STREAMS

Cobre Panama Panama

The mine is currently on preservation and safe management. **Processing of stockpiled material is expected to be authorized, pending formal approval. President Mulino expects to make an announcement in June 2026 pending the results of an audit of the mine.**

Antamina Peru

Medium term production growth from crushing and conveying project. Regulatory approval in February 2024, extending approved mine life from 2028 to 2036.

Condestable Peru

Rio2 closed the acquisition of the mine from Southern Peaks in January 2026 and outlined a plan to permit a mill expansion to 10,000tpd and plans to study the feasibility of an expansion to 12,000tpd

Candelaria Chile

Strong potential for continuation of mine life extensions through UG extensions and surface projects.

Antapaccay Peru

Coroccohuayco project development advancing, with potential for resource expansion and mine life extension of 30+ years. Community consultations progressing. **Coroccohuayco potential for first ore 2028, final decision expected in 2026.**

Guadalupe-Palmarejo Mexico

2025 exploration program extends near-mine resources in the Hidalgo Corridor. Hidalgo, Libertad, and San Juan veins extended along strike by 500 meters, 300 meters, and 150 meters, respectively.

Condestable - Peru

DIVERSIFIED

Vale Royalty Brazil

Royalty payments from Vale will benefit from contributions from the Southeastern System starting in Q2 2025, partly offset by a reduction in production forecast for 2026.

Announcements made within the last three months shown in blue

ROYALTIES

Detour Lake Ontario

2024 LOM plan and UG PEA released in June 2024 reflecting average production of 1 Mozpa from 2030 to 2043. Ramp for underground project commenced in July 2025. West Pit zone drilling defining high-grade domains and further grade and continuity confirmed in the West Extension zone.

Stillwater Montana

Sibanye indicated in January 2026 it expects to meet 2025 annual production guidance of 255-270 koz. Stillwater West expected to reopen in 2028, doubling current production levels.

Musselwhite Ontario

Mine trend extension confirmed 1.6km along strike from current operation, including 4.1m at 15.1 g/t Au. Surface drilling within 10km of mill identifying multiple targets for potential OP satellite deposits.

Côté Ontario

Côté achieved nameplate throughput rate of 36,000 tpd for 30 straight days in June 2025. **Achieved top end of production guidance, with 400 koz produced in 2025.**

Macassa (Kirkland Lake) Ontario

Asset optimization continues to be the focus, with construction of the new paste plant continuing Q3 2025, which is essentially complete. Exploration drilling targeting Lower/West SMC, SMC East and Main Break.

Porcupine Ontario

Produced 234,702 oz in 2025. Ramp up continuing at Pamour open pit. Exploration results include high-grade intercepts at Hoyle Pond and Borden & strike extensions at Pamour. 19 drills are currently active on the property.

Canadian Malartic Québec

Planned production from East Gouldie to start up in H2 2026. Drilling continued to extend East Gouldie to the east in both the upper and lower portions of the deposit.

Magino Ontario

February 2026 expansion plan outlines mill ramp up to 20,000 tpd starting in early 2028, with 17,000 tpd coming from Magino. 40% increase in open-pit mineral reserves to 3.1 Moz.

Séguéla Côte d'Ivoire

Mineral Reserve of 1.54Moz, an increase of 31%, with the addition of Sunbird UG. Plant expansion study in Q2 2026 to potentially increase production from 160-170koz to 200koz per year.

Bald Mountain Nevada

Kinross to proceed with capital required to mine full Redbird deposit of ~1 Moz. Extends mine life to 2032 with additional long-term optionality of 2.5 Moz of M&I at the property.

Island Gold Ontario

Mining rate increase to 2,400 tpd by 2027 and 3,000 tpd by 2029. Dec 2025 minerals reserves increased by 1Moz to 5.1Moz. FNV has royalty on regional Cline-Pick exploration target .

Hemlo Ontario

NPI provides increased leverage to higher gold prices. Sale to Hemlo Mining Corp. closed November 2025. **Expect an updated mine plan in H2 2026. 130,000 m of drilling planned in 2026, with an updated technical report to follow in H2 2027.**

PRODUCING AND ADVANCED NEWS

4

RAMP - U P

Valentine Gold¹ Newfoundland

Commercial production achieved. 23.8 koz poured in 2025, Q4 throughput averaging 90% of nameplate capacity. FS to increase throughput from 2.5 Mtpa to 4.5 Mtpa expected end of Q1 2026. **2025 drilling incl. Minotaur zone discovery and Frank Zone expansion.**

Greenstone¹ Ontario

First gold poured in May 2024 with commercial production achieved in November. **Produced 247 koz in 2025, in line with revised 2025 production guidance.**

Posse (Mara Rosa)¹ Brazil

Production for 2025 was 40 k GEOs, in line with revised 2025 guidance. 2026 production expected to increase to 67-80 kGEOs. Brownfield exploration continues to delineate structures on trend and parallel with Posse.

Salares Norte¹ Chile

First gold poured in March 2024. **Steady state production achieved in Q4 2025. Exceeded 2025 guidance of 325-375k GEOs, with 161k GEOs in Q4 2025.**

Tocantinzinho¹ Brazil

First gold poured in July 2024. Achieved nameplate capacity in July 2025. Forecasted production expected to range between 175,000 to 200,000 ounces in 2025.

CONSTRUCTION

Eskay Creek British Columbia

Skeena completed the permitting process in Feb 2026. Environmental Assessment Certificate, jointly approved by the Tahltan Nation, Federal Impact Assessment and BC Mines Act permit received January 2026. Operations planned to restart in Q2 2027

Stibnite Gold Idaho

Early works construction started in October. Perpetua advancing project financing which includes a \$2B application to the U.S. Import-Export Bank, \$255M strategic equity investment from Agnico Eagle and JPMorganChase and \$545M in equity raises.

Paul Brink, CEO of Franco-Nevada Corporation and Louis-Pierre Gignac, CEO of G Mining Ventures at Tocantinzinho Grand Opening in Brazil

ADVANCED AND EXPLORATION NEWS (cont.)

DEVELOPMENT UPDATES

Cascabel Ecuador

Drilling confirms high-grade resource at Tandayama-América open pit (TAM) adjacent to the Alpala Deposit. SolGold is targeting early development of TAM, with first production scheduled to begin in 2028. [SolGold and Jiangxi Copper reached agreement on takeover arrangement in Dec 2025¹.](#)

New Prosperity British Columbia

Long-standing dispute settled with Taseko contributing 22.5% equity interest in the New Prosperity mineral tenures to a trust for the benefit of the Tsilhqot'in Nation.

Copper World Project Arizona

Mitsubishi Corporation acquires 30% JV interest for \$600M. The project has received all major permits required for development and operation. Feasibility study to be advanced in 2025 with completion and sanctioning decision expected in 2026.

Calcatreu Argentina

Construction advancing on plant and leach facility with first material on heap leach expected in early 2026. Technical report Q2 2026.

San Jorge Argentina

Developer is moving project forward under RIGI framework. Working on feasibility study for Q4 2026 with initial production planned for early 2029.

Courageous Lake Northwest Territories

[Valor Gold spin-out to hold 11.0M ounce Courageous Lake project.](#)

EXPLORATION UPDATES

Rogozna Serbia

[Significant increase to the Shanac resource, exceptional drill results at Kotlovi and new discovery \(Red Creek\) 1 km west of Shanac where drilling returned 53 m at 2.3 g/t AuEq and 4 m at 4 g/t AuEq. 8.6 Moz AuEq Inferred Mineral Resource.](#)

Scottie British Columbia

PEA in October 2025 outlines average annual production of 65 koz of gold over a 7-year mine life. Scottie completed the sale of a bulk sample resulting in proceeds of C\$9M.

Midas/Hollister Nevada

Hecla reports high-grade gold discovery at Midas with visible gold intercepts. [Technical studies underway to estimate refurbishment costs and timelines at permitted processing infrastructure. \\$16M exploration budget for 2026 with production targeted by 2031.](#)

Bullabulling Australia

Mineral Resource estimate doubled to 4.5 Moz in Dec 2025. Minerals 260 expects to complete a pre-feasibility study mid-2026.

Ağı Dağı Türkiye

In Oct 2025, Alamos Gold completed the sale of its Turkish development projects, Kirazlı, Ağı Dağı and Çamyurt to Tümad Madencilik Sanayi ve Ticaret A.Ş. for total consideration of \$470M.

Crawford Ontario

M&I Mineral Resource doubled. Key investors as of November 2025 include Agnico Eagle (10.0%), Samsung SDI (7.2%), Anglo American (6.3%) and a \$20M Investment by Taykwa Tagamou Nation. Crawford Project referred to Canada's Major Projects Office.

[Announcements made in the last three months show in blue](#)

1. Cascabel stream has buy-down option exercisable upon change of control (50% within 3 years of closing; 33% between 3 and 5 years of closing). Royalty contains buy-down option (50% within 6 years of closing)

Notes and Sources:

- All Mineral Resources and Mineral Reserves have been calculated in accordance with CIM or Acceptable Foreign Codes for the purposes of NI 43-101, including Regulation S-K 1300, JORC, or SAMREC guidelines
- Mineral Resources, which are not Mineral Reserves, do not have demonstrated economic viability
- Unless otherwise noted, Mineral Resources were reported by the operator inclusive of Mineral Reserves
- Contained metal does not property, recovery losses
- Franco-Nevada's royalties or stream interests may not cover the operator's entire property, or all estimated Mineral Resources and Mineral Reserves or a combination of both
- The grade of platinum group elements has been reported by the operators as either the sum of the individual platinum group element grades or the individual grades. In the cases where individual platinum group element grades have been reported, Franco-Nevada's Qualified Person has calculated the sum of the platinum group element grades for presentation purposes
- Mineral Resources and Mineral Reserves based on publicly disclosed information
- The MRMR statement might have excluded depletion prior to this year's reporting
- Rows and columns may not add up due to rounding

Inferred Resources are in addition to Measured and Indicated Resources. Inferred Resources have a great amount of uncertainty as their existence and whether they can be mined legally or economically. It cannot be assumed that all or any part of the Inferred Resources will ever be upgraded to a higher category. See "Cautionary Note to US Investors Regarding Reserve and Resource Reporting Standards" contained in Franco-Nevada's most recent Annual Information Form filed with Canadian securities regulatory authorities on www.sedarplus.com.

- SolGold Plc.; Annual Information Form, September 26, 2024. Resource is comprised of Alpala Measured & Indicated Resource of 3,013 Mt at 0.35% Cu, 0.28 g/t Au and 0.94 g/t Ag and Tandayama-America Indicated Resource of 722 Mt at 0.24% Cu and 0.19 g/t Au
