Safe Harbor statement under the Private Securities Litigation Reform Act of 1995

This presentation contains “forward-looking statements,” as defined in the Private Securities Litigation Reform Act of 1995. These statements, which express management’s current views concerning future events, trends, contingencies or results, appear at various places in this presentation and use words like “anticipate,” “assume,” “believe,” “continue,” “estimate,” “expect,” “forecast,” “future,” “intend,” “plan,” “potential,” “predict,” “project,” “strategy,” “target” and similar terms, and future or conditional tense verbs like “could,” “may,” “might,” “should,” “will” and “would.” For example, management may use forward-looking statements when addressing topics such as: the outcome of contingencies; future actions by regulators; changes in the Company’s business strategies and methods of generating revenue; the development and performance of the Company’s services and products; the expected impact of acquisitions and dispositions; the Company’s effective tax rates; and the Company’s cost structure, dividend policy, cash flows or liquidity.

Forward-looking statements are subject to inherent risks and uncertainties. Factors that could cause actual results to differ materially from those expressed or implied in forward-looking statements include, among other things:

- worldwide economic, financial, political, and regulatory conditions (including slower GDP growth or recession, instability in the banking sector and inflation), and factors that contribute to uncertainty and volatility, natural and man-made disasters, civil unrest, public health crises (e.g., pandemics), geopolitical uncertainty (including military conflict), and conditions that may result from legislative, regulatory, trade and policy changes, including from the new US administration;
- the volatility and health of debt, equity, commodities, energy and automotive markets, including credit quality and spreads, the level of liquidity and future debt issuances, demand for investment products that track indices and assessments and trading volumes of certain exchange traded derivatives;
- the demand and market for credit ratings in and across the sectors and geographies where the Company operates;
- the Company's ability to maintain adequate physical, technical and administrative safeguards to protect the security of confidential information and data, and the potential for a system or network disruption that results in regulatory penalties and remedial costs or improper disclosure of confidential information or data;
- the outcome of litigation, government and regulatory proceedings, investigations and inquiries;
- concerns in the marketplace affecting the Company’s credibility or otherwise affecting market perceptions of the integrity or utility of independent credit ratings, benchmarks, indices and other services;
- the level of merger and acquisition activity in the United States and abroad;
- the level of the Company’s future cash flows and capital investments;
- the effect of competitive products (including those incorporating generative artificial intelligence ("AI")) and pricing, including the level of success of new product developments and global expansion;
- the impact of customer cost-cutting pressures;
- a decline in the demand for our products and services by our customers and other market participants;
- our ability to develop new products or technologies, to integrate our products with new technologies (e.g., AI), or to compete with new products or technologies offered by new or existing competitors;
- our ability to attract, incentivize and retain key employees, especially in a competitive business environment;
- our ability to successfully navigate key organizational changes, including among our executive leadership;
- the Company’s exposure to potential criminal sanctions or civil penalties for noncompliance with foreign and U.S. laws and regulations that are applicable in the jurisdictions in which it operates, including sanctions laws relating to countries such as Iran, Russia and Venezuela, anti-corruption laws such as the U.S. Foreign Corrupt Practices Act and the U.K. Bribery Act of 2010, and local laws prohibiting corrupt payments to government officials, as well as import and export restrictions;
- the continuously evolving regulatory environment in Europe, the United States and elsewhere around the globe affecting each of our businesses and the products they offer, and our compliance therewith;
- the Company’s ability to make acquisitions and dispositions and successfully integrate the businesses we acquire;
- consolidation of the Company’s customers, suppliers or competitors;
- the introduction of competing products or technologies by other companies;
- the ability of the Company, and its third-party service providers, to maintain adequate physical and technological infrastructure;
- the Company’s ability to successfully recover from a disaster or other business continuity problem, such as an earthquake, hurricane, flood, civil unrest, protests, military conflict, terrorist attack, outbreak of pandemic or contagious diseases, security breach, cyber attack, data breach, power loss, telecommunications failure or other natural or man-made event;
- the impact on the Company’s revenue and net income caused by fluctuations in foreign currency exchange rates; and
- the impact of changes in applicable tax or accounting requirements on the Company.

The factors noted above are not exhaustive. The Company and its subsidiaries operate in a dynamic business environment in which new risks emerge frequently. Accordingly, the Company cautions readers not to place undue reliance on any forward-looking statements, which speak only as of the dates on which they are made. The Company undertakes no obligation to update or revise any forward-looking statement to reflect events or circumstances arising after the date on which it is made, except as required by applicable law. Further information about the Company’s businesses, including information about factors that could materially affect its results of operations and financial condition, is contained in the Company’s filings with the SEC, including Item 1A, Risk Factors in our most recently filed Annual Report on Form 10-K.

Comparison of adjusted information to U.S. GAAP information

This presentation includes Company financials on an as-reported basis. The Company also refers to and presents certain additional non-GAAP financial measures, within the meaning of Regulation G under the Securities Exchange Act of 1934. These measures are: adjusted operating profit and margin; adjusted expenses; adjusted corporate unallocated expense; adjusted interest expense, net; adjusted effective tax rate; adjusted net income (less NCI); adjusted diluted EPS; free cash flow and adjusted free cash flow excluding certain items; EBITDA and adjusted EBITDA; adjusted gross debt; and adjusted deal-related amortization.

The Company is not able to provide reconciliations of certain forward-looking non-GAAP financial measures to comparable GAAP measures because certain items required for such reconciliations are outside of the Company's control and/or cannot be reasonably predicted without unreasonable effort.

The Company's non-GAAP measures include adjustments that reflect how management views our businesses. The Company believes these non-GAAP financial measures provide useful supplemental information that, in the case of non-GAAP financial measures other than free cash flow and adjusted free cash flow excluding certain items, enables investors to better compare the Company's performance across periods, and management also uses these measures internally to assess the operating performance of its business, to assess performance for employee compensation purposes and to decide how to allocate resources. The Company believes that the presentation of free cash flow and adjusted free cash flow excluding certain items allows investors to evaluate the cash generated from our underlying operations in a manner similar to the method used by management and that such measures are useful in evaluating the cash available to us to prepay debt, make strategic acquisitions and investments, and repurchase stock. However, investors should not consider any of these non-GAAP measures in isolation from, or as a substitute for, the financial information that the Company reports.

The Company's earnings releases, including its earnings release dated February 11, 2025, contain financial measures calculated in accordance with GAAP that correspond to the non-GAAP measures included in this presentation, and the earnings releases and this presentation contain reconciliations of such GAAP and non-GAAP measures. The Company's earnings releases and this presentation are available on the Company's website at https://investor.spglobal.com/quarterly-earnings.

EU regulation affecting investors in credit rating agencies

European Union Regulation 1060/2009 (as amended) applies to credit rating agencies (CRAs) registered in the European Union (“EU”) and therefore to the activities of S&P Global Ratings Europe Limited, an indirect wholly-owned subsidiary of S&P Global Inc., which is registered and regulated as a CRA with the European Securities and Markets Authority.

The United Kingdom’s Credit Rating Agencies (Amendment etc.) (EU Exit) Regulations 2019 applies to CRAs registered in the United Kingdom (“UK”) and therefore to the activities of S&P Global Ratings UK Limited, an indirect wholly-owned subsidiary of S&P Global Inc., which is registered and regulated as a CRA with the Financial Conduct Authority.

Any person obtaining direct or indirect ownership or control of 5% or more or 10% or more of the shares in S&P Global Inc. may (i) impact how S&P Global Ratings can conduct its CRA activities in the EU and the UK, and/or (ii) themselves become directly impacted by EU Regulation 1060/2009 (as amended) and the Credit Rating Agencies (Amendment etc.) (EU Exit) Regulations 2019.

Persons who have or expect to obtain such shareholdings in S&P Global Inc. should promptly contact S&P Global’s Investor Relations department (investor.relations@spglobal.com) for more information and should also obtain independent legal advice in such respect.

Key factors mitigating impact of currency changes

- SPGI revenue had a favorable impact primarily driven by the weakening of the USD against the GBP, with the most impact occurring within Ratings and Market Intelligence.

1. Net Impact includes revenue contributions from acquisitions in the current period less revenue from divestitures in all periods.
Note: Transactions only included in the table above if aggregate impact of all such transactions for a given division is greater than $500k in the period.
All financials other than revenue refer to non-GAAP adjusted metrics. Revenue refers to GAAP revenue.
