

DARWIN

AI INVESTMENTS LP

AI Powered Covered Call Fund

May 2026

Disclosures

This presentation is neither an offer to sell nor a solicitation of any offer to buy limited partnership interests in the Darwin AI Investments LP or Darwin AI Ventures LLC. An offering is made only by the final offering memorandum, subscription agreement and other documentation of the fund (the “Fund Documents”), which should be read in their entirety, including the risk factors and potential conflicts of interest described therein, before making any investment decisions. No offer to purchase interests in the fund will be accepted prior to receipt by the offeree of the Fund Documents and the completion of all appropriate documentation.

All performance data provided is based upon modeled information and does not represent actual investment returns. No assurances can be given that the partnership’s investment objectives will be achieved, and investment results may vary substantially on a monthly, quarterly or annual basis. All performance data is net of a 1%/15% fee, unless otherwise noted.

This presentation has been provided to you in a private and confidential manner. This presentation is not intended for public use or distribution. It is not to be reproduced or transmitted, in whole or in part, without the prior consent of Darwin AI Ventures LLC.

OVERVIEW

A new approach to options trading utilizing a proprietary neural network based on evolution inspired principles. Developed by world leading AI developers, experienced financial leaders and medical innovators.

EXECUTIVE SUMMARY

- Proprietary AI-based private trading fund utilizing covered calls for equities within the S&P 500 Index
- AI is perfectly suited to evaluate option premiums and pricing given the complexity of inputs
- Superior modeled historical net performance since 2016 through Q1 2026
- Developed by Data Science Pioneer, Dr. Xiaoqian (Shawn) Jiang

2.0 Sharpe Ratio

**25.8% Average Annual Compound
Net Return**

10+ Years Outperforming S&P 500

10/10 Positive Return Years

**11.9% Annual Average Compound
Outperformance v. S&P 500**

1. Net Returns are based upon historical model returns and do not reflect actual investment. Net returns assume a 1% / 15% fee model
2. Statistics based on annual data

UPDATE - 2026 Q1 PERFORMANCE

In a quarter characterized by international conflicts and volatility, Darwin AI significantly outperformed comps with lower volatility

Comparative Performance and Risk Data for Q1 2026

Metric	Darwin AI	S&P 500	CBOE S&P 500 BuyWrite Index	NASDAQ 100
Gross Return	2.3%	-4.3%	-0.9%	-5.8%
Net Return ¹	1.8%	-4.3%	-0.9 %	-5.8%
Volatility (Std Dev)	10.7%	17.4%	25.6%	22.8%

1. Net Returns are based upon historical model returns and do not reflect actual investment. Net returns assume a 1% / 15% fee model

2. Statistics based on annual data

PERFORMANCE

Darwin AI'S Deep Evolution Strategy Proprietary Neural Network Performance

Annualized Alpha:

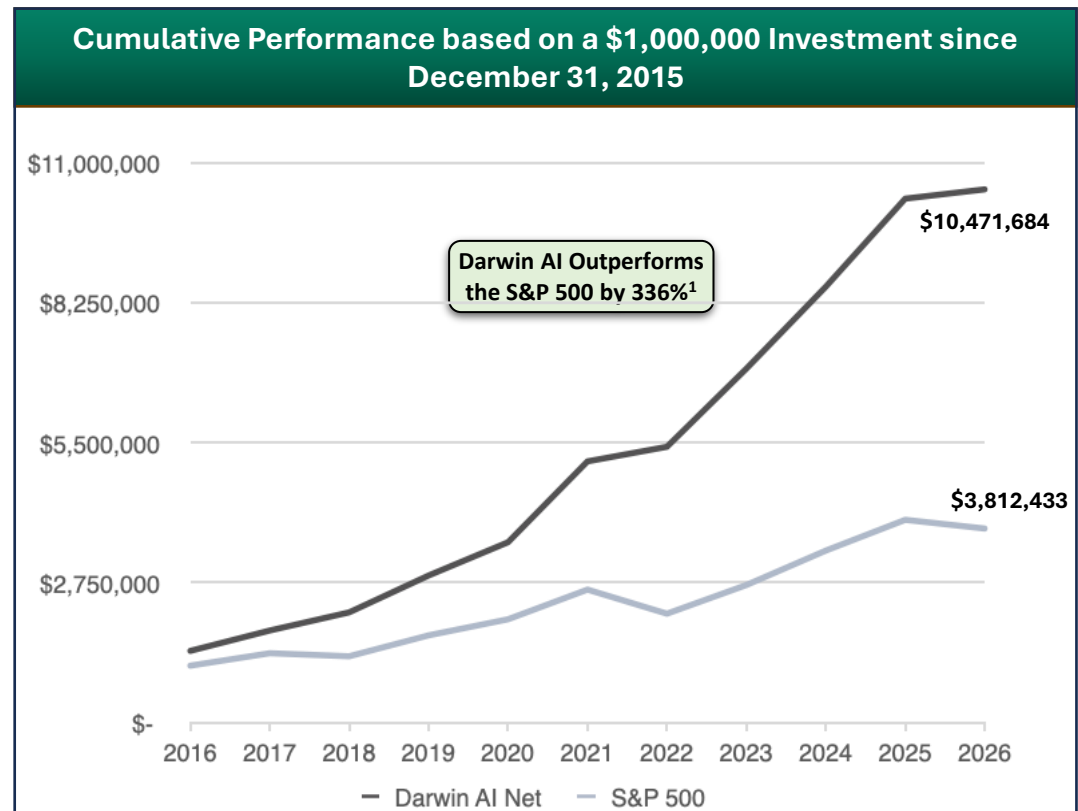

18.8% vs. S&P 500

Beta:

0.50 (less volatile)

Sharpe Ratio:

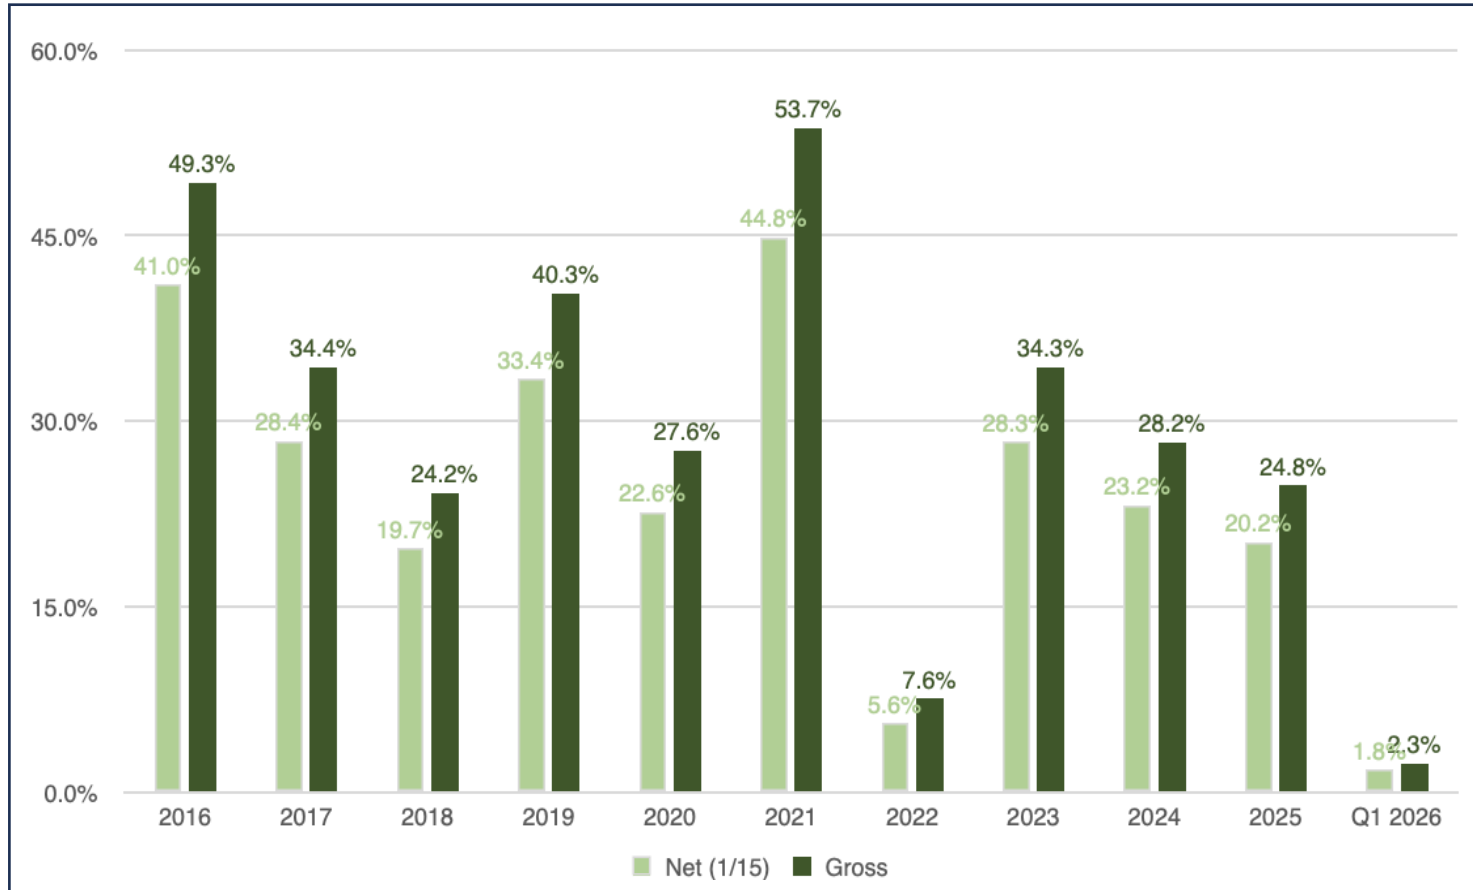

2.0 (attractive risk-adjusted returns)

1. Net Returns are based upon historical model returns and do not reflect actual investment. Net returns assume a 1% / 15% fee model
2. Statistics based on annual data 3. Annualized Alpha assume a 5% risk-free rate.

PERFORMANCE

Annual Net vs. Gross Modeled Performance¹

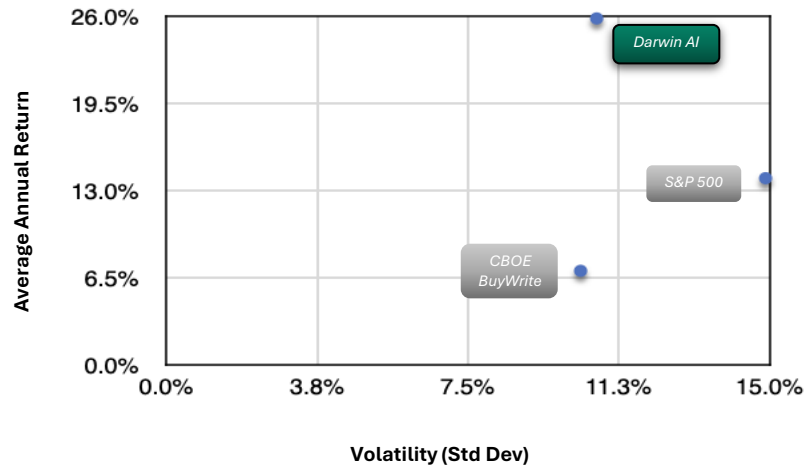

1. Net Returns are based upon historical model returns and do not reflect actual investment. Net returns assume a 1% / 15% fee model

PERFORMANCE

Superior Risk Adjusted Returns¹

Risk Return Profiles since 2016

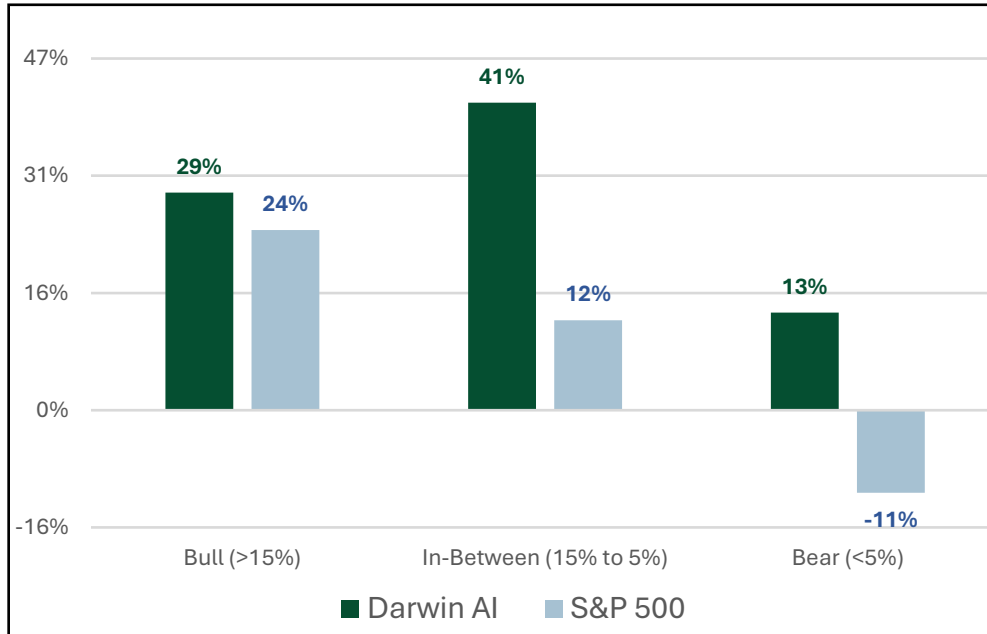

Risk Data from 2016 to 2026

Metric	Darwin AI (NET)	S&P 500	CBOE S&P 500 BuyWrite Index
Average Annual Compound Return	25.8 %	13.9 %	7.0 %
Volatility (Std Dev)	10.7 %	14.9 %	10.3 %
Risk-Adjusted Metric (Sharpe Ratio)	2.0	0.7	0.2
Worst Year	5.6 %	-18.1 %	-11.4 %
Best Year	44.8 %	31.5 %	20.5 %

1. Net Returns are based upon historical model returns and do not reflect actual investment. Net returns assume a 1% / 15% fee model
2. Statistics based on annual data

PERFORMANCE

Performance Across Market Cycles¹

Bull cycle: 7 years
(2017, 2019, 2020, 2021, 2023, 2024, 2025)

In-between cycle: 1 year
(2016)

Bear cycle: 2 years
(2018, 2022)

1. Net Returns are based upon historical model returns and do not reflect actual investment. Net returns assume a 1% / 15% fee model

WHAT IS DARWIN'S DEEP EVOLUTION STRATEGY?

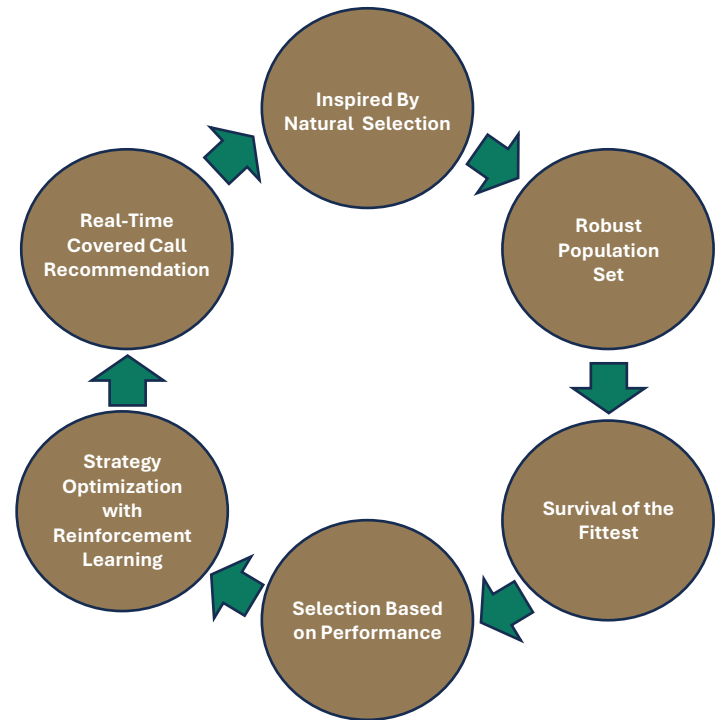

Groundbreaking Approach to Investing Combining Scientific Theory and AI

- 1 Inspired by biological evolution: only the "fittest" strategies survive
- 2 Robust, noise-resistant system utilizing group policy optimization
- 3 Quantum leap beyond typical momentum-tracing trading algorithms

DEEP EVOLUTION STRATEGY (DES)

- Thrives in noisy markets
- Evolution rewards adaptability
- Finds robust, profitable strategies
- Similar to chess; the DES Proprietary Neural Network targets multiple moves ahead

Why DES Thrives in noisy markets?

Resilience Through Diversity

- **Multiple Solutions:** By evaluating many strategies at once, DES doesn't rely on a single strategy that might be affected by noise
- **Adaptability:** If some strategies perform poorly due to random noise, others may still perform well

Natural Selection Mechanism

- **Survival of the Fittest:** Only the strategies that perform well survive to the next generation
- **Less Reliance on Exact Patterns:** DES doesn't need precise patterns to function, it focuses on overall performance

Continuous Adaptation

- **Learning Over Time:** Repeated iterations allow DES to adapt to new data and changing environments
- **Avoiding Overfitting:** Since DES is always testing strategies against actual performance, it's less likely to overfit to random noise

INVESTMENT FUNNEL

S&P 500 Equities

- Only those equities in the S&P 500, updated annually

Option Volume

- Front-week call Option Interest $\geq 1,500$ per strike (or chain Option Interest $\geq 5,000$)

Select Enhanced Tickers

- Top 25 to 60 equities by DES score (alpha + quality + momentum; large-cap tilt)

Eligibility / Corporate Actions

- Exclude mergers/halts/spinoffs; Avoid earnings week

Covered Call Overlay for Options Owned

- Often roll at 60–90% premium capture; Sells option

Portfolio

- 10 to 40 tickers, 0–5% cash reserve for rolls

MEET THE TEAM

Dr. Xiaoqian (Shawn) Jiang
AI and Data Science Pioneer

- PhD in Computer Science from Carnegie Mellon University
- AI Lead at UTHealth Houston, driving innovation in healthcare and beyond
- Expertise in advanced AI, computational modeling, and data-driven solutions

Winner of Multiple AI Awards and Accolades

- Proven leader in **AI innovation**, backed by career awards from CPRIT, UT System, Intel, and Microsoft, Principal investigator on **\$35M+ in federally funded AI research**
- Deep expertise in **computational modeling and real-world healthcare AI**, five-time American Medical Informatics Association (AMIA) Distinguished/Best Paper honoree
- Track record of **high-stakes problem-solving**: fraud detection (MITRE National Champion, 2020), drug repurposing (2nd place in DREAM challenge, 2021), antibody discovery (Top 5 in the 2025 IQVIA Antibody Challenge track #2)
- Builds systems that **adapt, learn, and perform under complex constraints**
- Cross-domain experience that provides the **diverse “ecosystem” Darwin AI needs to evolve**

MEET THE TEAM

Daniel Still

Financial & Research Leader

- Partner and Director of Research at Technology Opportunity Partners LP
- 25+ years of experience in finance, research, and business strategy
- Former Director of Transaction Services at PwC with a strong record in financial reporting and modeling

Tom Cullum

Financial & Operational Leader

- Founding Partner and former CEO / Executive Chairman of Lake Street Capital Markets LLC
- Over 35 years of trading, sales and management experience
- Demonstrated record of relationship driven success on both full-service investment bank and asset management platforms

Dr. Ben Bobrow

Transformative Innovator

- Distinguished Professor of Emergency Medicine
- Over 30 years of pioneering research in emergency medicine, space medicine, and AI
- Proven track record of transforming high-stakes, complex systems through data-driven innovation

TERMS OVERVIEW

Structure:	Management company is Darwin AI Ventures LLC Operating entity is Darwin AI Investments LP
Management Fee:	1% annually, payable quarterly in advance
Incentive Performance Allocation:	15% of profits computed annually (Subject to high-water mark)
Initial Investment Period:	One year lock-up
Redemption:	Quarterly, with 30 days notice
Estimated Close:	2026

SUMMARY

- Proven and Unique Proprietary AI Engine Vetted in Healthcare
- Downside Protection of a Covered Call Model with Superior Outperformance
- Modeled Performance Across Market Cycles
- Back-tested with 10 years of Real Market Data

2.0 Sharpe Ratio

25.8% Average Annual Net Return

10+ Years Outperforming S&P 500

10/10 Positive Return Years

**11.9% Annual Average Compound
Outperformance v. S&P 500**

1. Net Returns are based upon historical model returns and do not reflect actual investment. Net returns assume a 1% / 15% fee model
2. Statistics based on annual data.
