

Q1 2026 Highlights

Q1 gold production
beats guidance

Gold costs per ounce
better than plan

Strong earnings supported
by a higher gold price

North American Barrick IPO
progressing as planned

Improved **performance** and **cost control**
driving strong cash flow and earnings

Net Earnings

\$1.60B ↑ 238 %
year-on-year

Attributable EBITDA¹

\$2.76B ↑ 103 %
year-on-year

Adjusted Net EPS²

\$0.98/sh ↑ 173 %
year-on-year

Cash Flow from Operations

\$2.55B
↑ 111 % year-on-year

Attributable Free Cash Flow³

\$1.21B
↑ 195 % year-on-year

2026 priorities for delivering value

1

Safety

Continue to improve
safety performance

2

Operational Delivery

Consistently deliver production
and cost guidance

3

Growth

Advance projects at Pueblo
Viejo, Lumwana, and Fourmile

4

Complete the IPO

Execute the North American
Barrick IPO by the end of 2026

Capital Allocation Framework

New dividend
policy adopted in
February 2026

\$3 billion buyback
approved in
May 2026

\$7.9 billion

Returned
since 2021

Our Global Business

Barrick's operations and projects span 17 countries and five continents.

A portfolio of world-class and long-life gold and copper assets.

Plus exploration projects in Canada, Ecuador, Egypt, Jamaica, Peru, and Senegal

BARRICK

All amounts expressed in U.S. dollars

Endnote 1: EBITDA and attributable EBITDA margin are non-GAAP financial measures, which exclude the following from net earnings: income tax expense; finance costs; finance income; and depreciation. Management believes that EBITDA is a valuable indicator of Barrick's ability to generate liquidity by producing operating cash flow to fund working capital needs, service debt obligations, and fund capital expenditures. Management uses EBITDA for this purpose. EBITDA is also frequently used by investors and analysts for valuation purposes whereby EBITDA is multiplied by a factor or "EBITDA multiple" that is based on an observed or inferred relationship between EBITDA and market values to determine the approximate total enterprise value of a company. Adjusted EBITDA removes the effect of impairment charges, acquisition/disposition gains/losses, foreign currency translation gains/losses, and other expense adjustments. Management also removes the impact of income tax expense, finance costs, finance income and depreciation incurred in Barrick's equity method accounted investments. Attributable EBITDA further removes the non-controlling interest portion. Management believes these items provide a greater level of consistency with the adjusting items included in Barrick's adjusted net earnings reconciliation, with the exception that these amounts are adjusted to remove any impact on finance costs/income, income tax expense and/or depreciation as they do not affect EBITDA. Management believes this additional information will assist analysts, investors and other stakeholders of Barrick in better understanding Barrick's ability to generate liquidity from its attributable business, including equity method investments, by excluding these amounts from the calculation as they are not indicative of the performance of Barrick's core mining business and do not necessarily reflect the underlying operating results for the periods presented. Additionally, it is aligned with how management presents Barrick's forward-looking guidance on gold ounces and copper pounds produced. Attributable EBITDA margin is calculated as attributable EBITDA divided by revenues - as adjusted. Management believes this ratio will assist analysts, investors and other stakeholders of Barrick to better understand the relationship between revenues and EBITDA or operating profit. EBITDA and attributable EBITDA margin are intended to provide additional information to investors and analysts and do not have standardized definitions under IFRS and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. EBITDA and attributable EBITDA margin exclude the impact of cash costs of financing activities and taxes, and the effects of changes in operating working capital balances and therefore are not necessarily indicative of operating profit or cash flow from operations as determined under IFRS. Other companies may calculate EBITDA or attributable EBITDA margin differently. Further details including a detailed reconciliation of these non-GAAP financial measures to their most directly comparable GAAP measure are incorporated by reference and provided on pages 37 - 46 of the MD&A accompanying Barrick's Q1 2026 interim financial statements filed on SEDAR+ at www.sedarplus.ca and on EDGAR at www.sec.gov.

Endnote 2: "Adjusted net earnings per share" is a non-GAAP financial performance measure. Adjusted net earnings excludes the following from net earnings: impairment charges (reversals) related to intangibles, goodwill, property, plant and equipment, and investments; acquisition/disposition gains/losses; foreign currency translation gains/losses; significant tax adjustments; other items that are not indicative of the underlying operating performance of our core mining business; and tax effect and non-controlling interest of the above items. Management uses this measure internally to evaluate our underlying operating performance for the reporting periods presented and to assist with the planning and forecasting of future operating results. Management believes that adjusted net earnings is a useful measure of our performance because impairment charges, acquisition/disposition gains/losses and significant tax adjustments do not reflect the underlying operating performance of Barrick's core mining business and are not necessarily indicative of future operating results. Furthermore, foreign currency translation gains/losses are not necessarily reflective of the underlying operating results for the reporting periods presented. The tax effect and non-controlling interest of the adjusting items are also excluded to reconcile the amounts to Barrick's share on a post-tax basis, consistent with net earnings. Adjusted net earnings is intended to provide additional information only and does not have a standardized definition under IFRS Accounting Standards as issued by the International Accounting Standards Board ("IFRS") and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. The measure is not necessarily indicative of operating profit or cash flow from operations as determined under IFRS. Other companies may calculate this measure differently. Further details including a detailed reconciliation of this non-GAAP financial measure to its most directly comparable GAAP measure are incorporated by reference and provided on pages 37 - 46 of the MD&A accompanying Barrick's Q1 2026 interim financial statements filed on SEDAR+ at www.sedarplus.ca and on EDGAR at www.sec.gov.

Endnote 3: "Free cash flow" is a non-GAAP financial measure that deducts capital expenditures from net cash provided by operating activities. "Attributable free cash flow" starts with free cash flow and adds Barrick's attributable share of free cash flow from its equity investees and subtracts the free cash flow attributable to the non-controlling interests. Management believes these measures to be useful indicators of Barrick's ability to operate without reliance on additional borrowing or usage of existing cash. Free cash flow and attributable free cash flow are intended to provide additional information only, do not have standardized definitions under IFRS, and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. These measures are not necessarily indicative of operating profit or cash flow from operations as determined under IFRS. Other companies may calculate these measures differently. Further details including a detailed reconciliation of these non-GAAP financial measures to its most directly comparable GAAP measure are incorporated by reference and provided on pages 37 - 46 of the MD&A accompanying Barrick's Q1 2026 interim financial statements filed on SEDAR+ at www.sedarplus.ca and on EDGAR at www.sec.gov.

Endnote 4:

Key Outlook Assumptions	2026
Gold price (\$/oz)	4,500
Copper price (\$/lb)	5.50
Oil price (WTI) (\$/barrel)	70
AUD exchange rate (AUD:USD)	0.75
ARS exchange rate (USD:ARS)	1,513
CAD exchange rate (USD:CAD)	1.30
CLP exchange rate (USD:CLP)	900
EUR exchange rate (EUR:USD)	1.10

We expect Cortez, Loulo-Gounkoto, Kibali, North Mara and Phoenix to deliver higher year-over-year performances in 2027 relative to 2026, together with stable delivery across the rest of the portfolio. In 2028, the increase in gold production is expected to be driven by NGM and the increase in copper production is expected to be driven by Lumwana.

CAUTIONARY STATEMENT ON FORWARD-LOOKING INFORMATION

Certain information contained or incorporated by reference in this fact sheet, including any information as to our strategy, projects, plans or future financial or operating performance, constitutes "forward-looking statements". All statements, other than statements of historical fact, are forward-looking statements. The words "expect", "target", "plan", "guidance", "ramp up", "on track", "project", "growth", "expected", "progress", "continue", "potential", "focus", "ongoing", "scheduled", "will", "can", "could", and similar expressions identify forward-looking statements. In particular, this presentation contains forward-looking statements including, without limitation, with respect to Barrick's forward-looking production guidance, including our three year outlooks and anticipated production growth from Barrick's organic project pipeline and reserve replacement; estimates of future costs and projected future cash flows, capital, operating and exploration expenditures and mine life and production rates; our ability to convert resources into reserves and replace reserves net of depletion from production; mine life and production rates; the potential for Fourmile to become a Tier One Gold Asset; our plans and expected completion and benefits of our growth projects, including the anticipated timing for the Lumwana Super Pit Expansion and the anticipated timing for first copper production; Barrick's decision to slow development activity at Reko Diq and expected timing for completion of the project review; Barrick's global exploration strategy and planned exploration activities, including in North America, South America, and Asia Pacific and Africa and the Middle East; Barrick's copper strategy; our pipeline of high confidence projects at or near existing operations; the ramp-up of operations at Loulo-Gounkoto following the resolution of disputes with the Government of Mali, including adoption of the 2023 Mining Code; potential mineralization and metal or mineral recoveries; joint ventures and partnerships; the incorporation of Fourmile into the NGM joint venture at fair market value; Barrick's strategy, plans, targets, goals and expected benefits in respect of environmental and social governance issues, including health and safety and biodiversity initiatives; Barrick's intention to pursue and the expected timing for and potential benefits of an initial public offering of its North American gold assets; and expectations regarding future price assumptions, financial performance and other outlook or guidance.

Forward-looking statements are necessarily based upon a number of estimates and assumptions including material estimates and assumptions related to the factors set forth below that, while considered reasonable by the Company as at the date of this presentation in light of management's experience and perception of current conditions and expected developments, are inherently subject to significant business, economic and competitive uncertainties and contingencies. Known and unknown factors could cause actual results to differ materially from those projected in the forward-looking statements and undue reliance should not be placed on such statements and information. Such factors include, but are not limited to: fluctuations in the spot and forward price of gold, copper or certain other commodities (such as silver, diesel fuel, natural gas and electricity); risks associated with projects in the early stages of evaluation and for which additional engineering and other analysis is required; risks related to the possibility that future exploration results will not be consistent with the Company's expectations, that quantities or grades of reserves will be diminished, and that resources may not be converted to reserves; risks associated with the fact that certain of the initiatives described in this presentation are still in the early stages and may not materialize; changes in mineral production performance, exploitation and exploration successes; risks that exploration data may be incomplete and considerable additional work may be required to complete further evaluation, including but not limited to drilling, engineering and socioeconomic studies and investment; the speculative nature of mineral exploration and development; lack of certainty with respect to foreign legal systems, corruption and other factors that are inconsistent with the rule of law; disruption of supply routes which may cause delays in construction and mining activities, including disruptions in the supply of key mining inputs due to the invasion of Ukraine by Russia and conflicts in the Middle East; risk of loss due to acts of war, terrorism, sabotage and civil disturbances; risks associated with artisanal and illegal mining; changes in national and local government legislation, taxation, controls or regulations and/or changes in the administration of laws, policies and practices, including the status

of value-added tax refunds received in Chile in connection with the Pascua-Lama project; expropriation or nationalization of property and political or economic developments in Canada, the United States, Mali or other countries in which Barrick does or may carry on business in the future; risks relating to the proposed initial public offering of an entity that will hold Barrick's North American assets; risks relating to political instability in certain of the jurisdictions in which Barrick operates; timing of receipt of, or failure to comply with, necessary permits and approvals; non-renewal of key licenses by, or failure to obtain key licenses from governmental authorities; failure to comply with environmental and health and safety laws and regulations; increased costs and physical and transition risks related to climate change, including extreme weather events, resource shortages, emerging policies and increased regulations relating to greenhouse gas ("GHG") emission levels, energy efficiency and reporting of risks; Barrick's ability to achieve its sustainability goals, including its climate-related goals and GHG gas emissions reduction targets; contests over title to properties, particularly title to undeveloped properties, or over access to water, power and other required infrastructure; the liability associated with risks and hazards in the mining industry, and the ability to maintain insurance to cover such losses; damage to the Company's reputation due to the actual or perceived occurrence of any number of events, including negative publicity with respect to the Company's handling of environmental matters or dealings with community groups, whether true or not; risks related to operations near communities that may regard Barrick's operations as being detrimental to them; litigation and legal and administrative proceedings; operating or technical difficulties in connection with mining or development activities, including geotechnical challenges, tailings dam and storage facilities failures, and disruptions in the maintenance or provision of required infrastructure and information technology systems; increased costs, delays, suspensions and technical challenges associated with the construction of capital projects; risks associated with working with partners in jointly controlled assets; risks associated with Barrick's infrastructure, information technology systems and the implementation of Barrick's technological initiatives, including risks related to cybersecurity incidents, including those caused by computer viruses, malware, ransomware and other cyberattacks, or similar information technology system failures, delays and/or disruptions; the impact of global liquidity and credit availability on the timing of cash flows and the values of assets and liabilities based on projected future cash flows; the impact of inflation, including global inflationary pressures driven by ongoing global supply chain disruptions, global energy cost increases following the invasion of Ukraine by Russia and country-specific political and economic factors in Argentina and uncertainty related to Venezuela; adverse changes in our credit ratings; fluctuations in the currency markets; changes in U.S. dollar interest rates; changes in U.S. trade, tariff and other controls on imports and exports, tax, immigration or other policies that may impact relations with foreign countries, result in retaliatory policies, lead to increased costs for raw materials and components, or impact Barrick's existing operations and material growth projects; risks arising from holding derivative instruments (such as credit risk, market liquidity risk and mark-to-market risk); risks related to the demands placed on the Company's management, the ability of management to implement its business strategy and enhanced political risk in certain jurisdictions; uncertainty whether some or all of Barrick's targeted investments and projects will meet the Company's capital allocation objectives and internal hurdle rate; whether benefits expected from recent transactions are realized; business opportunities that may be presented to, or pursued by, the Company; our ability to successfully integrate acquisitions or complete divestitures; risks related to competition in the mining industry; employee relations including loss of key employees; availability of and increased costs associated with mining inputs and labor; and risks associated with diseases, epidemics and pandemics; risks related to the failure of internal controls; and risks related to the impairment of the Company's goodwill and assets. In addition, there are risks and hazards associated with the business of mineral exploration, development and mining, including environmental hazards, industrial accidents, unusual or unexpected formations, pressures, cave-ins, flooding and gold bullion, copper cathode or gold or copper concentrate losses and the risk of inadequate insurance, or inability to obtain insurance, to cover these risks).

Many of these uncertainties and contingencies can affect our actual results and could cause actual results to differ materially from those expressed or implied in any forward-looking statements made by, or on behalf of, us. Readers are cautioned that forward-looking statements are not guarantees of future performance. All of the forward-looking statements made in this presentation are qualified by these cautionary statements. Specific reference is made to the most recent Form 40-F/Annual Information Form on file with the SEC and Canadian provincial securities regulatory authorities for a more detailed discussion of some of the factors underlying forward-looking statements and the risks that may affect Barrick's ability to achieve the expectations set forth in the forward-looking statements contained in this presentation.

Barrick disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise, except as required by applicable law.
