

## Fund Descriptions

### Strategy:

The **Horizon Kinetics Japan Owner Operator ETF** is an actively managed exchange-traded fund (ETF). We seek long-term growth of capital by investing primarily in companies domiciled in Japan, with locally driven revenues—specifically, firms operated by individuals who have significant ownership of the company. Many owner-operators exhibit a high degree of management skills, specific industry knowledge, networks, and strong commitment to grow the company's long-term enterprise value.

The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost and current performance may be lower or higher than the performance quoted. Performance current to the most recent month-end can be obtained by calling (800) 617-0004.

Short term performance, in particular, is not a good indication of the fund's future performance, and an investment should not be made based solely on returns. Returns beyond 1 year are annualized. A fund's NAV is the sum of all its assets less any liabilities, divided by the number of shares outstanding. The market price is the most recent price at which the fund was traded.

The Fund is non-diversified, meaning it may concentrate its assets in fewer individual holdings than a diversified fund. Therefore, the Fund is more exposed to individual stock volatility than a diversified fund. Risks Related to Investing in Japan. Japan's economy has historically lagged that of its Asian neighbors and other major developed economies due in part to economic, political and social conditions. Japan's economic growth is heavily dependent on international trade, government support of the financial services sector and other troubled sectors, as well as governmental policy supporting its export market. However, slowdowns in the economies of key trading partners, such as the U.S. and China, leading to de-creased demand from these countries, new trade regulations, and changes in exchange rates may also have an adverse impact on the economy of Japan. The Fund may invest in the securities of smaller and mid-capitalization companies, which may be more volatile than funds that invest in larger, more established companies. The fund is actively managed and maybe affected by the investment adviser's security selections.

**Risk Considerations:** Investing in securities entails risk, which may be subject but not limited to the following—when investing in securities, the market may not necessarily have the same value assessment as the manager, and therefore, the performance of the securities may decline.
