News Release

CBOE HOLDINGS, INC. REPORTS RESULTS FOR FIRST-QUARTER 2015

First-Quarter 2015 Financial Highlights

- Operating Revenue of \$142.8 Million Compared With \$157.9 Million, Down 10 Percent
- GAAP Net Income Allocated to Common Stockholders of \$42.1 Million Compared With \$48.5 Million; Diluted EPS of \$0.50 Versus \$0.56, Down 11 Percent
- Adjusted Net Income Allocated to Common Stockholders of \$42.3 Million Compared With \$50.0 Million; Adjusted Diluted EPS of \$0.50 Versus \$0.58, Down 14 Percent¹
- GAAP Operating Margin of 48.7 Percent Compared With 52.0 Percent; Adjusted Operating Margin of 48.7 Percent Compared With 53.6 Percent¹

CHICAGO, May 1, 2015 - CBOE Holdings, Inc. (NASDAQ: CBOE) today reported net income allocated to common stockholders of \$42.1 million, or \$0.50 per diluted share, for the first quarter of 2015, compared with \$48.5 million, or \$0.56 per diluted share, in the first quarter of 2014. On an adjusted basis, net income allocated to common stockholders was \$42.3 million, or \$0.50 per diluted share, compared with \$50 million, or \$0.58 per diluted share, in the same period last year. Operating revenue for the quarter was \$142.8 million, down 10 percent compared with \$157.9 million in the first quarter of 2014.

Financial results presented on an adjusted basis for the first quarter of 2015 and 2014 exclude certain items, including accelerated stock-based compensation and impairment charges, which are detailed in the reconciliation of non-GAAP results.

"Despite challenging market conditions, we continue to lay the foundation for future growth at CBOE. Already this year, we made significant progress in our ongoing index option growth story when options on the Russell 2000 Index began trading exclusively at CBOE and C2 on April 1st, followed by the launch of options on the MSCI Emerging Markets Index and the MSCI EAFE Index on April 21st. We also expanded our global customer reach with extended trading hours for SPX and VIX options," said Edward T. Tilly, CBOE Holdings' Chief Executive Officer. "We are confident that our growing suite of premium index products, supported by ongoing educational and customer outreach efforts, will enable CBOE to continue to provide value to our shareholders as well as to customers in 2015 and beyond."

"Our first-quarter results reflect the impact of lower trading volume experienced at CBOE Holdings and industrywide, as well as a difficult comparison to last year's record first-quarter results," said Alan J. Dean, CBOE Holdings' Executive Vice President and Chief Financial Officer. "In response to current trading volumes, we are adjusting our 2015 expense plans while maintaining a sharp focus on advancing our long-term growth initiatives through ongoing investments in product and systems development. We have successfully adjusted to low volume periods in the past by making short-term cost reductions, while continuing to invest in our business to drive future growth. This approach historically has always enabled CBOE to emerge even stronger once trading conditions improve."

(1) A full reconciliation of our non-GAAP results to our GAAP results for the 2015 and 2014 reporting periods is included in the attached tables. See "Non-GAAP Information" in the accompanying financial tables.

Key Statistics and Financial Highlights

The table below highlights CBOE Holdings' operating results on a GAAP basis and an adjusted basis for the comparative quarters ended March 31, 2015 and 2014. Financial results presented on an adjusted basis provide supplemental information to facilitate period-over-period comparisons by adjusting for certain items that management believes are not indicative of the company's core operating performance.

(1) A full reconciliation of our non-GAAP results to our GAAP results for the 2015 and 2014 reporting periods is included in the attached tables. See "Non-GAAP Information" in the accompanying financial tables.

Revenues

Operating revenue was \$142.8 million in the first quarter of 2015, down \$15.1 million, or 10 percent, from \$157.9 million in the first quarter of 2014. The lower revenue primarily reflects a decrease of \$14.1 million in transaction fees.

Transaction fees decreased 12 percent in the quarter, driven by a 15 percent decrease in trading volume, offset somewhat by a 3 percent increase in the average revenue per contract (RPC) compared with the first quarter of 2014. Total trading volume in the first quarter was 290.7 million contracts, or 4.77 million contracts per day, compared with volume of 342.8 million contracts, or 5.62 million contracts per day, in last year's first quarter. RPC was \$0.340 compared with \$0.329 in the first quarter of 2014.

The increase in RPC primarily reflects the net impact of a higher RPC generated on index options and futures contracts, with increases of 6 percent and 5 percent, respectively, offset somewhat by a shift in the mix of volume towards lower-margin, multiply-listed products. The RPC gains for index options and futures contracts primarily resulted from fee adjustments and lower volume discounts and incentives. With respect to the shift in the volume mix, multiply-listed options accounted for a higher percent of trading volume at 66.7 percent in the first quarter of 2015, compared with 65.3 percent in the first quarter of 2014.

The average revenue per contract represents total transaction fee revenue divided by total reported trading volume for Chicago Board Options Exchange[®] (CBOE[®]), C2 Options ExchangeSM (C2SM) and CBOE Futures ExchangeSM (CFE[®]).

Adjusted Operating Expenses

Adjusted operating expenses were \$73.3 million for the first quarter of 2015 and 2014. Adjusted operating expenses for the quarter reflect the net impact of lower costs for compensation and benefits and royalty fees, offset by higher costs for professional fees and outside services and depreciation and amortization. There were no adjustments to operating expenses in the first quarter of 2015. For the first quarter of 2014, adjusted operating expenses exclude accelerated stock-based compensation of \$2.5 million.

The company's core operating expenses, which include total operating expenses less volume-based expenses, depreciation and amortization, accelerated stock-based compensation expense and unusual or one-time expenses, were \$47.9 million for the first quarter of 2015, up \$0.2 million, or 1 percent, compared with last year's first quarter. The increase in core operating expenses primarily reflects increases of \$4.6 million in professional fees and outside services, \$0.6 million in technology support services and \$0.5 million in travel and promotional expenses, offset by a decrease of \$5.4 million in compensation and benefits. The decline in compensation and benefits largely reflects lower expenses related to salaries, stock-based compensation and incentive compensation. The increase in professional fees and outside services, as well as the decrease in salaries, is primarily attributed to the company's outsourcing of certain regulatory services to FINRA, which occurred in December of 2014.

Volume-based expenses, which include royalty fees and order-routing fees, were \$15.0 million in the first quarter of 2015, a decrease of \$2.0 million, or 12 percent, compared with the same period last year. This decrease includes lower royalty fees of \$1.7 million and lower order-routing fees of \$0.3 million. The decline in royalty fees was primarily due to lower trading volume in licensed products.

Adjusted Operating Margin

The company's adjusted operating margin was 48.7 percent for the first quarter of 2015, a decrease of 490 basis points compared to an all-time high of 53.6 percent reported for the first quarter of 2014. The margin decline reflects flat expenses over a lower revenue base.

Effective Tax Rate

The company reported an effective tax rate of 39.0 percent for the current quarter compared with 39.9 percent in last year's first quarter. The effective tax rate for the first quarter of 2014 included the recognition of a discrete tax charge, which accounted for the higher effective tax rate in 2014 versus the first quarter of 2015.

Operational Highlights and Recent Developments

- On April 21, CBOE began trading options on the MSCI Emerging Markets Index (MXEF) and the MSCI EAFE Index (MXEA).
- On April 1, options on the Russell 2000 Index (RUT) began trading exclusively at CBOE and C2.
- On March 2 and March 9, the company expanded trading hours for CBOE Volatility Index[®] (VIX[®] Index) options and S&P 500 Index (SPX) options, respectively, adding more than six hours of additional trading each day. The expanded trading hours for VIX and SPX options at CBOE run Monday through Friday, beginning each day at 2:00 a.m. CT and ending at 8:15 a.m. CT.
- On February 26, the company announced that it entered into an exclusive licensing agreement with London Stock Exchange Group (LSEG), to develop and list options in the United States based on more than two dozen FTSE and Russell indices. In addition, as part of the agreement, CBOE and LSEG will collaborate on new index options products and investor education globally.

2015 Fiscal Year Financial Guidance

The company lowered its guidance for core expenses for the 2015 fiscal year to a range of \$190.0 million to \$194.0 million from the previous guidance range of \$195.0 million to \$199.0 million, reflecting expense reductions the company plans to make in light of current trading volumes.

The company reaffirmed its financial guidance for the 2015 fiscal year for the following:

- Continuing stock-based compensation expense included in core expenses is expected to be approximately \$12.0 million for the full year.
- Capital expenditures are expected to be in the range of \$37.0 million to \$40.0 million.
- Depreciation and amortization expense is expected to be in the range of \$46.0 million to \$48.0 million.
- Effective tax rate for the full-year 2015 is expected to be in the range of 38.5 percent to 39.5 percent. Significant changes in trading volume, expenses, state and local tax rates and other items, including ongoing state and federal tax audits, could materially impact this expectation.

Return of Capital to Stockholders

As announced on April 29, 2015, CBOE Holdings' Board of Directors declared a second-quarter dividend of \$0.21 per share, payable June 19, 2015, to stockholders of record as of May 29, 2015.

During the first quarter of 2015, the company repurchased 510,951 shares of its common stock under its share repurchase program at an average price of \$61.48 per share, for an aggregate purchase price of \$31.4 million.

Since the inception of its share repurchase program in 2011 through March 31, 2015, the company has repurchased 8,366,021 shares of its common stock at an average price of \$40.85 per share, for a total of \$341.8 million.

As of March 31, 2015, the company had approximately \$58.2 million of availability remaining under its existing share repurchase authorizations.

Earnings Conference Call

Executives of CBOE Holdings will host a conference call to review its first-quarter financial results today, May 1, 2015, at 8:30 a.m. ET/7:30 a.m. CT. The conference call and any accompanying slides will be publicly available via live webcast from the Investor Relations section of the company's website at www.cboe.com under Events & Presentations. Participants may also listen via telephone by dialing (866) 652-5200 from the United States, (855) 669-9657 from Canada or (412) 317-6060 for international callers. Telephone participants should place calls 10 minutes prior to the start of the call. The webcast will be archived on the company's website for replay. A telephone replay of the earnings call also will be available from approximately 11:00 a.m. CT, May 1, 2015, through 11:00 p.m. CT, May 8, 2015, by calling (877) 344-7529 from the U.S., (855) 669-9658 from Canada or (412) 317-0088 for international callers, using replay code 10062466.

About CBOE Holdings

CBOE Holdings, Inc. (NASDAQ: CBOE) is the holding company for Chicago Board Options Exchange (CBOE), CBOE Futures Exchange (CFE) and other subsidiaries. CBOE, the largest U.S. options exchange and creator of listed options, continues to set the bar for options and volatility trading through product innovation, trading technology and investor education. CBOE Holdings offers equity, index and ETP options, including proprietary products, such as S&P 500 options (SPX), the most active U.S. index option, and options and futures on the CBOE Volatility Index (the VIX Index). Other products engineered by CBOE include equity options, security index options, Weeklys options, LEAPS options, FLEX options, and benchmark products such as the CBOE S&P 500 BuyWrite Index (BXM). CBOE Holdings is home to the world-renowned Options Institute and www.cboe.com, the go-to place for options and volatility trading resources.

Forward-Looking Statements

This press release may contain forward-looking statements, within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are those statements that reflect our expectations, assumptions or projections about the future and involve a number of risks and uncertainties. These statements are only predictions based on our current expectations and projections about future events. There are important factors that could cause actual results to differ materially from that expressed or implied by the forward-looking statements, including: the loss of our right to exclusively list certain index options and futures products; increasing price competition in our industry; compliance with legal and regulatory obligations and obligations under agreements with regulatory agencies; decreases in the amount of trading volumes or a shift in the mix of products traded on our exchanges; our ability to operate our business, monitor and maintain our systems or program them so that they operate

correctly, including in response to increases in trading volume and order transaction traffic; the accuracy of our estimates and expectations; legislative or regulatory changes; increasing competition by foreign and domestic entities; our index providers ability to perform under our agreements; our ability to operate our business without violating the intellectual property rights of others and the costs associated with protecting our intellectual property rights; our ability to maintain access fee revenues; our ability to protect our systems and communication networks from security risks, including cyber-attacks; economic, political and market conditions; our ability to attract and retain skilled management and other personnel; our ability to maintain our growth effectively; our dependence on third party service providers; and the ability of our compliance and risk management methods to effectively monitor and manage our risks.

More detailed information about factors that may affect our performance may be found in our filings with the SEC, including in our Annual Report on Form 10-K for the year ended December 31, 2014 and other filings made from time to time with the SEC.

The condensed consolidated statements of income, balance sheets and statements of cash flows are unaudited and subject to reclassification.

Non-GAAP Information

In addition to disclosing results determined in accordance with GAAP, CBOE Holdings has disclosed certain non-GAAP measures of operating performance. These measures are not in accordance with, or a substitute for, GAAP, and may be different from or inconsistent with non-GAAP financial measures used by other companies. The non-GAAP measures provided in this press release include core operating expenses, adjusted operating expenses, adjusted operating income, adjusted operating margin, adjusted net income, adjusted net income allocated to common stockholders and adjusted diluted earnings per share.

Management believes that the non-GAAP financial measures presented in this press release, including adjusted net income and core operating expenses, provide useful and comparative information to assess trends in our core operations and a means to evaluate period-to-period comparisons. Non-GAAP financial measures disclosed by management, including adjusted diluted EPS, are provided as additional information to investors in order to provide them with an alternative method for assessing our financial condition and operating results.

The table below shows core operating expenses, which is the company's operating expenses after excluding (i) volume-based expenses, (ii) depreciation and amortization expense, (iii) accelerated stock-based compensation expense and (iv) other unusual or one-time expenses.
