PRODUCING ASSET NEWS

S T R E A M S

Cobre Panama Panama

The mine is currently on preservation and safe management. **Government has approved the processing of the stockpiles.** President Mulino expects to make an announcement in June 2026 pending the results of an audit of the mine.

Antamina Peru

Medium term production growth from crushing and conveying project. Regulatory approval in February 2024, extending approved mine life from 2028 to 2036.

Condestable Peru

Rio2 closed the acquisition of the mine from Southern Peaks in January 2026 and outlined a plan to permit a mill expansion to 10,000tpd and plans to study the feasibility of an expansion to 12,000tpd.

Candelaria Chile

Strong potential for continuation of mine life extensions through UG extensions and surface projects.

Antapaccay Peru

Coroccohuayco project development advancing, with potential for resource expansion and mine life extension of 30+ years. Community consultations progressing. Coroccohuayco potential for first ore 2028, final decision expected in 2026.

Guadalupe-Palmarejo Mexico

2025 exploration program extends near-mine resources in the Hidalgo Corridor. Hidalgo, Libertad, and San Juan veins extended along strike by 500 meters, 300 meters, and 150 meters, respectively.

Condestable - Peru

D I V E R S I F I E D

Vale Royalty Brazil

Royalty payments from Vale will benefit from contributions from the Southeastern System which started in Q2 2025, partly offset by a reduction in production forecast for 2026.

ROYALTIES

Detour Lake Ontario

Optimization initiatives to support throughput increase expected end of 2029. Production step-up in 2030, reaching 1 Mozpa in 2031 for approximately 14 yrs. Exploration ramp reached a depth of 147 metres and overburden removal commencing for the conveyor-ramp portal. Drilling confirmed further grade and continuity in the West Extension zone.

Stillwater Montana

US PGM Operations converting from conventional bolting to fully mechanized in-stope bolting, enabling larger headings and increased volumes mined. Phased implementation to be completed by H2 2028. Steady state production of ~410koz by 2029 with Stillwater West providing future optionality and upside.

Musselwhite Ontario

Mine trend extension confirmed 2km along strike from current operation. Surface drilling within 10km of mill identifying multiple targets for potential OP satellite deposits. Camp Bay covered by NPI.

Côté Ontario

Côté achieved nameplate throughput rate of 36,000 tpd for 30 straight days in June 2025. Achieved top end of production guidance, with 400 koz produced in 2025. 2026 guidance of between 390-440 koz expected to be more heavily weighted towards H2 2026.

Macassa (Kirkland Lake) Ontario

Advancing plans to increase mining and processing to 2,250 tpd. Processing of AK ore at the LZ5 mill expected in Q2 2026.

Porcupine Ontario

Ramp up continuing at Pamour open pit. Exploration results include high-grade intercepts at Hoyle Pond and Borden & strike extensions at Pamour. 19 drills are currently active on the property. In March 2026, Discovery announced the acquisition of Glencore's Kidd Operations.

Canadian Malartic Québec

Production from the East Gouldie ramp commenced in March 2026, three months ahead of schedule. Evaluating second shaft. Drilling continues to extend East Gouldie to the east in both the upper and lower portions of the deposit.

Magino Ontario

February 2026 expansion plan outlines mill ramp up to 20,000 tpd starting in early 2028, with 17,000 tpd coming from Magino. 40% increase in open-pit mineral reserves to 3.1 Moz.

Séguéla Côte d'Ivoire

Mineral Reserve of 1.54Moz, an increase of 31%, with the addition of Sunbird UG. Plant expansion study in Q2 2026 to potentially increase production from 160-170koz to 200koz per year.

Bald Mountain Nevada

Kinross to proceed with capital required to mine full Redbird deposit of ~1 Moz, progressing as planned through Q1 2026. Extends mine life to 2032 with additional long-term optionality of 2.5 Moz of M&I at the property.

Island Gold Ontario

Mining rate increase to 2,400 tpd by 2027 and 3,000 tpd by 2029. Dec 2025 minerals reserves increased by 1Moz to 5.1Moz. FNV has royalty on regional Cline-Pick exploration target.

Hemlo Ontario

NPI provides increased leverage to higher gold prices. Sale to Hemlo Mining Corp. closed November 2025. Expect an updated mine plan in H2 2026. 130,000 m of drilling planned in 2026, with an updated technical report to follow in H2 2027.

PRODUCING AND ADVANCED ASSET NEWS

R A M P - U P

Valentine Gold¹ Newfoundland

Commercial production achieved. **Phase 2 expansion from 2.5 Mtpa to 5 Mtpa released, with 223 koz average annual gold production over 10 years.** 2025 drilling incl. Minotaur zone discovery and Frank Zone expansion.

Salares Norte¹ Chile

First gold poured in March 2024. Steady state production achieved in Q4 2025. Exceeded 2025 guidance of 325-375 k GEOs, with 161 k GEOs in Q4 2025.

Posse (Mara Rosa)¹ Brazil

Production for 2025 was 40 k GEOs, in line with revised 2025 guidance. 2026 production expected to increase to 67-80 kGEOs. Brownfield exploration continues to delineate structures on trend and parallel with Posse.

Greenstone¹ Ontario

Produced 247 koz in 2025, inline with revised guidance. **New technical report outlining 320 koz average annual gold production over the next 10 years. Potential mill throughput increase from 27 ktpd to 30 ktpd and potential conversion of UG resources.**

Tocantinzinho¹ Brazil

First gold poured in July 2024. Achieved nameplate capacity in July 2025. Forecasted production expected to range between 160,000 to 190,000 ounces in 2026.

C O N S T R U C T I O N

Eskay Creek British Columbia

Skeena completed the permitting process in Feb 2026. Environmental Assessment Certificate, jointly approved by the Tahltan Nation, Federal Impact Assessment and BC Mines Act permit received January 2026. Operations planned to restart in Q2 2027.

Stibnite Gold Idaho

U.S. EXIM's Board advances proposed \$2.7B loan to Congress for development of the Stibnite Gold Project, expected to close in the second half of 2026. Dec 31, 2025 updated Technical Report shows improved economics with commercial production anticipated in 2029.

D E V E L O P M E N T U P D A T E S

PSJ Cobre Mendocino (San Jorge) Argentina

Developer (private company) is moving project forward under RIGI framework with feasibility study expected in late 2026. Initial production planned for 2029.

Courageous Lake Northwest Territories

Valor Gold spin-out to hold 11.0M ounce Courageous Lake project.

Arthur Gold Nevada

PFS results released supporting an initial nine-year mine life with an estimated average annual production of ~500koz Au (with production front-loaded of ~800koz Au per year) supported by a maiden Merlin Mineral Reserve of 4.9 Moz.

ADVANCED AND EXPLORATION NEWS (cont.)

DEVELOPMENT UPDATES

Cascabel Ecuador

Drilling confirms high-grade resource at Tandayama-América open pit (TAM) adjacent to the Alpala Deposit. SolGold is targeting early development of TAM, with first production scheduled to begin in 2028. SolGold and Jiangxi Copper completed takeover arrangement in March 2026. **Buy-down options for 50% of Cascabel stream and NSR were exercised.**

New Prosperity British Columbia

Long-standing dispute settled with Taseko contributing 22.5% equity interest in the New Prosperity mineral tenures to a trust for the benefit of the T̓silhqot'in Nation.

Copper World Project Arizona

Mitsubishi Corporation acquires 30% JV interest for \$600M. The project has received all major permits required for development and operation. Feasibility Study advanced during 2025 with completion and sanctioning decision expected in 2026. **Feasibility Study 85% complete at the end of March and on track for completion by mid-2026. Sanctioning decision expected later in 2026.**

Calcatreu Argentina

Construction complete on plant and leach facility and commencement of leaching operations in March 2026. Technical report expected in Q2 2026.

Taca Taca Argentina

De-risking Taca Taca with an updated technical report in February 2026 demonstrating positive project economics, completion of the Environmental and Social Impact Assessment in H1 2026 and an RIGI application in Argentina.

Castle Mountain California

Final EIS and Record of Decision on track for Q4 2026, draft EIS published in April. Updated feasibility study expected during the second half of 2026 with investment decision expected during the first half of 2027.

EXPLORATION UPDATES

Rogozna Serbia

Significant increase to the Shanac resource, exceptional drill results at Kotlovi and new discovery (Red Creek) 1 km west of Shanac where drilling returned 53 m at 2.3 g/t AuEq and 4 m at 4 g/t AuEq. 8.6 Moz AuEq Inferred Mineral Resource.

Ring of Fire/Eagle's Nest Ontario

Federal government has determined an impact assessment is not required for Wyloo's Eagle's Nest project. Marten Falls First Nation files environmental assessment for key Ring of Fire access road.

Midas/Hollister Nevada

Hecla reports high-grade gold discovery at Midas with visible gold intercepts. Technical studies underway to estimate refurbishment costs and timelines at the existing permitted processing infrastructure. \$16M exploration budget for 2026 with production targeted by 2031.

Bullabulling Australia

Mineral Resource estimate doubled to 3Moz Indicated Mineral Resources and 1.5Moz Inferred Mineral Resources in Dec 2025. Minerals 260 expects to complete a pre-feasibility study mid-2026. **Franco-Nevada added to the existing royalty to now have a 2.45% GR on the larger land package.**

Ağı Dağı Türkiye

In October 2025, Alamos Gold completed the sale of its Turkish development projects, Kirazlı, Ağı Dağı and Çamyurt to Tümad Madencilik Sanayi ve Ticaret A.Ş. for total consideration of \$470M.

Crawford Ontario

M&I Mineral Resource doubled. Key investors as of February 2026 include Agnico Eagle (10.0%), Samsung SDI (7.2%), Anglo American (6.3%) and a \$20M Investment by Taykwa Tagamou Nation. **Federal review of Impact Statement complete. Targeting summer 2026 permitting decision.**
