CES 2024: APTIV INVESTOR EVENT

APTIV

Forward Looking Statements

This presentation, as well as other statements made by Aptiv PLC (the "Company"), contain forward-looking statements that reflect, when made, the Company's current views with respect to current events, certain investments and acquisitions and financial performance. Such forward-looking statements are subject to many risks, uncertainties and factors relating to the Company's operations and business environment, which may cause the actual results of the Company to be materially different from any future results. All statements that address future operating, financial or business performance or the Company's strategies or expectations are forward-looking statements. Factors that could cause actual results to differ materially from these forward-looking statements include, but are not limited to, the following: global and regional economic conditions, including conditions affecting the credit market; global inflationary pressures; uncertainties posed by the COVID-19 pandemic and the difficulty in predicting its future course and its impact on the global economy and the Company's future operations; uncertainties created by the conflict between Ukraine and Russia, and its impacts to the European and global economies and our operations in each country; fluctuations in interest rates and foreign currency exchange rates; the cyclical nature of global automotive sales and production; the potential disruptions in the supply of and changes in the competitive environment for raw material and other components integral to the Company's products, including the ongoing semiconductor supply shortage; the Company's ability to maintain contracts that are critical to its operations; potential changes to beneficial free trade laws and regulations, such as the United States-Mexico-Canada Agreement; changes to tax laws; the ability of the Company to integrate and realize the expected benefits of recent transactions; the ability of the Company to attract, motivate and/or retain key executives; the ability of the Company to avoid or continue to operate during a strike, or partial work stoppage or slow down by any of its unionized employees or those of its principal customers; and the ability of the Company to attract and retain customers. Additional factors are discussed under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" in the Company's filings with the Securities and Exchange Commission. New risks and uncertainties arise from time to time, and it is impossible for us to predict these events or how they may affect the Company. It should be remembered that the price of the ordinary shares and any income from them can go down as well as up. The Company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events and/or otherwise, except as may be required by law.

APTIV

Today's Discussion

Welcome Message

The Software-Defined Future

APTIV

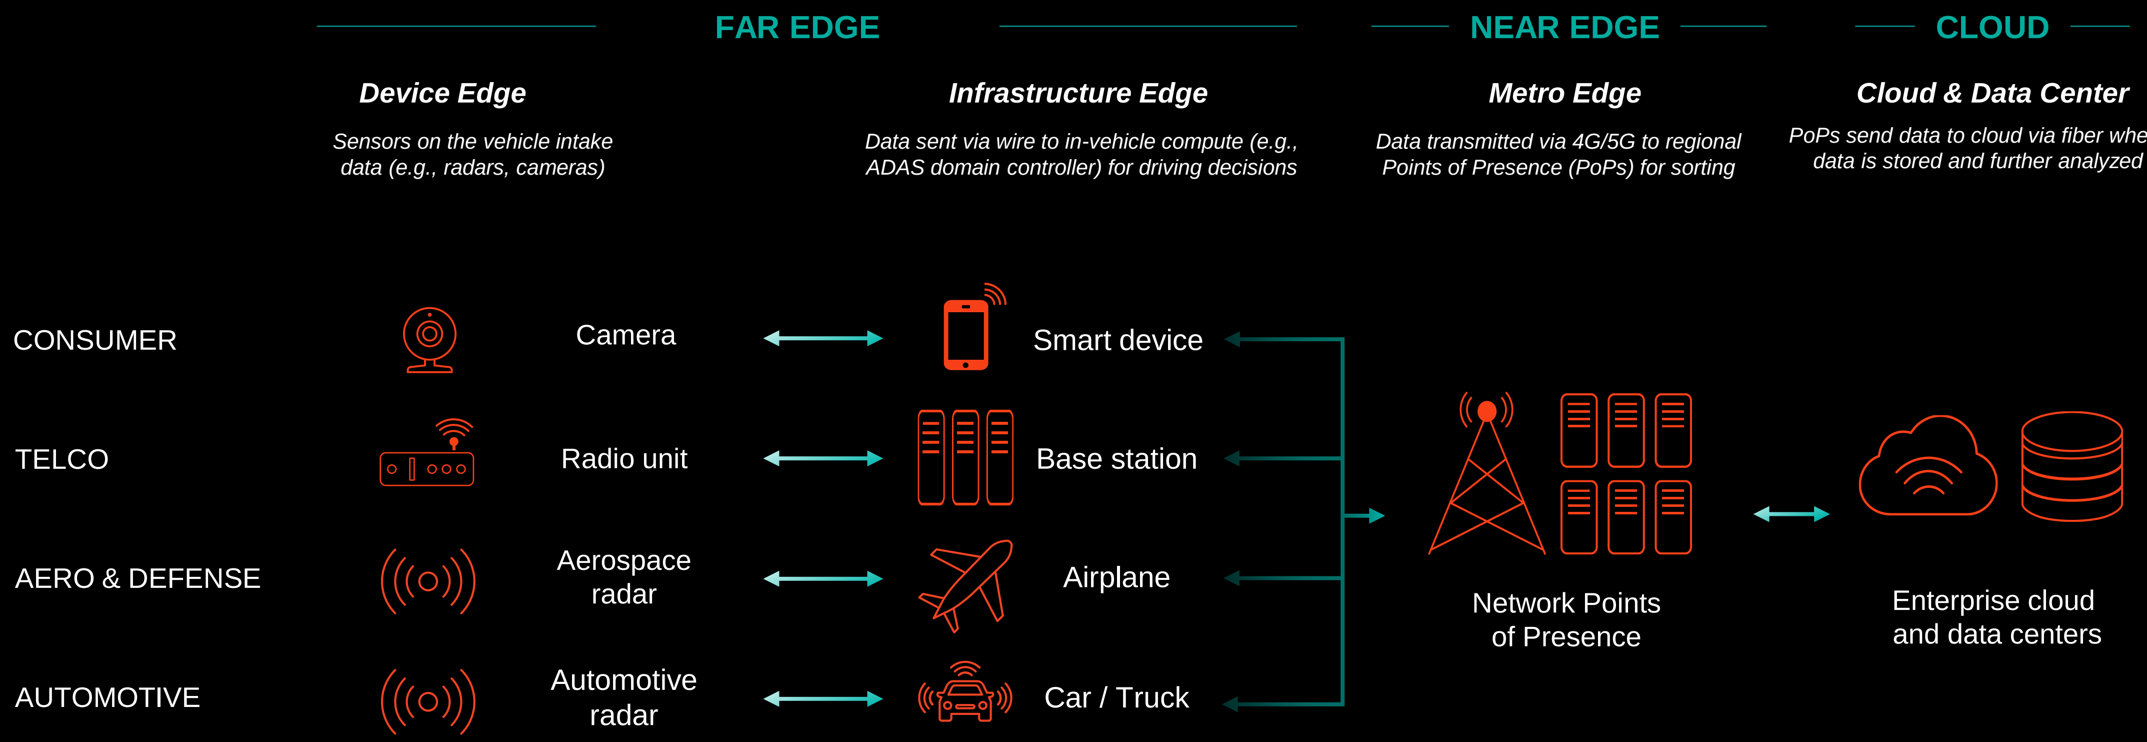
The Emerging Intelligent Edge

TRANSFORMATION ACROSS INDUSTRIES RESULTING IN NEW OPPORTUNITIES TO CREATE VALUE



DATA FLOW From the edge To the cloud

APTIV

Key Digital Transformation Challenges

SIMILAR CHALLENGES ACROSS INDUSTRIES REQUIRING A NEW INNOVATIVE SOLUTIONS

	COMPLEXITY	PERFORMANCE	AFFORDABILITY
SOFTWARE *Traditional Monolithic Architecture*	Significant software interdependencies Lack of standardization	Lengthy software lifecycle Mission-critical safety requirements	Fragmented lifecycle management Limited software resources
HARDWARE *Legacy Distributed Architecture*	Increasing demand for new features and functions Supported by additional power/signal requirements	High performance compute capabilities	Incremental mechatronic approach to features is unsustainable

APTIV

A Modern Architecture Solution

THREE KEY REQUIREMENTS ADDRESSING HW / SW CHALLENGES TO UNLOCK NEW BUSINESS MODELS

OPTIMIZED HARDWARE

THE RIGHT HARDWARE

CLOUD-NATIVE SOFTWARE

THE RIGHT SOFTWARE

EDGE-TO-CLOUD CONNECTIVITY

THE RIGHT TOOLCHAIN

Varying Levels of Maturity Across Industries

CONSUMER END MARKETS AT SCALE; DIGITAL TRANSFORMATION OF OTHER INDUSTRIES ACCELERATING

Modern Architecture Solution

OPTIMIZED HARDWARE | **CLOUD-NATIVE SOFTWARE** | **EDGE-TO-CLOUD CONNECTIVITY**

Consumer

All three architecture solutions are developed and deployed at scale

Telco

All three architecture solutions in production and the process of scaling up

A&D

Next-gen hardware in production

Automotive

In development

Aptiv + Wind River Addressing Those Needs

THE ONLY FULL SYSTEM SOLUTIONS PROVIDER WITH UNMATCHED EDGE-TO-CLOUD CAPABILITIES

CLOUD

- Cloud / Offboard Services
- DevOps

Edge-to-Cloud Connectivity

- Applications and Features
- Software Building Blocks
- Middleware/OS

Cloud-Native Software

EDGE

- Compute
- Interconnects
- Data & Power Distribution
- Sensors

Optimized Hardware

Automotive Industry Solutions

WNDRVR

Wind River Studio

Industry's first end-to-end, cloud-native DevOps platform enabling comprehensive software lifecycle management with cost- and time-efficient development and operation

APTIV

WNDRVR

Aptiv Containerized Application Software

Advanced, modular software across domains enabling features

Wind River Edge Software

On-vehicle software solutions which abstract SW from HW

APTIV

Aptiv Smart Vehicle Architecture™ Hardware

Next-gen architecture that lowers total cost of ownership while enabling feature-rich, highly automated vehicles over the life of a platform

Advanced Compute Systems

Established leadership in advanced compute across domains, including active safety and user experience

Optimized Electrification Solutions

Industry leader in optimized electrical architecture, including unique high voltage system-level technologies

Telco Ecosystem A Strong Precedent For Auto

UNLOCKING INNOVATION WITH CLOUD-NATIVE APPROACH FOR A WIDE RANGE OF ECOSYSTEM PLAYERS

	TELECOMMUNICATIONS		AUTOMOTIVE	
	Technology Drivers / IP Used	*Example Industry Players*	*Technology Drivers / IP Used*	*Example Industry Players*
Edge-to-Cloud Connectivity	WNDRVR Studio		WNDRVR Studio	
Cloud-Native Software	vRAN (Virtualized Radio Area Network) Supporting SW based functionality with open interfaces that is flexible and easily scalable VxWorks, Helix, Linux	SAMSUNG ERICSSON NOKIA	SDV (Software Defined Vehicle) Supporting SW based functionality with open interfaces that is flexible and easily scalable VxWorks, Helix, Linux	APTIV AUTO OEMs 3rd Party Software
Optimized Hardware	Distributed Network Distributed compute supporting mission critical applications, optimized for cost/latency Central Data Center, Regional Data Center, Edge Data Center	intel DELL Hewlett Packard Enterprise	HPC (High Performance Compute) Centralized, optimized compute platforms supporting mission critical applications OSP, CVC, PDC	APTIV AUTO OEMs 3rd Party Hardware

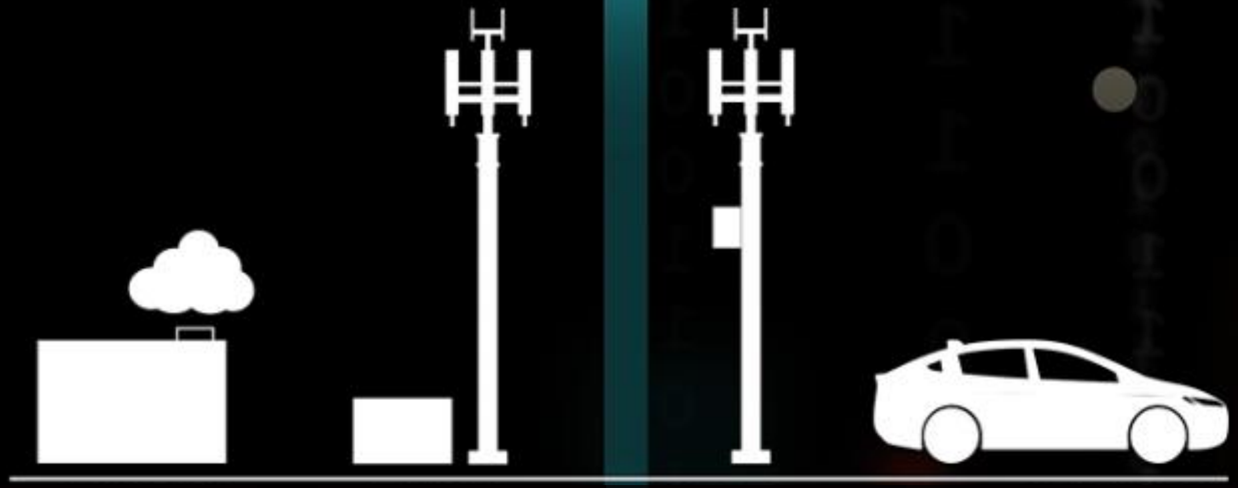
APTIV

Enabling Distributed Compute Across Industries

WIND RIVER STUDIO OPERATOR UNLOCKING ADVANCED, MULTI-CLOUD EDGE SITE USE CASE

Wind River solutions are enabling the virtualization of the edge network across multiple industries / verticals by moving to a cloud-native, container-based virtualized architecture with standardized interfaces.

This is enabling new offerings and business models through greater flexibility, faster delivery of services, greater scalability and improved cost efficiency

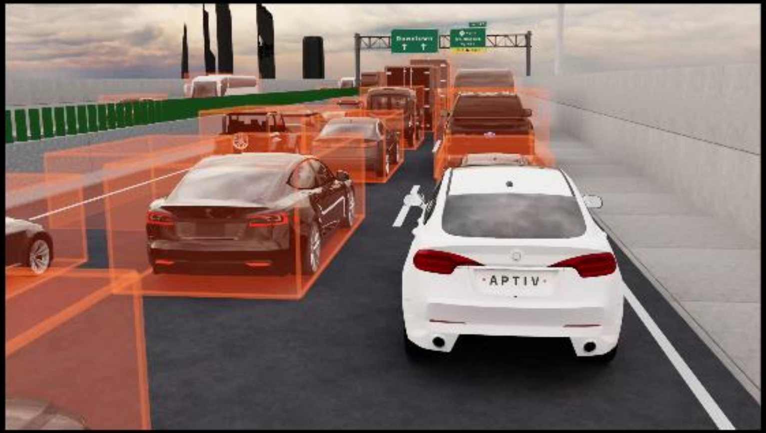


COMPUTE LOCATION	PUBLIC CLOUD (Central Data Center)	REGIONAL DATA CENTER	EDGE DATA CENTER	DEVICE EDGE
• Distance	0 – 25 km	25 – 100 km	0 – 25 km	N/A
• Latency	50+ msec	< 50 msec	< 20 msec	N/A
• Workload Source	Hyperscalar Hosted	Near Edge and Enterprise	Offboard / Far Edge	Device

Unlocking New Use Cases

FOR TODAY, 2030 AND BEYOND

C-V2X COMMUNICATION

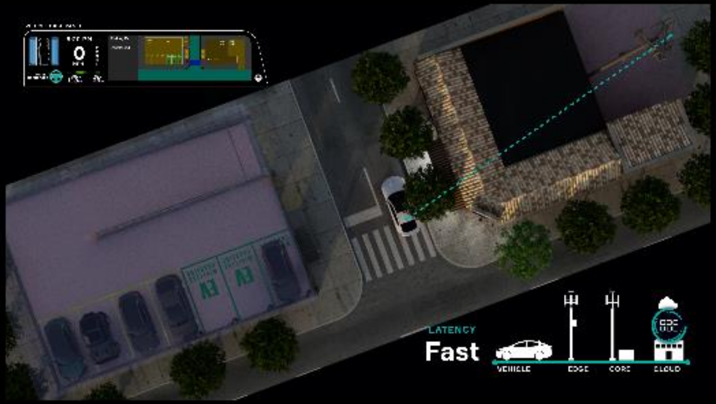


- Local Traffic & Hazard Warning
- VRU Collective Awareness
- Data Sharing of Dynamic Objects

OFFBOARD COMPUTE

- Content Streaming / Web Browsing
- Perception & Path Planning
- Secondary / Redundant Compute

PRIVATE 5G NETWORKS



- Localized / Point of Interest Content
- Point Of Sale Integration for Payment / Notification
- Differentiated Services (ex: Valet Parking)

While meeting the requirements for intelligent edge systems

RELIABILITY | SCALABILITY | SMALL FOOTPRINT | ULTRA-LOW LATENCY | OPEN | SECURE | UPDATEABLE

What You’ll See Today: Aptiv Technology Theater

FULL SYSTEM SOLUTIONS ON DISPLAY AT CES 2024

- Cloud / Offboard Services
- DevOps
- Applications and Features
- Software Building Blocks
- Middleware/OS
- Compute
- Interconnects
- Data & Power Distribution
- Sensors

1 **Wind River Studio:** development, deployment and operation in an automotive environment, to unlock greater innovation and lifecycle management

2 **Sustainable Architecture:** optimized software and hardware solutions for maximum flexibility, scalability and reuse

3 **Intelligent Perception:** enhancing situational awareness of the exterior and interior environment through software and AI/ML

4 **High Voltage Electrification:** up-integrated, automotive grade hardware supporting innovative high voltage solutions

5 **SVA Demonstrator:** power, data and compute solutions supporting feature rich, highly automated and electrified vehicles

APTIV

1. Wind River Studio

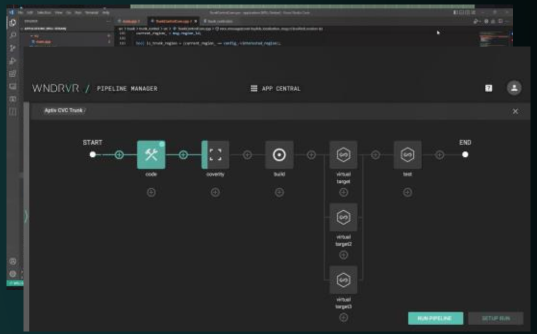
END-TO-END SOLUTION SPANNING ENTIRE DEVOPS CYCLE, COVERING BOTH VEHICLE AND CLOUD

WNDRVR Studio

Data and digital twin leveraged to improve software

DEVELOP

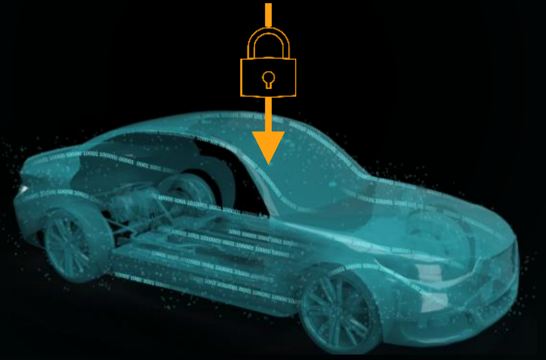
Fast and secure development and testing of software in the cloud



Open and extensible platform provides the scalability and collaboration of the cloud, while remaining fully agnostic between providers

DEPLOY

Seamless and secure deployment of containerized software



Wind River Edge on-vehicle software platform fully abstracts hardware from software for greater flexibility, scalability and reuse

OPERATE

Vehicle data sent to the cloud to build digital twin

Real-time analytics and insights from OS and application data improves performance and maintenance of assets deployed at the edge

Complete lifecycle management via a single pane of glass

APTIV

2. Sustainable Architecture

FLEXIBLE, OPEN PLATFORMS SUPPORT MAXIMUM SCALABILITY, REUSE AND SUPPLY CHAIN RESILIENCY

- Common, virtualized platform abstracting software from hardware for greater flexibility
- Flexibility on compute, which is expected to be over 1/3rd of OEM software-related spend by 2030
- Reduced hardware costs by allowing mixed-critical workloads to run on the same compute
- Guaranteed system performance by ensuring the desired actions completed as required
- Fully integrated with cloud-based DevOps platform enabling software lifecycle management

Applications and Features	L2+ Hwy, L3 Hwy, L3 urban, parking, etc.	Interior sensing, video call, HUD, navigation, etc.	Climate control, power lift gate, ambient lights, etc.	Battery management, E-drive customization, etc.
Software 'Building Blocks'	Mapping, Localization, radar perception, vision perception, sensor fusion, etc.	Image processing, sound processing, driver monitoring, etc.	Sound generator, power distribution, sensor processing, etc.	Battery state algorithm, chassis sensor fusion, actuator management, etc.
Middleware/OS	Container orchestration, RTOS, Hypervisor, AUTOSAR, Communication, Networking, etc.			
	Software fully abstracted from underlying compute / hardware			
Compute	Domain controllers and high-performance compute			

FLEXIBILITY / SCALABILITY

APTIV

3. Intelligent Perception Leveraging AI/ML

ENHANCED SITUATIONAL AWARENESS ENABLING SMARTER, MORE INTEGRATED APPLICATIONS

Software Solutions

Exterior Radar Tracking & Fusion

AI/ML Enhanced Environmental Model

Driver / Cabin Monitoring

ADAS / Cross Domain Applications

Hardware Solutions

Forward Facing Camera
StradVision Based

Driver Monitoring System

Radar + Camera Parking Sensors

Corner Radar

Forward Facing Radar

INTELLIGENT PERCEPTION PROVIDES THE FOUNDATION FOR MUCH OF THE CUSTOMER BENEFITS CREATED BY **APTIV'S GEN 6 ADAS PLATFORM**

Offboard Services	• Simulation & testing with real-world variables
DevOps	• Fully integrated edge-to-cloud platform & SDKs
Applications and Features	• L0-L2+ Urban, L0-L3 Highway, automated parking • Robust containerized ADAS feature stack
Software Building Blocks	• Market leading sensor fusion with AI/ML • Highest availability in all weather / lighting
Middleware/OS	• Best-in-class middleware with serverization • Only safety certified RTOS supporting containers
Compute	• Radar inherently compute efficient • SoC agnostic approach
Sensors	• Unmatched radar performance • Flexible vision provider • 15+ yrs camera industrialization experience

APTIV

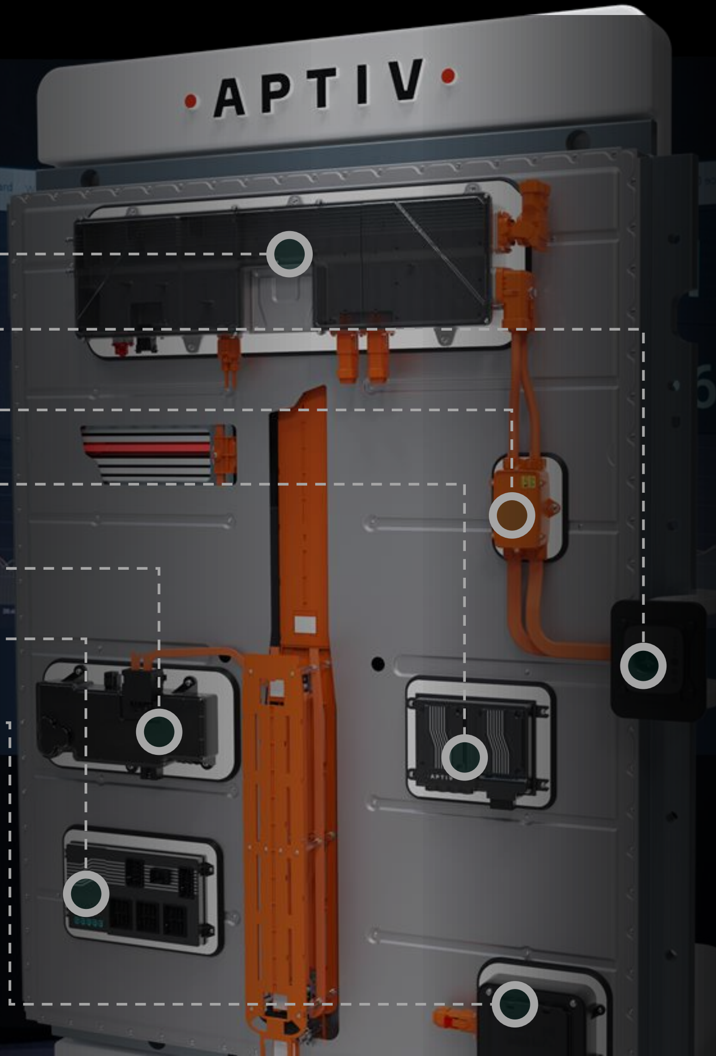
4. High Voltage Electrification

APPLYING SOFTWARE AND COMPUTE CAPABILITIES TO ENHANCE EV PERFORMANCE AND FUNCTIONALITY

Solutions On Display

Battery Management System (BMS)
Containerized BMS SW supported by Wind River on the CVC

- High Voltage Power Module
- NACS Inlet
- AC/DC Splice Box
- Central Vehicle Controller (CVC)
- Low Voltage Power Module
- Power Data Center (PDC)
- 120V Bi-Directional Power



MORE ACCURATE STATE ESTIMATION / METRICS
from higher fidelity information on battery state

IMPROVED BATTERY SAFETY
with early issue identification, leading to fewer incidents

FASTER CHARGING SPEEDS
without additional battery degradation

REDUCED BATTERY DEGRADATION
to increase range or enable reduced pack size, while increasing cycle life to reduce warranty costs

UP-INTEGRATION REDUCING COST & COMPLEXITY
as functions consolidated into fewer devices

HIGHLY EFFICIENT POWER DISTRIBUTION
Easier packaging, routing and thermal management

5. Smart Vehicle Architecture Demonstrator

OPTIMIZED HARDWARE ARCHITECTURE ADDRESSING THE NEEDS OF THE SOFTWARE DEFINED VEHICLE

Solutions On Display

- Central Vehicle Controller
- Open Server Platform (AD/UX)
- Zone Controllers
- Dock & Lock™ Connection System
- Automatable Power & Data Backbone
- Integrated Power Electronics
- High Voltage Modular Busbar Distribution
- High Voltage Chargers & Inlets
- High Voltage Connectors
- Radars and Cameras

KG

REDUCED WEIGHT & MASS
from eliminated component overhead

EASIER TO ASSEMBLE
for lower labor and factory floor usage

FEWER COMPONENT SKUs
and lower supply chain complexity

ENABLES POST-SOP UPGRADES
via Dock & Lock™ or Cartridges / Blades

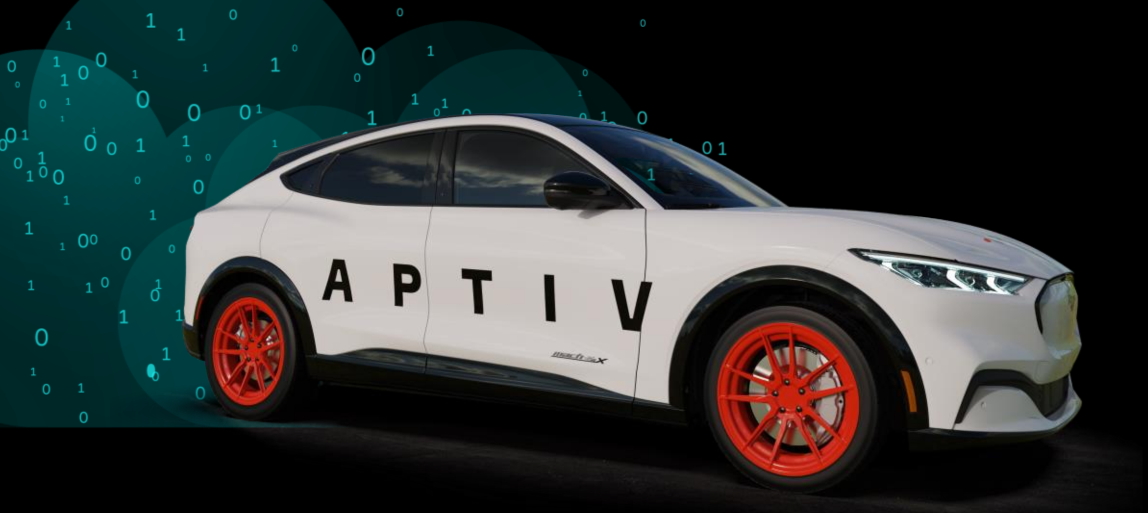
IMPROVED BEV PERF / COST
with faster charging and better range

REDUCED REPAIR COST
as compute no longer in crumple zones

APTIV

Demonstration Vehicles

INTEGRATING PRODUCTIZED OFFERINGS INTO FUNCTIONAL VEHICLES VALIDATES SYSTEM PERFORMANCE



SOFTWARE-DEFINED VEHICLE DEMONSTRATOR

- Leveraging Wind River Studio for diagnostics and digital feedback loop

---

- SVA™ supporting service-based approach with Wind River Edge
- OCI compliant, containerized applications across all domains
- Integrated Gen 6 ADAS offerings: Urban L2+, Perception with AI/ML, etc
- Integrated User Experience offerings including driver / cabin monitoring

---

- Key SVA™ offerings supporting an embedded, optimized approach

Edge-to-Cloud Connectivity

Cloud-Native Software

Optimized Hardware

HIGH VOLTAGE DEMONSTRATOR

- Telemetry data feedback loop supporting enhancements

- Propulsion and charging optimization via innovative BMS software
- BMS software containerized and fully abstracted from hardware

---

- Up-integration of key components supporting hardware optimization
- Fully functional 800V electric vehicle demonstrating key Aptiv offerings
- Extensive application of HV/LV connectors, HellermannTyton and IAS

Summary

TRANSITION TO SOFTWARE-DEFINED FUTURE

Multiple industries recognizing the benefits of software-defined, intelligent edge solutions

WIND RIVER DRIVING CLOUD-NATIVE TRANSITION

Wind River Software Platform and Wind River Studio are enabling telecom and A&D customers to disaggregate hardware from software, reduce cost and accelerate time to market

MODERNIZATION OF SOFTWARE ARCHITECTURE IN AUTOMOTIVE

Transition to the fully electrified, software-defined vehicle requires a modernized approach to software development, deployment and operations

APTIV AND WIND RIVER ENABLING CLOUD-NATIVE VEHICLE

Aptiv and Wind River are best positioned to provide full system solutions that lower costs, enable new revenue models and provide increased flexibility and modularity to our customers

APTIV
