SPOTLIGHT ON MOODY'S ANALYTICS

September 2023

Disclaimer

Certain statements contained in this document are forward-looking statements and are based on future expectations, plans and prospects for Moody's business and operations that involve a number of risks and uncertainties. Such statements involve estimates, projections, goals, forecasts, assumptions and uncertainties that could cause actual results or outcomes to differ materially from those contemplated, expressed, projected, anticipated or implied in the forward-looking statements. Stockholders and investors are cautioned not to place undue reliance on these forward-looking statements. The forward-looking statements and other information in this document are made as of the date hereof, and Moody's undertakes no obligation (nor does it intend) to publicly supplement, update or revise such statements on a going-forward basis, whether as a result of subsequent developments, changed expectations or otherwise, except as required by applicable law or regulation. In connection with the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995, Moody's is identifying certain factors that could cause actual results to differ, perhaps materially, from those indicated by these forward-looking statements. These factors, risks and uncertainties include, but are not limited to: the impact of current economic conditions, including capital market disruptions, inflation and related monetary policy actions by governments in response to inflation, on worldwide credit markets and on economic activity, including on the volume of mergers and acquisitions, and their effects on the volume of debt and other securities issued in domestic and/or global capital markets; the uncertain effectiveness and possible collateral consequences of U.S. and foreign government initiatives and monetary policy to respond to the current economic climate, including instability of financial institutions, credit quality concerns, and other potential impacts of volatility in financial and credit markets; the global impact of the Russia/Ukraine military conflict on volatility in world financial markets, on general economic conditions and GDP in the U.S. and worldwide, on global relations and on the Company's own operations and personnel; other matters that could affect the volume of debt and other securities issued in domestic and/or global capital markets, including regulation, increased utilization of technologies that have the potential to intensify competition and accelerate disruption and disintermediation in the financial services industry, as well as the number of issuances of securities without ratings or securities which are rated or evaluated by non-traditional parties; the level of merger and acquisition activity in the U.S. and abroad; the uncertain effectiveness and possible collateral consequences of U.S. and foreign government actions affecting credit markets, international trade and economic policy, including those related to tariffs, tax agreements and trade barriers; the impact of MIS's withdrawal of its credit ratings on countries or entities within countries and of Moody's no longer conducting commercial operations in countries where political instability warrants such action; concerns in the marketplace affecting our credibility or otherwise affecting market perceptions of the integrity or utility of independent credit agency ratings; the introduction or development of competing products or technologies; pricing pressure from competitors and/or customers; the level of success of new product development and global expansion; the impact of regulation as an NRSRO, the potential for new U.S., state and local legislation and regulations; the potential for increased competition and regulation in the EU and other foreign jurisdictions; exposure to litigation related to our rating opinions, as well as any other litigation, government and regulatory proceedings, investigations and inquiries to which Moody's may be subject from time to time; provisions in U.S. legislation modifying the pleading standards and EU regulations modifying the liability standards applicable to credit rating agencies in a manner adverse to credit rating agencies; provisions of EU regulations imposing additional procedural and substantive requirements on the pricing of services and the expansion of supervisory remit to include non-EU ratings used for regulatory purposes; uncertainty regarding the future relationship between the U.S. and China; the possible loss of key employees and the impact of the global labor environment; failures or malfunctions of our operations and infrastructure; any vulnerabilities to cyber threats or other cybersecurity concerns; the timing and effectiveness of our restructuring programs, such as the 2022 - 2023 Geolocation Restructuring Program; currency and foreign exchange volatility; the outcome of any review by controlling tax authorities of Moody's global tax planning initiatives; exposure to potential criminal sanctions or civil remedies if Moody's fails to comply with foreign and U.S. laws and regulations that are applicable in the jurisdictions in which Moody's operates, including data protection and privacy laws, sanctions laws, anti-corruption laws, and local laws prohibiting corrupt payments to government officials; the impact of mergers, acquisitions, such as our acquisition of RMS, or other business combinations and the ability of Moody's to successfully integrate acquired businesses; the level of future cash flows; the levels of capital investments; and a decline in the demand for credit risk management tools by financial institutions. These factors, risks and uncertainties as well as other risks and uncertainties that could cause Moody's actual results to differ materially from those contemplated, expressed, projected, anticipated or implied in the forward-looking statements are described in greater detail under "Risk Factors" in Part I, Item 1A of Moody's annual report on Form 10-K for the year ended December 31, 2022, and in other filings made by the Company from time to time with the SEC or in materials incorporated herein or therein. Stockholders and investors are cautioned that the occurrence of any of these factors, risks and uncertainties may cause the Company's actual results to differ materially from those contemplated, expressed, projected, anticipated or implied in the forward-looking statements, which could have a material and adverse effect on the Company's business, results of operations and financial condition. New factors may emerge from time to time, and it is not possible for the Company to predict new factors, nor can the Company assess the potential effect of any new factors on it. Forward-looking and other statements in this document may also address our corporate responsibility progress, plans, and goals (including sustainability and environmental matters), and the inclusion of such statements is not an indication that these contents are necessarily material to investors or required to be disclosed in the Company's filings with the Securities and Exchange Commission. In addition, historical, current, and forward-looking sustainability-related statements may be based on standards for measuring progress that are still developing, internal controls and processes that continue to evolve, and assumptions that are subject to change in the future.

Helping Customers Accelerate Value Creation in an Era of Exponential Risk

	Ratings	Research & Insights	Data & Information	Decision Solutions: Banking | Insurance | KYC

Value proposition

We provide solutions that offer customers a consistent, holistic view of risk to make decisions across Origination & Underwriting, Portfolio Monitoring & Management, Risk & Capital Management, and Finance & Reporting activities.

Sustainable competitive advantage

Expertise

- Extensive, proprietary and historically indexed ratings data, research and analytics that are essential insights to evaluate credit risk
- Economic data, research, scenarios and models

Technology & Innovation

- Gen AI-enabled research tool transforms how customers ingest our content and perform analyses
- AI-powered credit risk models built on decades of data and validated over multiple credit cycles
- APIs provide flexible and scalable integration with customer workflows and other Moody's solutions, extending across customer value chains

Integration

- Our solution seamlessly combines data, research and analytics on credit, securities, economics, defaults & recoveries, ESG and more, delivering multiple views of risk to enable decisions

Key growth drivers

Customers need to understand a large range of interconnected and emerging risks. With our GenAI enabled Research Assistant, we are transforming how we deliver insights. Further content integrations will enable up-sell and cross-sell opportunities.

Value proposition

We provide powerful, scalable tools to help enable banks to make decisions about Lending, Risk & Capital Management, and Finance & Reporting activities.

Sustainable competitive advantage

Expertise

- Award winning Cashflow analytics & Risk Rating models
- Proprietary data on: loans, borrowers, defaults and collateral performance

Technology & Innovation

- Stable, scalable, and secure technology platform that grows with client needs
- Machine learning & AI-enabled tools for data extraction, normalization and validation to accelerate asset valuation
- Exploring the use of Gen AI to further streamline creation of credit memos

Integration

- Solutions bring together Moody's data on companies, properties, climate and economic scenarios
- Empowers customers with consistent information across their organization to drive efficiencies and expedite decision making

Key growth drivers

Supporting banks in their digitization journey by combining software with data and analytics increases stickiness of Moody's solutions. Opportunities to cross-sell and up-sell as we develop solutions for new work flows, add new asset classes and expand geographic reach.

Value proposition

We provide workflow solutions to banks, insurers, corporates, and governments, enabling them to onboard and monitor their customers and suppliers, as well as perform third-party risk management.

Sustainable competitive advantage

Expertise

» Proprietary data on private and public entities and beneficial ownership structures

» Insights and information on individuals including, sanctions, PEPs, adverse media and financial crime

Technology & Innovation

» SaaS platform built on a modern scalable cloud agnostic architecture; no-code solution ensures rapid customer configuration

» AI powered screening and monitoring solution uses 15+ years of model training for instant, precise results. Reduces up to 80% of false positives for customers

» API enabled services embed directly into customer workflows

Integration

» Our deeply integrated solution combines workflow capabilities, data, analytics and AI to significantly reduce the cost of compliance and enable 95% of customer onboarding to be automated

Key growth drivers

Digitization, increasing third-party risk regulations, supplier risk, and new entrants to the payment space are driving the need for KYC/KYS risk management solutions. Our solutions are easily embedded into customer workflows, facilitating growth opportunities with new and existing customers.
