Baird 2016 Global Industrial Conference

Jeffrey J. Owens

Chief Technology Officer and Executive Vice President

Joseph R. Massaro

Chief Financial Officer and Senior Vice President

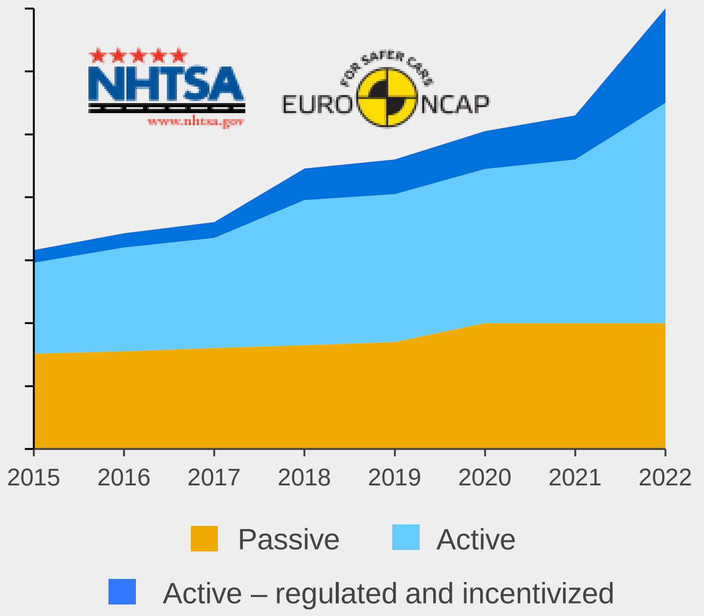
DELPHI

Innovation for the Real World

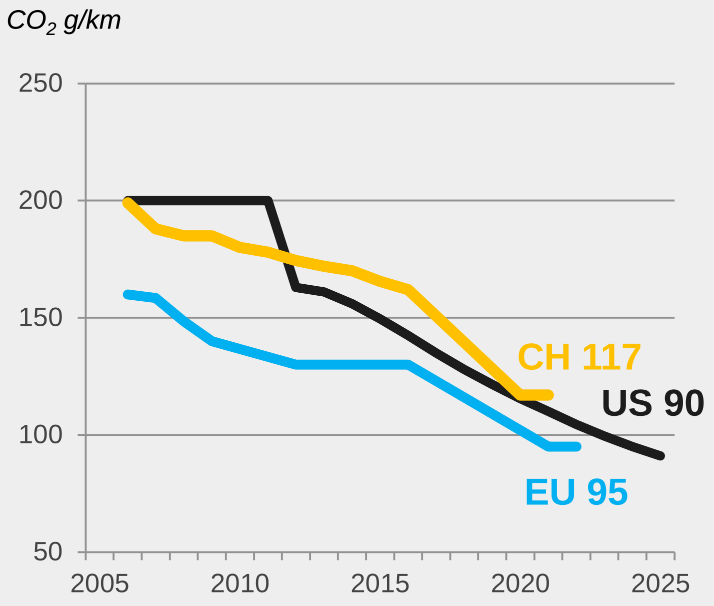
Accelerating macro trends create new challenges

Regulated Active Safety growing with increased consumer awareness	Best-value electrification required to meet step function change in regulation	IoT driving connected car to new levels & creating new challenges

More **safe**



More **green**



More **connected**

Connectivity

- Validating 5.9GHz standard for Dedicated Short-Range Radio Communication (DSRC)

Cybersecurity

- Auto Information Sharing and Analysis Center (ISAC) developing process to share & fix vulnerabilities

Big Data

- OEMs enabled to collect but not personalize information

Safe, green and connected convergence creates market opportunities

Complete system technology integrator

Macro trends are creating OEM challenges and consumer demand

Flexible system designs

Best-value innovations

Vehicle integration expertise

Agile software solutions

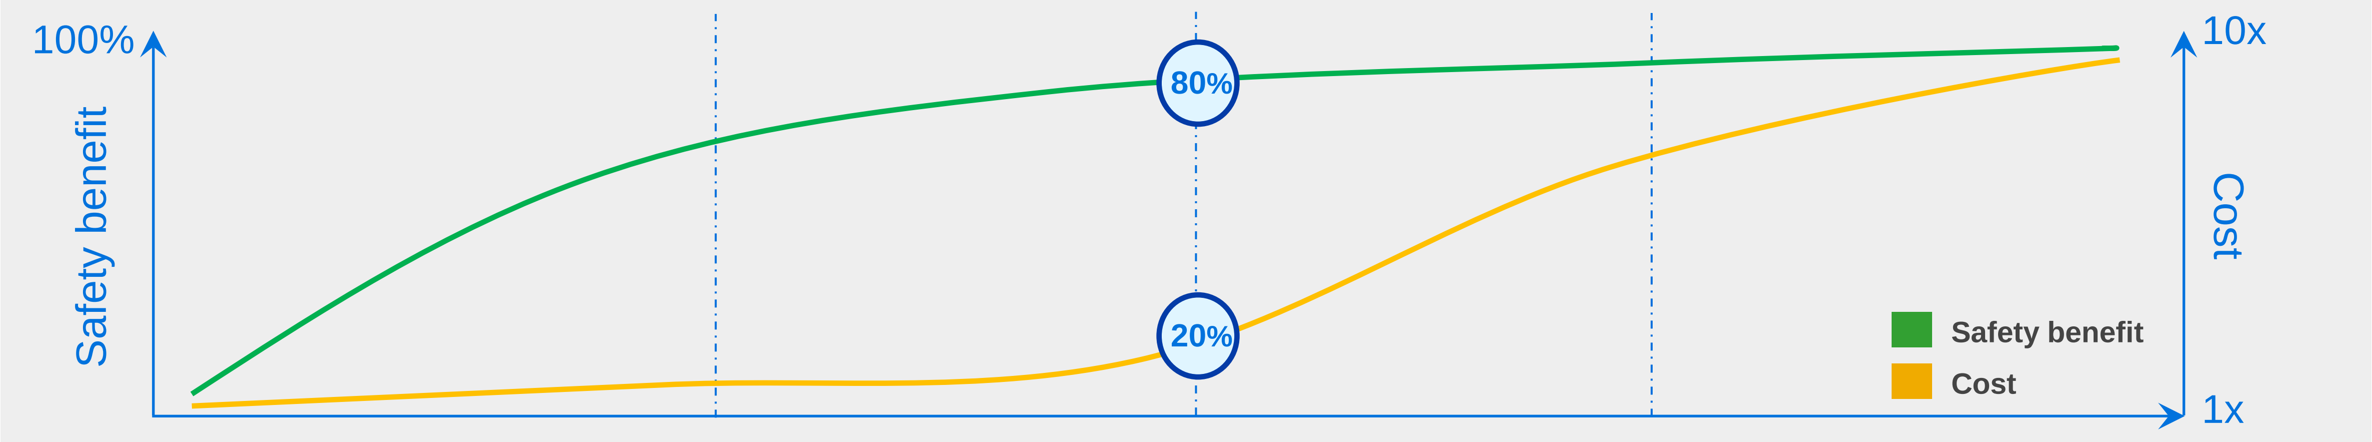
Solving customer problems

Intelligent Driving

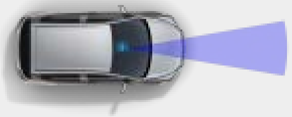
Delphi responding to opportunities with end-to-end solutions

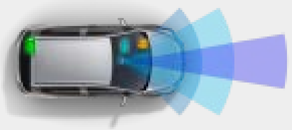
DELPHI

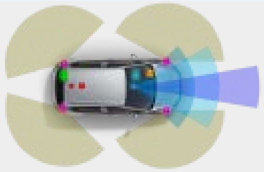
Active safety as the foundation of automated driving

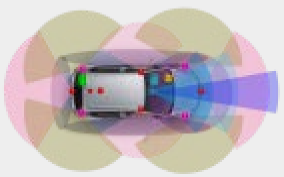


Level 0 No automation	Level 1 Function-specific automation	Level 2 Combined function automation	Level 3 Limited self-driving automation	Level 4/5 Full self-driving automation
Driver is in complete control of vehicle	Automation of one or more control functions	Automation of two or more control functions	Driver able to cede full control of all safety-critical functions under certain conditions	Driver able to cede full control of all safety-critical functions for an entire trip









Level 2 automation delivers 80% of the safety benefit for 20% of the cost

Delphi enables industry technology trends

Advanced computing platforms

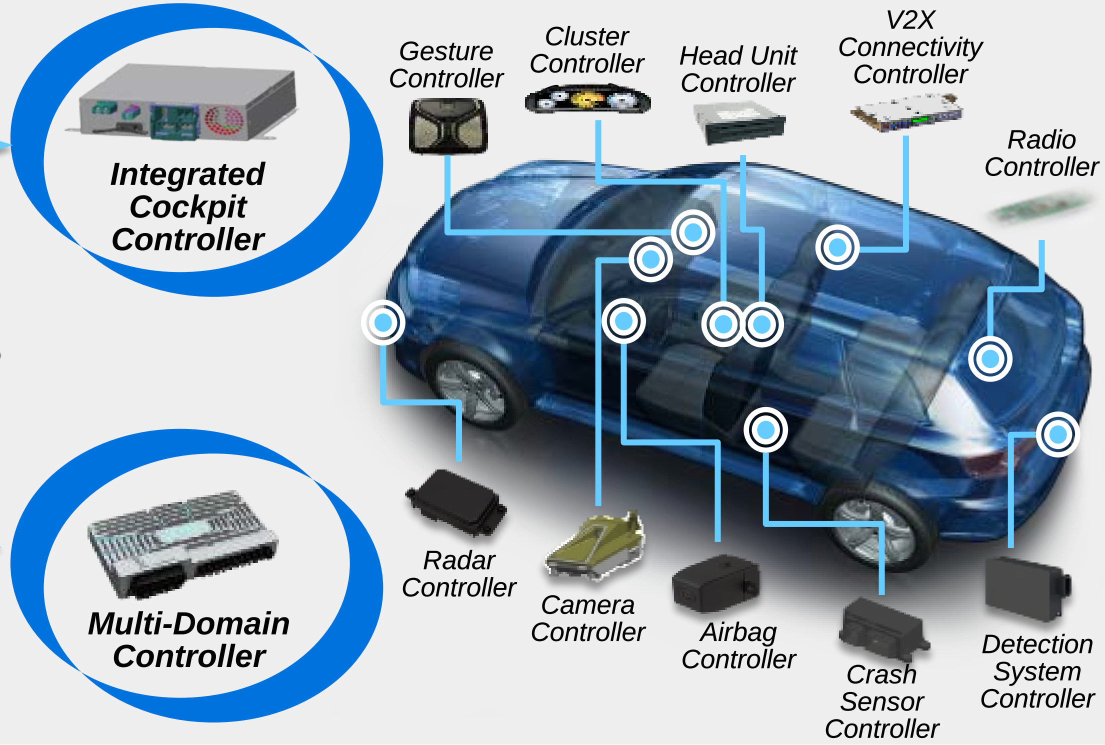
Multi-Domain Controller (MDC) Integrated Cockpit Controller (ICC)

- Scalable software platform
- Reduced architecture complexity
- Faster communication/interconnection
- Multi-processor configurations

Production launch in 2017 & 2018

Active Safety & Infotainment functionality

Centralized sensor fusion and user experience control



Future system software optimization and upgradeability

DELPHI

Delphi and Mobileye automated driving equation

Mobileye

- EyeQ® 4/5 System on a Chip (SOC)
- Road Experience Management (REM™) mapping system
- Policy and Reinforcement Learning system

+

Delphi

- Automated Driving software algorithms from Ottomatika
- Multi-Domain Controller
- Forward-looking and full-surround Radar and LiDAR sensors

=

Central Sensing Localization and Planning (CSLP) Platform

Unmatched, most cost-effective Automated Driving solution

Production Ready for 2019

Offering a turn-key fully autonomous driving system to OEMs by 2019

Creating intelligent electrification with Delphi's 48V solution

48V electrification

Optimized electrical architecture is the foundation

The Delphi solution

Builds on electrical solution competency

- Includes electrical architecture, power electronics and management

Designs a custom vehicle architecture

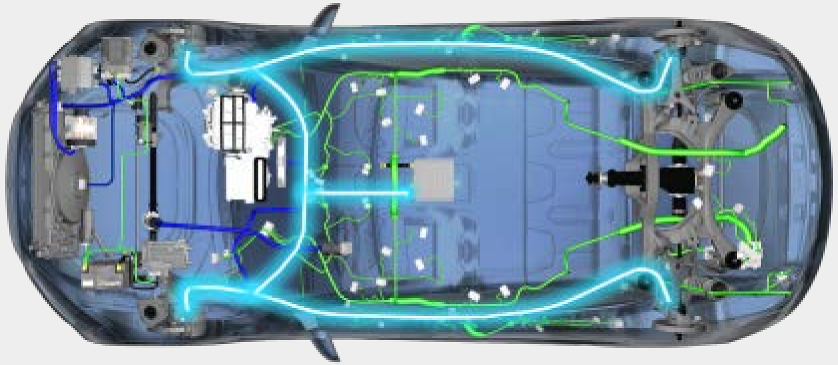
- Maximizes the use of power, moving high load components to 48V & incorporating all desired comfort, convenience & functional features

Incorporates Delphi's suite of products

Enabling intelligent electrification

Improved functionality, better performance, greater efficiency

Software, software, software…



Optimized electrification architecture

Fuel injection systems	DC/DC converter
Engine control	Connected Infotainment
Valve Train & engine sensors	Active Safety

48V solution solving customers challenges

DELPHI

Delphi investment thesis

Portfolio management

- Portfolio aligned to megatrends
- Increasing exposure to key technologies
- Global scale and reach for key markets

Organic growth acceleration

- Targeted market penetration
- Well positioned for key customers in region
- Track record of growing >2x the market

Margin expansion

- Optimized cost structure
- Enterprise operating system advancements
- Flexible global footprint adaptation

Capital allocation

- Balanced, predictable cash deployment
- Laser-focused on shareholder return
- Essential, accretive portfolio enhancements

Delivering value is at the core of what we do

DELPHI

Making it possible.

Innovation for the Real World
