December 4, 2018

Glen De Vos
Senior Vice President, Chief Technology Officer and
President, Mobility and Services Group

APTIV

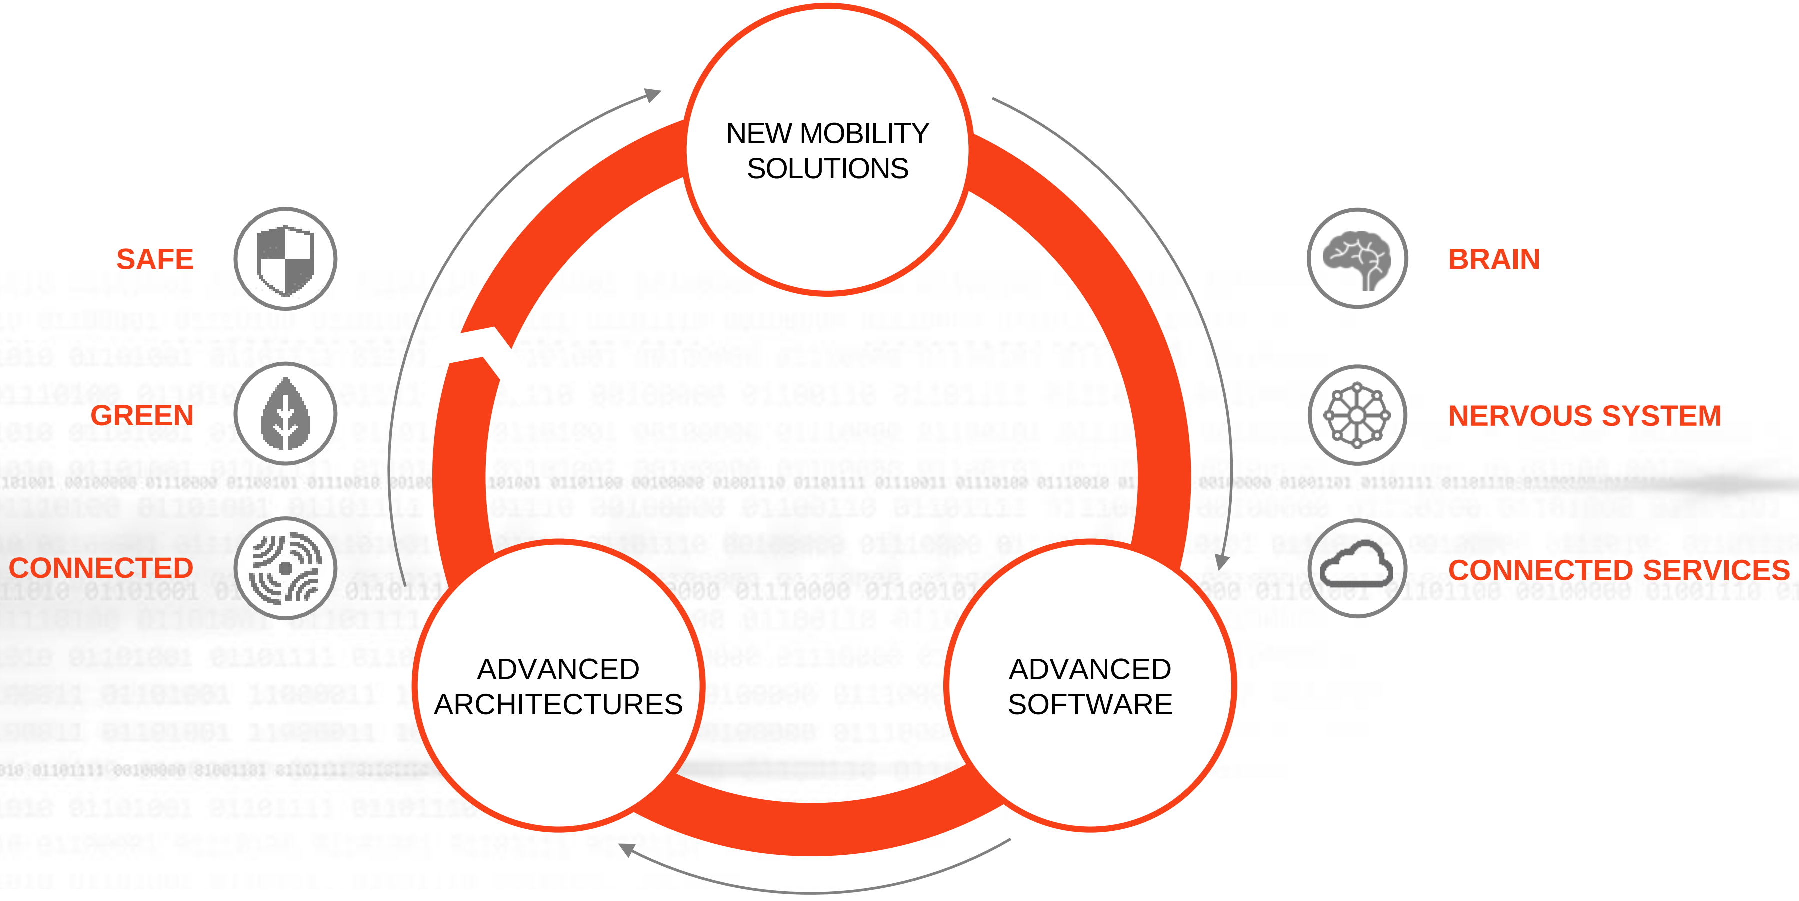
Raymond James Technology Conference

Forward Looking Statements

This presentation, as well as other statements made by Aptiv PLC (the "Company"), contain forward-looking statements that reflect, when made, the Company's current views with respect to current events, certain investments and acquisitions and financial performance. Such forward-looking statements are subject to many risks, uncertainties and factors relating to the Company's operations and business environment, which may cause the actual results of the Company to be materially different from any future results. All statements that address future operating, financial or business performance or the Company's strategies or expectations are forward-looking statements. Factors that could cause actual results to differ materially from these forward-looking statements are discussed under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" in the Company's filings with the Securities and Exchange Commission. New risks and uncertainties arise from time to time, and it is impossible for us to predict these events or how they may affect the Company. It should be remembered that the price of the ordinary shares and any income from them can go down as well as up. The Company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events and/or otherwise, except as may be required by law.

Aptiv Enabling The Future Of Mobility

UNIQUELY POSITIONED WITH THE BRAIN AND NERVOUS SYSTEM OF THE VEHICLE TO DEVELOP SAFER, GREENER AND MORE CONNECTED SOLUTIONS



Software & Computing Requirements Expanding

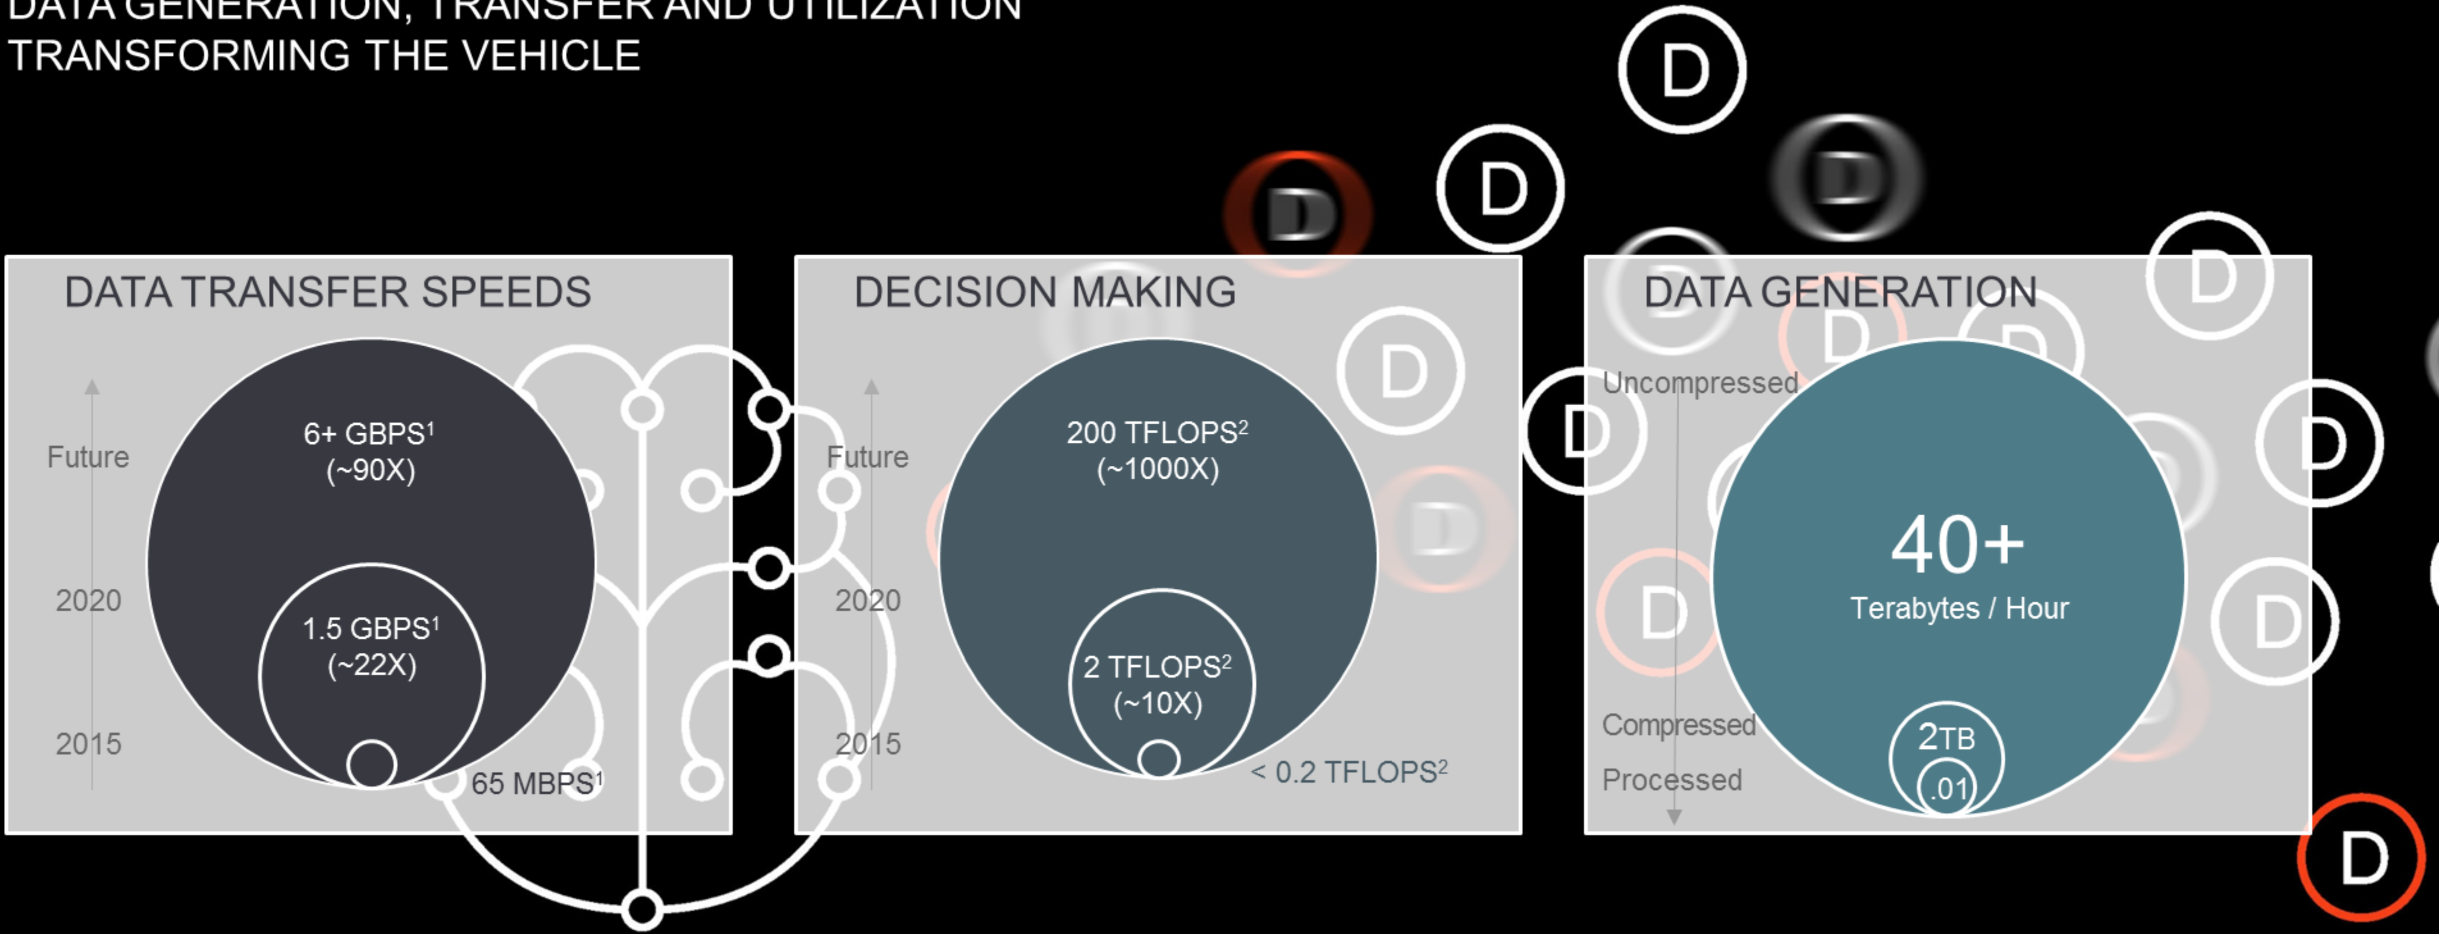
FEATURES DEMANDING STEP FUNCTION IMPROVEMENTS IN SOFTWARE COMPUTING

ENHANCED VEHICLE CAPABILITIES	TODAY (SOFTWARE COMPLEXITY / COMPUTING POWER)	TOMORROW (SOFTWARE COMPLEXITY / COMPUTING POWER)
SAFETY Increased safety and control functionality	AUTOMATIC EMERGENCY BRAKING	LEVEL 4/5 AUTONOMOUS DRIVING
CONNECTIVITY Increased communications protocols	SMART PHONE INTEGRATION	VEHICLE-2-EVERYTHING
INFOTAINMENT AND UX Increased capability and customization	RECONFIGURABLE CLUSTERS	8+ DISPLAYS, 40X IMPROVED GRAPHICS
ANALYTICS Access data to monitor vehicle performance	VEHICLE HEALTH MONITORING	DATA SERVICES

APTIV

Architecture Capabilities Increasing

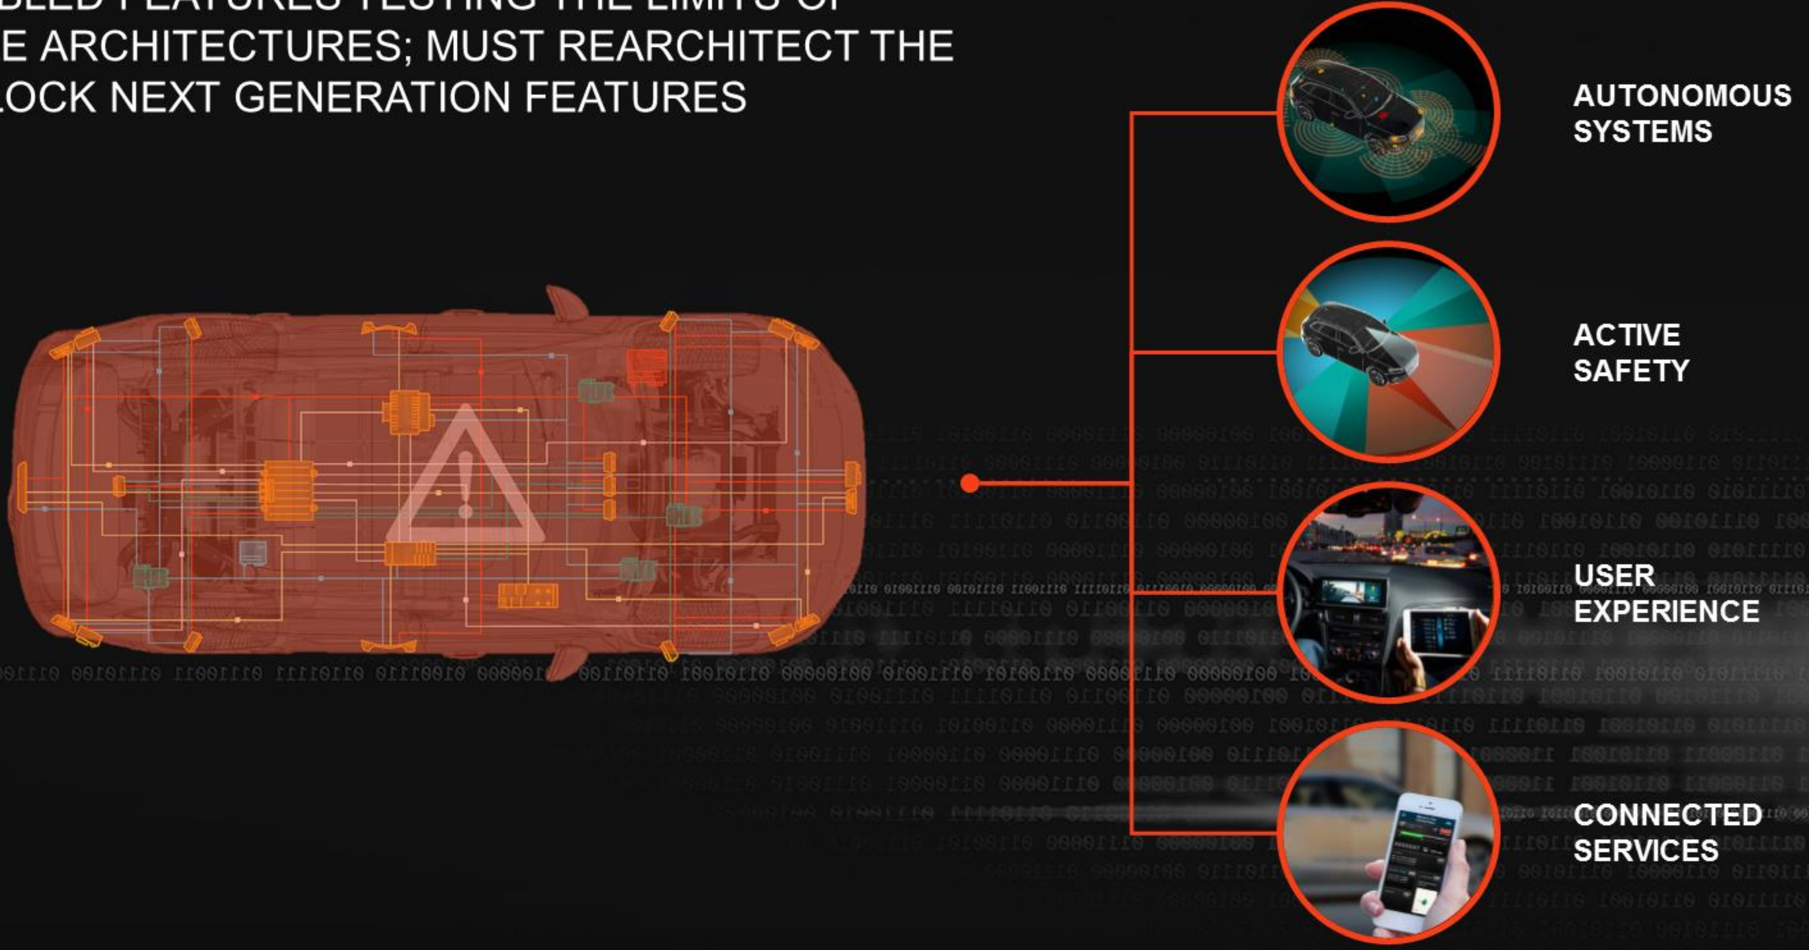
DATA GENERATION, TRANSFER AND UTILIZATION
TRANSFORMING THE VEHICLE



APTIV

Increasing Complexity Reaching It's Limits

SOFTWARE ENABLED FEATURES TESTING THE LIMITS OF TODAY'S VEHICLE ARCHITECTURES; MUST REARCHITECT THE VEHICLE TO UNLOCK NEXT GENERATION FEATURES



APTIV

Addressing Mobility's Toughest Challenges

PROVIDING END-TO-END SOLUTIONS THAT ENABLE THE COMMERCIALIZATION OF NEW MOBILITY

Full Stack System Solutions Provider

APTIV A LEADER IN DATA AND SOFTWARE, ADVANCED VEHICLE ARCHITECTURES, CONNECTIVITY AND COMPLEX SYSTEMS INTEGRATION

CORE APTIV STRENGTHS

Delivering automotive grade solutions

DATA AND SOFTWARE

Over 6,000 engineers focused on software and advanced algorithm development

SENSING AND COMPUTE

Leader in sensing / sensor fusion, and high speed computing platforms

SIGNAL AND POWER DISTRIBUTION

Managing increasing network complexity while optimizing cost and performance

CONNECTIVITY

Capabilities in edge computing, OTA, cyber-security, and data monetization

VEHICLE SOLUTION STACK / APTIV VALUE ADD

Area	Vehicle Solution Stack	Aptiv Value Add
ADVANCED SOFTWARE	CLOUD	• Data acquisition, edge processing and analytics • Vehicle telematics and OTA software
	APPLICATION LAYER	• Sensing algorithms and sensor fusion • Policy, planning and actuation for ADAS / AVs • Gesture control, HMI and User Experience software
	MIDDLEWARE OPERATING SYSTEM HARDWARE ABSTRACTION	• Systems integrator for complex software and hardware • Functional Safety design, testing and certification • Integrating hardened OS / Hypervisors
ADVANCED ARCHITECTURES	COMPUTE	• Automotive grade domain controllers • High performance central compute
	DATA & POWER DISTRIBUTION	• High speed / power and networking; global scale • Systems capabilities addressing exponential complexity growth
	COMPONENTS	• Perception systems for Active Safety / Automated driving • User experience hardware and in-cabin sensing • Distributed ECUs and body controllers

Summary

VEHICLE BECOMING A SOFTWARE DEFINED PLATFORM

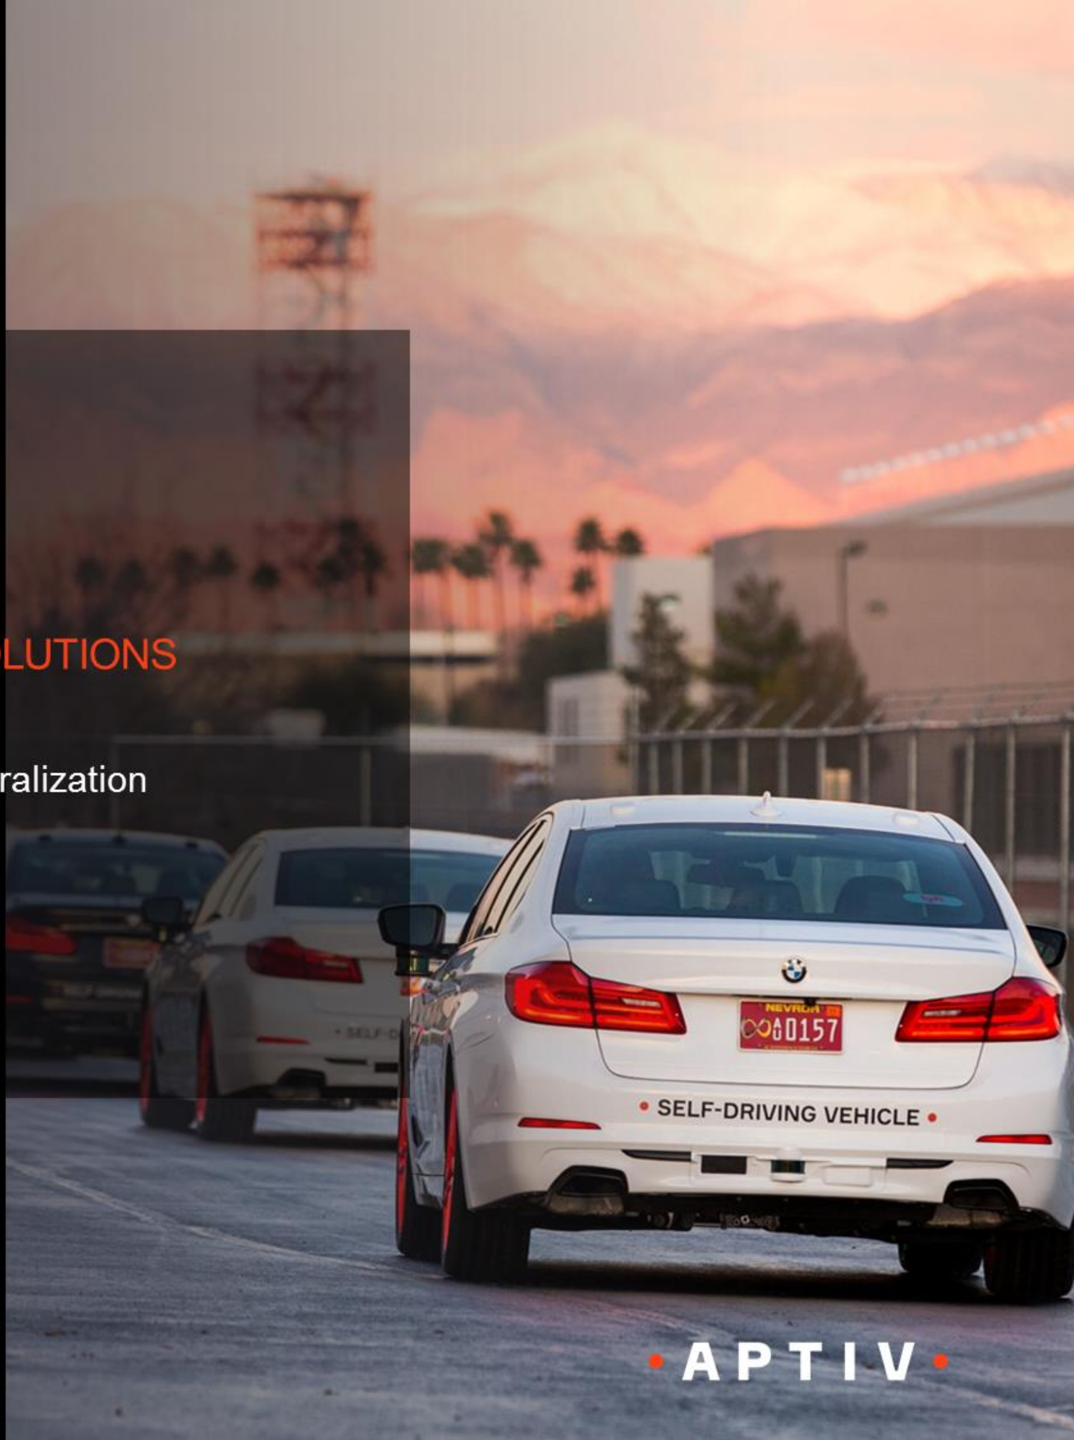
- Software driving value; increasingly enabling features and functionality
- Advanced hardware required to support increased data and compute needs

ADVANCED ARCHITECTURES REQUIRED TO ENABLE MOBILITY SOLUTIONS

- Optimizing system architecture for complexity, size, weight and cost
- Applying high performance central compute capabilities to deliver domain centralization

APTIV UNIQUELY POSITIONED TO UNLOCK VALUE

- Only provider of the integrated brain and nervous system of the vehicle
- Increasing vehicle complexity favors full stack solutions providers



APTIV

Glen W. De Vos

Senior Vice President and Chief Technology Officer and President, Mobility and Services Group

Glen De Vos is senior vice president and chief technology officer of Aptiv, a position he has held since March 2017.

In this role, Mr. De Vos is responsible for leading the company’s innovation strategies and development of advanced technologies. As CTO, Mr. De Vos leads the global engineering organization, which includes more than 16,000 technologists located in 14 major technical centers across the globe.

Previously, Mr. De Vos served as vice president, Software & Services, Delphi Electronics & Safety (E&S), located at the company’s Silicon Valley Lab in Mountain View, CA. He began his Delphi career with E&S in 1992 and following several progressive engineering and managerial roles in infotainment and user experience, was named vice president, Global Engineering for Delphi E&S in 2012.

Mr. De Vos has extensive business, engineering, and manufacturing experience including time at General Electric and ITT Power Systems.

Mr. De Vos received a Bachelor of Science in Engineering from Calvin College in 1982, a Bachelor of Science in Mechanical Engineering from the University of Michigan in 1983, and a Master of Business Administration from Ball State University in 1994.
