CAUTIONARY STATEMENT

FORWARD-LOOKING STATEMENTS

This presentation contains “forward-looking information” and “forward-looking statements” within the meaning of applicable Canadian securities laws and the United States Private Securities Litigation Reform Act of 1995, respectively, which may include, but are not limited to, statements with respect to future events or future performance, including expectations and assumptions for future performance, production, development, or expansion of, and mine life estimates relating to, projects where Franco-Nevada holds a royalty, stream or other interest as well as the timing thereof, management’s expectations regarding Franco-Nevada’s growth, results of operations, estimated future revenues, performance guidance, carrying value of assets, future dividends and requirements for additional capital, mineral resources and mineral reserves estimates, production estimates, production costs and revenue, future demand for and prices of commodities, expected mining sequences, business prospects and opportunities, the performance and plans of third party operators, any ongoing or future audits being conducted by the Canada Revenue Agency (the “CRA”), the expected exposure for current and future tax assessments and available remedies, and statements with respect to the future status and any potential restart of the Cobre Panamá mine. In addition, statements relating to mineral resources and mineral reserves, gold equivalent ounces (“GEOs”) or mine lives are forward-looking statements, as they involve implied assessment, based on certain estimates and assumptions, and no assurance can be given that the estimates and assumptions are accurate and that such mineral resources and mineral reserves, GEOs or mine lives will be realized. Such forward-looking statements reflect management’s current beliefs and are based on information currently available to management. Often, but not always, forward-looking statements can be identified by the use of words such as “plans”, “expects”, “is expected”, “budgets”, “potential for”, “scheduled”, “estimates”, “forecasts”, “predicts”, “projects”, “intends”, “targets”, “aims”, “anticipates” or “believes” or variations (including negative variations) of such words and phrases or may be identified by statements to the effect that certain actions “may”, “could”, “should”, “would”, “might” or “will” be taken, occur or be achieved. Forward-looking statements involve known and unknown risks, uncertainties and other factors, which may cause the actual results, performance or achievements of Franco-Nevada to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. A number of factors could cause actual events or results to differ materially from any forward-looking statement, including, without limitation: fluctuations in the prices of the primary commodities that drive royalty and stream revenue (gold, platinum group metals, copper, nickel, silver, iron-ore and oil and gas); fluctuations in the value of the Canadian and Australian dollar, Brazilian real, Mexican peso and any other currency in which revenue is generated, relative to the U.S. dollar; changes in national and local government legislation, including permitting and licensing regimes and taxation policies and the enforcement thereof; tariff and other trade measures that may be imposed by the United States and proposed retaliatory measures that may be adopted by its trading partners; the adoption and implementation of a global minimum tax on corporations; regulatory, political or economic developments in any of the countries where properties in which Franco-Nevada holds a royalty, stream or other interest are located or through which they are held; risks related to the operators of the properties in which Franco-Nevada holds a royalty, stream or other interest, including changes in the ownership and control of such operators; relinquishment or sale of mineral properties; influence of macroeconomic developments; business opportunities that become available to, or are pursued by Franco-Nevada; reduced access to debt and equity capital; litigation; title, permit or license disputes related to interests on any of the properties in which Franco-Nevada holds a royalty, stream or other interest; whether or not the Company is determined to have “passive foreign investment company” (“PFIC”) status as defined in Section 1297 of the United States Internal Revenue Code of 1986, as amended; potential changes in Canadian tax treatment of offshore streams; excessive cost escalation as well as development, permitting, infrastructure, operating or technical difficulties on any of the properties in which Franco-Nevada holds a royalty, stream or other interest; access to sufficient pipeline capacity; actual mineral content may differ from the mineral resources and mineral reserves contained in technical reports; rate and timing of production differences from mineral resource estimates, other technical reports and mine plans; risks and hazards associated with the business of development and mining on any of the properties in which Franco-Nevada holds a royalty, stream or other interest, including, but not limited to unusual or unexpected geological and metallurgical conditions, slope failures or cave-ins, sinkholes, flooding and other natural disasters, terrorism, civil unrest or an outbreak of contagious disease; the impact of future pandemics; and the integration of acquired assets. The forward-looking statements contained herein are based upon assumptions management believes to be reasonable, including, without limitation: the ongoing operation of the properties in which Franco-Nevada holds a royalty, stream or other interest by the owners or operators of such properties in a manner consistent with past practice; the accuracy of public statements and disclosures made by the owners or operators of such underlying properties; no material adverse change in the market price of the commodities that underlie the asset portfolio; the Company’s ongoing income and assets relating to determination of its PFIC status; no material changes to existing tax treatment; the expected application of tax laws and regulations by taxation authorities; the expected assessment and outcome of any audit by any taxation authority; no adverse development in respect of any significant property in which Franco-Nevada holds a royalty, stream or other interest; the accuracy of publicly disclosed expectations for the development of underlying properties that are not yet in production; integration of acquired assets; and the absence of any other factors that could cause actions, events or results to differ from those anticipated, estimated or intended. However, there can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Investors are cautioned that forward-looking statements are not guarantees of future performance. In addition, there can be no assurance as to (i) the outcome of any ongoing or future audits by the CRA or the Company’s exposure as a result thereof, or (ii) the future status and any potential restart of the Cobre Panamá mine. Franco-Nevada cannot assure investors that actual results will be consistent with these forward-looking statements. Accordingly, investors should not place undue reliance on forward-looking statements due to the inherent uncertainty therein.

For additional information with respect to risks, uncertainties and assumptions, please refer to Franco-Nevada’s most recent Annual Information Form as well as Franco-Nevada’s most recent Management’s Discussion and Analysis filed with the Canadian securities regulatory authorities on www.sedarplus.com and Franco-Nevada’s most recent Annual Report filed on Form 40-F filed with the SEC on www.sec.gov. The forward-looking statements herein are made as of the date hereof only and Franco-Nevada does not assume any obligation to update or revise them to reflect new information, estimates or opinions, future events or results or otherwise, except as required by applicable law.

Scientific and technical information included in this presentation has been reviewed by Darrol van Deventer, Vice President, Mining of Franco-Nevada, a qualified person under National Instrument 43-101.

NON-GAAP MEASURES

Cash Costs, Cash Costs per GEO sold, Adjusted Net Income, Adjusted Net Income per Share, Adjusted Net Income Margin, Adjusted EBITDA, Adjusted EBITDA per Share, and Adjusted EBITDA Margin are non-GAAP financial measures with no standardized meaning under International Financial Reporting Standards (“IFRS Accounting Standards”) and might not be comparable to similar financial measures disclosed by other issuers. For a quantitative reconciliation of each non-GAAP financial measure to the most directly comparable financial measure under IFRS Accounting Standards, refer to the appendix at the end of this presentation. Further information relating to these non-GAAP financial measures is incorporated by reference from the “Non-GAAP Financial Measures” section of Franco-Nevada’s MD&A for the three months ended March 31, 2026 and filed on May 12, 2026 with the Canadian securities regulatory authorities on SEDAR+ available at www.sedarplus.com and with the U.S. Securities and Exchange Commission available on EDGAR at www.sec.gov.

This presentation does not constitute an offer to sell or a solicitation for an offer to purchase any security in any jurisdiction.

THE GOLD INVESTMENT THAT WORKS

Franco-Nevada is the leading gold-focused royalty and streaming company with the largest and most diversified portfolio of cash-flow producing assets.

"We believe that lower risk gold investments, a strong balance sheet, progressive dividends and exposure to exploration optionality is the right mix for investors seeking to hedge market instability. "

- ★ Quality, long-life assets in safe jurisdictions
- ★ Exposure to commodity price and geological optionality
- ★ Insulated from cost inflation

WHY IS FRANCO-NEVADA DIFFERENT?

Profitable Growth

Create shareholder value by growing NAV/share & CF/share
Shareholder alignment - high share ownership and low G&A

Financial Flexibility

Limit the use of debt and pay progressive and sustainable dividends to ensure capital is available at all times

Adaptable Investment Style

Creative capital provider and financial backer of strong teams

Focus on Optionality

Seek exposure to exploration optionality and use strong technical skills to drive asset selection

Understand Cyclicalty

Build a business that thrives in both bull and bear markets for precious and other commodities

Financial Backing that Differentiates Companies

i-80 GOLD FINANCING

Royalty Covers all of i-80 Gold's Growth Plans in Nevada

- Asset development program will increase production from 32 koz Au in 2025 to 600+ koz Au per year by 2032
- Royalty rate steps up from a 1.5% NSR to 3.0% beginning in 2031, coinciding with i-80 Gold's development timeline, delivering a strong growth profile

Comprehensive Financing Plan Unlocks Processing Hub

- i-80 sufficiently capitalized to advance refurbishment of the Lone Tree Autoclave providing a central processing hub for the Granite Creek, Archimedes and Cove underground operations

Attractive Anchor Project in Mineral Point Heap Leach

- Attractive, large-scale and straight-forward heap leach project hosting 4.6 Moz AuEq M&I mineral resources and 3.2 Moz AuEq inferred resources¹
- Potential to accelerate timing of feasibility study and permitting, with part of Royalty financing tied to Mineral Point technical and permitting work
- Expected to produce 282 koz AuEq per year once in production

Large Mineral Resource with Exploration Potential

- Royalty will cover an expansive 256 km² land package, with a substantial resource base hosting 7.8 Moz AuEq M&I mineral resources and 8.6 Moz AuEq inferred mineral resources¹

¹ Please see slide 45 notes related to this slide

MINERALS 260 – BULLABULLING FINANCING

Near-Term Production Pathway

- One of Australia's largest near-term gold projects with 3 Moz Indicated Resources (93 Mt at 1.0 g/t) and 1.5 Moz Inferred Resources (42 Mt at 1.1 g/t)
- Located on existing mining leases with straightforward pathway to production through conventional open-pit mining and CIL processing
- A PFS is targeted by Minerals 260 for completion in mid-2026, with a FID expected early-2027 and first gold production potentially as soon as H2-2028

Meaningful Production Profile

- Minerals 260 intends to incrementally develop and expand Bullabulling to accelerate and optimize production
- Historical studies show potential for throughput of +7 Mtpa
- Royalty financing will accelerate development of Bullabulling including expansion of resource drilling and growth, camp construction and ordering long-lead items

Significant Upside Potential

- Resource has nearly doubled since Minerals 260's acquisition of the project
- Royalty financing will assist Minerals 260 to continue to expand their Resource base, with considerable growth potential on the deposits along strike and at depth, along with conversion of Inferred Resources

Experienced Board & Management Team

- Led by Chairman Tim Goyder (>40 years of experience and Minerals 260's second largest shareholder) and CEO & MD, Luke McFadyen (>15 years of experience)

OREZONE GOLD - CASA BERARDI FINANCING

Immediate Gold Revenues from the Established Casa Berardi Mine

- Gold deliveries of 6.5 koz per year for first five years, thereafter 5% of gold produced, deliveries subject to 20% ongoing payment
- Extensive production history, producing over 3.2 Moz to date and continues to deliver meaningful production and cash flow

Experienced Management Team

- Led by Patrick Downey and the Orezone team, who has a strong track record, building both the Bomboré mine and the subsequent Phase 1 Expansion on time and on budget

Significant Expansion Potential

- Multiple pathways to increase production and extend mine life, including:
 - Ongoing UG exploration to boost grades and production
 - Potential development of WMCP & Principal pits
 - Potential expansion of current and future open pits

Large Mineral Resource Base

- Stream covers both the Casa Berardi Mine (2.3 Moz M&I and 0.5 Moz inferred¹) and other Quebec assets, including Heva-Hosco (1.2 Moz M&I and 0.6 Moz inferred²)

Stream Area

¹ P&P mineral reserves of 1.3 Moz (14.4 Mt at 2.79 g/t Au), mineral resources of 0.9 Moz Au M&I mineral resources exclusive of mineral reserves (4.7 Mt at 5.92 g/t Au) and 0.5 Moz Au inferred mineral resources (2.4 Mt at 6.01 g/t Au) | ² 1.2 Moz Au M&I mineral resources (30.3 Mt at 1.19 g/t Au) and 0.6 Moz Au inferred mineral resources (14.6 Mt at 1.27 g/t Au)

VICTORIA ROYALTY PORTFOLIO / AURMAC ACQUISITION

Agreed to acquire a portfolio of six royalties for C\$55M

- 6% NSR on Banyan Gold Corp.'s AurMac Gold Project (subject to 5% buydown for C\$10M)
- 1% NSR on Banyan Gold Corp.'s Hyland property
- Production milestone payments (up to C\$20M) on i-80 Gold Corp.'s Cove Project in Nevada
- 3 additional royalties in Nevada and the Yukon

AurMac anchors the portfolio with large, growing resource base

- 2.27 Moz Au Indicated (113 Mt at 0.63 g/t Au) and 5.45 Moz Au Inferred (281 Mt at 0.60 g/t Au)
- 70 km underway with 5 drills; targeting 5 Moz Au at +1 g/t Au
- Royalty covers c.92 km² and 100% of the project resources

AurMac is well located with existing infrastructure in a producing district

- Year-round road access, access to 138 kVa line on the property
- 40 km north of Mayo and 15 km from Hecla's operating Keno Hill Mine

Upcoming AurMac Studies in 2026

- Updated mineral resource and PEA both expected in 2026

> 15%

UNIQUE PORTFOLIO MIX

INVESTMENT TYPE

Our royalties are mostly on gold orebodies, which have high optionality as often they are only fully revealed over time

Our streams are typically precious metal by-product from very long-life copper mines

UNDERLYING ASSETS

Reserves and Resources on orebodies often increase when the principal commodity prices increase

- Lower cut-off grades increase mineable inventory
- Reserves + Resources increase
- Mine lives are extended

¹ Represents revenue from other types of interests (Vale, LIF) and interest income from loans (G Mining Ventures, EMX)

Royalties Provide Significant Geological Optionality

¹ Investment made by predecessor company Franco-Nevada Mining Corporation Limited | ² Return represents After Tax Cash + Analyst NAV consensus as at March 31, 2026. After Tax Cash represents Revenue less Cost of Sales and Cash Taxes paid as of March 31, 2026. Analyst NAV based on consensus analyst asset detail for specific assets as available and disclosed as of March 31, 2026

EMBEDDED ROYALTY OPTIONALITY

Power of Optionality

¹ Calculation includes depletion | ² Total gold reserves associated with the top 37 assets at the time of IPO (not adjusted for FNV royalty ownership). All Mineral Reserves have been calculated in accordance with CIM or acceptable foreign codes for the purposes of NI 43-101, including Regulation S-K 1300, SEC Industry Guide 7, JORC, or SAMREC guidelines | ³ Revenue from original FNV portfolio includes gold, platinum and palladium revenue as at December 31, 2025

DETOUR LAKE – POTENTIAL FURTHER EXPANSION

CANADA'S LARGEST GOLD MINE WITH ROOM TO GROW

Current Outlook:

- Optimization initiatives to support throughput increase expected end of 2029. Production step-up in 2030, reaching 1 Moz pa in 2031 for approximately 14 years

Further Exploration Success:

- Ten drill rigs active, focused on conversion drilling and step-outs at depth, supporting confidence in grade continuity
- Ongoing drilling has extended mineralization more than 2.4 km west of the current pit outline

COTE GOLD – MILL EXPANSION PLANNED

7.5% Gross Margin Royalty on Côte

- Cote had 16 Moz Au M&I Mineral Resources and 4.2 Moz Au Inferred Mineral Resources at the time of transaction⁽¹⁾ - 3rd largest gold deposit in Canada
 - Since then, M&I Mineral Resources have increased to 18 Moz⁽¹⁾ due to conversion of Inferred Mineral Resources at Gosselin into Indicated
- Cote produced 400 koz Au in 2025 (achieving top end of guidance) with 2026 production guidance of 390 – 440 koz Au
- \$51M in revenue to FNV in 2025⁽²⁾ since acquiring the asset at the end of May 2025

Partnership with IAMGOLD and Sumitomo

- Partnership granted Franco-Nevada exclusive access to detailed technical due diligence, in exchange for providing two 25% buyback tranches, exercisable within 2 and 3 years from closing

2026 Outlook and Catalysts

- Targeting throughput increase of c.40% to +50 ktpd⁽³⁾ through combining Cote and Gosselin.
- Mill expansion study due end of 2026

Cote and Gosselin Conceptual Super Pit

ANTAPACCAY/COROCOCHUAYCO EXPANSION

Likely Coroccohuayco expansion to offset step down in Antapaccay stream

- Stream deliveries expected to transition from a copper link to 30% Au/Ag production in 2028²

Glencore anticipates a construction decision on Coroccohuayco in H2 2026

- First production targeted for H2 2029 with average gold/silver production of 53 kozpa Au / 1.5 Mozpa Ag over 40+ years

40+ year mine life³

- Multiple resources within the Antapaccay district provide for a potential +40-year life through addition of successive satellite pits
- + potential upside from additional milling capacity

Exposure to highly mineralized district (997 km² land package)

- Stream covers the majority of the Antapaccay concessions including Coroccohuayco+ potential upside from additional milling capacity

Antapaccay Gold and Silver Stream

Indicative Copper Production Profile (Kt Cu) ⁽¹⁾

■ Base Business ■ Coroccohuayco ■ Antapaccay District

	Coroccohuayco	Antapaccay District
FID	2026	2035
First Production	H2 2029	2037
Indicative Capex	\$1.80B	\$1.28B

¹ Source: Glencore 2025 Capital Markets Day Presentation. www.glencore.com | ² Franco-Nevada will receive 300 ounces of gold and 4,700 ounces of silver for each 1,000 tonnes of copper in concentrate shipped, until 630 koz of gold and 10Moz of silver have been delivered. Thereafter, Franco-Nevada will receive 30% of the gold and silver shipped | ³ The Antapaccay district is a heavily mineralized area. The current copper resources already identified within the district are expected to be sufficient to provide a district mine life in excess of 40 years

2026 GUIDANCE AND OUTLOOK

2026 GUIDANCE^{1, 2, 3}

TOTAL GEOS 510K – 570K

TSX/NYSE: FNV

GEOS AND NET GEOS

A P P E N D I X

GEOS include Franco-Nevada's attributable share of production from our Mining and Energy assets, after applicable recovery and payability factors. GEOS are estimated on a gross basis for NSR royalties and, in the case of stream ounces, before the payment of the per ounce contractual price paid by the Company. For NPI royalties, GEOS are calculated taking into account the NPI economics. Where the Company receives gold and silver bullion in-kind as payment for its royalties, GEOS are recognized at the time of receipt of such bullion. Silver, platinum, palladium, iron ore, oil, gas and other commodities are converted to GEOS by dividing associated revenue, which includes settlement adjustments, by the relevant gold price. Beginning in 2026, the Company adopted fixed GEO conversion ratios based on the pricing assumptions outlined in our guidance. This methodology replaces our previous methodology which was based on variable GEO conversion ratios using prevailing market prices. Our 2026 guidance, as disclosed in our 2025 MD&A filed on March 10, 2026, assumed the following commodity prices: \$4,500/oz Au, \$75.00/oz Ag, \$2,000/oz Pt, \$1,650/oz Pd, \$100/tonne Fe 62% CFR China, \$70/bbl WTI oil and \$3.00/mcf Henry Hub natural gas. GEOS for the 2026 period are calculated based on fixed conversion ratios based on the prices assumed in this 2026 guidance.

Net GEOS are GEOS sold, net of direct operating costs, including, for our stream GEOS, the associated ongoing cost per ounce. We use Net GEOS to reflect that GEOS from royalty interests have different economics than GEOS from stream interests due to the ongoing cost per ounce associated with GEOS from streams. We calculate Net GEOS on a quarterly basis by dividing Cash Costs (as defined below in the "Non-GAAP Financial Measures" section) by the relevant gold price, and subtracting this total from GEOS sold in the period.

	For the three months ended March 31,	
	2026	2025
(expressed in millions, excepts GEOS and Gold Price)		
GEOS	136,353	126,585
Less:		
Cash Costs	\$ 46.5	\$ 38.5
Divided by: Gold price per ounce	\$ 4,500	\$ 2,863
	10,333	13,447
Net GEOS	126,020	113,138

NON-GAAP MEASURES

A P P E N D I X

Non-GAAP Financial Measures: Cash Costs, Cash Costs per GEO sold, Adjusted Net Income, Adjusted Net Income per Share, Adjusted Net Income Margin, Adjusted EBITDA, Adjusted EBITDA per share, and Adjusted EBITDA Margin are non-GAAP financial measures with no standardized meaning under IFRS Accounting Standards and might not be comparable to similar financial measures disclosed by other issuers. For a quantitative reconciliation of each non-GAAP financial measure to the most directly comparable financial measure under IFRS Accounting Standards, refer to the following tables. Further information relating to these Non-GAAP financial measures is incorporated by reference from the "Non-GAAP Financial Measures" section of Franco-Nevada's MD&A for the three months ended March 31, 2026 and filed on May 12, 2026 with the Canadian securities regulatory authorities on SEDAR+ available at www.sedarplus.com and with the U.S. Securities and Exchange Commission available on EDGAR at www.sec.gov.

PRODUCING ASSET NEWS

S T R E A M S

Cobre Panama Panama

The mine is currently on preservation and safe management. **Government has approved the processing of the stockpiles.** President Mulino expects to make an announcement in June 2026 pending the results of an audit of the mine.

Antamina Peru

Medium term production growth from crushing and conveying project. Regulatory approval in February 2024, extending approved mine life from 2028 to 2036.

Condestable Peru

Rio2 closed the acquisition of the mine from Southern Peaks in January 2026 and outlined a plan to permit a mill expansion to 10,000tpd and plans to study the feasibility of an expansion to 12,000tpd.

Candelaria Chile

Strong potential for continuation of mine life extensions through UG extensions and surface projects.

Antapaccay Peru

Coroccohuayco project development advancing, with potential for resource expansion and mine life extension of 30+ years. Community consultations progressing. Coroccohuayco potential for first ore 2028, final decision expected in 2026.

Guadalupe-Palmarejo Mexico

2025 exploration program extends near-mine resources in the Hidalgo Corridor. Hidalgo, Libertad, and San Juan veins extended along strike by 500 meters, 300 meters, and 150 meters, respectively.

Condestable - Peru

D I V E R S I F I E D

Vale Royalty Brazil

Royalty payments from Vale will benefit from contributions from the Southeastern System which started in Q2 2025, partly offset by a reduction in production forecast for 2026.

PRODUCING ASSET NEWS (cont.)

ROYALTIES

Detour Lake Ontario

Optimization initiatives to support throughput increase expected end of 2029. Production step-up in 2030, reaching 1 Mozpa in 2031 for approximately 14 yrs. Exploration ramp reached a depth of 147 metres and overburden removal commencing for the conveyor-ramp portal. Drilling confirmed further grade and continuity in the West Extension zone.

Stillwater Montana

US PGM Operations converting from conventional bolting to fully mechanized in-stope bolting, enabling larger headings and increased volumes mined. Phased implementation to be completed by H2 2028. Steady state production of ~410koz by 2029 with Stillwater West providing future optionality and upside.

Musselwhite Ontario

Mine trend extension confirmed 2km along strike from current operation. Surface drilling within 10km of mill identifying multiple targets for potential OP satellite deposits. Camp Bay covered by NPI.

Côté Ontario

Côté achieved nameplate throughput rate of 36,000 tpd for 30 straight days in June 2025. Achieved top end of production guidance, with 400 koz produced in 2025. 2026 guidance of between 390-440 koz expected to be more heavily weighted towards H2 2026.

Macassa (Kirkland Lake) Ontario

Advancing plans to increase mining and processing to 2,250 tpd. Processing of AK ore at the LZ5 mill expected in Q2 2026.

Porcupine Ontario

Ramp up continuing at Pamour open pit. Exploration results include high-grade intercepts at Hoyle Pond and Borden & strike extensions at Pamour. 19 drills are currently active on the property. In March 2026, Discovery announced the acquisition of Glencore's Kidd Operations.

Canadian Malartic Québec

Production from the East Gouldie ramp commenced in March 2026, three months ahead of schedule. Evaluating second shaft. Drilling continues to extend East Gouldie to the east in both the upper and lower portions of the deposit.

Magino Ontario

February 2026 expansion plan outlines mill ramp up to 20,000 tpd starting in early 2028, with 17,000 tpd coming from Magino. 40% increase in open-pit mineral reserves to 3.1 Moz.

Séguéla Côte d'Ivoire

Mineral Reserve of 1.54Moz, an increase of 31%, with the addition of Sunbird UG. Plant expansion study in Q2 2026 to potentially increase production from 160-170koz to 200koz per year.

Bald Mountain Nevada

Kinross to proceed with capital required to mine full Redbird deposit of ~1 Moz, progressing as planned through Q1 2026. Extends mine life to 2032 with additional long-term optionality of 2.5 Moz of M&I at the property.

Island Gold Ontario

Mining rate increase to 2,400 tpd by 2027 and 3,000 tpd by 2029. Dec 2025 minerals reserves increased by 1Moz to 5.1Moz. FNV has royalty on regional Cline-Pick exploration target.

Hemlo Ontario

NPI provides increased leverage to higher gold prices. Sale to Hemlo Mining Corp. closed November 2025. Expect an updated mine plan in H2 2026. 130,000 m of drilling planned in 2026, with an updated technical report to follow in H2 2027.

PRODUCING AND ADVANCED ASSET NEWS

R A M P - U P

Valentine Gold¹ Newfoundland

Commercial production achieved. **Phase 2 expansion from 2.5 Mtpa to 5 Mtpa released, with 223 koz average annual gold production over 10 years.** 2025 drilling incl. Minotaur zone discovery and Frank Zone expansion.

Salares Norte¹ Chile

First gold poured in March 2024. Steady state production achieved in Q4 2025. Exceeded 2025 guidance of 325-375 k GEOs, with 161 k GEOs in Q4 2025.

Posse (Mara Rosa)¹ Brazil

Production for 2025 was 40 k GEOs, in line with revised 2025 guidance. 2026 production expected to increase to 67-80 kGEOs. Brownfield exploration continues to delineate structures on trend and parallel with Posse.

Greenstone¹ Ontario

Produced 247 koz in 2025, inline with revised guidance. **New technical report outlining 320 koz average annual gold production over the next 10 years. Potential mill throughput increase from 27 ktpd to 30 ktpd and potential conversion of UG resources.**

Tocantinzinho¹ Brazil

First gold poured in July 2024. Achieved nameplate capacity in July 2025. Forecasted production expected to range between 160,000 to 190,000 ounces in 2026.

C O N S T R U C T I O N

Eskay Creek British Columbia

Skeena completed the permitting process in Feb 2026. Environmental Assessment Certificate, jointly approved by the Tahltan Nation, Federal Impact Assessment and BC Mines Act permit received January 2026. Operations planned to restart in Q2 2027.

Stibnite Gold Idaho

U.S. EXIM's Board advances proposed \$2.7B loan to Congress for development of the Stibnite Gold Project, expected to close in the second half of 2026. Dec 31, 2025 updated Technical Report shows improved economics with commercial production anticipated in 2029.

D E V E L O P M E N T U P D A T E S

PSJ Cobre Mendocino (San Jorge) Argentina

Developer (private company) is moving project forward under RIGI framework with feasibility study expected in late 2026. Initial production planned for 2029.

Courageous Lake Northwest Territories

Valor Gold spin-out to hold 11.0M ounce Courageous Lake project.

Arthur Gold Nevada

PFS results released supporting an initial nine-year mine life with an estimated average annual production of ~500koz Au (with production front-loaded of ~800koz Au per year) supported by a maiden Merlin Mineral Reserve of 4.9 Moz.

ADVANCED AND EXPLORATION NEWS (cont.)

DEVELOPMENT UPDATES

Cascabel Ecuador

Drilling confirms high-grade resource at Tandayama-América open pit (TAM) adjacent to the Alpala Deposit. SolGold is targeting early development of TAM, with first production scheduled to begin in 2028. SolGold and Jiangxi Copper completed takeover arrangement in March 2026. **Buy-down options for 50% of Cascabel stream and NSR were exercised.**

New Prosperity British Columbia

Long-standing dispute settled with Taseko contributing 22.5% equity interest in the New Prosperity mineral tenures to a trust for the benefit of the T̓silhqot'in Nation.

Copper World Project Arizona

Mitsubishi Corporation acquires 30% JV interest for \$600M. The project has received all major permits required for development and operation. Feasibility Study advanced during 2025 with completion and sanctioning decision expected in 2026. **Feasibility Study 85% complete at the end of March and on track for completion by mid-2026. Sanctioning decision expected later in 2026.**

Calcatreu Argentina

Construction complete on plant and leach facility and commencement of leaching operations in March 2026. Technical report expected in Q2 2026.

Taca Taca Argentina

De-risking Taca Taca with an updated technical report in February 2026 demonstrating positive project economics, completion of the Environmental and Social Impact Assessment in H1 2026 and an RIGI application in Argentina.

Castle Mountain California

Final EIS and Record of Decision on track for Q4 2026, draft EIS published in April. Updated feasibility study expected during the second half of 2026 with investment decision expected during the first half of 2027.

EXPLORATION UPDATES

Rogozna Serbia

Significant increase to the Shanac resource, exceptional drill results at Kotlovi and new discovery (Red Creek) 1 km west of Shanac where drilling returned 53 m at 2.3 g/t AuEq and 4 m at 4 g/t AuEq. 8.6 Moz AuEq Inferred Mineral Resource.

Ring of Fire/Eagle's Nest Ontario

Federal government has determined an impact assessment is not required for Wyloo's Eagle's Nest project. Marten Falls First Nation files environmental assessment for key Ring of Fire access road.

Midas/Hollister Nevada

Hecla reports high-grade gold discovery at Midas with visible gold intercepts. Technical studies underway to estimate refurbishment costs and timelines at the existing permitted processing infrastructure. \$16M exploration budget for 2026 with production targeted by 2031.

Bullabulling Australia

Mineral Resource estimate doubled to 3Moz Indicated Mineral Resources and 1.5Moz Inferred Mineral Resources in Dec 2025. Minerals 260 expects to complete a pre-feasibility study mid-2026. **Franco-Nevada added to the existing royalty to now have a 2.45% GR on the larger land package.**

Ağı Dağı Türkiye

In October 2025, Alamos Gold completed the sale of its Turkish development projects, Kirazlı, Ağı Dağı and Çamyurt to Tümad Madencilik Sanayi ve Ticaret A.Ş. for total consideration of \$470M.

Crawford Ontario

M&I Mineral Resource doubled. Key investors as of February 2026 include Agnico Eagle (10.0%), Samsung SDI (7.2%), Anglo American (6.3%) and a \$20M Investment by Taykwa Tagamou Nation. **Federal review of Impact Statement complete. Targeting summer 2026 permitting decision.**

Notes and Sources:

- All Mineral Resources and Mineral Reserves have been calculated in accordance with CIM or Acceptable Foreign Codes for the purposes of NI 43-101, including Regulation S-K 1300, JORC, or SAMREC guidelines
- Mineral Resources, which are not Mineral Reserves, do not have demonstrated economic viability
- Unless otherwise noted, Mineral Resources were reported by the operator inclusive of Mineral Reserves
- Contained metal does not take into account recovery losses
- Franco-Nevada's royalties or stream interests may not cover the operator's entire property, or all estimated Mineral Resources and Mineral Reserves or a combination of both
- The grade of platinum group elements has been reported by the operators as either the sum of the individual platinum group element grades or the individual grades. In the cases where individual platinum group element grades have been reported, Franco-Nevada's Qualified Person has calculated the sum of the platinum group element grades for presentation purposes
- Mineral Resources and Mineral Reserves based on publicly disclosed information
- The MRMR statement might have excluded depletion prior to this year's reporting
- Rows and columns may not total precisely due to rounding

Inferred Resources are in addition to Measured and Indicated Resources. Inferred Resources have a great amount of uncertainty as their existence and whether they can be mined legally or economically. It cannot be assumed that all or any part of the Inferred Resources will ever be upgraded to a higher category. See "Cautionary Note to US Investors Regarding Reserve and Resource Reporting Standards" contained in Franco-Nevada's most recent Annual Information Form filed with Canadian securities regulatory authorities on www.sedarplus.com.

- SolGold plc; Annual Information Form, September 24, 2025 (Alpala & Tandayama America Underground) & News Release, November 26, 2025 (Tandayama America Open Pit). Resource is comprised of Alpala Measured & Indicated Resource of 3,013 Mt at 0.35% Cu, 0.28 g/t Au and 0.94 g/t Ag, Inferred Resource of 607 Mt at 0.26% Cu, 0.19 g/t Au and 0.56 g/t Ag and Tandayama-America Indicated Resource of 722 Mt at 0.23% Cu and 0.19 g/t Au, Inferred Resource of 247 Mt at 0.21% Cu and 0.21 g/t Au

SLIDE 13

¹ Total resources converted into gold equivalent at long term prices of \$3,302/oz Au and \$40.31/oz Ag. Total resources include the following:

Granite Creek Underground – 0.8 Mt at 10.5 g/t Au for 261 koz Au measured and indicated resources and 0.8 Mt at 13.0 g/t Au for 326 koz Au inferred resources.

Granite Creek Open Pit – 37.7 Mt at 1.2 g/t Au for 1,435 koz Au measured and indicated resources and 2.1 Mt at 1.1 g/t Au for 75 koz Au inferred resources.

Ruby Hill – Archimedes Underground – 1.8 Mt at 7.6 g/t Au and 1.6 g/t Ag for 436 koz Au and 92 koz Ag indicated resources and 4.2 Mt at 7.3g/t Au and 2.1 g/t Ag for 988 koz Au and 286 koz Ag inferred resources.

Ruby Hill – Mineral Point Open Pit – 217 Mt at 0.5 g/t Au and 15.0 g/t Ag for 3,376 koz Au and 104,332 koz Ag indicated resources and 194 Mt at 0.3 g/t Au and 14.6 g/t Ag for 2,117 koz Au and 91,473 koz Ag inferred resources.

Ruby Hill – Archimedes Open Pit – 4.3 Mt at 2.0 g/t Au and 10.6 g/t Ag for 272 koz Au and 1,490 koz Ag indicated resources and 0.9 Mt at 1.1 g/t Au and 8.5 g/t Ag for 31 koz Au and 250 koz Ag inferred resources.

Cove – 1.2 Mt at 8.2 g/t Au and 15.0 g/t Ag for 310 koz Au and 568 koz Ag indicated resources and 4.0 Mt at 8.9 g/t Au and 11.1 g/t Ag for 1,156 koz Au and 1,439 koz Ag inferred resources.

Lone Tree – 7.7 Mt at 1.7 g/t Au for 428 koz Au indicated resources and 52.9 Mt at 1.6 g/t Au for 2,789 koz Au inferred resources.

SLIDE 23

¹ Total resources for Cote & Gosselin at the time of the transaction (as of December 31, 2024) include: measured and indicated resources of 600 Mt at 0.84 g/t Au for 16.2 Moz Au contained and inferred mineral resources of 184 Mt at 0.70 g/t Au for 4.2 Moz Au contained. Current measured and indicated resources as of December 31, 2025 for Cote & Gosselin include 689 Mt at 0.82 g/t Au for 18.2 Moz Au contained.

SLIDE 31

¹ Potential Annual Contribution provides FNV's conceptual estimate of potential GEOs that could be delivered to FNV in any given year post 2030. Such estimate assumes all projects being developed and uses current public disclosures on Mineral Reserves and Mineral Resources and potential mine production plans, where available. | ² For information on calculation of Royalty Ounces and additional Advanced and Exploration assets, refer to 2026 Asset Handbook published in May 2026. Please refer to FNV's Annual Information Form dated March 19, 2026 for further details related to Mineral Resources and Mineral Reserves. | ³ FNV views the recent agreement with the T̓silhqot'in Nation as a positive development and has included the historic resource in this presentation. However, the New Prosperity Technical Report has not been updated since 2009. FNV is not treating the New Prosperity Royalty Ounces as current and caution is advised when assessing the reliability of such resources. | ⁴ Represents incremental contribution from Cascabel stream and NSR at full production net of the buy-back. Franco-Nevada has the option to convert the Cascabel royalty to a gold NSR for a period of time once the asset is producing.
