QUARTERLY REPORT

Cautionary Note Regarding Forward-Looking Statements

Information set forth in this Quarterly Report (the “Quarterly Report”) contains forward-looking statements, which involve a number of risks and uncertainties that could cause our actual results to differ materially from those reflected in the forward-looking statements. Forward-looking statements can be identified by use of the words “expect,” “project,” “may,” “might,” “potential,” and similar terms. OTC Markets Group Inc. (“OTC Markets Group”, “we” or the “Company”) cautions readers that any forward-looking information is not a guarantee of future performance and that actual results could differ materially from those contained in the forward-looking information. Forward-looking statements involve a number of risks, uncertainties or other factors beyond OTC Markets Group’s control. These factors include, but are not limited to, our ability to implement our strategic initiatives, economic, political and market conditions and price fluctuations, government and industry regulation, U.S. and global competition, the impact of the novel coronavirus (“COVID-19”) pandemic, including changes to trading behavior broadly in the market, and the risk factors discussed under the heading “Risk Factors” in our Quarterly Report for period ended March 31, 2020 and our Annual Report for the year ended December 31, 2019. We undertake no obligation to revise or publicly release the results of any revision to these forward-looking statements. Given these risks and uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements. We undertake no obligation to update any forward-looking statement, whether as a result of new information, future events or otherwise.

Item 1. The exact name of the issuer and the address of its principal executive offices

The name of the issuer is OTC Markets Group Inc.

Company description

OTC Markets Group Inc. (OTCQX: OTCM) operates the OTCQX® Best Market, the OTCQB® Venture Market, and the Pink® Open Market for 11,000 U.S. and global securities. Through our two Securities and Exchange Commission (“SEC”) registered alternative trading systems (“ATS”), OTC Link® ATS and OTC Link ECN, we connect a diverse network of Financial Industry Regulatory Authority (“FINRA”) member broker-dealers that provide liquidity and execution services. We enable investors to easily trade through the broker of their choice and empower companies to improve the quality of information available for investors.

The address of the issuer is: **300 Vesey Street, 12th Floor
New York, NY 10282**

The telephone and facsimile are: **Telephone: (212) 896-4400
Facsimile: (212) 868-3848**

The issuer's website:

OTC Markets Group's corporate website, www.otcmarkets.com, contains general information about us and our products and services. We also maintain www.otciq.com, www.otcdealer.com, www.qaravan.com and www.virtualinvestorconferences.com and www.lifescienceinvestorforum.com. The information contained on such websites shall not be deemed incorporated by reference herein.

Item 2. Shares outstanding

The Company is authorized to issue 14,000,000 shares of Class A common stock of \$0.01 par value.

None of OTC Markets Group's common stock has been registered under the Securities Act of 1933, as amended (the "Securities Act"), and we have no current plans to register any of our securities. Certain shares of our common stock are currently eligible for resale in the public market pursuant to the exemption from registration offered by Rule 144 under the Securities Act ("Rule 144"). The remaining outstanding shares of our common stock are "restricted securities" within the meaning of Rule 144 and may be eligible for resale in the future.

The following table shows Class A common stock share ownership as of June 30, 2020:

	June 30, 2020
(i) Number of shares authorized	14,000,000
(ii) Number of shares outstanding	11,661,030
(iii) Number of shares freely tradable (public float) ⁽¹⁾⁽²⁾	7,329,402
(iv) Total number of holders of record	206

(1) The number of shares freely tradable may include shares held by shareholders owning 10% or more of our Class A common stock. These shareholders may be considered "affiliates" within the meaning of Rule 144, and their shares may be "control shares" subject to the volume and manner of sale restrictions under Rule 144.

(2) Our officers and directors hold approximately 4.3 million shares of our Class A common stock, which may be "control shares" subject to the volume and manner of sale restrictions under Rule 144. These shares are excluded from the number of shares freely tradable.

As of June 30, 2020, there are 1,786 non-objecting beneficial shareholders owning at least 100 shares of the Company's Class A common stock.

Our Class A common stock trades on the OTCQX market under the symbol OTCM (CUSIP Number: 67106F108).

Dividends

The declaration of dividends by OTC Markets Group is subject to the discretion of our Board of Directors. Our Board of Directors will consider such matters as general business conditions, our financial results, capital requirements, contractual, legal and regulatory restrictions on the payment of dividends and such other factors as our Board of Directors may deem relevant.

During the six months ended June 30, 2020, our Board of Directors authorized and approved the following cash dividends:

Declaration Date	Dividend Per Common Share	Record Date	Total Amount (in thousands)	Payment Date
March 04, 2020	\$ 0.15	March 17, 2020	\$ 1,748	March 28, 2020
May 05, 2020	0.15	June 11, 2020	1,749	June 25, 2020

On August 5, 2020, the Board of Directors authorized and approved a quarterly cash dividend of \$0.15 per share of Class A common stock. The dividend is payable on September 25, 2020 to our stockholders of record on September 11, 2020.

Stock Buyback Program

On March 4, 2020, the Board of Directors refreshed the Company's stock repurchase program, giving the Company authorization to repurchase up to 300,000 shares of the Company's Class A common stock. The Company is authorized to purchase shares from time to time on the open market and through block trades, in accordance with the safe harbor provision of Rule 10b-18 under the Securities Exchange Act of 1934 (the "Exchange Act").

The following table shows purchases made by the Company of the Company's Class A common stock during the six months ended June 30, 2020.

Date	Number of Shares Purchased	Average Price Paid Per Share	Number of Shares Purchased as Part of Announced Repurchase Plan	Number of Shares Remaining To Be Purchased Under Announced Plan
Feb 2020	102,732	\$34.20	102,732	197,268
Mar 2020	206	\$32.98	206	197,062
Mar 2020				300,000

Item 3. Unaudited interim condensed consolidated financial statements

Copies of the unaudited interim condensed consolidated financial statements of OTC Markets Group for the three and six months ended June 30, 2020 and June 30, 2019, including the unaudited interim Condensed Consolidated Balance Sheets, Condensed Consolidated Statements of Income, Condensed Consolidated Statements of Cash Flows, Condensed Consolidated Statements of Stockholders' Equity and Notes to the condensed consolidated financial statements, are attached hereto as Exhibit 3.1 and are hereby incorporated by reference into this Quarterly Report.

The unaudited interim condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States ("U.S. GAAP"). The accompanying unaudited interim condensed consolidated financial statements reflect all adjustments which are, in the opinion of management, necessary for a fair statement of the results for the interim periods presented. These adjustments are of a normal recurring nature. As permitted under U.S. GAAP, certain footnotes or other financial information are condensed or omitted in the unaudited interim condensed consolidated financial statements. These unaudited interim condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and related notes included in our Annual Report for the year ended December 31, 2019. The December 31, 2019 unaudited Condensed Consolidated Balance Sheet was derived from audited consolidated financial statements contained in our Annual Report for the year ended December 31, 2019, but does not include all disclosures required by U.S. GAAP. Operating results for the interim periods are not

necessarily indicative of the results that may be expected for the fiscal year ending December 31, 2020.

Item 4. Management's discussion and analysis

Overview

Our mission is to create better informed and more efficient financial markets.

We operate three business lines:

- OTC Link LLC is a FINRA member broker-dealer that operates two SEC registered ATSS.
- Market Data Licensing distributes market data and financial information.
- Corporate Services operates the OTCQX and OTCQB markets and offers issuers disclosure and regulatory compliance products.

We facilitate transparent trading by connecting brokers, organizing markets and incentivizing disclosure. We distribute market data that informs investment decisions, enables the efficient pricing of risk, and assists regulated entities in meeting their compliance obligations. We provide the benefits of public trading to a wide spectrum of U.S. and global companies.

Our Business

Our wholly-owned subsidiary, OTC Link LLC, a FINRA member broker-dealer, operates OTC Link ATS and OTC Link ECN, both SEC registered ATSS. Accordingly, OTC Link LLC, OTC Link ATS and OTC Link ECN are subject to the direct regulatory oversight of the SEC and FINRA.

OTC Link ATS offers our broker-dealer subscribers a fully attributable, network-based model for quoting and facilitating transactions in OTC equity securities and serves a diverse community of FINRA member broker-dealers that operate as market makers, agency brokers and ATSS, including Electronic Communication Networks ("ECNs"). OTC Link ATS provides a suite of quotation and trade-messaging services offering broker-dealers control of trades and choice of counterparties so they can efficiently provide best execution, attract order flow, and comply with FINRA and SEC regulations. Unlike traditional exchanges and matching engines, OTC Link ATS is not an intermediary. Rather, OTC Link ATS delivers trade messages electronically, allowing subscribers to execute or negotiate trades.

OTC Link ECN functions as a matching engine and router for certain OTC securities. OTC Link ECN complements OTC Link ATS by providing FINRA registered broker-dealer subscribers with anonymous order matching functionality. OTC Link ECN acts as an agency intermediary in relation to all transactions executed on the ECN's platform. When orders do not match internally on OTC Link ECN's matching engine, they are routed to an interdealer quotation system where they may appear as quotes using the market participant identifier "OTCX". Pursuant to applicable FINRA rules, OTC Link ECN submits trade reports to FINRA's OTC Reporting Facility. All transactions executed on OTC Link ECN are cleared and settled pursuant to a clearing agreement with Apex Clearing Corporation.

OTC Markets Group provides our subscribers with access to extensive market data and financial information. Due to the role OTC Link ATS plays in the trading process, and our interaction with issuers, we generate a significant amount of market data and information about companies. Our market data consists of real-time, delayed and end-of-day quotation and

trading data, as well as security master data, company reference data, compliance data and compliance analytics for OTCQX, OTCQB and Pink securities.

We offer a suite of market data licenses, priced per enterprise or per user, through direct connectivity, extranet connectivity, web interfaces, and third-party market data redistributors and order management systems (“OMS”). Depending on the license type, subscribers may use the market data internally, redistribute to clients or redistribute to the public. We generate a majority of our market data revenues from sales through market data redistributors, and certain of our market data licensing agreements include redistribution fees and rebates.

We also charge for the display of advertisements on www.otcmarkets.com.

Our Corporate Services business line includes the OTCQX Best Market, the OTCQB Venture Market and the Pink Open Market, and our suite of disclosure and information services.

The OTCQX Best Market provides efficient public trading without the complexity and cost of a national securities exchange listing. To join OTCQX, companies must meet qualitative financial standards, adhere to common sense corporate governance practices, provide timely public disclosure and meet the requirements set out in our OTCQX Rules on an ongoing basis. Companies pay a one-time application fee and annual fees upon joining the market and upon each annual renewal.

The OTCQX market is divided into OTCQX U.S. and OTCQX International. OTCQX for Banks is specifically aimed at meeting the needs of U.S. community and regional banks. The OTCQX International market is targeted towards non-U.S. companies that meet the listing standards of a qualified stock exchange in their primary market, including (i) large global issuers that do not see value in meeting multiple regulatory, compliance, disclosure, and accounting standards involved in a U.S. stock exchange listing, and (ii) emerging growth companies that may be working towards a U.S. exchange listing, but are not yet ready to deploy the management resources necessary to handle the operational complexity and cost burdens.

The OTCQB Venture Market provides public trading for developing and venture-stage companies and applies standards that promote price transparency and facilitate public disclosure. OTCQB is open to SEC reporting companies, domestic companies that comply with our Alternative Reporting Standard and international companies that trade in the U.S. in reliance on one of various available exemptions from SEC registration. All OTCQB companies must also meet the applicable OTCQB standards.

Securities traded on OTC Link ATS that do not meet the standards of, or choose not to apply for, the OTCQX Best Market or the OTCQB Venture Market are traded on the Pink Open Market. Companies on the Pink market are categorized as “Pink Current Information,” “Pink Limited Information” or “Pink No Information” based on the sufficiency and timeliness of the information they provide to investors. Pink companies can subscribe to our OTC Disclosure & News Service® (“DNS”) to make current information available to their investors on our website and through our distribution channels.

Securities traded on the Pink Open Market that are the subject of a public interest concern may be flagged “Caveat Emptor” or buyer beware.

Recent Business Developments

Impact of the recent COVID-19 pandemic

In December 2019, a novel strain of coronavirus now known as COVID-19, was reported in Wuhan, China and has since spread rapidly. In January 2020, the World Health Organization (WHO) declared it a Public Health Emergency of International Concern and in early March

2020, characterized COVID-19 as a pandemic. The rapid spread has resulted in governmental and other authorities around the world implementing numerous measures to contain the virus, including travel bans and restrictions, quarantines, shelter-in-place orders and business shutdowns. The pandemic and these containment measures have had, and are expected to continue to have, a substantial negative impact on businesses around the world and on global, regional and national economies.

The COVID-19 pandemic has resulted in federal, state and municipal regulations impacting our business operations. On March 20, 2020, the Governor of New York issued the New York State on PAUSE Executive Order (the “PAUSE Order”), mandating the closure of all non-essential businesses and requiring that all non-essential employees refrain from travel and any public gatherings. Other states where our employees reside issued similar orders. As a provider of services related to financial markets, OTC Markets Group was considered an essential business under the PAUSE Order. However, despite this designation, we severely limited employee access to our physical locations beginning in mid-March.

As of July 6, 2020, New York City entered Phase 3 of reopening and, in line with guidelines applicable to office-based businesses, OTC Markets Group has permitted a small number of employees to return to our New York City headquarters and our Washington D.C. office, each on a voluntary basis. We have implemented health and safety protocols at our offices, including ensuring that reduced density is maintained, instituting temperature checks and other policies.

We have continued to operate our businesses with the majority of our employees working remotely. Pursuant to our Business Continuity Plan, we are able to operate normally while connecting remotely, which gives us the opportunity to carefully assess and develop our plan for bringing employees back to the office. We have, and will continue to, evaluate the unfolding situation and plan to take a conservative and measured approach to returning to our offices that balances the health and safety of our colleagues, operational effectiveness and our ability to serve our subscribers.

The COVID-19 outbreak and the measures implemented to contain it resulted in an unprecedented slow-down in economic activity and a dramatic deterioration in macro-economic conditions at a global level. The COVID-19 pandemic did not have a material impact on our revenue and financial results for the first six months of 2020, with strong growth in our OTC Link business line, and the impact of price increases and user growth in our Market Data Licensing business, more than offsetting contraction in our Corporate Services business (see *Financial Results*, below).

However, we expect that the current global economic conditions are likely to have an adverse effect on our future business, financial condition and results of operations. We have seen, and are likely to continue to see, reduced sales in our Corporate Services business and an increase in our voluntary non-renewal rate as issuers reach the end of their service terms. In recognition of the unprecedented economic conditions, we have offered financial assistance in the form of extended payment terms to issuers on our OTCQB market (see *Temporary Relief Provided to Companies on our Markets, including Extended Payment Terms for OTCQB Companies*, below).

The extent to which the COVID-19 pandemic will materially adversely affect our business and results of operations will depend on numerous evolving factors and future developments that we are not able to predict, including the duration, spread and severity of the outbreak; the nature, extent and effectiveness of containment measures; the extent and duration of the effect on the global economic conditions and how quickly and to what extent normal economic and operating conditions can resume. The potential impact to our financial results is discussed further in the

Trends in Our Business section, below.

Temporary Relief Provided to Companies on our Markets, including Extended Payment Terms for OTCQB Companies

In March and April 2020, we announced measures designed to provide temporary relief to issuers on our OTCQX and OTCQB markets from certain of our market standards and requirements. In the context of the unprecedented market turmoil caused by the COVID-19 pandemic, we provided issuers on our OTCQX and OTCQB markets with relief from bid price, market capitalization, market value and public float requirements through June 30, 2020. We also extended public disclosure filing deadlines in line with similar SEC extensions. We remain committed to maintaining orderly markets and adhering to our data driven market standards, while recognizing, as other market operators have done, that temporary relief from certain requirements is an appropriate response to extreme circumstances such as the COVID-19 pandemic.

Beginning in March 2020, we also provided relief to renewing OTCQB customers by extending our regular payment terms by as much as ninety days. We have continued to provide extended payment terms to issuers on our OTCQB market. As of June 30, 2020, five OTCQB issuers included in the company and securities counts shown in our Key Metrics table below, have been granted extended payment terms in respect of service periods beginning on May 1, 2020 and June 1, 2020. There is no revenue recognized in our financial statements in respect of these five companies.

Canadian Transfer Agents Added to our Transfer Agent Verified Shares Program

In April 2020, we announced that transfer agents in Canada are now participating in our Transfer Agent Verified Shares Program. These firms provide reliable and current share data on approximately 89% of the Canadian companies traded on our OTCQX and OTCQB markets, as of August 1, 2020. Participating transfer agents include Computershare Canada, AST Trust Company Canada and TSX Trust.

Enhancements to our Suite of Compliance Products

We continued to expand the data included in our Small Cap Listed compliance product, which provides broker-dealers and compliance and risk management professionals with data points allowing them to evaluate OTC equity securities and roughly 2,300 “Small Cap” exchange-listed equity securities (those with a market capitalization below \$500 million).

In March 2020, we announced the introduction of “Hot Sector” industry data points to our Small Cap Listed compliance product, supplementing our existing data set to include flags identifying securities involved in “hot” industries, such as cannabis or blockchain. In April 2020, we introduced an additional “Hot Sector” designation assigned to companies engaged in activities connected to COVID-19. The new COVID-19 flag is included in our Compliance Analytics and Small Cap Listed Compliance file.

In June 2020, we announced the introduction of “Risk Scoring” to our Small Cap Listed compliance product. This enhancement provides quantitative metrics to compare compliance data points for OTC and Small Cap exchange-listed equities.

Enhanced Data Availability related to U.S. Banks

In April 2020, we introduced enhancements to the U.S. Bank Call Report data available on our website. Through this enhancement, users can access historical data trends and charting functionality on all Call Report data points for the more than 550 U.S. community banks trading

on the OTCQX, OTCQB and Pink markets.

In July 2020, we made Bank Holding Company corporate data available on our website. This latest enhancement provides more robust financial data for the majority of the U.S. community banks traded on our markets.

Virtual Investor Conferences® Business

Following our 2019 acquisition of assets related to the Virtual Investor Conferences® business (“VIC”), we have devoted internal resources to growing our VICSM business. As the COVID-19 pandemic continues to require remote working arrangements, we view the VIC offering as an important tool for issuers to communicate and engage with investors and potential investors. For the six months ended June 30, 2020, we hosted 13 VICs, with 147 companies participating, reaching more than 12,000 investors. We have a further 10 events scheduled through the rest of 2020, including a partner event with KCSA Strategic Communications focused on the Cannabis space and a Metals and Mining event, a Deutsche Bank Depositary Receipts conference, and a Life Sciences Investor Forum hosted jointly with Intrado. During the first six months of 2019, we hosted 10 events and for the year ended December 31, 2019 we hosted a total of 18 events.

Recent Regulatory Developments Impacting our Business

SEC Proposed Rule and Concept Release on Exchange Act Rule 15c2-11

On September 25, 2019, the SEC published a Proposed Rule and Concept Release on Publication or Submission of Quotations without Specified Information (the “Proposed Rule”). The Proposed Rule would amend Rule 15c2-11 under the Exchange Act (“Rule 15c2-11”), which governs the publication of quotes in interdealer quotation systems such as our OTC Link ATS.

The Proposed Rule would require, among other things, that current information about a company be publicly available in order for that company to become, or remain, the subject of broker-dealer quotes on OTC Link ATS. The Proposed Rule recognizes the OTC Markets Group disclosure standards and designations of those companies that provide current information to the public. As such, the Proposed Rule would largely allow companies to become or remain quoted based on meeting our current information standards and would permit broker-dealers to rely on those designations in submitting quotations on OTC Link ATS. This would, for the first time, give us the ability to bring certain securities onto our markets without relying on a broker-dealer reviewing information and filing a Form 211 with FINRA.

Companies that do not make current information available, such as those we designate as Pink No Information, as well as certain shell companies, would no longer be available for public broker-dealer quotations on OTC Link ATS. Unsolicited quotations in companies that do not make current information available would continue to be permitted, provided they are from investors not affiliated with the company. The Proposed Rule also introduces several new exceptions to the initial information review requirements of Rule 15c2-11, including for securities of certain issuers with higher capitalizations and those that have been the subject of underwritten offerings.

We submitted comments on the Proposed Rule on November 25, 2019, December 30, 2019 and April 8, 2020, outlining our response to the Rule Proposal. Specifically, our comments

support the Proposal's recognition of our market standards and processes, and otherwise focus on improving Rule 15c2-11 in the following areas:

- Modernize the standard of review with respect to the current information requirements under Rule 15c2-11.
- Simplify the requirements for initial and ongoing quoting and streamline FINRA's role in the administration of Rule 15c2-11.
- Adopt a bright-line definition to capture "shell companies" and impose additional disclosure requirements on these companies.
- Recognize a regulated "Expert Market" for broker-dealers and other institutional, professional or "Expert" investors to achieve best execution and meet other regulatory requirements in securities not eligible for public quoting under the Proposed Rule.
- Outside of Rule 15c2-11, impose additional disclosure requirements on insiders, affiliates and other powerful market participants.

We continue to engage with the SEC regarding the Proposed Rule and its impact on our markets. The SEC's Semiannual Regulatory Agenda, released on June 30, 2020, indicates that the agency intends to publish a final rule by October 2020. In the event that the SEC adopts a final rule based on the Proposed Rule, we would expect that our financial results would be impacted, however it is not yet possible to determine the materiality of such an impact.

Blue Sky Secondary Trading Exemptions for OTCQX and OTCQB

As of August 1, 2020, our OTCQX and OTCQB markets are exempt from state Blue Sky laws regarding secondary trading in 37 states – Alaska, Arkansas, Colorado, Connecticut, Delaware, Georgia, Hawaii, Idaho (OTCQX only), Indiana, Iowa, Kansas (OTCQX only), Kentucky, Louisiana, Maine, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Jersey, New Mexico, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Dakota, Tennessee, Texas, Utah, Vermont (OTCQX only), Virginia (OTCQX only), Washington, West Virginia, Wisconsin and Wyoming. State Blue Sky laws generally help investors make informed decisions by mandating that companies disclose accurate and current information when offering or marketing securities.

In connection with this initiative, in July 2018 the North American Securities Administrators Association ("NASAA"), the national organization of state securities regulators, announced a proposed model rule that would recognize OTC Markets Group as a "securities manual" with respect to securities on the OTCQX and OTCQB markets. If adopted by NASAA, the proposed model rule could lead to additional states recognizing these markets.

We believe recognition of our markets by state regulators and the resulting Blue Sky exemptions will make OTCQX and OTCQB more attractive to current and prospective companies. However, the potential impact of this initiative on our financial results is indirect, and therefore difficult to determine.

ESOP Fairness Act

On February 11, 2020, the ESOP Fairness Act (S.3270) (H.R.5851) was introduced by bi-partisan co-sponsors in the House and Senate. Employee stock ownership plans ("ESOPs") give employees a greater opportunity to take an ownership stake in the companies they work for, which aids employee retention and promotes small company growth. Current IRS regulations impose additional requirements on non-exchange listed companies that seek to offer an ESOP. We have long advocated for modernization of the rules regarding ESOPs. The ESOP Fairness Act would put qualified companies that meet established financial standards, such as those traded on the OTCQX market, on par with exchange listed companies by allowing them to fully access the benefits of public company ESOPs.

Following its introduction, the bill has gained additional co-sponsors in the House and Senate and we continue to support this legislation as it awaits further Congressional consideration. The progress of the bill, and the potential that it is ultimately enacted into law, will determine the extent to which the ESOP Fairness Act will impact our financial results.

Consolidated Audit Trail

In 2016, the SEC approved a National Market System (NMS) plan to create a comprehensive database of trading activity, or consolidated audit trail (“CAT”), for regulatory market surveillance purposes. Under the CAT plan, self-regulatory organizations (SROs) and FINRA member broker-dealers (such as OTC Link LLC) are required to report information to, and fund the operation of, the CAT. The operating committee for the CAT plan has adopted certain technical specifications and timeliness for compliance but has not yet established the funding requirements for the CAT. The initial phase of CAT reporting obligations related to OTC equity securities began on June 22, 2020. OTC Link LLC and its broker-dealer subscribers have reporting responsibilities as of that date.

As the next phases of the CAT plan become effective through 2021, the applicable CAT reporting requirements are likely to result in increased compliance and technology costs that may be material. It is not possible at this time to determine the potential impact on our financial results.

Thinly Traded Securities

On October 17, 2019, the SEC issued a Policy Statement on Market Structure Innovation for Thinly Traded Securities (the “Policy Statement”), seeking proposals to improve secondary market trading for smaller companies with less actively traded securities, including proposals to suspend or terminate unlisted trading privileges (“UTP”) for these companies and consolidate all trading onto a single exchange. UTP permits securities listed on a national securities exchange to be traded on other exchanges. Suspending UTP, or regulatory recognition of a single venue for small company trading, could negatively impact our Corporate Services business. On February 5, 2020, Nasdaq, Inc. submitted a proposal in response to the SEC’s Policy Statement, proposing a set of rules for thinly traded securities that would, among other things, suspend UTP (the “Nasdaq Proposal”). If the SEC were to approve the Nasdaq Proposal, it is possible that Nasdaq could increase its efforts to compete for listings of certain companies currently traded on our OTCQX and OTCQB markets.

The SEC has not yet commented on the Nasdaq Proposal, or proposed any formal rulemaking with respect to thinly traded securities and, as such, we are not able to determine the potential impact of this Policy Statement or the Nasdaq Proposal on our financial results.

NSCC Clearing Fund Proposal

On March 16, 2020, the National Securities Clearing Corporation (“NSCC”) filed a proposed rule change with the SEC to enhance the calculation of certain components of NSCC’s Clearing Fund formula, including charges applicable to illiquid securities (the “NSCC Proposal”). Under current NSCC rules, all OTC-traded securities are treated as “Illiquid Securities” and member firms are subject to additional Clearing Fund requirements with respect to such securities. The NSCC Proposal would, among other things, amend the definition of Illiquid Securities to include certain exchange-traded stocks and modify the Clearing Fund requirements applicable to Illiquid Securities. On June 24, 2020, the SEC published an order instituting proceedings to determine whether to approve or disapprove the NSCC Proposal (the “Order”).

We submitted comments in response to the NSCC Proposal and the Order on June 26, 2020 and July 21, 2020, respectively. Our comments urge the SEC disapprove the NSCC Proposal

and describe how any increase in the costs applicable to Illiquid Securities would disproportionately impact smaller broker-dealers accessing our markets and increase fees for investors seeking to settle and clear transactions in small company and OTC-traded securities.

OTC Link LLC is not an NSCC member. Therefore, the impact of the NSCC Proposal, and any resultant rulemaking or increase in clearing fees applicable to securities traded on our markets, on our financial results would be indirect and is not yet possible to determine.

Trends in Our Business

As noted above under *Recent Business Developments*, the COVID-19 pandemic has resulted, and is likely to continue to result, in significant economic disruption. Considerable uncertainty still surrounds the trajectory of the COVID-19 pandemic and its potential long-term effects on the global economy. The full scope and extent of the potential impact to our business is dependent on a number of factors which are highly uncertain and cannot be predicted, including the scope and duration of the pandemic, the effectiveness of our work from home arrangements, the ability of third party vendors to continue to support our operations, the extent and scope of the adverse impact to our subscribers and customers, the extent and duration of the global economic downturn and how quickly and to what extent normal economic and operating conditions can resume.

Our framework for managing through this challenging environment is grounded in four key principles: supporting our colleagues and prioritizing their safety and well-being; continuing to serve our subscribers and customers; ensuring that we take the measures necessary in the short-term to protect our current operations and remain financially strong; and remaining focused on the critical long-term strategic initiatives that position our business for future growth.

Nearly all of our employees continue to operate from fully remote working environments and non-essential business travel remains limited. We have taken a conservative and measured approach to having employees voluntarily return to our offices, one that provides for the health and safety of our colleagues and allows us to best serve our clients.

While operating from an entirely remote environment, we have continued to operate our businesses, including facilitating unprecedented trading volumes on our two SEC registered ATSs. We continue to support our broker-dealer community, the users of our market data and the diverse community of U.S. and global issuers that we serve. We have been able to remotely host virtual events for our Corporate Services customers via our VIC business and engage through digital content and our relationship management teams. We continue to devote resources to marketing and selling efforts focused on growing our subscriber base and adding issuers to our premium markets.

We operate three distinct business lines that generate diversified revenue streams and serve a broad range of market participants and a wide spectrum of U.S. and global issuers. We benefit from a subscription-based revenue model. For the six months ended June 30, 2020, 84% of our revenues derived from subscription-based arrangements that are recurring in nature. We ended the quarter with a strong balance sheet, \$25.0 million in cash on hand, no debt and access to a line of credit with JPMorgan Chase that makes up to \$1.5 million available for business operations.

The COVID-19 pandemic did not materially adversely affect our financial results for the three months ended June 30, 2020, with strong growth in our OTC Link business line and the impact

of price increases and user growth in our Market Data Licensing business, offsetting weaker results in our Corporate Services business (see *Financial Results*, below).

We have continued to see increased trading activity in the U.S. equity markets. In our OTC Link business, this has continued to drive significant transactional volume on our OTC Link ECN as well as a marked increase in the number of trade messages on our OTC Link ATS. For the three months ended June 30, 2020, we executed an average of 8,800 transactions per day on our OTC Link ECN, as compared to an average of 3,200 transactions per day during the second quarter of 2019. This contributed to significant revenue growth from our OTC Link ECN and was the primary driver of the 26% quarter over quarter increase in revenues from OTC Link. Launched in late 2017, our OTC Link ECN had 64 subscribers as of June 30, 2020. We expect to continue to attract new subscribers to the platform and to grow our market share. However, the total addressable market is relatively limited, and we expect that we may choose to compete more aggressively on pricing in order to capture additional market share.

In our Market Data Licensing business, we saw a 4% increase in professional users, from 21,766 professional users as at June 30, 2019 to 22,533 professional users as at June 30, 2020. During the same period, the number of professional subscribers to the U.S. Equities Securities Information Processor (“UTP SIP”), which includes information on securities listed on Nasdaq, declined by 3% to 278,085 users. We continue to have a relatively modest, but growing, share of UTP SIP users at 8.1% of the UTP SIP total as at June 30, 2020, up from 7.6% as at June 30, 2019. This likely reflects the smaller number of financial services firms that participate in the OTC markets versus the listed equities markets. Effective January 1, 2020, we raised the monthly subscription price for Level 1 and Level 2 professional users of our market data from \$35 and \$75 per month, respectively, to \$45 and \$85 per month, respectively. This, together with quarter over quarter growth in the number of users, helped drive a 16% increase in quarter over quarter revenues derived from professional users.

The number of non-professional users of our market data increased significantly during the second quarter from 11,694 users as of March 31, 2020 to 16,545 users as at June 30, 2020, an increase of 41%. This represented an 18% uptick versus the 13,991 non-professional users of our data as at June 30, 2019. Historically, and in the normal course of business operations, we have seen fluctuations in the number of non-professional users, in particular in response to volatility in the market and increased retail trading interest in “hot sectors”, including, most recently, the cryptocurrency and the cannabis sectors. We have also seen significant growth from retail investors in Canada.

We continue to focus resources on developing and enhancing our suite of compliance analytics and compliance data products. In April 2019, we launched Canari®, a web-based tool designed to provide users with a comprehensive view of quantitative compliance data for OTCQX, OTCQB, Pink and Grey Market securities (those without a public quote), as well as certain exchange listed securities. As of August 1, 2020, a total of 44 firms subscribe to our Compliance Data or Compliance Analytics products, representing most of the largest banks, custodians and clearing firms in the U.S. equities space. We have devoted significant resources to growing the subscriber base and believe that we have captured much of the total addressable market with respect to our existing product suite. Further, consolidation amongst the larger financial services firms, including, for example recent high-profile acquisitions of retail brokerage firms, is likely to continue, and could impact the addressable market for our compliance products and for our enterprise level market data products more generally. However, we are devoting internal resources to developing additional compliance products that address the needs of compliance professionals in other areas.

It is possible that the existing adverse economic conditions caused by the COVID-19 pandemic may worsen, become prolonged or lead to a severe economic recession. If that were to occur, we could see a decline in trading activity that could adversely affect our subscriber base and in turn our OTC Link and Market Data Licensing revenues. Further, our OTC Link broker-dealer subscribers, as well as enterprise level and other users of our Market Data Licensing products, could delay or defer purchasing decisions and product implementations, curtail their spending or cancel their services entirely.

In 2019 and 2020, we have continued to focus on providing enhanced disclosure and investor engagement tools to corporate issuers on our OTCQX and OTCQB markets. These initiatives include our acquisition of the VIC business; the expansion of our Research Marketplace, now the Premium Provider Directory, a platform for companies to access the services of equity research firms and other firms who offer services to the issuer community; as well as other visibility initiatives such as our tie-in with Proactive Investors and company video and podcast series.

We have continued to work closely with the Canadian Securities Exchange to jointly market a North American capital markets solution and, during the second half of 2020, plan to devote further resources to similar initiatives with other global exchanges. Through our continued selling efforts, joint marketing efforts and enhanced product offerings, we hope to attract additional issuers to our markets and in particular, to grow the number of domestic banks and the number of international issuers on our markets. It is not yet possible to predict the impact these initiatives will have on Corporate Services revenues.

As of June 30, 2020, 415 companies were traded on the OTCQX Best Market, down slightly versus 421 companies on the market as at the prior year quarter. For the 2020 annual subscription period, we achieved a 92% retention rate, representing a 2 percentage point decrease versus our retention rate for the 2019 annual subscription period. We saw a significant drop in new sales during the first quarter of 2020, with nine companies joining the OTCQX market, versus the 30 companies added to the market during the first quarter of 2019. In March, we adapted our selling efforts to the challenges of a fully remote working environment and restrictions on business travel. Further, the onset of the COVID-19 pandemic and the rapid deterioration in global economic conditions that occurred in the later part of the first quarter of 2020 resulted in a reduction in the number of companies that met our continuing market standards and likely contributed to qualified companies delaying or deferring purchasing decisions. During the quarter ended June 30, 2020, OTCQX sales began to rebound, with 19 companies added, and with 13 of those sales closing in the month of June. This compares to a total of 30 companies added during the quarter ended June 30, 2019.

As of June 30, 2020, there were 885 companies on the OTCQB Venture Market, down versus 916 companies as of June 30, 2019. For the year ended December 31, 2019, we saw a decline in new sales, with 202 companies added, down versus the 243 joins in 2018. New sales in 2019 were constrained by a combination of factors, including the strengthening of OTCQB eligibility requirements, which had the effect of reducing the overall addressable market. For the quarter ended March 31, 2020, we added 28 new companies to the OTCQB market, down significantly versus the 68 companies added in the prior year quarter. During the quarter ended June 30, 2020, we saw an uptick in sales on our OTCQB market, with 45 new joins, up from the 38 companies added to the market in the quarter ended June 30, 2019. However, voluntary non-renewal rates also increased on our OTCQB market. For service periods beginning April 1, May 1 and June 1, 2020 we had a voluntary non-renewal rate of 9%, 6% and 7%, respectively, as compared to an average non-renewal rate in 2019 of 6%.

The small and venture stage companies that the OTCQB market serves are among those most severely impacted by the rapid deterioration in global macro-economic conditions during the first half of 2020. U.S. companies make up a significant portion of the OTCQB market, and these companies have been adversely impacted by the unprecedented measures taken by state and local authorities across the U.S., including travel bans, shelter-in-place orders, and the mandatory closure of non-essential businesses. As noted above under *Recent Business Developments*, we have extended our regular payment terms in recognition of the challenges of the current business environment faced by many of our OTCQB customers.

The COVID-19 pandemic and the resultant deterioration in macro-economic conditions, especially if prolonged, is likely to cause a continuing dampening of demand for our Corporate Services products. Further, we are likely to see an increase in the number of customers, particularly OTCQB customers, who choose not to renew their services at the end of their service term. Given our subscription-based revenue model – and in particular in relation to our Corporate Services business, where subscription periods range from six months to fifteen months – any prolonged decline in sales, particularly if combined with an uptick in our non-renewal rates, would drive a decline in the number of companies on our premium markets, which would negatively impact our financial results both in the periods in which those declines occur, and in future periods.

For additional disclosure related to the potential impact of the COVID-19 pandemic on business operations, our financial results, see the risk factors discussed under the heading “Risk Factors” in our Quarterly Report for period ended March 31, 2020 and Annual Report for the year ended December 31, 2019.

Over the past several years, we have made significant progress in our goal of gaining regulatory recognition for our OTCQX and OTCQB markets. We are continuing to work with NASAA and individual state regulators to achieve full nationwide Blue Sky recognition for secondary trading activities on our OTCQX and OTCQB markets.

We intend to continue our efforts to gain federal regulatory recognition for our data driven market standards and compliance processes and to advocate for changes that provide issuers on our market with a more efficient public market. For example, we have made some headway in gaining additional House and Senate co-sponsors of the ESOP Fairness Act, legislation that would ease restrictions on qualified OTC issuers wishing to offer their employees access to an employee stock ownership plan, or ESOP, and we are making some progress in advancing regulatory change that would designate certain OTCQX and OTCQB securities as margin eligible. Recognition of our market standards by federal, state and international regulators provides investors with a benchmark against which to measure the quality of information available to them, while providing corporate issuers with a more efficient public market.

In September 2019, the SEC published a Proposed Rule that would amend Rule 15c2-11, which governs the publication of quotes in interdealer quotation systems such as our OTC Link ATS. The Proposed Rule would require, among other things, that current information about a company be publicly available in order for that company to become, or remain, the subject of broker-dealer quotes on OTC Link ATS.

In November and December 2019, and April 2020, we submitted comments to the Proposed Rule. We have devoted significant attention to advocating for changes that drive increased market efficiency and position us to better serve the needs of issuers, investors and other market participants and will continue to do so. In the event that the SEC adopts a final rule based on the Proposed Rule, we would expect that our financial results would be impacted. Certain aspects of the Proposed Rule amendments could result in additional revenue opportunities, while other of the amendments could result in a reduction in the number of

securities quoted on our markets and we expect to dedicate resources towards developing tailored business and product plans in light of the content of any final rule.

For additional disclosure related to our regulatory initiatives, see *Recent Regulatory Developments Impacting Our Business*, above.

As we navigate the challenging economic conditions resulting from the COVID-19 pandemic, we continue to evaluate both the current and future period impact of increasing costs related to our personnel, IT infrastructure and expense base more generally. Consistent with other companies in the financial technology sector, compensation and information technology costs make up a very significant proportion of our overall expenses, representing approximately 81% and 80% of our total operating expenses in the three months ended June 30, 2020 and 2019, respectively. We recognize the importance of attracting and retaining the talent required to develop our service offerings and manage our infrastructure. We have added headcount where we believe those additional resources can drive future earnings growth or are necessary to provide reliable services to our clients or to comply with our regulatory obligations. Our headcount increased from 99 as of June 30, 2019 to 102 as of June 30, 2020. We have not made and, at this time, do not plan to make any reductions to our existing headcount or compensation structure. As the COVID-19 pandemic unfolds, we will continue to evaluate our expense base in the context of our business operations and financial results. However, given that a significant portion of our costs are relatively fixed in nature, it may not be possible to reduce our operating expenses in line with reduced revenues, which would result in a contraction in our operating margin and a reduction in our operating income and earnings.

We have continued to make investments in the personnel that support our technology infrastructure. We believe such investments are necessary if we are to remain compliant with our regulatory obligations, including our obligations under Regulation Systems Compliance and Integrity ("Regulation SCI") and our CAT reporting responsibilities. We expect that future investments with respect to our Regulation SCI and CAT compliance will be material to our financial results.

How OTC Markets Group Generates Revenues

Each of our three business lines offers a distinct fee structure designed to serve its constituents. OTC Link operates OTC Link ATS, with a subscription model and usage-based fees, and OTC Link ECN, with transaction-based fees. Corporate Services charges application fees, and subscription fees on an annual and semi-annual basis. Market Data Licensing charges distribution and licensing fees. A significant proportion of our revenues are derived pursuant to subscription arrangements; consequently, a significant majority of our revenues are recurring in nature. For the first six months of 2020 and 2019, approximately 84% and 87%, respectively, of our revenues were derived pursuant to subscription arrangements.

Each of our business lines is described in detail below.

OTC Link

Our trading services business is operated by our wholly-owned subsidiary, OTC Link LLC. OTC Link LLC operates OTC Link ATS and OTC Link ECN.

Broker-dealers pay monthly subscription and connectivity fees to use OTC Link ATS. Our OTC Dealer[®] application provides broker-dealers a user interface into OTC Link ATS. Fees for use of the OTC Dealer application are based on the number of authorized users per subscriber and are discounted in graduated amounts in relation to total users per subscriber.

OTC Link ATS's FINRA member broker-dealer subscribers pay per security usage fees to (i) publish quotes and (ii) communicate and negotiate with counterparties on OTC Link ATS. Monthly OTC Link ATS position fees are based on the number of daily quote positions in Pink securities, with tiered pricing arrangements based on volume. Monthly OTC Link ATS message fees are based on the daily number of securities on OTC Link ATS for which trade messages are sent or received, with tiered pricing arrangements based on volume. The daily quoting and messaging fees allow subscribers to make unlimited quote updates in a single security and to send and receive an unlimited number of trade messages in a security on a given day.

OTC Link ECN generates transactional revenues based on share volume executed on the ECN matching platform. Broker-dealer subscribers pay a fixed fee per share executed where their orders remove posted liquidity on the ECN, while receiving a rebate on shares executed against their own posted liquidity.

Market Data Licensing

We generate Market Data Licensing revenues by providing our subscribers with access to the extensive market data, compliance data, company data and security information collected through our OTC Link and Corporate Services business lines.

Investors, traders, institutions, accountants, and regulators pay us monthly license fees to access this information. We offer a suite of market data licenses, priced at per enterprise or per subscriber rates, through direct connectivity, extranet connectivity, web interfaces, third-party market data redistributors and OMS providers. Depending on the license type, subscribers may distribute the market data on an internal-only basis, to clients, or to the public. We generate a majority of our Market Data Licensing revenues from sales through market data redistributors. The market data redistributors that offer our market data to their subscribers have historically remained long-term clients.

Certain of our market data license agreements include redistribution fees and rebates, which represented 10% of gross revenue from our Market Data Licensing business for each of the second quarter and first six months of 2020 and 2019.

Pricing information for each of our market data licenses is publicly available on our website.

We also charge for the right to display advertisements on www.otcmarkets.com. Website advertising revenue is included in our Market Data Licensing business line.

Corporate Services

We operate the OTCQX Best Market, the OTCQB Venture Market, and offer a suite of services to companies trading on all of our markets. These services include DNS for posting financial reports, disclosure documents and news releases; the VIC; Real-Time Level 2 Quote Display, a service that companies sponsor to provide their investors with access to free real-time level 2 quotes on www.otcmarkets.com and the company's website; and the Blue Sky Monitoring Service for analysis, review, and guidance about a company's compliance with each U.S. state's securities laws.

Companies that choose to have their securities designated as OTCQX securities do so annually, on a calendar year basis, while companies on the OTCQB market renew their services annually or semi-annually based on the anniversary of the date on which they joined the market. All companies traded on the OTCQX or OTCQB markets pay a one-time application fee and annual or semi-annual fees. These fees are fixed and do not vary based on outstanding shares, market capitalization, market segment or otherwise. Companies on both markets also receive DNS, Real-Time Level 2 Quote Display and access to the Blue Sky Monitoring Service. Pink companies may subscribe separately to DNS, Real-Time Level 2 Quote Display, and the Blue

Sky Monitoring Service. Companies can choose to subscribe to these services and pay fees on an annual or semi-annual basis.

Each of these services may be accessed through our www.otciq.com secure web portal.

Key Metrics

The table below presents key metrics for our OTC Link, Corporate Services and Market Data Licensing business lines for the three and six months ended June 30, 2020 and 2019.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2020	2019	2020	2019
OTC Link				
Number of active ATS subscribers ⁽¹⁾	85	90	85	90
Number of active ECN subscribers ⁽¹⁾	64	45	64	45
New Form 211 filings	71	86	146	183

Weighted-average shares outstanding, diluted	11,587,268	11,678,560	(1%)	11,627,683	11,688,693	(1%)

Revenues and Transaction-Based Expenses

The following table shows OTC Markets Group's gross revenues by business line and consolidated revenues less transaction-based expenses for the three and six months ended June 30, 2020 and 2019.

(in thousands)	Three Months Ended June 30,			Six Months Ended June 30,		
	2020	2019	% change	2020	2019	% change
OTC Link	\$ 3,659	\$ 2,898	26%	\$ 6,979	\$ 5,741	22%
Market data licensing	6,858	6,077	13%	13,603	12,149	12%
Corporate services	6,582	6,695	(2%)	13,121	13,136	-
Gross revenues	17,099	15,670	9%	33,703	31,026	9%
Redistribution fees and rebates	(706)	(637)	11%	(1,407)	(1,263)	11%
Net revenues	16,393	15,033	9%	32,296	29,763	9%
Transaction-based expenses	(607)	(172)	253%	(1,045)	(312)	235%
Revenues less transaction-based expenses	<u>\$ 15,786</u>	<u>\$ 14,861</u>	6%	<u>\$ 31,251</u>	<u>\$ 29,451</u>	6%

Gross Revenue increased by \$1.4 million and \$2.7 million, or 9%, in each of the second quarter and first six months of 2020, respectively, compared to the same periods in 2019.

- OTC Link revenues increased \$761 thousand, or 26%, and \$1.2 million, or 22%, in the second quarter and first six months of 2020, respectively. The increases were primarily a result of increased transactional volume on our OTC Link ECN and in the number of messages on our OTC Link ATS, both caused by heightened market volatility, which drove an increase in ECN revenues of \$698 thousand and \$1.1 million and additional revenues from OTC Link ATS messages of \$87 thousand and \$169 thousand, during the second quarter and first six months of 2020, respectively. The increases were partially offset by a contraction in the number of active broker-dealers on the OTC Link ATS platform.
- Market Data Licensing revenues increased \$781 thousand, or 13%, and \$1.5 million, or 12%, in the second quarter and first six months of 2020, respectively. The increases were primarily driven by an increase of \$499 thousand and \$948 thousand in revenues from professional user licenses in the second quarter and first six months of 2020,

respectively, consistent with an increase in the Company's monthly subscription fees for professional user licenses effective January 1, 2020, and period over period increases in reported users. The increases were further impacted by a \$134 thousand and \$295 thousand increase in revenues from internal, delayed and other data services in the second quarter and first six months of 2020, respectively, driven primarily by continued growth in the number of users of our compliance data products. The increase in broker-dealer enterprise license revenue of \$103 thousand in the second quarter and \$243 thousand in the first six months of 2020 was primarily a result of price increases effective January 1, 2020.

- Corporate Services revenues decreased \$113 thousand, or 2%, and \$15 thousand, or less than 1%, in the second quarter and first six months of 2020, respectively. Revenue from our OTCQB market decreased by \$233 thousand, or 7%, and \$362 thousand, or 6%, for the second quarter and first six months of 2020, respectively, a result of a decline in the number of companies on the market due to a significant slowdown in sales during 2020, combined with an uptick in our non-renewal rates. Decreases in OTCQB revenues were partially offset by increases in revenue from the OTCQX market of \$5 thousand and \$133 thousand, in the second quarter and first six months of 2020, respectively, with the number of OTCQX companies roughly flat as compared to prior year periods, but with an uptick in the second quarter in the number of service cancellations resulting in accelerated revenue recognition. Revenues from our VIC product increased \$51 thousand, or 46%, and \$99 thousand, or 61%, for the second quarter and first six months of 2020, respectively, a result of the increased number of events hosted during each period.
- Transaction-based expenses, which are comprised of rebates paid to subscribers providing liquidity on our OTC Link ECN, increased \$435 thousand, or 253%, and \$733 thousand, or 235%, in the second quarter and first six months of 2020, respectively. The changes reflected an increase in volumes traded on our OTC Link ECN.

Operating Expenses

The following table shows OTC Markets Group's consolidated operating expenses for the three and six months ended June 30, 2020 and 2019.

(in thousands)	Three Months Ended June 30,			Six Months Ended June 30,		
	2020	2019	% change	2020	2019	% change
Compensation and benefits	\$ 7,380	\$ 6,754	9%	\$ 14,867	\$ 13,751	8%
IT Infrastructure and information services	1,560	1,614	(3%)	3,087	3,141	(2%)
Professional and consulting fees	725	546	33%	1,214	935	30%
Marketing and advertising	167	242	(31%)	410	493	(17%)
Occupancy costs	534	605	(12%)	1,091	1,450	(25%)
Depreciation and amortization	415	380	9%	830	660	26%
General, administrative and other	213	293	(27%)	472	571	(17%)
Total operating expenses	<u>\$ 10,994</u>	<u>\$ 10,434</u>	5%	<u>\$ 21,971</u>	<u>\$ 21,001</u>	5%

Operating expenses increased \$560 thousand and \$970 thousand in the second quarter and first six months of 2020, respectively, or 5% in each period, compared to the same periods in 2019.

- Compensation and benefits expenses increased \$626 thousand, or 9%, and \$1.1 million, or 8%, in the second quarter and first six months of 2020, respectively. The increases primarily resulted from an increase in salary, bonus and payroll tax expenses, driven by higher headcount. The increases were further impacted by the cumulative impact of prior year stock compensation and accruals of paid time-off associated with higher than usual unused vacation hours. As a percentage of gross revenues, compensation and benefits costs represented 43% for the second quarter 2020 and 2019, respectively and 44% for the six months ended June 30, 2020 and 2019, respectively.
- IT infrastructure and information services expenses decreased \$54 thousand, or 3%, and \$54 thousand, or 2%, in the second quarter and first six months of 2020, respectively. The decreases were primarily related to a decrease in our data center costs of \$113 thousand, or 31%, and \$101 thousand, or 17%, in the second quarter and first six months of 2020, respectively, with costs in the prior year periods including one-time costs related to upgrades to infrastructure at our primary data center. The decreases were further impacted by a reduced maintenance spend in connection with hardware disposed of during 2019 as part of our move to new office headquarters, with a decrease of \$45 thousand and \$97 thousand in the second quarter and first six months of 2020, respectively. These decreases were partially offset by an increase in spend related to system security enhancements and development and support of our ECN system.
- Professional and consulting fees increased \$179 thousand, or 33%, and \$279 thousand, or 30%, in the second quarter and first six months of 2020, respectively. The increases were related to higher ECN clearing costs in line with higher transactional volume. The increases were further impacted by one-time legal costs incurred related to litigation and CAT compliance matters, as well as consulting fees incurred in relation to the evaluation of a potential acquisition.
- Marketing and advertising expenses decreased \$75 thousand, or 31%, and \$83 thousand, or 17%, in the second quarter and first six months of 2020, respectively, reflecting decreased spend on travel and entertainment.

- Occupancy fees decreased \$71 thousand, or 12%, and \$359, or 25%, in the second quarter and first six months of 2020. The decrease in the second quarter was primarily due to lower utilities cost. The decrease in the first six months was additionally impacted by overlapping rent expense incurred in the first quarter of 2019.
- Depreciation and amortization increased \$35 thousand, or 9%, and \$170 thousand, or 26%, in the second quarter and first six months of 2020, respectively. The increases reflected full period impacts of depreciation from our acquisition of Qaravan® Inc., capital investment made at the Company's corporate headquarters, and technology infrastructure upgrades at our primary and secondary data centers.
- General, administrative and other fees decreased \$80 thousand, or 27%, and \$99 thousand, or 17%, in the second quarter and first six months of 2020, respectively. The declines were primarily driven by project management and other one-time expenses related to our office move and incurred during 2019, and a decrease in bad debt expense in 2020.

Income from Operations and Operating Profit Margin

(in thousands)	Three Months Ended June 30,			Six Months Ended June 30,		
	2020	2019	% change	2020	2019	% change
Income from operations	\$ 4,792	\$ 4,427	8%	\$ 9,280	\$ 8,450	10%
Operating profit margin	29.2%	29.4%	(1%)	28.7%	28.4%	1%

Income from operations increased \$365 thousand, or 8%, and \$830 thousand, or 10%, in the second quarter and first six months of 2020, respectively, compared to the same periods in 2019. The Company's operating profit margin remained flat during the three and six months ended June 30, 2020 primarily as a result of the 9% increase in net revenues, partially offset by a 5% increase in operating expenses.

Net Income

(in thousands, except shares and per share data)	Three Months Ended June 30,			Six Months Ended June 30,		
	2020	2019	% change	2020	2019	% change
Income before provision for income taxes	\$ 4,802	\$ 4,450	8%	\$ 9,306	\$ 8,510	9%
Provision for income taxes	571	883	(35%)	1,215	1,396	(13%)
Effective income tax rate	11.9%	19.8%	(40%)	13.1%	16.4%	(20%)
Net income	<u>\$ 4,231</u>	<u>\$ 3,567</u>	19%	<u>\$ 8,091</u>	<u>\$ 7,114</u>	14%

Net income increased \$664 thousand, or 19%, and \$977 thousand, or 14%, in the second quarter and first six months of 2020, respectively, compared to the same periods in 2019. The increases were due to the increase in income from operations and a decrease in the Company's effective tax rate. The decreases in the Company's effective tax rate were primary a result of the reversal during the quarter ended June 30, 2020 of previously recorded uncertain state tax expenses based on the Company being accepted into a state's Voluntary Disclosure Agreement ("VDA") program during the second quarter of 2020. The release of tax expense reserves in respect of years prior to the VDA period had the effect of decreasing the Company's effective tax rate for the second quarter and first six months of 2020 by 9.6% and 5.0%, respectively.

Liquidity and Capital Resources

Our liquidity is primarily derived from our working capital and cash flows from operations. We require cash to support our current operating levels, fund strategic growth initiatives, develop new services and enhance existing services, make capital expenditures, fund dividends, and pay federal, state and local corporate taxes. We expect that our operations will provide sufficient cash to fund our strategic initiatives. We have no outstanding debt and \$1.5 million available for business operations under our line of credit, which gives us additional flexibility in managing our cash flows.

Cash available for operations

The following table presents cash available for operations, which consists of cash as of June 30, 2020 and December 31, 2019.

(in thousands)	June 30, 2020	December 31, 2019	% change
Cash available for operations	\$ 25,007	\$ 28,217	(11%)

Cash available for operations decreased \$3.2 million to \$25.0 million as of June 30, 2020, from \$28.2 million as of December 31, 2019. The Company generated \$4.4 million of cash from operations during the first six months of 2020. The Company utilized operating cashflows and cash on hand to fund \$404 thousand in IT infrastructure enhancements and to pay \$3.5 million in quarterly dividends and \$3.5 million in respect of repurchases of our common stock.

Cash Flow

The following table presents sources and uses of cash flows during the six months ended June 30, 2020 and 2019.

	Six Months Ended June 30,		
	2020	2019	% change
Net cash provided by operating activities	\$ 4,390	\$ 5,129	(14%)
Net cash used in investing activities	(404)	(4,647)	(91%)
Net cash used in financing activities	(7,196)	(5,329)	35%
Net Increase (decrease) in cash and restricted cash	\$ (3,210)	\$ (4,847)	(34%)

Cash provided by operating activities

Cash provided by operating activities for the six months ended June 30, 2020 was \$4.4 million, as compared to \$5.1 million during the same prior year period. Cash provided by operating activities for the first six months consisted of net income of \$8.1 million, adjusted for non-cash items of \$2.6 million and changes in assets and liabilities of \$6.3 million. Adjustments for non-cash items to net income primarily consisted of depreciation and amortization expense of \$830 thousand and stock-based compensation expense of \$1.6 million, partially offset by excess tax benefits related to stock-based compensation expense of \$363 thousand. The decrease in cash provided by operating activities was primarily a result of a \$2.6 million decrease in cash flows resulting from changes in assets and liabilities. This was partially offset by a \$977 thousand increase in net income and a \$868 thousand increase in the impact of non-cash items.

Cash used in investing activities

Cash used in investing activities during the six months ended June 30, 2020 was \$404 thousand, as compared to \$4.6 million during the same prior year period. The cash used in investing activities for the first six months of 2020 primarily related to purchases of IT equipment for our data centers, while cash used in the prior year period consisted of spend related to leasehold improvements and IT infrastructure for our new corporate headquarters, the acquisition of Qaravan Inc., as well as upgrades to our data center infrastructure.

Cash used in financing activities

Cash used in financing activities during the six months ended June 30, 2020 was \$7.2 million, as compared to \$5.3 million during the same prior year period. The cash used in both periods was primarily related to dividends paid to holders of our Class A common stock. The increase in the use of cash in the current period was primarily related to an increase in the amount of treasury stock purchased.

Capital resources and working capital

OTC Markets Group's working capital at June 30, 2020 was \$12.3 million, an increase of \$2.7 million, or 28%, from \$9.6 million at December 31, 2019. Working capital includes certain non-operating assets and liabilities, such as prepaid income taxes, deferred tax assets and liabilities, and income taxes payable. The increase in working capital during the six months ended June 30, 2020 was primarily attributable to cash generated by operating activities.

Line of Credit

On July 7, 2012, the Company obtained a line of credit with JPMorgan Chase (the "Line of Credit") that made up to \$1.5 million available for business operations. The effective interest rate of the Line of Credit is benchmarked to the London Inter Bank Offered Rate ("LIBOR"). The Line of Credit has been extended through June 25, 2021. We have not drawn funds on the Line of Credit. Under the terms of the Line of Credit, we agreed to fulfill certain affirmative and negative covenants and other specified terms. At June 30, 2020, the Company was in compliance with all of the covenants and other terms of the Line of Credit.

Operating Leases

We have entered into operating lease agreements for our offices and recognize rent expense on a straight-line basis over the terms of the leases.

Off-Balance Sheet Arrangements

None.

Item 5. Legal proceedings

There are no current, past, pending or threatened legal proceedings or administrative actions either by or against OTC Markets Group that could have a material effect on our business, financial condition or operations. Our securities are not a party to any past or pending trading suspensions by a securities regulator.

Item 6. Defaults upon senior securities

None.

Item 7. Other information

None.

Item 8. Exhibits

- Exhibit 3.1 Unaudited interim condensed consolidated financial statements
- Exhibit 3.11 Advised Line of Credit Note by and between JPMorgan Chase Bank, N.A. and OTC Markets Group Inc.
- Exhibit 9.1 Certification of principal executive officer
- Exhibit 9.2 Certification of principal financial officer

Item 9. Certifications

Current certifications are filed as Exhibits 9.1 and 9.2 to this Quarterly Report.

(in thousands, except share and per share information)

Note 1. Description of Business

Overview

OTC Markets Group Inc. (“OTC Markets Group” or the “Company”) (OTCQX: OTCM) operates the OTCQX® Best Market, the OTCQB® Venture Market, and the Pink® Open Market for 11,000 U.S. and global securities. Through OTC Link® ATS and OTC Link ECN, each a Securities and Exchange Commission (“SEC”) registered Alternative Trading System (“ATS”) operated by the Company’s wholly owned subsidiary OTC Link® LLC, a Financial Industry Regulatory Authority, Inc. (“FINRA”) and SEC registered broker-dealer, the Company enables investors to easily trade through the broker of their choice and empowers companies to improve the quality and availability of information for their investors.

The Company has three business lines: OTC Link, Market Data Licensing and Corporate Services.

- OTC Link– OTC Link LLC operates two ATSS, OTC Link ATS and OTC Link ECN, which provide trading services to FINRA member broker-dealer subscribers.
- Market Data Licensing – OTC Markets Group is a central source of real-time data, delayed and historical market data, company financial data, security master data, corporate reference data and compliance data for securities traded on the OTCQX, OTCQB and Pink markets. The Market Data Licensing business line provides investors, traders, institutions, and regulators with a suite of enterprise and user market data licenses, offered via direct or extranet connectivity, web interfaces, through third party market data redistributors or order management systems (OMSs).
- Corporate Services – OTC Markets Group operates the OTCQX Best Market and the OTCQB Venture Market and offers companies a suite of services that are designed to create a better informational experience for investors by facilitating public disclosure and communication with investors, promoting greater transparency and allowing companies to demonstrate regulatory compliance and mitigate market risk. These services include the OTC Disclosure & News Service®, Virtual Investor Conferences®, Real-Time Level 2 Quote Display and Blue Sky Monitoring Service.

Corporate Form

OTC Markets Group Inc. is a Delaware corporation. The Company is a “C” corporation for federal, state, and local income tax purposes.

Note 2. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying unaudited interim condensed consolidated financial statements are prepared in accordance with generally accepted accounting principles in the United States of America (“U.S. GAAP”) and include the accounts of the Company and its wholly-owned subsidiaries, OTC Link LLC, OTC Markets Group International Ltd and Qaravan® Inc., and reflect all adjustments, consisting of normal recurring adjustments, that are, in the opinion of management, necessary for a fair statement of the results for the period. All intercompany transactions have been eliminated in consolidation. Management has assessed the segment reporting standard, analyzed how the chief operating decision maker (the Chief Executive Officer) manages the businesses, assesses performance and allocates resources; and has concluded that the Company has one reportable segment. Refer to Note 2, *Summary of*

OTC MARKETS GROUP INC.

Notes to Unaudited Condensed Consolidated Financial Statements (continued)

(in thousands, except share and per share information)

Significant Accounting Policies, from the Company's Annual Report for the year ended December 31, 2019 for a full discussion of significant accounting policies.

The interim condensed consolidated financial statements are unaudited and should be read in conjunction with the audited financial statements of the Company as of and for the year ended December 31, 2019. Operating results for the three and six months ended June 30, 2020 are not necessarily indicative of the results that may be expected for the year ending December 31, 2020.

Use of Estimates

The preparation of these unaudited interim condensed consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the consolidated financial statements, and the reported amounts of revenue and expenses during the reporting periods. Estimates included in the consolidated financial statements include allowance for doubtful accounts, certain accrued expenses, stock-based compensation expense, the incremental borrowing rate used to calculate the present value of the operating lease liabilities, income tax reserve and provision for income taxes. Actual results could differ from those estimates. As the impact of the COVID-19 pandemic continues to unfold and additional information becomes available, some of our estimates and assumptions may change in future periods.

Recently Adopted Accounting Standards

In June 2016, the Financial Accounting Standards Board ("FASB") issued ASU 2016-13, *Measurement of Credit Losses on Financial Instruments*, which amends previously issued guidance regarding the impairment of financial instruments by creating an impairment model that is based on expected losses rather than incurred losses. ASU 2016-13 is effective for annual periods beginning after December 15, 2019. On January 1, 2020, the Company adopted the standard using the modified retrospective approach permitted by the standard. The adoption had no material impact on our Consolidated Statements of Income.

In August 2018, the FASB issued ASU 2018-13, *Fair Value Measurement (Topic 820): Disclosure Framework—Changes to the Disclosure Requirements for Fair Value Measurement*, which amends Topic 820 to modify, remove, and add certain fair value measurement disclosure requirements. ASU 2018-13 is effective for interim and annual periods beginning after December 15, 2019, with early adoption permitted. The Company adopted the standard effective January 1, 2020. The adoption had no material impact on the consolidated financial statements.

In August 2018, the FASB issued ASU 2018-15, *Intangibles—Goodwill and Other—Internal-Use Software (Subtopic 350-40): Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract*, which clarifies the accounting for implementation costs in cloud computing arrangements. ASU 2018-15 requires a customer in a cloud computing arrangement that is a service contract to follow the internal-use software guidance under Subtopic 350-40 to determine which implementation costs to capitalize as assets. ASU 2018-15 is effective for interim and annual periods beginning after December 15, 2019, with early adoption permitted. On January 1, 2020, the Company adopted the standard using the prospective approach to all implementation costs incurred after its adoption. The adoption had no material impact on the consolidated financial statements.

Recently Issued Accounting Standards Not Yet Adopted

There are no applicable material accounting pronouncements that have been issued but are not yet adopted.

Note 3. Revenue Recognition

Substantially all of our revenues are derived from contracts with customers. Revenues are recognized when control of the promised goods or services is transferred to our customers, in an amount that reflects the consideration we expect to be entitled to, in exchange for those goods or services. In accordance with Topic 606, we evaluate our contracts with customers based on a five-step methodology. We: (1) Identify the contract with the customer; (2) Identify the performance obligations under the contract; (3) Determine the transaction price; (4) Allocate the transaction price to separate performance obligations; and (5) Recognize revenue when each performance obligation is satisfied. Certain of our ancillary Market Data Licensing and Corporate Services offerings, including news release and advertising services, are usage-based and are delivered at a point in time. Accordingly, we recognize revenue upon delivery of the service in line with the contractual agreement. Neither represent a material source of revenues.

OTC Link

OTC Link LLC operates two ATSS: OTC Link ATS and OTC Link ECN. Broker-dealers pay monthly subscription fees that permit access to the trading system, including the OTC Dealer[®] application and related support and updates, if applicable, during the contract term. Fees for such access are based on the number of authorized users per subscriber and are calculated based on a tiered pricing arrangement. These fees are invoiced monthly and in advance of the monthly service period. The Company satisfies its performance obligations over the contract term and records revenue from these fees ratably over the month, with the unrealized portion recorded as deferred revenue on the Company's Balance Sheet. The Company pays rebates to certain resellers of OTC Link ATS services. These are invoiced monthly based on the fixed rate specified in the applicable contract and recorded as a reduction of gross revenues. In addition to the before mentioned monthly access fees, broker-dealer subscribers to OTC Link ATS pay usage-based fees to publish quotes and deliver trade messages electronically to counterparties. Those fees are recognized at the point in time when the performance obligation, the publication of the quote or delivery of the message, is satisfied. OTC Link ECN generates revenues based on share volume executed on the ECN matching platform. Broker-dealer counterparties pay a fixed fee per share executed where their orders remove posted liquidity on the ECN, while receiving a rebate on shares executed against their own posted liquidity. These fees are invoiced monthly, in arrears and are due upon receipt. The Company recognizes transactional based revenue earned upon the execution of a trade, when the Company's obligations are substantially met. Similarly, payments made to subscribers providing liquidity are recognized upon execution and are recorded as transaction-based expenses within the Consolidated Statements of Income.

Market Data Licensing

Market Data Licensing generates revenues by providing our subscribers with continuous access to the market data, compliance data, company data and security information collected through our OTC Link and Corporate Services business lines. Subscribers pay monthly fees to access this information priced at per enterprise or per subscriber rates. Market Data Licensing revenues are recognized ratably over the term of the contract period, beginning on the date on

OTC MARKETS GROUP INC.

Notes to Unaudited Condensed Consolidated Financial Statements (continued)

(in thousands, except share and per share information)

which the data is made available to the customer, as our continuing performance obligations are met.

The majority of Market Data Licensing revenues result from sales through redistributors, some of whom earn redistribution fees based on a contractual fixed rate. These fees are invoiced monthly based on the contractual period and are recognized as a reduction of gross revenues. The vast majority of our redistribution fees and rebates are related to these arrangements with market data redistributors.

Corporate Services

Corporate Services generates revenues from the OTCQX Best Market and OTCQB Venture Market and from a suite of other services. Issuers pay annual or semi-annual subscription fees upfront to have their securities traded on the OTCQX or OTCQB markets and to subscribe to our various other services. We recognize these revenues ratably over time based on the subscription period as the performance obligations are met and the transfer of services occurs. Issuers pay one-time non-refundable application fees. These fees are not related to distinct performance obligations and are recognized ratably over the contractual service period, which is one year or shorter.

The following tables present our revenues disaggregated by timing of revenue recognition:

	Three Months Ended June 30,					
	2020			2019		
	Point in Time	Over Time	Total	Point in Time	Over Time	Total

Accounts Receivable

As of June 30, 2020 and December 31, 2019, accounts receivable net of allowance for doubtful accounts were \$6.3 million and \$5.2 million, respectively. The allowance for doubtful accounts reflects our best estimate of expected losses in the accounts receivable balance. The Company determines the allowance based on historical experience, the age of the accounts receivable balances, specific account information, and our estimates of current and future economic conditions that may affect our customers' ability to pay.

Deferred Revenue

Deferred revenue primarily represents our contractual performance obligations related to annual and semi-annual Corporate Services subscription fees, as well as monthly Market Data Licensing and OTC Link license subscription fees. The following table presents the changes in deferred revenue during the first six months ended June 30, 2020 and 2019:

	Six Months Ended June 30,	
	2020	2019
Balance at beginning of period	\$ 15,815	\$ 16,070
Net changes	(3,687)	(2,968)
Balance at end of period	12,128	13,100

During the first six months ended June 30, 2020 and 2019, we recognized \$10.4 million and \$10.6 million of revenue, respectively, that was included in the deferred revenue balance at the beginning of the year.

OTC MARKETS GROUP INC.

Notes to Unaudited Condensed Consolidated Financial Statements (continued)

(in thousands, except share and per share information)

Payment Terms

Our payment terms vary by business line and the products or services offered and range from due upon receipt to net 45 days. For certain products, we require payment before services are rendered.

Note 4. Concentrations and Uncertainties

During both the three and six months ended June 30, 2020 and 2019, Market Data Licensing revenues earned through one market data redistributor amounted to approximately 10% of gross revenues. As of June 30, 2020 and 2019, accounts receivable from that same redistributor amounted to 30% and 23% of accounts receivable, respectively.

Note 5. Fair Value of Financial Instruments

The Company accounts for certain financial instruments at fair value, in accordance with the provisions of the standard for fair value measurement, which utilizes a three-tier hierarchy to determine the fair value of financial assets and liabilities based on the quality of observable inputs and enhances disclosure requirements for fair value measurement. The three tiers are:

- Level 1 – Quoted prices (unadjusted) for identical assets or liabilities in an active market;
- Level 2 – Other inputs that are directly or indirectly observable in the market; and
- Level 3 – Unobservable inputs that are supported by little or no market activity.

The fair value of a financial instrument is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date and in the principal or most advantageous market for that asset or liability.

Assets and liabilities on the unaudited interim condensed Consolidated Balance Sheets that are measured at carrying value, which approximates fair value due to the short-term nature of these balances, include prepaid expenses, accrued expenses and other current liabilities and deferred revenue. These balances are classified as Level 1 and Level 2 in the fair value hierarchy.

Note 6. Property and Equipment

Property and equipment consisted of the following:

	June 30, 2020	December 31, 2019	Estimated useful life (years)
Computer software	\$ 2,514	\$ 2,499	2 - 3
Computer equipment	5,342	5,309	3 - 5
Furniture and fixtures	691	691	5 - 7
Leasehold improvements	2,804	2,804	Term of lease
Total property and equipment	11,351	11,303	
Accumulated depreciation and amortization	(5,635)	(4,885)	
Total property and equipment, net	\$ 5,716	\$ 6,418	

Depreciation and amortization on property and equipment included in the unaudited interim condensed Consolidated Statements of Income amounted to \$415 and \$830 for the three and six months ended June 30, 2020, respectively, and \$372 and \$639 during the comparable three and six months in 2019, respectively.

OTC MARKETS GROUP INC.

Notes to Unaudited Condensed Consolidated Financial Statements (continued)

(in thousands, except share and per share information)

Computer software includes approximately \$135 and \$236 in unamortized website development costs, as of June 30, 2020 and December 31, 2019, respectively.

Note 7. Leases

The Company has two non-cancelable operating leases. One is for office space at 300 Vesey Street, New York, NY that was executed in October 2018 and expires on December 30, 2031. The other is for office space at 100 M Street SE, Washington, D.C. that was amended in May 2016 and expires on June 30, 2021. These operating leases are recorded as operating lease right-of-use assets on the Company's Consolidated Balance Sheet as of June 30, 2020 and represent the Company's right to use of the underlying asset during the lease term. The Company's obligation in respect of future payments due under the leases is included in accrued expenses, other current liabilities and in the operating lease liabilities section on the Company's Consolidated Balance Sheet as of June 30, 2020.

The components of lease expense were as flows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2020	2019	2020	2019
Operating Lease cost	\$ 497	\$ 497	\$ 994	\$ 994
Short-term Lease cost	4	5	8	269
Total lease cost	\$ 501	\$ 502	\$ 1,002	\$ 1,263

Supplemental cash flow information related to leases was as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2020	2019	2020	2019
Cash Paid for operating lease liabilities	\$ 496	\$ 202	\$ 993	\$ 316
Right-of-use assets obtained in exchange for operating lease obligations	-	-	-	-

Supplemental balance sheet information related to leases was as follows:

	June 30, 2020	December 31, 2019
Operating lease right-of use assets	\$ 15,438	\$ 16,018
Other current liabilities	1,941	1,939
Operating lease liabilities	14,948	15,529
Total operating lease liabilities	16,889	17,468
Weighted-average remaining lease term	11 Years	12 Years
Weighted-average discount rate	4.8%	4.8%

Maturities of lease liabilities were as follows:

Remainder of 2020	\$ 995
2021	1,875
2022	1,759
2023	1,759
2024	1,875
Thereafter	13,920
Total lease payments	22,183
Less imputed interest	(5,294)
Total	\$ 16,889

OTC MARKETS GROUP INC.

Notes to Unaudited Condensed Consolidated Financial Statements (continued)

(in thousands, except share and per share information)

As of December 31, 2019, maturities of lease liabilities were as follows:

2020	\$	1,988
2021		1,875
2022		1,759
2023		1,759
2024		1,875
Thereafter		13,920
Total lease payments		23,176
Less imputed interest		(5,708)
Total	\$	17,468

Note 8. Goodwill and Intangible Assets

Goodwill and intangible assets consisted of the following:

	June 30, 2020	December 31, 2019	Estimated useful life (years)
Goodwill	\$ 251	\$ 251	Indefinite
Intangible assets:			
Website	\$ 100	\$ 100	2
Subscription services	150	150	8-15
Distributor relations	27	27	15
Intellectual property	40	40	Indefinite
Total intangible assets	317	317	
Accumulated amortization	(277)	(277)	
Intangible assets, net	\$ 40	\$ 40	

Amortization expense for finite-lived intangible assets was \$0 and \$9 for the three and six months ended June 30, 2020 and \$0 and \$13 for the three and six months ended June 30, 2019. No impairment charges were recorded to goodwill or intangible assets during the three and six months ended June 30, 2020 or 2019.

Note 9. Accrued Expenses and Other Current Liabilities

Accrued expenses and other current liabilities consisted of the following:

	June 30, 2020	December 31, 2019
Payroll and employee withholdings	\$ 3,698	\$ 5,506
Accrued operating expenses	1,546	1,709
Current operating lease liabilities	1,941	1,939
Total accrued expenses and other current liabilities	\$ 7,185	\$ 9,154

Payroll and employee withholdings primarily consisted of accrued discretionary bonus, discretionary employer 401(k) contribution, vacation and sales commission. The balance of payroll and employee withholdings as of December 31, 2019 represents a full year of accrual, which was paid out in February 2020.

OTC MARKETS GROUP INC.

Notes to Unaudited Condensed Consolidated Financial Statements (continued)

(in thousands, except share and per share information)

Note 10. Stock-Based Compensation

OTC Markets Group grants stock options and restricted stock awards (“RSAs”) to employees and directors. The grant date fair value of each stock option is estimated using the Black-Scholes option pricing model and is amortized into compensation expense on a straight-line basis over the requisite service period, which is generally the vesting period. The grant date fair value of each RSA is based on the closing stock price on the day prior to the grant date. These charges are included in compensation and benefits expense and professional and consulting fees on the unaudited interim Condensed Consolidated Statements of Income.

A summary of the Company’s option activity for the six months ended June 30, 2020 is as follows:

(in thousands, except W/A exercise price)	Stock options	Weighted-average exercise price	Aggregate intrinsic value	Remaining contractual term (years)
Outstanding, January 1, 2020	662	\$ 21.17	\$ 9,186	6.56
Granted	44	32.81	22	
Exercised	(47)	16.22	691	
Outstanding, June 30, 2020	659	\$ 22.31	\$ 5,541	6.38
Exercisable, June 30, 2020	327	\$ 15.49	\$ 4,769	4.44

The Company recognized compensation expense related to stock options, net of estimated forfeitures, of \$152 and \$169 for the three months ended June 30, 2020 and 2019, respectively, and \$321 and \$317 for the six months ended June 30, 2020 and 2019, respectively. Management has estimated forfeiture rates of 5% for stock options granted to management and 23% for stock options granted to other employees.

At June 30, 2020, unrecognized compensation cost related to non-vested stock options was \$1.4 million, which will be recognized over approximately 3.5 years.

A summary of the Company’s restricted stock activity for the six months ended June 30, 2020 is as follows:

(in thousands, except W/A fair value)	Restricted stock	Weighted-average fair value	Aggregate intrinsic value
Outstanding, January 1, 2020	276	\$ 24.57	\$ 9,669
Granted	92	34.20	3,173
Vested	(92)	22.19	3,146
Outstanding, June 30, 2020	276	\$ 28.57	\$ 8,286

The Company recognized compensation expense, net of estimated forfeitures, of \$529 and \$453 for the three months ended June 30, 2020 and 2019, respectively, and \$1,232 and \$1,054 for the six months ended June 30, 2020 and 2019, respectively. Management has estimated forfeiture rates of 9% for RSAs granted to management and 15% for RSAs granted to other employees. In addition, the Company also recognized professional fees of \$37 for each of the three months ended June 30, 2020 and 2019, and \$75 for each of the six months ended June 30, 2020 and 2019, related to the issuance of RSAs to the Board of Directors.

At June 30, 2020, unrecognized compensation cost related to non-vested RSAs totaled \$6.2 million, which will be recognized over approximately 3.5 years.

OTC MARKETS GROUP INC.

Notes to Unaudited Condensed Consolidated Financial Statements (continued)

(in thousands, except share and per share information)

Note 11. Contingencies

Partial Self-Insurance Reserves

Effective January 1, 2018, the Company switched from a fully insured employee health insurance policy to a partially self-insured plan. Under the new plan, the Company contracted a third-party administrator ("TPA") to access healthcare carriers, process claims, and facilitate the provision of specific and aggregate stop-loss coverage to limit our total exposure under the program. Accordingly, we record the TPA's administrative fees, insurance carrier fees, and stop-loss coverage premiums, as well as expected claims costs, on a straight-line basis over the annual coverage period. The Company's total cost of claims represents 80% of the Company's maximum liability for claims based on coverage provided under our specific and aggregate stop-loss policies. As claims are reported and paid, the liability is relieved. As of June 30, 2020, the estimated claims, fees and premiums accrued were higher than the premiums and fees paid to the TPA by \$96. This amount was recorded as a current liability in the accrued operating expenses section on our Consolidated Balance Sheet.

Legal Matters

There are no current, past, pending or threatened legal proceedings or administrative actions either by or against OTC Markets Group that could have a material effect on its business, financial condition or operations. OTC Markets Group is not a party to any past or pending trading suspensions by a securities regulator.

Note 12. Stockholders' Equity

Common Stock

The Company has one class of shares, Class A common stock, outstanding. Holders of Class A common stock, which include holders of unvested RSAs, are entitled to receive such dividends and other distributions in cash, stock of any corporation or property of the Company as may be authorized and declared by the Board of Directors from time to time out of the assets or funds of the Company legally available for the payment of dividends. Upon the voluntary or involuntary liquidation, dissolution or winding up of the Company, holders of Class A common stock are entitled to a pro rata share of the net assets of the Company available for distribution in proportion to the number of shares of Class A common stock held by each.

The Company is authorized to issue 14,000,000 shares of common stock at \$0.01 par value. As of June 30, 2020 there were a total of 12,297,664 shares issued and 11,661,030 shares outstanding. As of December 31, 2019 there were a total of 12,189,022 shares issued and 11,655,326 shares outstanding.

Treasury Stock

In August 2011, the Board of Directors authorized the Company to repurchase up to 300,000 shares of Class A common stock in compliance with Rule 10b-18 under the Securities Exchange Act of 1934 (the "Exchange Act"). On March 6, 2020, the Board of Directors refreshed the Company's stock repurchase program, authorizing the repurchase of up to 300,000 shares of Class A common stock.

During the six months ended June 30, 2020, the Company repurchased 102,938 shares of Class A common stock at an average price of \$34.20 per share for a total of \$3,520. During the same prior year period, the Company repurchased 46,711 shares of Class A common stock at an average price of \$29.75 per share for a total of \$1,390. All repurchased shares are held in

OTC MARKETS GROUP INC.

Notes to Unaudited Condensed Consolidated Financial Statements (continued)

(in thousands, except share and per share information)

treasury. As of June 30, 2020, there are 300,000 shares remaining to be purchased under the stock repurchase program.

Dividends

The Company declared a cash dividend of \$0.15 per Class A share during each of the three months ended June 30, 2020 and 2019, totaling \$1,748 and \$1,745, respectively. The Company declared cash dividends of \$0.30 per Class A share during each of the six months ended June 30, 2020 and 2019, respectively, totaling \$3,497 and \$3,488, respectively.

Equity Incentive Plan

The Company's Equity Incentive Plan (the "Plan"), as adopted by the Board of Directors on May 7, 2019 and approved by a vote of the Company's shareholders on December 19, 2019, provides for the grant of incentive stock options, non-statutory stock options, restricted stock, restricted stock units, stock appreciation rights, performance units and performance shares, and governs options awarded (refer to Note 11, *Stock-Based Compensation*). In each of November 2019 and 2018, the Board of Directors authorized the increase in the number of shares available for issuance under the Plan by 200,000 shares.

Note 13. Income Taxes

The Company's effective tax rate was 11.9% and 19.8% for the three months ended June 30, 2020 and 2019, respectively, and 13.1% and 16.4% for the six months ended June 30, 2020 and 2019, respectively. The rates reflect the inclusion of state and local income taxes at the federal statutory rate of 21%. The effective tax rate differs from the federal statutory rate primarily due to the recognition of the U.S. federal research and development credit, the impact of the Foreign-Derived Intangible Income deduction available pursuant to provisions of the Tax Cuts and Jobs Act, and the impact of excess tax benefits from share-based compensation. Our effective tax rate is based on forecasted annual results which may fluctuate significantly through the rest of the year as the result of the economic impact of the COVID-19 pandemic. During the first six months of 2020 and 2019, we recognized an income tax benefit related to the excess tax benefit on stock-based compensation of \$363 and \$524, respectively.

On March 27, 2020, the Coronavirus Aid, Relief, and Economic Security Act ("CARES Act") was enacted. The CARES Act included modifications for net operating loss carryovers and carrybacks, provisions allowing for the immediate refund of alternative minimum tax credits, and a technical correction to the treatment of qualified improvement property under the Tax Cuts and Jobs Act. As of March 31, 2020, the Company has completed its initial evaluation of the CARES Act and concluded that the provisions will not have an impact on our effective tax rate. Pursuant to the technical correction referenced above, the Company expects to claim bonus depreciation on its 2019 federal return related to qualified improvement property brought into service in 2019. The ultimate impact of the CARES Act may differ from the existing estimate due to the evolving analysis and as interpretations of the law are developed, including guidance issued by the Internal Revenue Service and other regulatory bodies.

As required by the uncertain tax position guidance in FASB Accounting Standards Codification Topic 740, the Company recognizes the financial statement benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting the more-likely-than-not threshold, the amount recognized in the financial statements is the largest benefit that has a greater than 50 percent likelihood of being realized upon settlement with the relevant tax authority. During the three months ended June 30, 2020, the Company was accepted into a voluntary disclosure agreement

OTC MARKETS GROUP INC.

Notes to Unaudited Condensed Consolidated Financial Statements (continued)

(in thousands, except share and per share information)

("VDA") with a state tax jurisdiction for which the Company had previously recorded a liability for an uncertain tax position. By participating in the VDA program, the Company limited the look back period to three years, which reduced its recorded liabilities relating to uncertain tax positions by approximately \$579, or \$464 net of federal benefit, and agreed to file tax returns for the VDA period, resulting in a reclass of approximately \$395, or \$309 net of federal benefit from uncertain tax liabilities to income tax payable. The gross amount of unrecognized tax benefits as of June 30, 2020 and December 31, 2019 was \$713 and \$1,382, respectively, and was classified in income tax reserve in the unaudited interim condensed Consolidated Balance Sheets. It is not reasonably possible that any unrecognized tax benefits related to state nexus will reverse within the next twelve months from settlements with taxing authorities.

The Company recognizes interest and penalties related to unrecognized tax benefits as a component of tax expense. For three and six months ended June 30, 2019, the Company recognized interest and penalties \$39 and \$54, respectively. For three and six months ended June 30, 2020, the Company recorded a reduction of interest and penalties of \$220 and \$197, respectively. Interest and penalties accrued as of June 30, 2020 and December 31, 2019 were \$185 and \$382, respectively.

Note 14. Earnings Per Share

The Company calculates earnings per share pursuant to the two-class method, which is an earnings allocation formula that determines earnings per share for common stock and participating securities according to dividends declared and participation rights in undistributed earnings. Under this method, all earnings (distributed and undistributed) are allocated to common shares and participating securities based on their respective rights to receive dividends. RSAs granted to employees (Refer to Note 11, *Stock-Based Compensation*) participate in dividends on the same basis as common shares and such dividends are nonforfeitable by the holder. As a result, these RSAs meet the definition of a participating security.

The tables below present the calculations of earnings per share under the two-class method:

Basic Earnings per common share

(in thousands, except shares and per share data)	Three Months Ended June 30,		Six Months Ended June 30,	
	2020	2019	2020	2019

Diluted earnings per share	\$ 0.36	\$ 0.30	\$ 0.68	\$ 0.59

Note 15. Regulatory Authorities

OTC Link LLC is a U.S. registered broker-dealer and is subject to the net capital requirements of Rule 15c3-1 under the Exchange Act. Rule 15c3-1 requires the maintenance of net capital, as defined, which shall be the greater of \$5 or 6-2/3% of aggregate indebtedness, as defined. OTC Link LLC's regulatory net capital as of June 30, 2020 and December 31, 2019 was \$2,906 and \$3,095, respectively, which exceeded the minimum net capital requirement by \$2,767 and \$2,944, respectively.

Note 16. Subsequent Events

For purposes of disclosure in the unaudited condensed consolidated financial statements, the Company has evaluated subsequent events through August 12, 2020, the date the financial statements were available to be issued.

On August 5, 2020, the Board of Directors authorized and approved a quarterly cash dividend of \$0.15 per share of Class A common stock. The quarterly dividend is payable on September 25, 2020 to our stockholders of record as of September 11, 2020.
