CAUTIONARY STATEMENT

2

FORWARD-LOOKING STATEMENTS

This presentation contains “forward-looking information” and “forward-looking statements” within the meaning of applicable Canadian securities laws and the United States Private Securities Litigation Reform Act of 1995, respectively, which may include, but are not limited to, statements with respect to future events or future performance, including the expected future performance of Sibanye-Stillwater’s South African PGM assets, the Sibanye-Stillwater stream, the Porcupine Complex assets, the Porcupine Royalty, the Côté Gold Mine, the Côté Gold Mine Royalty, the Arthur Gold Project and the Arthur Gold Project royalty and production and mine life estimates relating to Sibanye-Stillwater’s South African PGM assets, the Porcupine Complex assets, the Côté Gold Mine and the Arthur Project, management’s expectations regarding Franco-Nevada’s growth, results of operations, estimated future revenues, performance guidance, carrying value of assets, future dividends and requirements for additional capital, mineral resources and mineral reserves estimates, production estimates, production costs and revenue, future demand for and prices of commodities, expected mining sequences, business prospects and opportunities, the performance and plans of third party operators, any audits being conducted by the Canada Revenue Agency (“CRA”), the expected exposure for current and future tax assessments and available remedies, and statements with respect to the future status and any potential restart of the Cobre Panama mine and related arbitration proceedings. In addition, statements relating to mineral resources and mineral reserves, gold equivalent ounces (“GEOs”) or mine lives are forward-looking statements, as they involve implied assessment, based on certain estimates and assumptions, and no assurance can be given that the estimates and assumptions are accurate and that such mineral resources and mineral reserves, GEOs or mine lives will be realized. Such forward-looking statements reflect management’s current beliefs and are based on information currently available to management. Often, but not always, forward-looking statements can be identified by the use of words such as “plans”, “expects”, “is expected”, “budgets”, “potential for”, “scheduled”, “estimates”, “forecasts”, “predicts”, “projects”, “intends”, “targets”, “aims”, “anticipates” or “believes” or variations (including negative variations) of such words and phrases or may be identified by statements to the effect that certain actions “may”, “could”, “should”, “would”, “might” or “will” be taken, occur or be achieved. Forward-looking statements involve known and unknown risks, uncertainties and other factors, which may cause the actual results, performance or achievements of Franco-Nevada to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. A number of factors could cause actual events or results to differ materially from any forward-looking statement, including, without limitation: fluctuations in the prices of the primary commodities that drive royalty and stream revenue (gold, platinum group metals, copper, nickel, uranium, silver, iron-ore and oil and gas); fluctuations in the value of the Canadian and Australian dollar, Mexican peso and any other currency in which revenue is generated, relative to the U.S. dollar; changes in national and local government legislation, including permitting and licensing regimes and taxation policies and the enforcement thereof; proposed tariff and other trade measures that may be imposed by the United States and proposed retaliatory measures that may be adopted by its trading partners; the adoption of a global minimum tax on corporations; regulatory, political or economic developments in any of the countries where properties in which Franco-Nevada holds a royalty, stream or other interest are located or through which they are held; risks related to the operators of the properties in which Franco-Nevada holds a royalty, stream or other interest, including changes in the ownership and control of such operators; relinquishment or sale of mineral properties; influence of macroeconomic developments; business opportunities that become available to, or are pursued by Franco-Nevada; reduced access to debt and equity capital; litigation; title, permit or license disputes related to interests on any of the properties in which Franco-Nevada holds a royalty, stream or other interest; whether or not the Company is determined to have “passive foreign investment company” (“PFIC”) status as defined in Section 1297 of the United States Internal Revenue Code of 1986, as amended; potential changes in Canadian tax treatment of offshore streams; excessive cost escalation as well as development, permitting, infrastructure, operating or technical difficulties on any of the properties in which Franco-Nevada holds a royalty, stream or other interest; access to sufficient pipeline capacity; actual mineral content may differ from the mineral resources and mineral reserves contained in technical reports; rate and timing of production differences from resource estimates, other technical reports and mine plans; risks and hazards associated with the business of development and mining on any of the properties in which Franco-Nevada holds a royalty, stream or other interest, including, but not limited to unusual or unexpected geological and metallurgical conditions, slope failures or cave-ins, sinkholes, flooding and other natural disasters, terrorism, civil unrest or an outbreak of contagious disease; the impact of future pandemics; and the integration of acquired assets. The forward-looking statements contained herein are based upon assumptions management believes to be reasonable, including, without limitation: the ongoing operation of the properties in which Franco-Nevada holds a royalty, stream or other interest by the owners or operators of such properties in a manner consistent with past practice; the accuracy of public statements and disclosures made by the owners or operators of such underlying properties; no material adverse change in the market price of the commodities that underlie the asset portfolio; the Company’s ongoing income and assets relating to determination of its PFIC status; no material changes to existing tax treatment; the expected application of tax laws and regulations by taxation authorities; the expected assessment and outcome of any audit by any taxation authority; no adverse development in respect of any significant property in which Franco-Nevada holds a royalty, stream or other interest; the accuracy of publicly disclosed expectations for the development of underlying properties that are not yet in production; integration of acquired assets; and the absence of any other factors that could cause actions, events or results to differ from those anticipated, estimated or intended. However, there can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Investors are cautioned that forward-looking statements are not guarantees of future performance. In addition, there can be no assurance as to (i) the outcome of any ongoing or future audits by the CRA or the Company’s exposure as a result thereof, or (ii) the future status and any potential restart of the Cobre Panama mine or the outcome of any related arbitration proceedings. Franco-Nevada cannot assure investors that actual results will be consistent with these forward-looking statements. Accordingly, investors should not place undue reliance on forward-looking statements due to the inherent uncertainty therein.

For additional information with respect to risks, uncertainties and assumptions, please refer to Franco-Nevada’s most recent Annual Information Form as well as Franco-Nevada’s most recent Management’s Discussion and Analysis filed with the Canadian securities regulatory authorities on www.sedarplus.com and Franco-Nevada’s most recent Annual Report filed on Form 40-F filed with the SEC on www.sec.gov. The forward-looking statements herein are made as of the date hereof only and Franco-Nevada does not assume any obligation to update or revise them to reflect new information, estimates or opinions, future events or results or otherwise, except as required by applicable law.

NON-GAAP MEASURES

Cash Costs, Cash Costs per GEO sold, Adjusted Net Income, Adjusted Net Income per Share, Adjusted Net Income Margin, Adjusted EBITDA, Adjusted EBITDA per Share, and Adjusted EBITDA Margin are non-GAAP financial measures with no standardized meaning under International Financial Reporting Standards (“IFRS Accounting Standards”) and might not be comparable to similar financial measures disclosed by other issuers. For a quantitative reconciliation of each non-GAAP financial measure to the most directly comparable financial measure under IFRS Accounting Standards, refer to the appendix at the end of this presentation. Further information relating to these non-GAAP financial measures is incorporated by reference from the “Non-GAAP Financial Measures” section of Franco-Nevada’s MD&A for the three and nine months ended September 30, 2025 and filed on November 3, 2025 with the Canadian securities regulatory authorities on SEDAR+ available at www.sedarplus.com and with the U.S. Securities and Exchange Commission available on EDGAR at www.sec.gov.

This presentation does not constitute an offer to sell or a solicitation for an offer to purchase any security in any jurisdiction.

9M 2025 REVENUE

Royalties

- Acquired from operator/developer or third party
- Typically, gold assets which have higher optionality
- Revenue based NSRs are high margin
- Secured title. Interest in land in certain jurisdictions

E.g.: Detour, Goldstrike, Greenstone

Streams

- Purchase and sale contracts for gold/silver from operator/developer
- Typically, gold/silver from large copper mines
- Copper mines often have long life and steady cash flow
- Protection of tenure typically established through security and/or structurally

E.g.: Cobre Panama, Candelaria, Antapaccay, Antamina

Most Diversified Portfolio in the Industry

Arthur Gold ⁶	\$275M	~8	18 yrs	n/a ⁶

>25yrs (average)

25% (average)

Recent acquisitions have the potential to add >120K GEOs to our medium-term outlook

1. Franco-Nevada estimate based on current oxide production plus Yanacocha Sulphides, excluding Conga or other projects.
2. LOM based on PFS study dated March 8, 2024, more details available on SolGold's website. Investment of \$525M represents total committed amount. Amount funded at September 30, 2025 was \$47M. Average GEOs does not reflect buy-down option⁶. exercise available upon a change in control (50% within 3 years of closing; 33% between 3 to 5 years of closing).
3. Mine plan based on reserves at current operations and certain pre-feasibility and feasibility stage replacement projects.
4. LOM based on Technical Report with an effective date of January 13, 2025, more details available on Discovery's website. Average GEOs does not reflect buy-down option exercise available to Discovery (available on 2.00% NSR tranche).
5. Based on production per Technical Report with an effective date of June 30, 2022, and costs based on the midpoint of

IAMGOLD's 2025 guidance. The Technical report is in the process of being updated and is expected in 2026, Average GEOs does not reflect buy-down option exercise available to IAMGOLD (up to 50% within 3 years of closing). GEOs estimate and estimated mine life based on Merlin Technical Report Summary dated April 25, 2024, assuming ~80% recoveries and Silicon Technical Report Summary dated March 30, 2022. A PFS for the Arthur Project is underway and is expected late 2025 / early 2026.

ANTAPACCAY/COROCOCHUAYCO EXPANSION

P O T E N T I A L F O R S I G N I F I C A N T M I N E L I F E E X T E N S I O N S

20

Likely Coroccohuayco expansion to offset step down in Antapaccay stream

Stream deliveries expected to transition from a copper link to 30% Au/Ag production in 2028⁽²⁾

Glencore anticipates a construction decision on Coroccohuayco in H2 2026

First production targeted for H2 2029 with average gold /silver production of 53 kozpa Au / 1.5 Mozpa Ag over 40+ years

40+ year mine life⁽³⁾

Multiple resources within the Antapaccay district provide for a potential +40 year life through addition of successive satellite pits
+ potential upside from additional milling capacity

Exposure to highly mineralized district (997 km² land package)

Stream covers the majority of the Antapaccay concessions including Coroccohuayco

Antapaccay Gold and Silver Stream

Indicative Copper Production Profile (Kt Cu) ⁽¹⁾

■ Base Business ■ Coroccohuayco ■ Antapaccay District

	Coroccohuayco	Antapaccay District
FID	2026	2035
First Production	H2 2029	2037
Indicative Capex	\$1.80B	\$1.28B

1. Source: Glencore 2025 Capital Markets Day Presentation. www.glencore.com

2. Franco-Nevada will receive 300 ounces of gold and 4,700 ounces of silver for each 1,000 tonnes of copper in concentrate shipped, until 630 koz of gold and 10Moz of silver have been delivered. Thereafter, Franco-Nevada will receive 30% of the gold and silver shipped.

3. The Antapaccay district is a heavily mineralized area. The current copper resources already identified within the district are expected to be sufficient to provide a district mine life in excess of 40 years

GEOs Sold

Significant Embedded Growth if Mine Restarts

2023 Actions

- Law 406¹ found unconstitutional November 2023 and Government ordered shutdown
- Mine placed on preservation and safe management
- Full impairment recorded by FNV

International Arbitration

- Value of claim >\$5B
- Agreed to suspend arbitration² proceeding on June 18, 2025

Potential for Mine Restart

- President Mulino took office on July 1, 2024
- Gov approved P&SM in May 2025
- Completed shipping previously stored concentrate in June 2025
- Public polling indicating more openness to restarting the mine
- Gov expects to make an announcement on future of the mine in Q1 2026

1. Law 406 approved the revised contract for the Cobre Panama mine

2. Arbitration under the Canada/Panama Free Trade Agreement

>50% of 5-year Growth is Already Under Construction

1. Expansion periods are based on operators' indicated period of ramp-up
2. Indicated mine start periods are based on operators' guidance and FNV best estimates
3. Production growth is largely from accessing higher silver grade

4. Expansion is a combination of underlying production growth at the operation and mining on higher royalty rate ground

LONG-TERM OPTIONALITY

G R O W T H A N D O P T I O N A L I T Y

25

POTENTIAL ANNUAL CONTRIBUTION

M&I ROYALTY OUNCES

Assets that could potentially contribute beyond our 5-year outlook could generate ~225,000 GEOs¹ of annual production and contain over ~7M of M&I Royalty Ounces²

1.

Potential Annual Contribution provides FNV's conceptual estimate of potential GEOs that could be delivered to FNV in any given year post 2029. Such estimate assumes all projects being developed and uses current public disclosures on reserves and resources and potential mine production plans, where available. Potential GEO contributions does not reflect early buy-down options, including Porcupine (buy-down available on 2.00% NSR tranche).

2.

For information on calculation of M&I Royalty Ounces and additional Advanced and Exploration assets, refer to 2025 Asset Handbook published in May 2025 and see slide 37.

3.

M&I Royalty Ounces were not calculated for New Prosperity in the 2025 Asset Handbook due to the uncertainty surrounding its

4.

development. FNV views the recent agreement with the T̂silhqot'in Nation as a positive development and has included the historic resource in this slide. However, the New Prosperity Technical Report has not been updated since 2009. FNV is not treating the New Prosperity M&I Royalty Ounces as current and caution is advised when assessing the reliability of such resources.

Franco-Nevada has the option to convert the Cascabel royalty to a gold NSR for a period of time once the asset is producing. Does not reflect buy-down options exercisable by operator of Cascabel (NSR: 50% within 6 years of closing; Stream: 50% within 3 years of closing and 33% between 3 and 5 years of closing).

GEOS AND NET GEOS

APPENDIX

29

1. GEOs include Franco-Nevada's attributable share of production from our Mining and Energy assets, after applicable recovery and payability factors. GEOs are estimated on a gross basis for NSR royalties and, in the case of stream ounces, before the payment of the per ounce contractual price paid by the Company. For NPI royalties, GEOs are calculated taking into account the NPI economics. Where the Company receives gold and silver bullion in-kind as payment for its royalties, GEOs are recognized at the time of receipt of such bullion. Silver, platinum, palladium, iron ore, oil, gas and other commodities are converted to GEOs by dividing associated revenue, which includes settlement adjustments, by the relevant gold price. The price used in the computation of GEOs earned from a particular asset varies depending on the royalty or stream agreement, which may make reference to the market price realized by the operator, or the average price for the month, quarter, or year in which the commodity was produced or sold.

Quarterly average prices and rates		Q3 2025	Q3 2024	Variance

2. Net GEOs are GEOs sold, net of direct operating costs, including, for our stream GEOs, the associated ongoing cost per ounce. We use Net GEOs to reflect that GEOs from royalty interests have different economics than GEOs from stream interests due to the ongoing cost per ounce associated with GEOs from streams. We calculate Net GEOs on a quarterly basis by dividing Cash Costs (as defined below in the "Non-GAAP Financial Measures" section) by the average gold price (based on the LBMA PM Fix during the period), and subtracting this total from GEOs sold in the period.

(expressed in millions, excepts GEOs and Average Gold Price)	Q1 2025	Q2 2025	Q3 2025	For the nine months ended September 30, 2025
GEOs	126,585	112,093	138,772	377,450
Less:				
Cash Costs	\$ 38.5	\$ 33.5	\$ 47.2	\$ 119.2
Divided by: Average gold price per ounce	\$ 2,863	\$ 3,279	\$ 3,456	\$ 3,194
	13,447	10,217	13,657	37,321
Net GEOs	113,138	101,876	125,115	340,129

NON-GAAP MEASURES

A P P E N D I X

30

- Non-GAAP Financial Measures: Cash Costs, Cash Costs per GEO sold, Adjusted Net Income, Adjusted Net Income per Share, Adjusted Net Income Margin, Adjusted EBITDA, Adjusted EBITDA per share, and Adjusted EBITDA Margin are non-GAAP financial measures with no standardized meaning under IFRS Accounting Standards and might not be comparable to similar financial measures disclosed by other issuers. For a quantitative reconciliation of each non-GAAP financial measure to the most directly comparable financial measure under IFRS Accounting Standards, refer to the following tables. Further information relating to these Non-GAAP financial measures is incorporated by reference from the "Non-GAAP Financial Measures" section of Franco-Nevada's MD&A for the three and nine months ended September 30, 2025 and filed on November 3, 2025 with the Canadian securities regulatory authorities on SEDAR+ available at www.sedarplus.com and with the U.S. Securities and Exchange Commission available on EDGAR at www.sec.gov.

PRODUCING ASSET NEWS

32

APPENDIX STREAMS

Cobre Panama Panama

The mine is currently on preservation and safe management. P&SM plan approved by Government of Panama in May 2025. FNV suspended its arbitration proceeding. President Mulino expects to make a decision in Q1 2026 on the mine pending the results of an audit of the mine, which has commenced. In January 2026, President Mulino authorized the processing and export of stockpiled material.

Antamina Peru

Medium term production growth from crushing and conveying project. Regulatory approval in February 2024, extending approved mine life from 2028 to 2036.

Condestable Peru

Rio2 mine life expansion from exploration results.

Candelaria Chile

Strong potential for continuation of mine life extensions through UG extensions and surface projects.

Antapaccay Peru

Coroccohuayco project development advancing, with potential for resource expansion and mine life extension of 30+ years. Community consultations progressing.
Coroccohuayco potential for first ore 2028, final decision expected in 2026.

Guadalupe-Palmarejo Mexico

Mine life expansion from exploration results.

Condestable - Peru

DIVERSIFIED

Vale Royalty Brazil

Royalty payments from Vale will benefit from contributions from the Southeastern System starting in Q2 2025, partly offset by a reduction in production forecast for 2026.

PRODUCING ASSET NEWS (cont.)

33

APPENDIX ROYALTIES

Detour Lake Ontario

2024 LOM plan and UG PEA released in June 2024 reflecting average production of 1 Mozpa from 2030 to 2043. Ramp for underground project commenced in July 2025. West Pit zone drilling defining high-grade domains and further grade and continuity confirmed in the West Extension zone.

Stillwater Montana

Q4 2024 restructuring due to lower palladium price environment improves commercial viability, with anticipated S45X credits further underpinning sustainability. On track to meet 2025 annual production guidance of 255-270 koz per Sibanye Q3 guidance update.

Musselwhite Ontario

Mine trend extension confirmed 1.6km along strike from current operation, including 4.1m at 15.1 g/t Au. Surface drilling within 10km of mill identifying multiple targets for potential OP satellite deposits.

Côté Ontario

Côté achieved nameplate throughput rate of 36,000 tpd for 30 straight days in June 2025. On track to produce 360k–400k oz in 2025.

Macassa (Kirkland Lake) Ontario

Asset optimization continues to be the focus, **with construction of the new paste plant continuing Q3 2025, which is essentially complete**. Exploration drilling targeting Lower/West SMC, SMC East and Main Break.

Subika Ghana

Production expected to decrease relative to 2024 as mining activities in the Subika open pit are completed as planned in H2 2025. Increased investment in exploration and advanced projects at Subika Underground.

Canadian Malartic Québec

UG development reached quarterly record with East Gouldie production levels advancing for the planned production start up in H2 2026. Exploration drilling continued to extend East Gouldie to the east in both the upper and lower portions of the deposit.

Magino Ontario

Milling rates nearing planned levels, with detailed engineering advancing expansion to 12,400 tpd by Q3 2026. Potential longer-term expansion to between 18,000 and 20,000 tonnes per day.

Séguéla Côte d'Ivoire

Kingfisher maiden Mineral Reserve of 257 koz, open along strike and at depth. High grade exploration results at Sunbird remain open along strike.

Bald Mountain Nevada

Kinross announced plans to proceed with mining at the Redbird pit after converting approximately 1 million oz of gold to reserves. Mining of Redbird Phase 1 & 2 will extend the mine life through 2031.

Island Gold Ontario

Exploration spend of \$27M expected at Island Gold. Focus on UG exploration drilling, surface exploration drilling, regional exploration drilling and 500m of UG exploration drift development.

Hemlo Ontario

NPI provides increased leverage to higher gold prices. Sale to Hemlo Mining Corp. closed in late November 2025. Expect an updated mine plan in H2 2026.

PRODUCING AND ADVANCED NEWS

34

A P P E N D I X R A M P - U P S

Valentine Gold¹ Newfoundland

Commercial production achieved. First gold poured in September 2025 with ramp-up anticipated into Q1 2026. Substantial progress on phase two expansion studies, accelerating planned throughput ramp-up from 4 Mtpa starting in 2029, to 5.4 Mtpa in 2029.

Greenstone¹ Ontario

First gold poured in May 2024. Full year guidance revised down in June 2025. Between 220,000 to 260,000 ounces of gold now expected in 2025.

Posse (Mara Rosa)¹ Brazil

Commercial production achieved in May 2024. Full year guidance revised to 35,000-45,000 ounces (previously 94,000-104,000 ounces), following heavy rains and low contractor performance. Brownfield exploration budget of \$36M for 2025.

Salares Norte¹ Chile

First gold poured in March 2024. Commercial levels of production set to be achieved in Q2 2025. Gold Fields bought back 1% of Franco-Nevada's 2% NSR in May 2025. Q2 2025 production was 73,000 GEOs, up 46% from 50,000 GEO in Q1 2025.

Tocantinzinho¹ Brazil

First gold poured in July 2024. Achieved nameplate capacity in July 2025. Forecasted production expected to range between 175,000 to 200,000 ounces in 2025.

C O N S T R U C T I O N

Eskay Creek British Columbia

Tahltan Nation vote in support of IBA, representing important step toward final permitting. Joint Permit Application filed and expecting receipt of Environmental Assessment Certificate in Q4 2025. Construction activities advancing, mobilization of mining equipment to support quarry mining for construction materials. C\$144M bough deal financing closed in October 2025.

Stibnite Gold Idaho

Early works construction started in October. Perpetua advancing project financing which includes a \$2B application to the U.S. Import-Export Bank, \$255M strategic equity investment from Agnico Eagle and JPMorganChase and \$545M in equity raises.

Paul Brink, CEO of Franco-Nevada Corporation and Louis-Pierre Gignac, CEO of G Mining Ventures at Tocantinzinho Grand Opening in Brazil

Indicated timing based on operator guidance. Items in bold represent announcements made during within the last month.

ADVANCED AND EXPLORATION NEWS (cont.)

35

APPENDIX

DEVELOPMENT UPDATES ¹

Cascabel Ecuador

Recent drilling confirms high-grade resource core at Tandayama-América adjacent to the Alpala Deposit. SolGold is targeting early development of the Tandayama open pit to expedite production at Cascabel, with first production scheduled to begin in 2028. **SolGold and Jiangxi Copper reached agreement on takeover arrangement².**

New Prosperity British Columbia

Long-standing dispute settled with Taseko contributing 22.5% equity interest in the New Prosperity mineral tenures to a trust for the benefit of the T̓silhqot'in Nation.

Copper World Project Arizona

Mitsubishi Corporation acquires 30% JV interest for \$600M. The project has received all major permits required for development and operation. Feasibility study to be advanced in 2025 with completion and sanctioning decision expected in 2026.

Castle Mountain California

Phase 2 project expected to produce ~220koz/a for 12 years. Accepted in Federal Fast-41 permitting program, federal permits expected by end of 2026.

San Jorge Argentina

Developer is moving project forward under Rigi framework. Working on feasibility study for Q4 2026 with initial production planned for early 2029.

Courageous Lake Northwest Territories

Valor Gold spin-out to hold 11.0M ounce Courageous Lake project.

EXPLORATION UPDATES

Rogozna Serbia

Significant increase to the Shanac resource, exceptional drill results at Kotlovi and maiden resource at Gradina of 1.2Moz at 3.0 g/t. Overall Rogozna Project now has 8.6 Moz AuEq Inferred Mineral Resources.

Scottie British Columbia

PEA in October 2025 outlines average annual production of 65 koz of gold over a 7-year mine life. Scottie completed the sale of a bulk sample resulting in proceeds of C\$9M. FNV holds a 2% royalty on >600 km² covering the Scottie Gold project in the Golden Triangle located 23 km north of Ascot Resources Premier mill.

Midas Nevada

Hecla reports high-grade gold discovery at Midas with visible gold intercepts. With existing permitted processing infrastructure in place, there is potential for a near-term restart of production.

Bullabulling Australia

Mineral Resource estimate doubled to 4.5 Moz. Minerals 260 expects to complete a pre-feasibility study mid-2026.

Ağı Dağı Türkiye

In October 2025, Alamos Gold completed the sale of its Turkish development projects, Kirazlı, Ağı Dağı and Çamyurt to Tümad Madencilik Sanayi ve Ticaret A.Ş. for total consideration of \$470M.

Crawford Ontario

M&I Mineral Resource doubled. Key investors as of **November 2025 include Agnico Eagle (10.0%), Samsung SDI (7.2%), Anglo American (6.3%)** and a \$20M Investment by Taykwa Tagamou Nation. Crawford Project referred to Canada's Major Projects Office.

Notes and Sources:

- All Mineral Resources and Mineral Reserves have been calculated in accordance with CIM or Acceptable Foreign Codes for the purposes of NI 43-101, including Regulation S-K 1300, JORC, or SAMREC guidelines
- Mineral Resources, which are not Mineral Reserves, do not have demonstrated economic viability
- Unless otherwise noted, Mineral Resources were reported by the operator inclusive of Mineral Reserves
- Contained metal does not property, recovery losses
- Franco-Nevada's royalties or stream interests may not cover the operator's entire property, or all estimated Mineral Resources and Mineral Reserves or a combination of both
- The grade of platinum group elements has been reported by the operators as either the sum of the individual platinum group element grades or the individual grades. In the cases where individual platinum group element grades have been reported, Franco-Nevada's Qualified Person has calculated the sum of the platinum group element grades for presentation purposes
- Mineral Resources and Mineral Reserves based on publicly disclosed information
- The MRMR statement might have excluded depletion prior to this year's reporting
- Rows and columns may not add up due to rounding

Inferred Resources are in addition to Measured and Indicated Resources. Inferred Resources have a great amount of uncertainty as their existence and whether they can be mined legally or economically. It cannot be assumed that all or any part of the Inferred Resources will ever be upgraded to a higher category. See "Cautionary Note to US Investors Regarding Reserve and Resource Reporting Standards" contained in Franco-Nevada's most recent Annual Information Form filed with Canadian securities regulatory authorities on www.sedarplus.com.

- SolGold Plc.; Annual Information Form, September 26, 2024. Resource is comprised of Alpala Measured & Indicated Resource of 3,013 Mt at 0.35% Cu, 0.28 g/t Au and 0.94 g/t Ag and Tandayama-America Indicated Resource of 722 Mt at 0.24% Cu and 0.19 g/t Au
- Newmont Corporation; News Release, February 20, 2025
- G Mining Ventures Corp.; News Release, February 20, 2025
- Barrick Gold Corporation; Press Release, February 6, 2025. Estimated 80% of Mineral Resources covered by FNV interest.
- Hochschild Mining PLC; Press Release, March 12, 2025
- Mineral Resources reported by operator exclusive of Mineral Reserves. Franco-Nevada's Qualified Person determined the inclusive Mineral Resources by adding the exclusive Measured and Indicated Mineral Resources to the Proven and Probable Reserves
- Agnico Eagle Mines Limited; News Release, February 13, 2025
- Strickland Metals Limited; ASX Announcement, December 10, 2025. The Rogozna Project currently contains JORC compliant Inferred Mineral Resource of 8.60 Moz Au Eq (5.20 Moz Au, 321 kt Cu, 32.3 Moz Ag, 383 kt Pb and 830 kt Zn)
- First Quantum Minerals Ltd.; Taca Taca Project NI 43-101 Technical Report, March 29, 2021
- Los Andes Copper Ltd.; Corporate Presentation, February 5, 2025
- Faraday Copper Corp.; Copper Creek Project NI 43-101 Technical Report and Preliminary Economic Assessment, May 3, 2023. Franco-Nevada royalty covers portions of the Globe and Copper Prince deposits as well as a \$3 million production decision royalty payable over 5 years after commencement of commercial production.
- Canada Nickel Company, Inc.; Crawford Nickel Sulfide Project NI 43-101 Technical Report, October 1, 2023
- Newmont Corporation; News Release, February 20, 2025. Yanacocha, as represented in the table, excludes Conga
- Taseko Mines Ltd.; Corporation Presentation, June 19, 2025
- Due to the uncertainty surrounding the development of the New Prosperity Project and the fact that the Prosperity Technical Report has not been updated since 2009, caution is advised when assessing its conclusions in light of current metal price outlooks, operating and capital costs, appropriate technologies and like matters

On September 11, 2025, the Company announced that it has reached a settlement with the Canada Revenue Agency ("CRA") which provides for a final resolution of its tax dispute in connection with the transfer pricing reassessments for 2013 to 2019 related to income generated by its Mexican and Barbadian subsidiaries.

Highlights:

- No payment required of any tax in Canada on the foreign earnings of the Mexican and Barbadian subsidiaries for 2013 to 2019.
- The service fee charged by the Company for certain services provided to the Barbadian and Mexican subsidiaries will be adjusted to increase the mark-up applied to its cost of providing those services from the current range of 7-20% to 30%.
- This additional service fee will result in the Company being subjected to Canadian tax on additional income of C\$1.4 million in Canada for 2013-2019. After the application of non-capital losses, no additional cash taxes are anticipated to arise.
- Transfer pricing penalties reflected in the reassessments will be reversed. Interest charges reflected in the reassessments will be reduced and adjusted consequentially to the adjustments described above.
- The settlement is not legally binding on the CRA for years after 2019, however, the Company believes the transfer pricing principles established by the settlement will apply to subsequent years (provided there are no material changes to the facts or law) but notes the Federal Government recently announced proposed changes to the transfer pricing legislation which, if enacted, would apply from 2026 onwards. The Company is in the process of evaluating the potential impact of these proposals.
