APTIV PLC
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

1. GENERAL

General and basis of presentation—“Aptiv,” the “Company,” “we,” “us” and “our” refer to Aptiv PLC (formerly known as Delphi Automotive PLC), a public limited company formed under the laws of Jersey on May 19, 2011, which completed an initial public offering on November 22, 2011, and its consolidated subsidiaries. On December 4, 2017, following the spin-off of Delphi Technologies PLC, the Company changed its name to Aptiv PLC and New York Stock Exchange (“NYSE”) symbol to “APTIV.”

The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”) and all adjustments, consisting of only normal recurring items, which are necessary for a fair presentation, have been included. The consolidated financial statements and notes thereto included in this report should be read in conjunction with Aptiv’s 2021 Annual Report on Form 10-K.

Nature of operations—Aptiv is a leading global technology and mobility architecture company primarily serving the automotive sector. We deliver end-to-end mobility solutions enabling our customers’ transition to more electrified, software-defined vehicles. We design and manufacture vehicle components and provide electrical, electronic and active safety technology solutions to the global automotive and commercial vehicle markets. Aptiv operates manufacturing facilities and technical centers utilizing a regional service model that enables the Company to efficiently and effectively serve its global customers from best cost countries.

2. SIGNIFICANT ACCOUNTING POLICIES

Consolidation—The consolidated financial statements include the accounts of Aptiv and the subsidiaries in which Aptiv holds a controlling financial or management interest and variable interest entities of which Aptiv has determined that it is the primary beneficiary. Aptiv’s share of the earnings or losses of non-controlled affiliates, over which Aptiv exercises significant influence (generally a 20% to 50% ownership interest), is included in the consolidated operating results using the equity method of accounting. When Aptiv does not have the ability to exercise significant influence (generally when ownership interest is less than 20%), investments in non-consolidated affiliates without readily determinable fair value are measured at cost, less impairments, adjusted for observable price changes in orderly transactions for identical or similar investments of the same issuer, while investments in publicly traded equity securities are measured at fair value based on quoted prices for identical assets on active market exchanges as of each reporting date. The Company monitors its investments in affiliates for indicators of other-than-temporary declines in value on an ongoing basis. If the Company determines that such a decline has occurred, an impairment loss is recorded, which is measured as the difference between carrying value and estimated fair value. Estimated fair value is generally determined using an income approach based on discounted cash flows or negotiated transaction values.

Intercompany transactions and balances between consolidated Aptiv businesses have been eliminated.

During the three months ended September 30, 2022, Aptiv received a dividend of \$3 million from one of its equity method investments. During the nine months ended September 30, 2021, Aptiv received a dividend of \$6 million from one of its equity method investments. The dividends were recognized as a reduction to the investment and represented a return on investment in cash flows from operating activities.

Aptiv’s equity investments without readily determinable fair value totaled \$65 million and \$30 million as of September 30, 2022 and December 31, 2021, respectively, and are classified within other long-term assets in the consolidated balance sheets. Aptiv’s investments in publicly traded equity securities totaled \$15 million and \$66 million as of September 30, 2022 and December 31, 2021, respectively, and are classified within other long-term assets in the consolidated balance sheets. Refer to Note 21. Investments in Affiliates for further information regarding Aptiv’s equity investments.

Use of estimates—Preparation of consolidated financial statements in conformity with U.S. GAAP requires the use of estimates and assumptions that affect amounts reported therein. Generally, matters subject to estimation and judgment include amounts related to accounts receivable realization, inventory obsolescence, asset impairments, useful lives of intangible and fixed assets, deferred tax asset valuation allowances, income taxes, pension benefit plan assumptions, accruals related to litigation, warranty costs, environmental remediation costs, contingent consideration arrangements, worker’s compensation accruals and healthcare accruals. Due to the inherent uncertainty involved in making estimates, including the duration and severity of the impacts of the COVID-19 pandemic, the ongoing global supply chain disruptions and the conflict between Ukraine and Russia, actual results reported in future periods may be based upon amounts that differ from those estimates.

Revenue recognition—Revenue is measured based on consideration specified in a contract with a customer. Customer contracts generally are represented by a combination of a current purchase order and a current production schedule issued by the customer. The Company recognizes revenue when it satisfies a performance obligation by transferring control over a

product or service to a customer. From time to time, Aptiv enters into pricing agreements with its customers that provide for price reductions, some of which are conditional upon achieving certain joint cost saving targets. In these instances, revenue is recognized based on the agreed-upon price at the time of shipment.

Sales incentives and allowances are recognized as a reduction to revenue at the time of the related sale. In addition, from time to time, Aptiv makes payments to customers in conjunction with ongoing business. These payments to customers are generally recognized as a reduction to revenue at the time of the commitment to make these payments. However, certain other payments to customers, or upfront fees, meet the criteria to be considered a cost to obtain a contract as they are directly attributable to a contract, are incremental and management expects the fees to be recoverable.

Aptiv collects and remits taxes assessed by different governmental authorities that are both imposed on and concurrent with a revenue-producing transaction between the Company and the Company's customers. These taxes may include, but are not limited to, sales, use, value-added, and some excise taxes. Aptiv reports the collection of these taxes on a net basis (excluded from revenues). Shipping and handling fees billed to customers are included in net sales, while costs of shipping and handling are included in cost of sales. Refer to Note 20. Revenue for further information.

Net income per share—Basic net income per share is computed by dividing net income attributable to ordinary shareholders by the weighted average number of ordinary shares outstanding during the period. Diluted net income per share reflects the weighted average dilutive impact of all potentially dilutive securities from the date of issuance and is computed using the treasury stock and if-converted methods. The if-converted method is used to determine if the impact of conversion of the 5.50% Mandatory Convertible Preferred Shares, Series A, \$0.01 par value per share (the "MCPS") into ordinary shares is more dilutive than the MCPS dividends to net income per share. If so, the MCPS are assumed to have been converted at the later of the beginning of the period or the time of issuance, and the resulting ordinary shares are included in the denominator and the MCPS dividends are added back to the numerator. Unless otherwise noted, share and per share amounts included in these notes are on a diluted basis. Refer to Note 12. Shareholders' Equity and Net Income Per Share for additional information including the calculation of basic and diluted net income per share.

Cash and cash equivalents—Cash and cash equivalents are defined as short-term, highly liquid investments with original maturities of three months or less, for which the book value approximates fair value.

Accounts receivable—Aptiv enters into agreements to sell certain of its accounts receivable, primarily in Europe. Sales of receivables are accounted for in accordance with Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 860, *Transfers and Servicing* ("ASC 860"). Agreements which result in true sales of the transferred receivables, as defined in ASC 860, which occur when receivables are transferred without recourse to the Company, are excluded from amounts reported in the consolidated balance sheets. Cash proceeds received from such sales are included in operating cash flows. Agreements that allow Aptiv to maintain effective control over the transferred receivables and which do not qualify as a sale, as defined in ASC 860, are accounted for as secured borrowings and recorded in the consolidated balance sheets within accounts receivable, net and short-term debt. The expenses associated with receivables factoring are recorded in the consolidated statements of operations within interest expense.

Credit losses—Aptiv is exposed to credit losses primarily through the sale of vehicle components and services. Aptiv assesses the creditworthiness of a counterparty by conducting ongoing credit reviews, which considers the Company's expected billing exposure and timing for payment, as well as the counterparty's established credit rating. When a credit rating is not available, the Company's assessment is based on an analysis of the counterparty's financial statements. Aptiv also considers contract terms and conditions, country and political risk, and business strategy in its evaluation. Based on the outcome of this review, the Company establishes a credit limit for each counterparty. The Company continues to monitor its ongoing credit exposure through active review of counterparty balances against contract terms and due dates, which includes timely account reconciliation, payment confirmation and dispute resolution. The Company may also employ collection agencies and legal counsel to pursue recovery of defaulted receivables, if necessary.

Aptiv primarily utilizes historical loss and recovery data, combined with information on current economic conditions and reasonable and supportable forecasts to develop the estimate of the allowance for doubtful accounts in accordance with ASC Topic 326, *Financial Instruments – Credit Losses*. As of September 30, 2022 and December 31, 2021, the Company reported \$3,366 million and \$2,784 million, respectively, of accounts receivable, net of allowances, which includes the allowance for doubtful accounts of \$53 million and \$37 million, respectively. Changes in the allowance for doubtful accounts were not material for the nine months ended September 30, 2022.

Inventories—As of September 30, 2022 and December 31, 2021, inventories are stated at the lower of cost, determined on a first-in, first-out basis, or net realizable value, including direct material costs and direct and indirect manufacturing costs. Refer to Note 3. Inventories for additional information. Obsolete inventory is identified based on analysis of inventory for known obsolescence issues, and, generally, the market value of inventory on hand in excess of one year's supply is fully-reserved.

From time to time, payments may be received from suppliers. These payments from suppliers are recognized as a reduction of the cost of the material acquired during the period to which the payments relate. In some instances, supplier rebates are received in conjunction with or concurrent with the negotiation of future purchase agreements and these amounts are amortized over the prospective agreement period.

Assets and liabilities held for sale—The Company considers assets to be held for sale when management, having the appropriate authority, approves and commits to a formal plan to actively market the assets for sale at a price reasonable in relation to their estimated fair value, the assets are available for immediate sale in their present condition, an active program to locate a buyer and other actions required to complete the sale have been initiated, the sale of the assets is probable and expected to be completed within one year and it is unlikely that significant changes will be made to the plan. Upon designation as held for sale, the Company records the assets at the lower of their carrying value or their estimated fair value, less cost to sell, and ceases to record depreciation expense on the assets.

Assets and liabilities of a discontinued operation are reclassified as held for sale for all comparative periods presented in the consolidated balance sheets. For assets that meet the held for sale criteria but do not meet the definition of a discontinued operation, the Company reclassifies the assets and liabilities in the period in which the held for sale criteria are met, but does not reclassify prior period amounts.

Intangible assets—Intangible assets were \$806 million and \$964 million as of September 30, 2022 and December 31, 2021, respectively. Aptiv amortizes definite-lived intangible assets over their estimated useful lives. Aptiv has definite-lived intangible assets related to patents and developed technology, customer relationships and trade names. Indefinite-lived in-process research and development intangible assets are not amortized, but are tested for impairment annually, or more frequently when indicators of potential impairment exist, until the completion or abandonment of the associated research and development efforts. Upon completion of the projects, the assets will be amortized over the expected economic life of the asset, which will be determined on that date. Should the project be determined to be abandoned, and if the asset developed has no alternative use, the full value of the asset will be charged to expense. The Company also has intangible assets related to acquired trade names that are classified as indefinite-lived when there are no foreseeable limits on the periods of time over which they are expected to contribute cash flows. These indefinite-lived trade name assets are tested for impairment annually, or more frequently when indicators of potential impairment exist. Costs to renew or extend the term of acquired intangible assets are recognized as expense as incurred. Amortization expense was \$37 million and \$112 million for the three and nine months ended September 30, 2022, respectively, and \$37 million and \$111 million for the three and nine months ended September 30, 2021, respectively, which includes the impact of any intangible asset impairment charges recorded during the period.

Goodwill—Goodwill is the excess of the purchase price over the estimated fair value of identifiable net assets acquired in business combinations. The Company tests goodwill for impairment annually in the fourth quarter, or more frequently when indications of potential impairment exist. The Company monitors the existence of potential impairment indicators throughout the fiscal year. The Company tests for goodwill impairment at the reporting unit level. Our reporting units are the components of operating segments which constitute businesses for which discrete financial information is available and is regularly reviewed by segment management.

The impairment test involves first qualitatively assessing goodwill for impairment. If the qualitative assessment is not met the Company then performs a quantitative assessment by comparing the estimated fair value of each reporting unit to its carrying value, including goodwill. Fair value reflects the price a market participant would be willing to pay in a potential sale of the reporting unit. If the estimated fair value exceeds carrying value, then we conclude that no goodwill impairment has occurred. If the carrying value of the reporting unit exceeds its estimated fair value, the Company recognizes an impairment loss in an amount equal to the excess, not to exceed the amount of goodwill allocated to the reporting unit. The Company qualitatively concluded there were no goodwill impairments during the nine months ended September 30, 2022 and 2021. Goodwill was \$2,274 million and \$2,511 million as of September 30, 2022 and December 31, 2021, respectively.

Warranty and product recalls—Expected warranty costs for products sold are recognized at the time of sale of the product based on an estimate of the amount that eventually will be required to settle such obligations. These accruals are based on factors such as past experience, production changes, industry developments and various other considerations. Costs of product recalls, which may include the cost of the product being replaced as well as the customer's cost of the recall, including labor to remove and replace the recalled part, are accrued as part of our warranty accrual at the time an obligation becomes probable and can be reasonably estimated. These estimates are adjusted from time to time based on facts and circumstances that impact the status of existing claims. Refer to Note 6. Warranty Obligations for additional information.

Income taxes—Deferred tax assets and liabilities reflect temporary differences between the amount of assets and liabilities for financial and tax reporting purposes. Such amounts are adjusted, as appropriate, to reflect changes in tax rates expected to be in effect when the temporary differences reverse. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in earnings in the period that includes the enactment date. A valuation allowance is recorded to reduce

deferred tax assets to the amount that is more likely than not to be realized. In the event the Company determines it is more likely than not that the deferred tax assets will not be realized in the future, the valuation allowance adjustment to the deferred tax assets will be charged to earnings in the period in which the Company makes such a determination. In determining whether an uncertain tax position exists, the Company determines, based solely on its technical merits, whether the tax position is more likely than not to be sustained upon examination, and if so, a tax benefit is measured on a cumulative probability basis that is more likely than not to be realized upon the ultimate settlement. In determining the provision for income taxes for financial statement purposes, the Company makes certain estimates and judgments which affect its evaluation of the carrying value of its deferred tax assets, as well as its calculation of certain tax liabilities. As it relates to changes in accumulated other comprehensive income (loss), the Company's policy is to release tax effects from accumulated other comprehensive income when the underlying components affect earnings. Refer to Note 11. Income Taxes for additional information.

Restructuring—Aptiv continually evaluates alternatives to align the business with the changing needs of its customers and to lower operating costs. This includes the realignment of its existing manufacturing capacity, facility closures, or similar actions, either in the normal course of business or pursuant to significant restructuring programs. These actions may result in employees receiving voluntary or involuntary employee termination benefits, which are mainly pursuant to union or other contractual agreements or statutory requirements. Voluntary termination benefits are accrued when an employee accepts the related offer. Involuntary termination benefits are accrued upon the commitment to a termination plan and when the benefit arrangement is communicated to affected employees, or when liabilities are determined to be probable and estimable, depending on the existence of a substantive plan for severance or termination. Contract termination costs and certain early termination lease costs are recorded when contracts are terminated. All other exit costs are expensed as incurred. Refer to Note 7. Restructuring for additional information.

Customer concentrations—As reflected in the table below, net sales to Stellantis N.V. ("Stellantis"), General Motors Company ("GM") and Volkswagen Group ("VW"), Aptiv's three largest customers, totaled approximately 25% and 26% of our total net sales for the three and nine months ended September 30, 2022, respectively, and 25% and 28% of our total net sales for the three and nine months ended September 30, 2021, respectively.

	Percentage of Total Net Sales				Accounts Receivable	
	Three Months Ended September 30,		Nine Months Ended September 30,		September 30,	December 31,
	2022	2021	2022	2021	2022	2021
					(in millions)	
Stellantis (1)	8 %	10 %	9 %	11 %	\$ 306	\$ 317
GM	9 %	7 %	9 %	8 %	270	208
VW	8 %	8 %	8 %	9 %	213	163

(1) On January 16, 2021, Fiat Chrysler Automobiles N.V. ("FCA") and Peugeot Citroën ("PSA") merged to form a new, combined company ("Stellantis"). Net sales to FCA and PSA before the date of the merger are included in net sales to Stellantis in the table above for the nine months ended September 30, 2021.

Recently adopted accounting pronouncements—In June 2022, the FASB issued Accounting Standards Update ("ASU") 2022-03, *Fair Value Measurement (Topic 820): Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions*. The amendments in this update clarify the guidance when measuring the fair value of an equity security subject to contractual restrictions that prohibit the sale of an equity security and introduces new disclosure requirements for equity securities subject to contractual sale restrictions that are measured at fair value in accordance with Topic 820. As permitted, the Company elected to early adopt this guidance effective in the second quarter of 2022. The adoption of this guidance resulted in insignificant incremental disclosures in the Company's financial statements.

Aptiv adopted ASU 2021-10, *Government Assistance (Topic 832): Disclosures by Business Entities about Government Assistance* in the first quarter of 2022. This guidance is intended to improve the transparency of government assistance received by most business entities by requiring disclosure of: (1) the types of government assistance received; (2) the accounting for such assistance; and (3) the effect of the assistance on the registrant's financial statements. As the guidance is only applicable to annual disclosures, the Company is still evaluating the effects that the adoption of ASU 2021-10 will have on the Company's consolidated financial statements.

In October 2021, the FASB issued ASU 2021-08, *Business Combinations (Topic 805): Accounting for Contracts and Contract Liabilities from Contracts with Customers*. This guidance requires that an acquirer recognize and measure contract assets and contract liabilities acquired in a business combination in accordance with ASC Topic 606, *Revenue from Contracts with Customers* ("ASC 606"). At the acquisition date, an acquirer should account for the related revenue contracts in accordance with ASC 606 as if it had originated the contracts. As permitted, the Company elected to early adopt this guidance effective January 1, 2022. As this standard is to be applied prospectively to business combinations, the impact to the

Company's consolidated financial statements will depend on various factors associated with individual business combinations that occur in future periods.

Recently issued accounting pronouncements not yet adopted—In September 2022, the FASB issued ASU 2022-04, *Liabilities - Supplier Finance Programs (Subtopic 405-50): Disclosure of Supplier Finance Program Obligations*. The amendments in this update intend to improve the transparency of supplier finance programs by requiring a buyer in a supplier finance program to disclose sufficient information about the program to allow a user of the financial statements to understand the program's nature, key terms, outstanding balances and activity during the period. The new guidance will be applied retrospectively and is effective for fiscal years beginning after December 15, 2022, except for the amendment on rollforward information, which is to be applied prospectively and is effective for fiscal years beginning after December 15, 2023. Early adoption is permitted. The adoption of this guidance is not expected to have a significant impact on Aptiv's consolidated financial statements.

3. INVENTORIES

Inventories are stated at the lower of cost, determined on a first-in, first-out basis, or net realizable value, including direct material costs and direct and indirect manufacturing costs. A summary of inventories is shown below:

	September 30, 2022	December 31, 2021
	(in millions)	
Productive material	\$ 1,619	\$ 1,311
Work-in-process	140	172
Finished goods	547	531
Total	<u>\$ 2,306</u>	<u>\$ 2,014</u>

4. ASSETS

Other current assets consisted of the following:

	September 30, 2022	December 31, 2021
	(in millions)	
Value added tax receivable	\$ 161	\$ 178
Prepaid insurance and other expenses	61	63
Reimbursable engineering costs	99	110
Notes receivable	5	16
Income and other taxes receivable	74	54
Deposits to vendors	9	6
Derivative financial instruments (Note 14)	20	38
Capitalized upfront fees (Note 20)	20	34
Other	8	—
Total	<u>\$ 457</u>	<u>\$ 499</u>

Other long-term assets consisted of the following:

	September 30, 2022	December 31, 2021
	(in millions)	
Deferred income taxes, net	\$ 151	\$ 159
Unamortized Revolving Credit Facility debt issuance costs	9	11
Income and other taxes receivable	32	28
Reimbursable engineering costs	169	176
Value added tax receivable	2	20
Equity investments (Note 21)	80	96
Derivative financial instruments (Note 14)	10	3
Capitalized upfront fees (Note 20)	47	58
Other	73	71
Total	<u>\$ 573</u>	<u>\$ 622</u>

5. LIABILITIES

Accrued liabilities consisted of the following:

	September 30, 2022	December 31, 2021
	(in millions)	
Payroll-related obligations	\$ 318	\$ 286
Employee benefits, including current pension obligations	83	83
Income and other taxes payable	113	157
Warranty obligations (Note 6)	40	41
Restructuring (Note 7)	43	42
Customer deposits	77	83
Derivative financial instruments (Note 14)	59	13
Accrued interest	51	30
MCPS dividends payable	3	3
Operating lease liabilities	96	92
Other	455	416
Total	<u>\$ 1,338</u>	<u>\$ 1,246</u>

Other long-term liabilities consisted of the following:

	September 30, 2022	December 31, 2021
	(in millions)	
Environmental (Note 10)	\$ 1	\$ 4
Extended disability benefits	6	5
Warranty obligations (Note 6)	8	8
Restructuring (Note 7)	15	21
Payroll-related obligations	9	11
Accrued income taxes	138	153
Deferred income taxes, net	136	153
Derivative financial instruments (Note 14)	32	7
Other	56	74
Total	<u>\$ 401</u>	<u>\$ 436</u>

6. WARRANTY OBLIGATIONS

Expected warranty costs for products sold are recognized principally at the time of sale of the product based on an estimate of the amount that eventually will be required to settle such obligations. These accruals are based on factors such as past experience, production changes, industry developments and various other considerations. The estimated costs related to product recalls based on a formal campaign soliciting return of that product are accrued at the time an obligation becomes probable and can be reasonably estimated. These estimates are adjusted from time to time based on facts and circumstances that impact the status of existing claims. Aptiv has recognized its best estimate for its total aggregate warranty reserves, including product recall costs, across all of its operating segments as of September 30, 2022. The Company estimates the reasonably possible amount to ultimately resolve all matters in excess of the recorded reserves as of September 30, 2022 to be zero to \$10 million.

The table below summarizes the activity in the product warranty liability for the nine months ended September 30, 2022:

	Warranty Obligations	
	(in millions)	
Accrual balance at beginning of period	\$	49
Provision for estimated warranties incurred during the period		33
Changes in estimate for pre-existing warranties		2
Settlements made during the period (in cash or in kind)		(32)
Foreign currency translation and other		(4)
Accrual balance at end of period	\$	48

7. RESTRUCTURING

Aptiv's restructuring activities are undertaken as necessary to implement management's strategy, streamline operations, take advantage of available capacity and resources, and ultimately achieve net cost reductions. These activities generally relate to the realignment of existing manufacturing capacity and closure of facilities and other exit or disposal activities, as it relates to executing Aptiv's strategy, either in the normal course of business or pursuant to significant restructuring programs.

As part of Aptiv's continued efforts to optimize its cost structure, it has undertaken several restructuring programs which include workforce reductions as well as plant closures. These programs are primarily focused on reducing global overhead costs and on the continued rotation of our manufacturing footprint to best cost locations in Europe. The Company recorded employee-related and other restructuring charges related to these programs totaling approximately \$11 million and \$52 million during the three and nine months ended September 30, 2022, respectively. None of the Company's individual restructuring programs initiated during the three and nine months ended September 30, 2022 were material and there have been no changes in previously initiated programs that have resulted (or are expected to result) in a material change to our restructuring costs. The Company expects to incur additional restructuring costs of approximately \$50 million (of which approximately \$40 million relates to the Advanced Safety and User Experience segment and approximately \$10 million relates to the Signal and Power Solutions segment) for programs approved as of September 30, 2022, which are primarily expected to be incurred within the next twelve months.

During the three and nine months ended September 30, 2021, Aptiv recorded employee-related and other restructuring charges totaling approximately \$1 million and \$21 million, respectively.

Restructuring charges for employee separation and termination benefits are paid either over the severance period or in a lump sum in accordance with either statutory requirements or individual agreements. Aptiv incurred cash expenditures related to its restructuring programs of approximately \$50 million and \$63 million in the nine months ended September 30, 2022 and 2021, respectively.

The following table summarizes the restructuring charges recorded for the three and nine months ended September 30, 2022 and 2021 by operating segment:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2022	2021	2022	2021
	(in millions)			
Signal and Power Solutions	\$ 1	\$ (4)	\$ 23	\$ 5
Advanced Safety and User Experience	10	5	29	16
Total	\$ 11	\$ 1	\$ 52	\$ 21

The table below summarizes the activity in the restructuring liability for the nine months ended September 30, 2022:

	Employee Termination Benefits Liability	Other Exit Costs Liability	Total
	(in millions)		
Accrual balance at January 1, 2022	\$ 63	\$ —	\$ 63
Provision for estimated expenses incurred during the period	52	—	52
Payments made during the period	(50)	—	(50)
Foreign currency and other	(7)	—	(7)
Accrual balance at September 30, 2022	<u>\$ 58</u>	<u>\$ —</u>	<u>\$ 58</u>

8. DEBT

The following is a summary of debt outstanding, net of unamortized issuance costs and discounts, as of September 30, 2022 and December 31, 2021:

	September 30, 2022	December 31, 2021
	(in millions)	
2.396%, senior notes, due 2025 (net of \$3 and \$0 unamortized issuance costs, respectively)	\$ 697	\$ —
1.50%, Euro-denominated senior notes, due 2025 (net of \$1 and \$2 unamortized issuance costs and \$1 and \$1 discount, respectively)	679	790
1.60%, Euro-denominated senior notes, due 2028 (net of \$2 and \$3 unamortized issuance costs, respectively)	484	563
4.35%, senior notes, due 2029 (net of \$2 and \$2 unamortized issuance costs, respectively)	298	298
3.25%, senior notes, due 2032 (net of \$7 and \$0 unamortized issuance costs and \$3 and \$0 discount, respectively)	790	—
4.40%, senior notes, due 2046 (net of \$3 and \$3 unamortized issuance costs and \$1 and \$1 discount, respectively)	296	296
5.40%, senior notes, due 2049 (net of \$4 and \$4 unamortized issuance costs and \$1 and \$1 discount, respectively)	345	345
3.10%, senior notes, due 2051 (net of \$16 and \$17 unamortized issuance costs and \$32 and \$33 discount, respectively)	1,452	1,450
4.15%, senior notes, due 2052 (net of \$11 and \$0 unamortized issuance costs and \$2 and \$0 discount, respectively)	987	—
Tranche A Term Loan, due 2026 (net of \$2 and \$2 unamortized issuance costs, respectively)	309	311
Finance leases and other	15	14
Total debt	<u>6,352</u>	<u>4,067</u>
Less: current portion	<u>(16)</u>	<u>(8)</u>
Long-term debt	<u>\$ 6,336</u>	<u>\$ 4,059</u>

Credit Agreement

Aptiv PLC and its wholly-owned subsidiary Aptiv Corporation entered into a credit agreement (the “Credit Agreement”) with JPMorgan Chase Bank, N.A., as administrative agent (the “Administrative Agent”), under which it maintains senior unsecured credit facilities currently consisting of a term loan (the “Tranche A Term Loan”) and a revolving credit facility of \$2 billion (the “Revolving Credit Facility”). Subsequently, Aptiv Global Financing Limited (“AGFL”), a wholly-owned subsidiary of Aptiv PLC, executed a joinder agreement to the Credit Agreement, which allows it to act as a borrower under the Credit Agreement, and a guaranty supplement, under which AGFL guarantees the obligations under the Credit Agreement, subject to certain exceptions.

The Credit Agreement was entered into in March 2011 and has been subsequently amended and restated on several occasions, most recently on June 24, 2021. The June 2021 amendment, among other things, (1) refinanced and replaced the existing term loan A and revolver with a new term loan A that matures in 2026, and a new five-year revolving credit facility with aggregate commitments of \$2 billion, (2) utilized the Company’s existing sustainability-linked metrics and commitments, that, if achieved, would change the facility fee and interest rate margins as described below, and (3) established the leverage

ratio maintenance covenant that requires the Company to maintain total net leverage (as calculated in accordance with the Credit Agreement) of less than 3.5 to 1.0 (or 4.0 to 1.0 for four full fiscal quarters following completion of material acquisitions, as defined in the Credit Agreement) and allowed for dividends and other payments on equity. Losses on modification of debt totaled \$1 million during the nine months ended September 30, 2021 related to the June 2021 amendment. Aptiv paid amendment fees of \$6 million during the nine months ended September 30, 2021 which are reflected as a financing activity in the consolidated statements of cash flows.

The Tranche A Term Loan and the Revolving Credit Facility mature on June 24, 2026. Beginning in the third quarter of 2022, Aptiv was obligated to begin making quarterly principal payments on the Tranche A Term Loan according to the amortization schedule in the Credit Agreement. The Credit Agreement also contains an accordion feature that permits Aptiv to increase, from time to time, the aggregate borrowing capacity under the Credit Agreement by up to an additional \$1 billion upon Aptiv's request, the agreement of the lenders participating in the increase, and the approval of the Administrative Agent.

As of September 30, 2022, Aptiv had no amounts outstanding under the Revolving Credit Facility and less than \$1 million in letters of credit were issued under the Credit Agreement. Letters of credit issued under the Credit Agreement reduce availability under the Revolving Credit Facility.

Loans under the Credit Agreement bear interest, at Aptiv's option, at either (a) the Administrative Agent's Alternate Base Rate ("ABR" as defined in the Credit Agreement) or (b) the London Interbank Offered Rate (the "Adjusted LIBO Rate" as defined in the Credit Agreement) ("LIBOR") plus in either case a percentage per annum as set forth in the table below (the "Applicable Rate"). The June 2021 amendment also contains provisions to facilitate the replacement of the LIBOR-based rate with a Secured Overnight Financing Rate ("SOFR") based rate upon the discontinuation or unavailability of LIBOR. The Applicable Rates under the Credit Agreement on the specified dates are set forth below:

	September 30, 2022		December 31, 2021	
	LIBOR plus	ABR plus	LIBOR plus	ABR plus
Revolving Credit Facility	1.06 %	0.06 %	1.10 %	0.10 %
Tranche A Term Loan	1.105 %	0.105 %	1.125 %	0.125 %

Under the June 2021 amendment, the Applicable Rate under the Credit Agreement, as well as the facility fee, may increase or decrease from time to time based on changes in the Company's credit ratings and whether the Company achieves or fails to achieve certain sustainability-linked targets with respect to greenhouse gas emissions and workplace safety. Such adjustments may be up to 0.04% per annum on interest rate margins on the Revolving Credit Facility, 0.02% per annum on interest rate margins on the Tranche A Term Loan and 0.01% per annum on the facility fee. Accordingly, the interest rate is subject to fluctuation during the term of the Credit Agreement based on changes in the ABR, LIBOR, changes in the Company's corporate credit ratings or whether the Company achieves or fails to achieve its sustainability-linked targets. The Credit Agreement also requires that Aptiv pay certain facility fees on the Revolving Credit Facility, which are also subject to adjustment based on the sustainability-linked targets as described above, and certain letter of credit issuance and fronting fees. As a result of meeting the sustainability-linked targets for the 2021 calendar year, the interest rate margins and facility fees were reduced by the amounts specified above, effective in the third quarter of 2022.

The interest rate period with respect to LIBOR interest rate options can be set at one-, three-, or six-months as selected by Aptiv in accordance with the terms of the Credit Agreement (or other period as may be agreed by the applicable lenders). Aptiv may elect to change the selected interest rate option in accordance with the provisions of the Credit Agreement. As of September 30, 2022, Aptiv selected the one-month LIBOR interest rate option on the Tranche A Term Loan, and the rate effective as of September 30, 2022, as detailed in the table below, was based on the Company's current credit rating and the Applicable Rate for the Credit Agreement:

	Applicable Rate	Borrowings as of September 30, 2022 (in millions)		Rates effective as of September 30, 2022
Tranche A Term Loan	LIBOR plus 1.105%	\$	311	4.23 %

Borrowings under the Credit Agreement are prepayable at Aptiv's option without premium or penalty.

The Credit Agreement contains certain covenants that limit, among other things, the Company's (and the Company's subsidiaries') ability to incur certain additional indebtedness or liens or to dispose of substantially all of its assets. In addition, under the June 2021 amendment, the Credit Agreement requires that the Company maintain a consolidated leverage ratio (the ratio of Consolidated Total Indebtedness to Consolidated EBITDA, each as defined in the Credit Agreement) of not more than 3.5 to 1.0 (or 4.0 to 1.0 for four full fiscal quarters following completion of material acquisitions, as defined in the Credit Agreement).

Agreement). The Credit Agreement also contains events of default customary for financings of this type. The Company was in compliance with the Credit Agreement covenants as of September 30, 2022.

As of September 30, 2022, all obligations under the Credit Agreement were borrowed by Aptiv Corporation and jointly and severally guaranteed by AGFL and Aptiv PLC, subject to certain exceptions set forth in the Credit Agreement.

Senior Unsecured Notes

On March 10, 2015, Aptiv PLC issued €700 million in aggregate principal amount of 1.50% Euro-denominated senior unsecured notes due 2025 (the “2015 Euro-denominated Senior Notes”) in a transaction registered under the Securities Act of 1933, as amended (the “Securities Act”). The 2015 Euro-denominated Senior Notes were priced at 99.54% of par, resulting in a yield to maturity of 1.55%. The proceeds were primarily utilized to redeem \$500 million of 6.125% senior unsecured notes due 2021, and to fund growth initiatives, such as acquisitions, and share repurchases. Aptiv incurred approximately \$5 million of issuance costs in connection with the 2015 Euro-denominated Senior Notes. Interest is payable annually on March 10. The Company has designated the 2015 Euro-denominated Senior Notes as a net investment hedge of the foreign currency exposure of its investments in certain Euro-denominated wholly-owned subsidiaries. Refer to Note 14. Derivatives and Hedging Activities for further information.

On September 15, 2016, Aptiv PLC issued €500 million in aggregate principal amount of 1.60% Euro-denominated senior unsecured notes due 2028 (the “2016 Euro-denominated Senior Notes”) in a transaction registered under the Securities Act. The 2016 Euro-denominated Senior Notes were priced at 99.881% of par, resulting in a yield to maturity of 1.611%. The proceeds, together with proceeds from the 2016 Senior Notes described below, were utilized to redeem the \$800 million of 5.00% senior unsecured notes due 2023. Aptiv incurred approximately \$4 million of issuance costs in connection with the 2016 Euro-denominated Senior Notes. Interest is payable annually on September 15. The Company has designated the 2016 Euro-denominated Senior Notes as a net investment hedge of the foreign currency exposure of its investments in certain Euro-denominated wholly-owned subsidiaries. Refer to Note 14. Derivatives and Hedging Activities for further information.

On September 20, 2016, Aptiv PLC issued \$300 million in aggregate principal amount of 4.40% senior unsecured notes due 2046 (the “2016 Senior Notes”) in a transaction registered under the Securities Act. The 2016 Senior Notes were priced at 99.454% of par, resulting in a yield to maturity of 4.433%. The proceeds, together with proceeds from the 2016 Euro-denominated Senior Notes, were utilized to redeem the \$800 million of 5.00% senior unsecured notes due 2023. Aptiv incurred approximately \$3 million of issuance costs in connection with the 2016 Senior Notes. Interest is payable semi-annually on April 1 and October 1 of each year to holders of record at the close of business on March 15 or September 15 immediately preceding the interest payment date.

On March 14, 2019, Aptiv PLC issued \$650 million in aggregate principal amount of senior unsecured notes in a transaction registered under the Securities Act, comprised of \$300 million of 4.35% senior unsecured notes due 2029 (the “4.35% Senior Notes”) and \$350 million of 5.40% senior unsecured notes due 2049 (the “5.40% Senior Notes”) (collectively, the “2019 Senior Notes”). The 4.35% Senior Notes were priced at 99.879% of par, resulting in a yield to maturity of 4.365%, and the 5.40% Senior Notes were priced at 99.558% of par, resulting in a yield to maturity of 5.430%. The proceeds were utilized to redeem \$650 million of 3.15% senior unsecured notes due 2020. Aptiv incurred approximately \$7 million of issuance costs in connection with the 2019 Senior Notes. Interest on the 2019 Senior Notes is payable semi-annually on March 15 and September 15 of each year to holders of record at the close of business on March 1 or September 1 immediately preceding the interest payment date.

On November 23, 2021, Aptiv PLC issued \$1.5 billion in aggregate principal amount of 3.10% senior unsecured notes due 2051 (the “2021 Senior Notes”) in a transaction registered under the Securities Act. The 2021 Senior Notes were priced at 97.814% of par, resulting in a yield to maturity of 3.214%. Aptiv incurred approximately \$17 million of issuance costs in connection with the 2021 Senior Notes. Interest on the 2021 Senior Notes is payable semi-annually on June 1 and December 1 of each year (commencing on June 1, 2022) to holders of record at the close of business on May 15 or November 15 immediately preceding the interest payment date. On December 27, 2021, Aptiv PLC entered into a supplemental indenture to add AGFL as a joint and several co-issuer of the 2021 Senior Notes effective as of the date of issuance. The proceeds from the 2021 Senior Notes were primarily utilized to redeem \$700 million of 4.15% senior unsecured notes due 2024 and \$650 million of 4.25% senior unsecured notes due 2026.

On February 18, 2022, Aptiv PLC and Aptiv Corporation (together, the “Issuers”) issued \$2.5 billion in aggregate principal amount of senior unsecured notes in a transaction registered under the Securities Act, comprised of \$700 million of 2.396% senior unsecured notes due 2025 (the “2.396% Senior Notes”), \$800 million of 3.25% senior unsecured notes due 2032 (the “3.25% Senior Notes”) and \$1.0 billion of 4.15% senior unsecured notes due 2052 (the “4.15% Senior Notes”) (collectively, the “2022 Senior Notes”). The 2022 Senior Notes are guaranteed by AGFL. The 2.396% Senior Notes were priced at 100% of par, resulting in a yield to maturity of 2.396%, the 3.25% Senior Notes were priced at 99.600% of par, resulting in a yield to maturity of 3.297%, and the 4.15% Senior Notes were priced at 99.783% of par, resulting in a yield to

maturity of 4.163%. On or after February 18, 2023, the 2.396% Senior Notes may be optionally redeemed at a price equal to their principal amount plus accrued and unpaid interest thereon.

The proceeds from the 2022 Senior Notes are expected to fund a portion of the cash consideration payable in connection with the proposed acquisition of Wind River Systems, Inc. (“Wind River”). In the event that the Company does not consummate the acquisition of Wind River on or prior to July 10, 2023, or if prior to such date, the definitive agreement relating to the proposed acquisition is terminated, then the Issuers will redeem all of the 3.25% Senior Notes and 4.15% Senior Notes on the special mandatory redemption date (as defined below) at a redemption price equal to 101% of the principal amount of each of the 3.25% Senior Notes and 4.15% Senior Notes, plus accrued and unpaid interest from the date of initial issuance. The “special mandatory redemption date” means the earlier to occur of (1) July 10, 2023, if the acquisition of Wind River has not been completed on or prior to July 10, 2023, and (2) the fifth business day following the termination of the definitive agreement relating to the proposed acquisition for any reason. Refer to Note 17. Acquisitions and Divestitures for further information on this proposed acquisition.

Aptiv incurred approximately \$22 million of issuance costs in connection with the 2022 Senior Notes. Interest on the 2.396% Senior Notes, 3.25% Senior Notes and 4.15% Senior Notes is payable semi-annually on February 18 and August 18 (commencing August 18, 2022), March 1 and September 1 (commencing September 1, 2022) and May 1 and November 1 (commencing May 1, 2022), respectively, of each year to holders of record at the close of business on February 3 or August 3, February 15 or August 15, April 15 or October 15, respectively, immediately preceding the interest payment date.

Although the specific terms of each indenture governing each series of senior notes vary, the indentures contain certain restrictive covenants, including with respect to Aptiv’s (and Aptiv’s subsidiaries) ability to incur liens, enter into sale and leaseback transactions and merge with or into other entities. In February 2022, Aptiv Corporation and AGFL were added as guarantors on each series of outstanding senior notes previously issued by Aptiv PLC. As of September 30, 2022, the Company was in compliance with the provisions of all series of the outstanding senior notes.

Other Financing

Receivable factoring—Aptiv maintains a €450 million European accounts receivable factoring facility that is available on a committed basis and allows for factoring of receivables denominated in both Euros and U.S. dollars (“USD”). This facility is accounted for as short-term debt and borrowings are subject to the availability of eligible accounts receivable. Collateral is not required related to these trade accounts receivable. This facility became effective on January 1, 2021 and has a term of three years, subject to Aptiv’s right to terminate at any time with three months’ notice. After expiration of the three-year term, either party can terminate with three months’ notice. Borrowings denominated in Euros under the facility bear interest at the three-month Euro Interbank Offered Rate (“EURIBOR”) plus 0.50% and USD borrowings bear interest at two-month LIBOR plus 0.50%, with borrowings under either denomination carrying a minimum interest rate of 0.20%. As of September 30, 2022 and December 31, 2021, Aptiv had no amounts outstanding on the European accounts receivable factoring facility.

Finance leases and other—As of September 30, 2022 and December 31, 2021, approximately \$15 million and \$14 million, respectively, of other debt primarily issued by certain non-U.S. subsidiaries and finance lease obligations were outstanding.

Interest—Cash paid for interest related to debt outstanding totaled \$129 million and \$131 million for the nine months ended September 30, 2022 and 2021, respectively.

Letter of credit facilities—In addition to the letters of credit issued under the Credit Agreement, Aptiv had approximately \$3 million and \$3 million outstanding through other letter of credit facilities as of September 30, 2022 and December 31, 2021, respectively, primarily to support arrangements and other obligations at certain of its subsidiaries.

9. PENSION BENEFITS

Certain of Aptiv’s non-U.S. subsidiaries sponsor defined benefit pension plans, which generally provide benefits based on negotiated amounts for each year of service. Aptiv’s primary non-U.S. plans are located in France, Germany, Mexico, Portugal and the U.K. The U.K. and certain Mexican plans are funded. In addition, Aptiv has defined benefit plans in South Korea, Turkey and Italy for which amounts are payable to employees immediately upon separation. The obligations for these plans are recorded over the requisite service period.

Aptiv sponsors a Supplemental Executive Retirement Program (“SERP”) for those employees who were U.S. executives of the former Delphi Corporation prior to September 30, 2008 and were still U.S. executives of the Company on October 7, 2009, the effective date of the program. This program is unfunded. Executives receive benefits over five years after an involuntary or voluntary separation from Aptiv. The SERP is closed to new members.

The amounts shown below reflect the defined benefit pension expense for the three and nine months ended September 30, 2022 and 2021:

	Non-U.S. Plans		U.S. Plans	
	Three Months Ended September 30,			
	2022	2021	2022	2021
	(in millions)			
Service cost	\$ 5	\$ 5	\$ —	\$ —
Interest cost	6	5	—	—
Expected return on plan assets	(5)	(4)	—	—
Amortization of actuarial losses	3	4	—	—
Net periodic benefit cost	\$ 9	\$ 10	\$ —	\$ —

	Non-U.S. Plans		U.S. Plans	
	Nine Months Ended September 30,			
	2022	2021	2022	2021
	(in millions)			
Service cost	\$ 14	\$ 15	\$ —	\$ —
Interest cost	19	15	—	—
Expected return on plan assets	(15)	(14)	—	—
Curtailment loss	—	5	—	—
Amortization of actuarial losses	6	12	1	1
Net periodic benefit cost	\$ 24	\$ 33	\$ 1	\$ 1

Other postretirement benefit obligations were approximately \$1 million and \$1 million at September 30, 2022 and December 31, 2021, respectively.

10. COMMITMENTS AND CONTINGENCIES

Ordinary Business Litigation

Aptiv is from time to time subject to various legal actions and claims incidental to its business, including those arising out of alleged defects, alleged breaches of contracts, product warranties, intellectual property matters, and employment-related matters. It is the opinion of Aptiv that the outcome of such matters will not have a material adverse impact on the consolidated financial position, results of operations, or cash flows of Aptiv. With respect to warranty matters, although Aptiv cannot ensure that the future costs of warranty claims by customers will not be material, Aptiv believes its established reserves are adequate to cover potential warranty settlements.

Matters Related to Global Supply Chain Disruptions

Due to various factors that are beyond our control, there are currently global supply chain disruptions, including a worldwide semiconductor supply shortage. The semiconductor supply shortage, due in part to increased demand across multiple industries, is impacting production in automotive and other industries. We anticipate these supply chain disruptions will continue into 2023. We, along with most automotive component manufacturers that use semiconductors, have been unable to fully meet the vehicle production demands of original equipment manufacturers (“OEMs”) because of events which are outside our control, including but not limited to, the global semiconductor shortage, fires in our suppliers’ facilities, unprecedented weather events in the southwestern United States, and other extraordinary events. Although we are working closely with suppliers and customers to minimize any potential adverse impacts of these events, some of our customers have indicated that they expect us to bear at least some responsibility for their lost production and other costs. While no assurances can be made as to the ultimate outcome of these customer expectations or any other future claims, we do not currently believe a loss is probable, and accordingly, no reserve has been made as of September 30, 2022. We will continue to actively monitor all direct

and indirect potential impacts of these supply chain disruptions, and will seek to aggressively mitigate and minimize their impact on our business.

Brazil Matters

Aptiv conducts business operations in Brazil that are subject to the Brazilian federal labor, social security, environmental, health and safety, tax and customs laws, as well as a variety of state and local laws. While Aptiv believes it complies with such laws, they are complex, subject to varying interpretations, and the Company is often engaged in litigation with government agencies regarding the application of these laws to particular circumstances. As of September 30, 2022, the majority of claims asserted against Aptiv in Brazil relate to such litigation. The remaining claims in Brazil relate to commercial and labor litigation with private parties. As of September 30, 2022, claims totaling approximately \$100 million (using September 30, 2022 foreign currency rates) have been asserted against Aptiv in Brazil. As of September 30, 2022, the Company maintains accruals for these asserted claims of \$20 million (using September 30, 2022 foreign currency rates). The amounts accrued represent claims that are deemed probable of loss and are reasonably estimable based on the Company's analyses and assessment of the asserted claims and prior experience with similar matters. While the Company believes its accruals are adequate, the final amounts required to resolve these matters could differ materially from the Company's recorded estimates and Aptiv's results of operations could be materially affected. The Company estimates the reasonably possible loss in excess of the amounts accrued related to these claims to be zero to \$80 million.

Environmental Matters

Aptiv is subject to the requirements of U.S. federal, state, local and non-U.S. environmental, health and safety laws and regulations. As of September 30, 2022 and December 31, 2021, the undiscounted reserve for environmental investigation and remediation recorded in other liabilities was approximately \$2 million and \$4 million, respectively. Aptiv cannot ensure that environmental requirements will not change or become more stringent over time or that its eventual environmental remediation costs and liabilities will not exceed the amount of its current reserves. In the event that such liabilities were to significantly exceed the amounts recorded, Aptiv's results of operations could be materially affected. At September 30, 2022, the difference between the recorded liabilities and the reasonably possible range of potential loss was not material.

11. INCOME TAXES

At the end of each interim period, the Company makes its best estimate of the annual expected effective income tax rate and applies that rate to its ordinary year-to-date earnings or loss. The income tax provision or benefit related to unusual or infrequent items, if applicable, that will be separately reported or reported net of their related tax effects are individually computed and recognized in the interim period in which those items occur. In addition, the effect of changes in enacted tax laws or rates, tax status, judgment on the realizability of a beginning-of-the-year deferred tax asset in future years or income tax contingencies is recognized in the interim period in which the change occurs.

The computation of the annual expected effective income tax rate at each interim period requires certain estimates and assumptions including, but not limited to, the expected pre-tax income (or loss) for the year, projections of the proportion of income (and/or loss) earned and taxed in respective jurisdictions, permanent and temporary differences, and the likelihood of the realizability of deferred tax assets generated in the current year. The future direct and indirect impacts of the ongoing volatile global economic conditions resulting from the COVID-19 pandemic, global supply chain disruptions and conflict between Ukraine and Russia are difficult to predict and may cause fluctuations in our expected results of operations for the year, which could create volatility in our annual expected effective income tax rate. Jurisdictions with a projected loss for the year or a year-to-date loss for which no tax benefit or expense can be recognized due to a valuation allowance are excluded from the estimated annual effective tax rate. The impact of such an exclusion could result in a higher or lower effective tax rate during a particular quarter, based upon the composition and timing of actual earnings compared to annual projections. The estimates used to compute the provision or benefit for income taxes may change as new events occur, additional information is obtained or as our tax environment changes. To the extent that the expected annual effective income tax rate changes, the effect of the change on prior interim periods is included in the income tax provision in the period in which the change in estimate occurs.

The Company's income tax expense and effective tax rates for the three and nine months ended September 30, 2022 and 2021 were as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2022	2021	2022	2021
	(dollars in millions)			
Income tax expense	\$ 59	\$ 25	\$ 96	\$ 101
Effective tax rate	14 %	14 %	15 %	12 %

The Company's tax rate is affected by the tax rates in Ireland and other jurisdictions in which the Company operates, the relative amount of income earned by jurisdiction and the relative amount of losses or income for which no tax benefit or expense was recognized due to a valuation allowance. The Company's effective tax rate is also impacted by the receipt of certain tax incentives and holidays that reduce the effective tax rate for certain subsidiaries below the statutory rate. For the nine months ended September 30, 2022, the Company's effective tax rate was impacted by impairments and other charges related to the Ukraine/Russia conflict for which no tax benefit was recognized.

The Company's effective tax rate for the three and nine months ended September 30, 2022 includes net discrete tax benefits of approximately \$1 million and \$5 million, respectively, primarily related to provision to return adjustments, net changes in accruals for unremitted earnings and changes in reserves. The effective tax rate for the three and nine months ended September 30, 2021 includes net discrete tax expense of approximately \$4 million and \$0 million, respectively, primarily related to changes in reserves and provision to return adjustments.

Aptiv PLC is an Irish resident taxpayer and not a domestic corporation for U.S. federal income tax purposes. As such, it is not subject to U.S. tax on remitted foreign earnings and, as a result of its capital structure, is also generally not subject to Irish tax on the repatriation of foreign earnings.

Cash paid or withheld for income taxes was \$146 million and \$134 million for the nine months ended September 30, 2022 and 2021, respectively.

On August 16, 2022, the Inflation Reduction Act ("IRA") was signed into law in the United States. Among other provisions, the IRA includes a 15% corporate minimum tax rate applied to certain large corporations and a 1% excise tax on corporate stock repurchases made after December 31, 2022. The IRA is not expected to have a significant impact on Aptiv's consolidated financial statements.

12. SHAREHOLDERS' EQUITY AND NET INCOME PER SHARE

2020 Public Equity Offering

In June 2020, the Company completed the underwritten public offering of approximately 15.1 million ordinary shares at a price of \$75.91 per share, resulting in net proceeds of approximately \$1,115 million, after deducting expenses and the underwriters' discount of \$35 million. Simultaneously, the Company completed the underwritten public offering of 11.5 million 5.50% Mandatory Convertible Preferred Shares, Series A, \$0.01 par value per share (the "MCPS") with a liquidation preference of \$100 per share (the "MCPS Offering"), resulting in net proceeds of approximately \$1,115 million, after deducting expenses and the underwriters' discount of \$35 million.

Each share of MCPS will convert on the mandatory conversion date of June 15, 2023, into between 1.0754 and 1.3173 shares of the Company's ordinary shares, subject to customary anti-dilution adjustments, and further adjustment if there are any accumulated and unpaid MCPS dividends at the conversion date. The number of the Company's ordinary shares issuable upon conversion will be determined based on the volume-weighted average price per share of the Company's ordinary shares over the 20 consecutive trading day period beginning on, and including the 21st scheduled trading day immediately before June 15, 2023. Subject to certain exceptions, at any time prior to June 15, 2023, holders of the MCPS may elect to convert each share into 1.0754 ordinary shares, subject to further anti-dilution adjustments. In the event of a fundamental change, the MCPS will convert at the fundamental change rates specified in the statement of rights, and the holders of the MCPS would be entitled to a fundamental change make-whole dividend.

Holders of the MCPS will be entitled to receive, when and if declared by the Company's Board of Directors, cumulative dividends at the annual rate of 5.50% of the liquidation preference of \$100 per share (equivalent to \$5.50 annually per share), payable in cash or, subject to certain limitations, by delivery of the Company's ordinary shares or any combination of cash and the Company's ordinary shares, at the Company's election. If declared, dividends on the MCPS will be payable quarterly on March 15, June 15, September 15 and December 15 of each year (commencing on September 15, 2020 to, and including June 15, 2023), to the holders of record of the MCPS as they appear on the Company's share register at the close of business on the immediately preceding March 1, June 1, September 1 or December 1, respectively.

Net Income Per Share

Basic net income per share is computed by dividing net income attributable to ordinary shareholders by the weighted average number of ordinary shares outstanding during the period. Diluted net income per share reflects the weighted average dilutive impact of all potentially dilutive securities from the date of issuance and is computed using the treasury stock and if-converted methods. The if-converted method is used to determine if the impact of the conversion of the MCPS into ordinary shares is more dilutive than the MCPS dividends to net income per share. If so, the MCPS are assumed to have been converted at the later of the beginning of the period or the time of issuance, and the resulting ordinary shares are included in the denominator and the MCPS dividends are added back to the numerator. Unless otherwise noted, share and per share amounts included in these notes are on a diluted basis. For the three and nine months ended September 30, 2022, the impact of the MCPS calculated under the if-converted method was anti-dilutive, and as such 12.37 million and 12.37 million ordinary shares underlying the MCPS, respectively, were excluded from the diluted net income per share calculation. For the three and nine months ended September 30, 2021, the impact of the MCPS calculated under the if-converted method was anti-dilutive, and as such 12.37 million and 12.37 million ordinary shares underlying the MCPS, respectively, were excluded from the diluted net income per share calculation. For all other periods presented, the calculation of net income per share also contemplates the dilutive impacts, if any, of the Company's share-based compensation plans. Refer to Note 18. Share-Based Compensation for additional information.

Weighted Average Shares

The following table illustrates net income per share attributable to ordinary shareholders and the weighted average shares outstanding used in calculating basic and diluted income per share:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2022	2021	2022	2021
	(in millions, except per share data)			
Numerator:				
Net income attributable to ordinary shareholders	\$ 286	\$ 86	\$ 298	\$ 512
Denominator:				
Weighted average ordinary shares outstanding, basic	270.93	270.51	270.88	270.44
Dilutive shares related to restricted stock units	0.17	0.69	0.22	0.70
Weighted average ordinary shares outstanding, including dilutive shares	271.10	271.20	271.10	271.14
Net income per share attributable to ordinary shareholders:				
Basic	\$ 1.06	\$ 0.32	\$ 1.10	\$ 1.89
Diluted	\$ 1.05	\$ 0.32	\$ 1.10	\$ 1.89

Share Repurchase Programs

In April 2016, the Board of Directors authorized a share repurchase program of up to \$1.5 billion of ordinary shares, which commenced in September 2016. This share repurchase program provides for share purchases in the open market or in privately negotiated transactions, depending on share price, market conditions and other factors, as determined by the Company.

There were no shares repurchased during the three and nine months ended September 30, 2022 and 2021.

As of September 30, 2022, approximately \$13 million of share repurchases remained available under the April 2016 share repurchase program, which is in addition to the share repurchase program of up to \$2.0 billion that was previously announced in January 2019. This program, which will commence following the completion of the April 2016 share repurchase program, provides for share purchases in the open market or in privately negotiated transactions, depending on share price, market conditions and other factors, as determined by the Company. All previously repurchased shares were retired, and are reflected as a reduction of ordinary share capital for the par value of the shares, with the excess applied as reductions to additional paid-in-capital and retained earnings.

Preferred Dividends

The Company has declared and paid cash dividends per preferred share during the periods presented as follows:

	Dividend Per Share	Amount (in millions)
2022:		
Third quarter	\$ 1.375	\$ 15
Second quarter	1.375	16
First quarter	1.375	16
Total	<u>\$ 4.125</u>	<u>\$ 47</u>
2021:		
Fourth quarter	\$ 1.375	\$ 16
Third quarter	1.375	15
Second quarter	1.375	16
First quarter	1.375	16
Total	<u>\$ 5.500</u>	<u>\$ 63</u>

13. CHANGES IN ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

The changes in accumulated other comprehensive income (loss) attributable to Aptiv (net of tax) for the three and nine months ended September 30, 2022 and 2021 are shown below:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2022	2021	2022	2021
	(in millions)			
Foreign currency translation adjustments:				
Balance at beginning of period	\$ (803)	\$ (494)	\$ (588)	\$ (445)
Aggregate adjustment for the period (1)	(211)	(77)	(426)	(126)
Balance at end of period	<u>(1,014)</u>	<u>(571)</u>	<u>(1,014)</u>	<u>(571)</u>
Gains (losses) on derivatives:				
Balance at beginning of period	(79)	38	(17)	40
Other comprehensive loss before reclassifications (nil net tax effect for all periods presented)	(11)	(44)	(50)	(7)
Reclassification to income (nil net tax effect for all periods presented)	<u>6</u>	<u>(18)</u>	<u>(17)</u>	<u>(57)</u>
Balance at end of period	<u>(84)</u>	<u>(24)</u>	<u>(84)</u>	<u>(24)</u>
Pension and postretirement plans:				
Balance at beginning of period	(60)	(110)	(67)	(140)
Other comprehensive income before reclassifications (net tax effect of \$(2), \$(2), \$(5), and \$(3))	5	3	11	21
Reclassification to income (net tax effect of \$(1), \$(1), \$(4) and \$(3))	<u>2</u>	<u>3</u>	<u>3</u>	<u>15</u>
Balance at end of period	<u>(53)</u>	<u>(104)</u>	<u>(53)</u>	<u>(104)</u>
Accumulated other comprehensive loss, end of period	<u>\$ (1,151)</u>	<u>\$ (699)</u>	<u>\$ (1,151)</u>	<u>\$ (699)</u>

- (1) Includes gains of \$94 million and \$191 million for the three and nine months ended September 30, 2022, respectively, and gains of \$30 million and \$74 million for the three and nine months ended September 30, 2021, respectively, related to non-derivative net investment hedges. Refer to Note 14. Derivatives and Hedging Activities for further description of these hedges. Includes \$6 million of accumulated currency translation adjustment losses reclassified to net income as a result of the liquidation of a foreign subsidiary during the three and nine months ended September 30, 2022.

Reclassifications from accumulated other comprehensive income (loss) to income for the three and nine months ended September 30, 2022 and 2021 were as follows:

Reclassification Out of Accumulated Other Comprehensive Income (Loss)					
Details About Accumulated Other Comprehensive Income Components	Three Months Ended September 30,		Nine Months Ended September 30,		Affected Line Item in the Statements of Operations
	2022	2021	2022	2021	
(in millions)					
Foreign currency translation adjustments:					
Liquidation of foreign subsidiary (1)	\$ (6)	\$ —	\$ (6)	\$ —	Other income (expense), net
	(6)	—	(6)	—	Income before income taxes
	—	—	—	—	Income tax expense
	(6)	—	(6)	—	Net income
	—	—	—	—	Net income (loss) attributable to noncontrolling interest
	<u>\$ (6)</u>	<u>\$ —</u>	<u>\$ (6)</u>	<u>\$ —</u>	Net income attributable to Aptiv
Gains (losses) on derivatives:					
Commodity derivatives	\$ (13)	\$ 15	\$ 7	\$ 54	Cost of sales

	<u>1</u>	<u>1</u>	<u>4</u>	<u>3</u>	Income tax expense
	(2)	(3)	(3)	(15)	Net income
	—	—	—	—	Net income (loss) attributable to noncontrolling interest
	<u>\$ (2)</u>	<u>\$ (3)</u>	<u>\$ (3)</u>	<u>\$ (15)</u>	Net income attributable to Aptiv
Total reclassifications for the period	\$ (14)	\$ 15	\$ 8	\$ 42	

(1) Represents accumulated currency translation adjustment losses reclassified to net income as a result of the liquidation of a foreign subsidiary during the three and nine months ended September 30, 2022.

(2) These accumulated other comprehensive loss components are included in the computation of net periodic pension cost (see Note 9. Pension Benefits for additional details).

14. DERIVATIVES AND HEDGING ACTIVITIES

Cash Flow Hedges

Aptiv is exposed to market risk, such as fluctuations in foreign currency exchange rates, commodity prices and changes in interest rates, which may result in cash flow risks. To manage the volatility relating to these exposures, Aptiv aggregates the exposures on a consolidated basis to take advantage of natural offsets. For exposures that are not offset within its operations, Aptiv enters into various derivative transactions pursuant to its risk management policies, which prohibit holding or issuing derivative financial instruments for speculative purposes, and designation of derivative instruments is performed on a transaction basis to support hedge accounting. The changes in fair value of these hedging instruments are offset in part or in whole by corresponding changes in the fair value or cash flows of the underlying exposures being hedged. Aptiv assesses the initial and ongoing effectiveness of its hedging relationships in accordance with its documented policy.

As of September 30, 2022, the Company had the following outstanding notional amounts related to commodity and foreign currency forward and option contracts designated as cash flow hedges that were entered into to hedge forecasted exposures:

Commodity	Quantity Hedged	Unit of Measure	Notional Amount (Approximate USD Equivalent)
	(in thousands)		(in millions)
Copper	118,494	pounds	\$ 415
Foreign Currency	Quantity Hedged	Unit of Measure	Notional Amount (Approximate USD Equivalent)
		(in millions)	
Mexican Peso	14,478	MXN	\$ 720
Chinese Yuan Renminbi	2,574	RMB	360
Euro	122	EUR	120
Polish Zloty	664	PLN	135
Hungarian Forint	23,895	HUF	55

As of September 30, 2022, Aptiv has entered into derivative instruments to hedge cash flows extending out to September 2024.

Gains and losses on derivatives qualifying as cash flow hedges are recorded in accumulated OCI, to the extent that hedges are effective, until the underlying transactions are recognized in earnings. Unrealized amounts in accumulated OCI will fluctuate based on changes in the fair value of hedge derivative contracts at each reporting period. Net losses on cash flow hedges included in accumulated OCI as of September 30, 2022 were \$54 million (approximately \$54 million, net of tax). Of this total, approximately \$41 million of losses are expected to be included in cost of sales within the next 12 months and approximately \$13 million of losses are expected to be included in cost of sales in subsequent periods. Cash flow hedges are discontinued when Aptiv determines it is no longer probable that the originally forecasted transactions will occur. Cash flows from derivatives used to manage commodity and foreign exchange risks designated as cash flow hedges are classified as operating activities within the consolidated statements of cash flows.

Net Investment Hedges

The Company is also exposed to the risk that adverse changes in foreign currency exchange rates could impact its net investment in non-U.S. subsidiaries. To manage this risk, the Company designates certain qualifying derivative and non-derivative instruments, including foreign currency forward contracts and foreign currency-denominated debt, as net investment hedges of certain non-U.S. subsidiaries. The gains or losses on instruments designated as net investment hedges are recognized within OCI to offset changes in the value of the net investment in these foreign currency-denominated operations. Gains and losses reported in accumulated OCI are reclassified to earnings only when the related currency translation adjustments are required to be reclassified, usually upon sale or liquidation of the investment. Cash flows from derivatives designated as net investment hedges are classified as investing activities within the consolidated statements of cash flows.

The Company has entered into a series of forward contracts, each of which have been designated as net investment hedges of the foreign currency exposure of the Company's investments in certain Chinese Yuan Renminbi ("RMB")-denominated subsidiaries. During the nine months ended September 30, 2022 and 2021, the Company received \$9 million and paid \$11 million, respectively, at settlement related to this series of forward contracts which matured during the period. In September

2022, the Company entered into forward contracts with a total notional amount of 700 million RMB (approximately \$100 million, using September 30, 2022 foreign currency rates), which mature in December 2022. Refer to the tables below for details of the fair value recorded in the consolidated balance sheets and the effects recorded in the consolidated statements of operations and consolidated statements of comprehensive income related to these derivative instruments.

The Company has designated the €700 million 2015 Euro-denominated Senior Notes and the €500 million 2016 Euro-denominated Senior Notes, as more fully described in Note 8. Debt, as net investment hedges of the foreign currency exposure of its investments in certain Euro-denominated subsidiaries. Due to changes in the value of the Euro-denominated debt instruments designated as net investment hedges, during the three and nine months ended September 30, 2022, \$94 million and \$191 million of gains, respectively, were recognized within the cumulative translation adjustment component of OCI. During the three and nine months ended September 30, 2021, \$30 million and \$74 million of gains, respectively, were recognized within the cumulative translation adjustment component of OCI. Included in accumulated OCI related to these net investment hedges were cumulative gains of \$154 million and losses of \$37 million as of September 30, 2022 and December 31, 2021, respectively.

Derivatives Not Designated as Hedges

In certain occasions the Company enters into certain foreign currency and commodity contracts that are not designated as hedges. When hedge accounting is not applied to derivative contracts, gains and losses are recorded to other income (expense), net and cost of sales in the consolidated statements of operations.

Fair Value of Derivative Instruments in the Balance Sheet

The fair value of derivative financial instruments recorded in the consolidated balance sheets as of September 30, 2022 and December 31, 2021 are as follows:

						Net Amounts of Assets and (Liabilities) Presented in the Balance Sheet
Asset Derivatives			Liability Derivatives			
Balance Sheet Location	September 30, 2022		Balance Sheet Location	September 30, 2022		September 30, 2022
(in millions)						
Derivatives designated as cash flow hedges:

Foreign currency derivatives*	Other current assets		29	Other current assets		9
Foreign currency derivatives*	Accrued liabilities		17	Accrued liabilities		21
Commodity derivatives	Other long-term assets		—	Other long-term liabilities		30
Foreign currency derivatives*	Other long-term assets		13	Other long-term assets		3
Foreign currency derivatives*	Other long-term liabilities		2	Other long-term liabilities		4
Total derivatives designated as hedges		\$	61			\$
						122

				Net Amounts of Assets and (Liabilities) Presented in the Balance Sheet	
Asset Derivatives			Liability Derivatives		
Balance Sheet Location	December 31, 2021		Balance Sheet Location	December 31, 2021	
(in millions)					
Derivatives designated as cash flow hedges:					
Commodity derivatives	Other current assets	\$	27	Accrued liabilities	\$ —
Foreign currency derivatives*	Other current assets		15	Other current assets	9 \$ 6
Foreign currency derivatives*	Accrued liabilities		5	Accrued liabilities	16 (11)
Commodity derivatives	Other long-term assets		2	Other long-term liabilities	—
Foreign currency derivatives*	Other long-term assets		2	Other long-term assets	1 1
Foreign currency derivatives*	Other long-term liabilities		1	Other long-term liabilities	8 (7)
Derivatives designated as net investment hedges:					
Foreign currency derivatives	Other current assets		—	Accrued liabilities	1
Total derivatives designated as hedges		\$	52	\$ 35	
Derivatives not designated:					
Commodity derivatives	Other current assets	\$	5	Accrued liabilities	\$ —
Foreign currency derivatives*	Accrued liabilities		—	Accrued liabilities	1 (1)
Total derivatives not designated as hedges		\$	5	\$ 1	

* Derivative instruments within this category are subject to master netting arrangements and are presented on a net basis in the consolidated balance sheets in accordance with accounting guidance related to the offsetting of amounts related to certain contracts.

The fair value of Aptiv's derivative financial instruments was in a net liability position as of September 30, 2022 and a net asset position as of December 31, 2021.

Effect of Derivatives on the Statements of Operations and Statements of Comprehensive Income

The pre-tax effect of derivative financial instruments in the consolidated statements of operations and consolidated statements of comprehensive income for the three and nine months ended September 30, 2022 and 2021 is as follows:

Three Months Ended September 30, 2022	(Loss) Gain Recognized in OCI	(Loss) Gain Reclassified from OCI into Income
	(in millions)	
Derivatives designated as cash flow hedges:		
Commodity derivatives	\$ (40)	\$ (13)
Foreign currency derivatives	23	7
Derivatives designated as net investment hedges:		
Foreign currency derivatives	6	—
Total	\$ (11)	\$ (6)
		Loss Recognized in Income
		(in millions)
Derivatives not designated:		
Foreign currency derivatives		\$ (8)
Total		\$ (8)

Three Months Ended September 30, 2021

	Loss Recognized in OCI	Gain Reclassified from OCI into Income
	(in millions)	
Derivatives designated as cash flow hedges:		
Commodity derivatives	\$ (16)	\$ 15
Foreign currency derivatives	(24)	3
Derivatives designated as net investment hedges:		
Foreign currency derivatives	(4)	—
Total	\$ (44)	\$ 18
		Loss Recognized in Income
		(in millions)
Derivatives not designated:		
Foreign currency derivatives		\$ (3)
Total		\$ (3)

Nine Months Ended September 30, 2022

	(Loss) Gain Recognized in OCI	Gain Reclassified from OCI into Income
	(in millions)	
Derivatives designated as cash flow hedges:		
Commodity derivatives	\$ (108)	\$ 7
Foreign currency derivatives	48	10
Derivatives designated as net investment hedges:		
Foreign currency derivatives	10	—
Total	\$ (50)	\$ 17
		Loss Recognized in Income
		(in millions)
Derivatives not designated:		
Foreign currency derivatives		\$ (15)
Total		\$ (15)

Nine Months Ended September 30, 2021

	Gain (Loss) Recognized in OCI	Gain Reclassified from OCI into Income
	(in millions)	
Derivatives designated as cash flow hedges:		
Commodity derivatives	\$ 35	\$ 54
Foreign currency derivatives	(31)	3
Derivatives designated as net investment hedges:		
Foreign currency derivatives	(11)	—
Total	\$ (7)	\$ 57

	Gain (Loss) Recognized in Income
	(in millions)
Derivatives not designated:	
Commodity derivatives	\$ 1
Foreign currency derivatives	(5)
Total	\$ (4)

The gain or loss recognized in income for designated and non-designated derivative instruments was recorded to cost of sales and other income (expense), net in the consolidated statements of operations for the three and nine months ended September 30, 2022 and 2021, respectively.

15. FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair Value Measurements on a Recurring Basis

Derivative instruments—All derivative instruments are required to be reported on the balance sheet at fair value unless the transactions qualify and are designated as normal purchases or sales. Changes in fair value are reported currently through earnings unless they meet hedge accounting criteria. Aptiv’s derivative exposures are with counterparties with long-term investment grade credit ratings. Aptiv estimates the fair value of its derivative contracts using an income approach based on valuation techniques to convert future amounts to a single, discounted amount. Estimates of the fair value of foreign currency and commodity derivative instruments are determined using exchange traded prices and rates. Aptiv also considers the risk of non-performance in the estimation of fair value, and includes an adjustment for non-performance risk in the measure of fair value of derivative instruments. The non-performance risk adjustment reflects the credit default spread (“CDS”) applied to the net commodity by counterparty and foreign currency exposures by counterparty. When Aptiv is in a net derivative asset position, the counterparty CDS rates are applied to the net derivative asset position. When Aptiv is in a net derivative liability position, estimates of peer companies’ CDS rates are applied to the net derivative liability position.

In certain instances where market data is not available, Aptiv uses management judgment to develop assumptions that are used to determine fair value. This could include situations of market illiquidity for a particular currency or commodity or where observable market data may be limited. In those situations, Aptiv generally surveys investment banks and/or brokers and utilizes the surveyed prices and rates in estimating fair value.

As of September 30, 2022 and December 31, 2021, Aptiv was in a net derivative liability position of \$61 million and a net derivative asset position of \$21 million, respectively, and no significant adjustments were recorded for nonperformance risk based on the application of peer companies’ CDS rates, evaluation of our own nonperformance risk and because Aptiv’s exposures were to counterparties with investment grade credit ratings. Refer to Note 14. Derivatives and Hedging Activities for further information regarding derivatives.

Contingent consideration—The liability for contingent consideration is estimated as of the date of the acquisition and is recorded as part of the purchase price, and is subsequently re-measured to fair value at each reporting date, based on a probability-weighted analysis using a rate that reflects the uncertainty surrounding the expected outcomes, which the Company believes is appropriate and representative of market participant assumptions. The measurement of the liability for contingent consideration is based on significant inputs that are not observable in the market, and is therefore classified as a Level 3 measurement in accordance with ASC Topic 820-10-35. Examples of utilized unobservable inputs are estimated future earnings or milestone achievements of the acquired businesses and applicable discount rates. The estimate of the liability may fluctuate if there are changes in the forecast of acquired businesses’ future earnings or milestone achievements, as a result of actual earnings or milestone achievements or in the discount rates used to determine the present value of contingent future cash flows. The Company regularly reviews these assumptions and makes adjustments to the fair value measurements as required by facts and circumstances.

As of September 30, 2022 and December 31, 2021, the liability for contingent consideration was \$10 million (which was classified within other current liabilities) and \$10 million (which was classified within other long-term liabilities), respectively, representing the maximum required amounts to be paid under existing agreements. Adjustments to this liability for interest accretion are recognized in interest expense, and any other changes in the fair value of this liability are recognized within other income (expense), net in the consolidated statements of operations.

There were no changes in the contingent consideration liability classified as a Level 3 measurement during the nine months ended September 30, 2022.

Publicly traded equity securities—All publicly traded equity securities are reported at fair value as of each reporting date. The measurement of the asset is based on quoted prices for identical assets on active market exchanges. Gains and losses from changes in the fair value of these securities are recorded within other income (expense), net on the consolidated statement of operations.

As of September 30, 2022 and December 31, 2021, Aptiv had the following assets measured at fair value on a recurring basis:

	Total	Quoted Prices in Active Markets Level 1	Significant Other Observable Inputs Level 2	Significant Unobservable Inputs Level 3
	(in millions)			
As of September 30, 2022:				
Foreign currency derivatives	\$ 30	\$ —	\$ 30	\$ —
Publicly traded equity securities	15	15	—	—
Total	<u>\$ 45</u>	<u>\$ 15</u>	<u>\$ 30</u>	<u>\$ —</u>
As of December 31, 2021:				
Commodity derivatives	\$ 34	\$ —	\$ 34	\$ —
Foreign currency derivatives	7	—	7	—
Publicly traded equity securities	66	66	—	—
Total	<u>\$ 107</u>	<u>\$ 66</u>	<u>\$ 41</u>	<u>\$ —</u>

As of September 30, 2022 and December 31, 2021, Aptiv had the following liabilities measured at fair value on a recurring basis:

	Total	Quoted Prices in Active Markets Level 1	Significant Other Observable Inputs Level 2	Significant Unobservable Inputs Level 3
	(in millions)			
As of September 30, 2022:				
Commodity derivatives	\$ 85	\$ —	\$ 85	\$ —
Foreign currency derivatives	6	—	6	—
Contingent consideration	10	—	—	10
Total	<u>\$ 101</u>	<u>\$ —</u>	<u>\$ 91</u>	<u>\$ 10</u>
As of December 31, 2021:				
Foreign currency derivatives	\$ 20	\$ —	\$ 20	\$ —
Contingent consideration	10	—	—	10
Total	<u>\$ 30</u>	<u>\$ —</u>	<u>\$ 20</u>	<u>\$ 10</u>

Non-derivative financial instruments—Aptiv’s non-derivative financial instruments include cash and cash equivalents, accounts and notes receivable, accounts payable, as well as debt, which consists of its accounts receivable factoring arrangement, finance leases and other debt issued by Aptiv’s non-U.S. subsidiaries, the Revolving Credit Facility, the Tranche A Term Loan and all series of outstanding senior notes. The fair value of debt is based on quoted market prices for instruments with public market data or significant other observable inputs for instruments without a quoted public market price (Level 2). As of September 30, 2022 and December 31, 2021, total debt was recorded at \$6,352 million and \$4,067 million, respectively, and had estimated fair values of \$4,913 million and \$4,297 million, respectively. For all other financial instruments recorded at September 30, 2022 and December 31, 2021, fair value approximates book value.

Fair Value Measurements on a Nonrecurring Basis

In addition to items that are measured at fair value on a recurring basis, Aptiv also has items in its balance sheet that are measured at fair value on a nonrecurring basis. As these items are not measured at fair value on a recurring basis, they are not included in the tables above. Financial and nonfinancial assets and liabilities that are measured at fair value on a nonrecurring basis include certain inventories, long-lived assets, assets and liabilities held for sale, intangible assets, equity investments without readily determinable fair values, asset retirement obligations and liabilities for exit or disposal activities measured at fair value upon initial recognition. Aptiv recorded non-cash long-lived asset impairment charges of \$5 million and \$8 million

for the three and nine months ended September 30, 2022, respectively, and other charges of \$3 million for the nine months ended September 30, 2022. These charges were primarily related to the conflict between Ukraine and Russia and were recorded within cost of sales. Aptiv recorded no non-cash asset impairment charges during the three and nine months ended September 30, 2021. In addition, Aptiv determined that our majority owned subsidiary in Russia met the held for sale criteria as of September 30, 2022. Consequently, during the nine months ended September 30, 2022, the Company recorded a charge of \$51 million to reduce the carrying value of the subsidiary to fair value, which was recorded primarily within cost of sales. Fair value of long-lived and other assets is determined primarily using the anticipated cash flows discounted at a rate commensurate with the risk involved and a review of appraisals or other market indicators and management estimates. As such, Aptiv has determined that the fair value measurements of long-lived and other assets fall in Level 3 of the fair value hierarchy.

16. OTHER INCOME, NET

Other income (expense), net included:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2022	2021	2022	2021
	(in millions)			
Interest income	\$ 26	\$ 3	\$ 35	\$ 8
Loss on modification of debt	—	—	—	(1)
Components of net periodic benefit cost other than service cost (Note 9)	(4)	(5)	(11)	(19)
Costs associated with acquisitions and other transactions	(6)	—	(8)	—
(Loss) gain on change in fair value of publicly traded equity securities	(6)	(1)	(55)	8
Other, net	10	4	(5)	6
Other income (expense), net	<u>\$ 20</u>	<u>\$ 1</u>	<u>\$ (44)</u>	<u>\$ 2</u>

During the three months ended September 30, 2022 and 2021, net unrealized losses of \$6 million and gains of \$11 million, respectively, were recognized for publicly traded equity securities still held as of September 30, 2022. During the nine months ended September 30, 2022 and 2021, net unrealized losses of \$51 million and gains of \$11 million, respectively, were recognized for publicly traded equity securities still held as of September 30, 2022.

Also, as further discussed in Note 8. Debt, during the nine months ended September 30, 2021, Aptiv recorded a loss on debt modification of \$1 million in conjunction with the June 2021 amendment to the Credit Agreement.

17. ACQUISITIONS AND DIVESTITURES

Acquisition of El-Com, Inc.

On December 30, 2021, Aptiv acquired 100% of the equity interests of El-Com, Inc. (“El-Com”), a manufacturer of custom wire harnesses and cable assemblies for high-reliability products and industries, for total consideration of up to \$88 million.

The total consideration includes a cash payment of up to \$10 million, contingent upon the achievement of certain performance metrics over a one-year period following the acquisition. The range of the undiscounted amounts the Company could be required to pay under this arrangement is between zero and \$10 million. As of the closing date of the acquisition, the contingent consideration was assigned a fair value of approximately \$10 million. Refer to Note 15. Fair Value of Financial Instruments for additional information regarding the measurement of the contingent consideration liability. The results of operations of El-Com are reported within the Signal and Power Solutions segment from the date of acquisition. The Company acquired El-Com utilizing cash on hand.

The acquisition was accounted for as a business combination, with the total purchase price allocated on a preliminary basis using information available, in the fourth quarter of 2021. Minor adjustments were recorded to goodwill and intangible assets from the amounts disclosed as of December 31, 2021. These adjustments were not significant for any period presented

after the acquisition date. The preliminary purchase price and related allocation to the acquired net assets of El-Com based on their estimated fair values is shown below (in millions):

Assets acquired and liabilities assumed

Purchase price, cash consideration, net of cash acquired	\$	78
Purchase price, fair value of contingent consideration		10
Total consideration, net of cash acquired	\$	88
Intangible assets	\$	35
Other assets, net		10
Identifiable net assets acquired		45
Goodwill resulting from purchase		43
Total purchase price allocation	\$	88

Intangible assets primarily include amounts recognized for the fair value of customer-based assets, which will be amortized over their estimated useful lives of approximately nine years. The estimated fair value of these assets was based on third-party valuations and management's estimates, generally utilizing income and market approaches. Goodwill recognized in this transaction is primarily attributable to synergies expected to arise after the acquisition and is expected to be partially deductible for tax purposes.

The purchase price and related allocation are preliminary and could be revised as a result of adjustments made to the purchase price, additional information obtained regarding liabilities assumed, including, but not limited to, contingent liabilities, revisions of provisional estimates of fair values, including, but not limited to, the completion of independent appraisals and valuations related to property, plant and equipment and intangible assets and certain tax attributes.

The pro forma effects of this acquisition would not materially impact the Company's reported results for any period presented, and as a result no pro forma financial statements were presented.

Acquisition of Krono-Safe Automotive, SAS

On November 9, 2021, Aptiv acquired 100% of the equity interests of Krono-Safe Automotive, SAS ("Krono-Safe Automotive"), a leading software developer of safety-critical real-time embedded systems, for total consideration of \$13 million, which was comprised of Aptiv's previous investment of \$6 million in Krono-Safe, SAS that was previously made in 2019 and \$7 million of cash. The results of operations of Krono-Safe Automotive are reported within the Advanced Safety and User Experience segment from the date of acquisition.

The acquisition was accounted for as a business combination, with the total purchase price allocated on a preliminary basis using information available, in the fourth quarter of 2021, which primarily resulted in the recognition of goodwill of \$9 million and intangible assets of \$4 million. Goodwill recognized in this transaction is primarily attributable to synergies expected to arise after the acquisition and is not deductible for tax purposes.

The purchase price and related allocation are preliminary and could be revised as a result of adjustments made to the purchase price, additional information obtained regarding liabilities assumed, including, but not limited to, contingent liabilities, revisions of provisional estimates of fair values, including, but not limited to, the completion of independent appraisals and valuations related to property, plant and equipment and intangible assets and certain tax attributes.

The pro forma effects of this acquisition would not materially impact the Company's reported results for any period presented, and as a result no pro forma financial statements were presented.

Acquisition of Ulti-Mate Connector, Inc.

On April 30, 2021, Aptiv acquired certain assets of Ulti-Mate Connector, Inc. ("Ulti-Mate"), a manufacturer of miniature and micro-miniature connectors and cable assemblies, for total consideration of \$45 million, net of cash acquired. The results of the operations of Ulti-Mate are reported within the Signal and Power Solutions segment from the date of acquisition. The Company acquired Ulti-Mate utilizing cash on hand.

The acquisition was accounted for as a business combination, with the total purchase price allocated on a preliminary basis using information available, in the second quarter of 2021. The purchase price and related allocation were finalized in the

second quarter of 2022. The final purchase price and related allocation to the acquired net assets of Ulti-Mate based on their estimated fair values is shown below (in millions):

Assets acquired and liabilities assumed

Purchase price, cash consideration, net of cash acquired	\$	45
Intangible assets	\$	17
Other assets, net		5
Identifiable net assets acquired		22
Goodwill resulting from purchase		23
Total purchase price allocation	\$	45

Intangible assets primarily include amounts recognized for the fair value of customer-based assets, which will be amortized over their estimated useful lives of approximately nine years. The estimated fair value of these assets was based on third-party valuations and management's estimates, generally utilizing income and market approaches. Goodwill recognized in this transaction is primarily attributable to synergies expected to arise after the acquisition, and an insignificant portion of the goodwill is expected to be deductible for tax purposes.

The pro forma effects of this acquisition would not materially impact the Company's reported results for any period presented, and as a result no pro forma financial statements were presented.

Proposed Acquisition of Intercable Automotive Solutions

In September 2022, Aptiv entered into a definitive agreement to acquire 85% of the equity interests of Intercable Automotive Solutions S.r.l. ("Intercable Automotive"), a manufacturer of high-voltage busbars and interconnect solutions, for €595 million, subject to customary post-closing adjustments. The acquisition is expected to close in the fourth quarter of 2022, subject to regulatory approvals and customary closing conditions. Upon completion, Intercable Automotive will become part of Aptiv's Signal and Power Solutions segment. The Company intends to acquire its interest in Intercable Automotive utilizing cash on hand.

Concurrent with the acquisition, the Company entered into an agreement with the noncontrolling interest holders that provides the Company with the right to purchase, and the noncontrolling interest holders with the right to sell to the Company, the remaining 15% of Intercable Automotive for cash at a contractually defined value beginning in 2026.

Proposed Acquisition of Wind River Systems, Inc.

In January 2022, Aptiv entered into a definitive agreement to acquire 100% of the equity interests of Wind River, a global leader in delivering software for the intelligent edge, for \$4.3 billion, subject to customary post-closing adjustments. The transaction is subject to regulatory approvals and customary closing conditions, and we are targeting a closing this year as we work through the regulatory approval process. Upon completion, we anticipate that Wind River will become part of Aptiv's Advanced Safety and User Experience segment. The Company intends to acquire Wind River primarily utilizing cash on hand, including proceeds from the 2022 Senior Notes. Refer to Note 8. Debt for additional information regarding the 2022 Senior Notes.

Planned Exit from Majority Owned Russian Subsidiary

Given the sanctions put in place by the European Union (the "E.U."), U.S. and other governments, which restrict our ability to conduct business in Russia, we initiated a plan to exit our majority owned subsidiary in Russia in the second quarter of 2022. As a result, the Company determined that this subsidiary, which is reported within the Signal and Power Solutions segment, met the held for sale criteria as of September 30, 2022. Consequently, during the nine months ended September 30, 2022, the Company recorded a pre-tax charge of \$51 million to impair the carrying value of the Russian subsidiary's net assets to fair value, which was recorded primarily within cost of sales in the consolidated statement of operations. Approximately \$25 million of these charges were attributable to the noncontrolling interest based on the noncontrolling shareholder's economic interest. The remaining assets and liabilities of the subsidiary were reclassified as held for sale and reflect the appropriate valuation allowances. The net assets and liabilities are de minimis and are presented as other current assets and other current liabilities, respectively, in the consolidated balance sheet as of September 30, 2022.

18. SHARE-BASED COMPENSATION

Long-Term Incentive Plan

The Aptiv PLC Long-Term Incentive Plan, as amended and restated effective April 23, 2015 (the “PLC LTIP”), allows for the grant of awards of up to 25,665,448 ordinary shares for long-term compensation. The PLC LTIP is designed to align the interests of management and shareholders. The awards can be in the form of shares, options, stock appreciation rights, restricted stock, restricted stock units (“RSUs”), performance awards and other share-based awards to the employees, directors, consultants and advisors of the Company. The Company has awarded annual long-term grants of RSUs under the PLC LTIP in order to align management compensation with Aptiv’s overall business strategy. In addition, the Company has competitive and market-appropriate ownership requirements for its directors and officers. All of the RSUs granted under the PLC LTIP are eligible to receive dividend equivalents for any dividend paid from the grant date through the vesting date. Dividend equivalents are generally paid out in ordinary shares upon vesting of the underlying RSUs.

Board of Director Awards

Aptiv has granted RSUs to the Board of Directors as detailed in the table below:

Grant Date	RSUs granted	Grant Date Fair Value (1)	Vesting Date	Shares Issued Upon Vesting	Fair Value of Shares at Issuance	Shares Withheld to Cover Withholding Taxes
(dollars in millions)						
April 2022	23,387	\$ 2	April 2023	N/A	N/A	N/A
April 2021	17,589	3	April 2022	15,633	\$ 2	1,956
April 2020	48,745	3	April 2021	41,896	6	6,849

(1) Determined based on the closing price of the Company’s ordinary shares on the date of the grant.

Executive Awards

Aptiv has made annual grants of RSUs to its executives in February of each year beginning in 2012. These awards include a time-based vesting portion and a performance-based vesting portion, as well as continuity awards in certain years. The time-based RSUs, which make up 40% (25% prior to 2021) of the awards for Aptiv’s officers and 50% for Aptiv’s other executives, vest ratably over three years beginning on the first anniversary of the grant date. The performance-based RSUs, which make up 60% (75% prior to 2021) of the awards for Aptiv’s officers and 50% for Aptiv’s other executives, vest at the completion of a three-year performance period if certain targets are met. Each executive will receive between 0% and 200% (150% for the 2019 and 2020 grants based on the executive performance grant modification in 2020) of his or her target performance-based award based on the Company’s performance against established company-wide performance metrics, which are:

Metric	2020 - 2022 Grants	2018 - 2019 Grants
Average return on net assets (1)	33%	50%
Cumulative net income	33%	25%
Relative total shareholder return (2)	33%	25%

- (1) Average return on net assets is measured by tax-affected operating income divided by average net working capital plus average net property, plant and equipment for each calendar year during the respective performance period.
- (2) Relative total shareholder return is measured by comparing the average closing price per share of the Company’s ordinary shares for the specified trading days in the fourth quarter of the end of the performance period to the average closing price per share of the Company’s ordinary shares for the specified trading days in the fourth quarter of the year preceding the grant, including dividends, and assessed against a comparable measure of competitor and peer group companies.

The details of the executive grants were as follows:

Grant Date	RSUs Granted	Grant Date Fair Value	Time-Based Award Vesting Dates	Performance-Based Award Vesting Date
	(in millions)			
February 2018	0.63	\$ 61	Annually on anniversary of grant date, 2019 - 2021	December 31, 2020
February 2019	0.71	62	Annually on anniversary of grant date, 2020 - 2022	December 31, 2021
February 2020	0.75	62	Annually on anniversary of grant date, 2021 - 2023	December 31, 2022
February 2021	0.44	72	Annually on anniversary of grant date, 2022 - 2024	December 31, 2023
February 2022	0.59	80	Annually on anniversary of grant date, 2023 - 2025	December 31, 2024

The grant date fair value of the RSUs is determined based on the target number of awards issued, the closing price of the Company's ordinary shares on the date of the grant of the award, including an estimate for forfeitures, and a contemporaneous valuation performed by an independent valuation specialist with respect to the relative total shareholder return awards.

Any new executives hired after the annual executive RSU grant date may be eligible to participate in the PLC LTIP. The Company has also granted additional awards to employees in certain periods under the PLC LTIP. Any off cycle grants made for new hires or to other employees are valued at their grant date fair value based on the closing price of the Company's ordinary shares on the date of such grant.

The details of the shares issued upon vesting of the executive grants are as follows:

	Time-Based Awards			Performance-Based Awards		
Vesting Date	Ordinary Shares Issued Upon Vesting	Fair Value of Shares at Issuance	Ordinary Shares Withheld to Cover Withholding Taxes	Ordinary Shares Issued Upon Vesting	Fair Value of Shares at Issuance	Ordinary Shares Withheld to Cover Withholding Taxes
	(dollars in millions)					
Q1 2022	354,600	\$ 46	140,409	325,283	\$ 42	136,143
Q1 2021	449,426	67	177,825	288,074	43	121,609

A summary of RSU activity, including award grants, vesting and forfeitures is provided below:

	RSUs	Weighted Average Grant Date Fair Value
	(in thousands)	
Nonvested, January 1, 2022	1,344	\$ 131.40
Granted	793	128.42
Vested	(371)	96.95
Forfeited	(262)	137.98
Nonvested, September 30, 2022	1,504	137.17

Aptiv recognized share-based compensation expense of \$19 million (\$19 million, net of tax) and \$19 million (\$19 million, net of tax) based on the Company's best estimate of ultimate performance against the respective targets during the three months ended September 30, 2022 and 2021, respectively. Aptiv recognized share-based compensation expense of \$65 million (\$65 million, net of tax) and \$76 million (\$75 million, net of tax) based on the Company's best estimate of ultimate performance against the respective targets during the nine months ended September 30, 2022 and 2021, respectively. Aptiv will continue to recognize compensation expense, based on the grant date fair value of the awards applied to the Company's best estimate of ultimate performance against the respective targets, over the requisite vesting periods of the awards. Based on the grant date fair value of the awards and the Company's best estimate of ultimate performance against the respective targets as of September 30, 2022, unrecognized compensation expense on a pre-tax basis of approximately \$124 million is anticipated to be recognized over a weighted average period of approximately two years. For the nine months ended September 30, 2022 and 2021, approximately \$36 million and \$45 million, respectively, of cash was paid and reflected as a financing activity in the statements of cash flows related to the tax withholding for vested RSUs.

19. SEGMENT REPORTING

Aptiv operates its core business along the following operating segments, which are grouped on the basis of similar product, market and operating factors:

- Signal and Power Solutions, which includes complete electrical architecture and component products.
- Advanced Safety and User Experience, which includes vehicle technology and systems integration expertise in advanced safety, user experience and connectivity and security solutions, as well as advanced software development and autonomous driving technologies.
- Eliminations and Other, which includes i) the elimination of inter-segment transactions, and ii) certain other expenses and income of a non-operating or strategic nature.

The accounting policies of the segments are the same as those described in Note 2. Significant Accounting Policies, except that the disaggregated financial results for the segments have been prepared using a management approach, which is consistent with the basis and manner in which management internally disaggregates financial information for which Aptiv's chief operating decision maker regularly reviews financial results to assess performance of, and make internal operating decisions about allocating resources to, the segments.

Generally, Aptiv evaluates segment performance based on stand-alone segment net income before interest expense, other income (expense), net, income tax (expense) benefit, equity income (loss), net of tax, amortization, restructuring, other acquisition and portfolio project costs (which includes costs incurred to integrate acquired businesses and to plan and execute product portfolio transformation actions, including business and product acquisitions and divestitures), asset impairments and other related charges and gains (losses) on business divestitures and other transactions ("Adjusted Operating Income") and accounts for inter-segment sales and transfers as if the sales or transfers were to third parties, at current market prices.

Effective on January 1, 2022, the Company now excludes amortization expense of intangible assets from the calculation of Adjusted Operating Income, as reflected in the definition above. The Company's management believes that the updated calculation of this non-GAAP financial measure will be more useful to both management and investors in their analysis of the Company's results of operations due to recent and pending acquisitions. Amortization of intangible assets generally results from a write-up in the value of assets in connection with an acquisition. The Company believes that exclusion of amortization expense will facilitate more comparable operating results of the Company over time, between periods when the Company is more or less acquisitive and allows for improved comparison with both acquisitive and non-acquisitive peer companies. The historical presentation of Adjusted Operating Income in the tables below has been revised to be consistent with this updated calculation.

Aptiv's management utilizes Adjusted Operating Income as the key performance measure of segment income or loss to evaluate segment performance, and for planning and forecasting purposes to allocate resources to the segments, as management believes this measure is most reflective of the operational profitability or loss of Aptiv's operating segments. Segment Adjusted Operating Income should not be considered a substitute for results prepared in accordance with U.S. GAAP and should not be considered an alternative to net income attributable to Aptiv, which is the most directly comparable financial measure to Adjusted Operating Income that is prepared in accordance with U.S. GAAP. Segment Adjusted Operating Income, as determined and measured by Aptiv, should also not be compared to similarly titled measures reported by other companies.

Included below are sales and operating data for Aptiv's segments for the three and nine months ended September 30, 2022 and 2021.

	Signal and Power Solutions	Advanced Safety and User Experience	Eliminations and Other (1)	Total
	(in millions)			
For the Three Months Ended September 30, 2022:				
Net sales	\$ 3,424	\$ 1,199	\$ (9)	\$ 4,614

Operating income	\$ 403	\$ 67	\$ —	\$ 470
Equity income (loss), net of tax	\$ 7	\$ (74)	\$ —	\$ (67)
Net income attributable to noncontrolling interest	\$ 5	\$ —	\$ —	\$ 5

	Signal and Power Solutions	Advanced Safety and User Experience	Eliminations and Other (1)	Total
(in millions)				
For the Three Months Ended September 30, 2021:				
Net sales	\$ 2,705	\$ 959	\$ (10)	\$ 3,654
Depreciation and amortization	\$ 149	\$ 44	\$ —	\$ 193
Adjusted operating income (2)	\$ 234	\$ 22	\$ —	\$ 256
Operating income	\$ 200	\$ 15	\$ —	\$ 215
Equity income (loss), net of tax	\$ 5	\$ (56)	\$ —	\$ (51)
Net income attributable to noncontrolling interest	\$ 3	\$ —	\$ —	\$ 3
(in millions)				
For the Nine Months Ended September 30, 2022:				
Net sales	\$ 9,569	\$ 3,307	\$ (27)	\$ 12,849
Depreciation and amortization	\$ 441	\$ 133	\$ —	\$ 574
Adjusted operating income	\$ 995	\$ 67	\$ —	\$ 1,062
Operating income	\$ 796	\$ 27	\$ —	\$ 823
Equity income (loss), net of tax	\$ 15	\$ (217)	\$ —	\$ (202)
Net loss attributable to noncontrolling interest	\$ (21)	\$ —	\$ —	\$ (21)
(in millions)				
For the Nine Months Ended September 30, 2021:				
Net sales	\$ 8,573	\$ 2,940	\$ (29)	\$ 11,484
Depreciation and amortization	\$ 451	\$ 132	\$ —	\$ 583
Adjusted operating income (2)	\$ 953	\$ 115	\$ —	\$ 1,068
Operating income	\$ 837	\$ 92	\$ —	\$ 929
Equity income (loss), net of tax	\$ 10	\$ (156)	\$ —	\$ (146)
Net income attributable to noncontrolling interest	\$ 11	\$ —	\$ —	\$ 11

(1) Eliminations and Other includes the elimination of inter-segment transactions.

(2) As described above, the calculation of adjusted operating income now excludes amortization expense. The historical presentation of adjusted operating income as shown in this table has been revised to be consistent with the updated calculation.

The reconciliation of Adjusted Operating Income to operating income includes, as applicable, amortization, restructuring, other acquisition and portfolio project costs (which includes costs incurred to integrate acquired businesses and to plan and execute product portfolio transformation actions, including business and product acquisitions and divestitures), asset impairments and other related charges and gains (losses) on business divestitures and other transactions. The reconciliations of Adjusted Operating Income to net income attributable to Aptiv for the three and nine months ended September 30, 2022 and 2021 are as follows:

	Signal and Power Solutions	Advanced Safety and User Experience	Total

20. REVENUE

Refer to Note 2. Significant Accounting Policies for a complete description of the Company's revenue recognition accounting policy.

Nature of Goods and Services

The principal activity from which the Company generates its revenue is the manufacturing of production parts for OEM customers. Aptiv recognizes revenue for production parts at a point in time, rather than over time, as the performance obligation

is satisfied when customers obtain control of the product upon title transfer and not as the product is manufactured or developed.

Although production parts are highly customized with no alternative use, Aptiv does not have an enforceable right to payment as customers have the right to cancel a product program without a notification period. The amount of revenue recognized is based on the purchase order price and adjusted for revenue allocated to variable consideration (i.e. estimated rebates and price discounts), as applicable. Customers typically pay for production parts based on customary business practices with payment terms averaging 60 days.

Disaggregation of Revenue

Revenue generated from Aptiv's operating segments is disaggregated by primary geographic market in the following tables for the three and nine months ended September 30, 2022 and 2021. Information concerning geographic market reflects the manufacturing location.

For the Three Months Ended September 30, 2022:	Signal and Power Solutions	Advanced Safety and User Experience	Eliminations and Other	Total
	(in millions)			
Geographic Market				
North America	\$ 1,317	\$ 352	\$ (2)	\$ 1,667

Total net sales	\$ 8,573	\$ 2,940	\$ (29)	\$ 11,484

Contract Balances

Consistent with the recognition of production parts revenue at a point in time as title transfers to the customer, Aptiv has no contract assets or contract liabilities balances as of September 30, 2022 and December 31, 2021.

Outstanding Performance Obligations

As customer contracts generally are represented by a combination of a current purchase order and a current production schedule issued by the customer for a production part, there are no contracts outstanding beyond one year. Aptiv does not enter into fixed long-term supply agreements.

As permitted, Aptiv does not disclose information about remaining performance obligations that have original expected durations of one year or less.

Costs to Obtain a Contract

From time to time, Aptiv makes payments to customers in conjunction with ongoing business. These payments to customers are generally recognized as a reduction to revenue at the time of the commitment to make these payments. However, certain other payments to customers, or upfront fees, meet the criteria to be considered a cost to obtain a contract as they are directly attributable to a contract, are incremental and management expects the fees to be recoverable. As of September 30, 2022 and December 31, 2021, Aptiv has recorded \$67 million (of which \$20 million was classified within other current assets and \$47 million was classified within other long-term assets) and \$92 million (of which \$34 million was classified within other current assets and \$58 million was classified within other long-term assets), respectively, related to these capitalized upfront fees.

Capitalized upfront fees are amortized to revenue based on the transfer of goods and services to the customer for which the upfront fees relate, which typically range from three to five years. There have been no impairment losses in relation to the costs capitalized. The amount of amortization to net sales was \$7 million and \$5 million for the three months ended September 30, 2022 and 2021, respectively, and \$20 million and \$19 million for the nine months ended September 30, 2022 and 2021, respectively.

21. INVESTMENTS IN AFFILIATES
Equity Method Investments

As part of Aptiv's operations, it has investments in various non-consolidated affiliates accounted for under the equity method of accounting. These affiliates are not publicly traded companies and are located in North America, Europe and Asia Pacific. Aptiv's ownership percentages vary generally from approximately 20% to 50%, with the most significant investment being in Motional, Inc. ("Motional") (of which Aptiv owns 50%). Motional was deemed a significant equity investee under Rule 10-01(b) of Regulation S-X for the nine months ended September 30, 2022. Accordingly, summarized interim income statement information of Motional is presented below:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2022	2021	2022	2021
	(in millions)		(in millions)	
Net sales	\$ —	\$ —	\$ —	\$ —
Gross margin	\$ (94)	\$ (73)	\$ (280)	\$ (224)
Net loss	\$ (139)	\$ (112)	\$ (419)	\$ (312)

Motional Lease Agreement

In connection with the formation of Motional, Aptiv agreed to sublease certain office space to Motional, which has a remaining lease term of approximately six years as of September 30, 2022. Total income under the agreement was \$1 million during the three months ended September 30, 2022, and \$3 million and \$2 million during the nine months ended September 30, 2022 and 2021, respectively. The sublease income and Aptiv's associated operating lease cost are recorded to cost of sales in the consolidated statement of operations. The Company believes the terms of the lease agreement have not significantly been affected by the fact the Company and the lessee are related parties.

Motional Cybersecurity Incident

In October 2022, Motional experienced a cybersecurity incident involving unauthorized access to, and theft of data from, certain Motional systems. Upon discovering the unauthorized activity, Motional took immediate action, including terminating the unauthorized access and pausing certain operations. With assistance from leading forensic information technology firms and legal counsel, Motional conducted an investigation of the incident and has been in communication with law enforcement authorities regarding this matter. Based on the results of the Motional investigation, the Company believes that this incident has not had a material impact to the Company's or to Motional's operations or financial results and financial condition. Motional has since resumed its testing operations.

Investment in TTTech Auto AG

On March 15, 2022, Aptiv acquired approximately 20% of the equity interests of TTTech Auto AG ("TTTech Auto"), a leading provider of safety-critical middleware solutions for advanced driver-assistance systems and autonomous driving applications, in exchange for €200 million (approximately \$220 million, using foreign currency rates on the investment date). The Company made the investment in TTTech Auto utilizing cash on hand.

The carrying value of the Company's investment in TTTech Auto was \$188 million as of September 30, 2022, which is included in the Advanced Safety and User Experience segment. As of September 30, 2022, the difference between the amount at which the Company's investment is carried and the amount of the Company's share of the underlying equity in net assets of TTTech Auto was approximately \$138 million. The basis difference is primarily attributable to equity method goodwill associated with the investment, which is not amortized.

Technology Investments

The Company has made technology investments in certain non-consolidated affiliates for ownership interests of less than 20% (where Aptiv does not have the ability to exercise significant influence), as described in Note 2. Significant Accounting Policies. Certain of these investments do not have readily determinable fair values and are measured at cost, less impairments, adjusted for observable price changes in orderly transactions for identical or similar investments of the same issuer. The Company also holds technology investments in publicly traded equity securities. These investments are measured at fair value based on quoted prices for identical assets on active market exchanges.

The following is a summary of technology investments, which are classified within other long-term assets in the consolidated balance sheets, as of September 30, 2022 and December 31, 2021:

Investment Name	Segment	September 30, 2022	December 31, 2021
(in millions)			
Equity investments without readily determinable fair values:			
StradVision, Inc.	Advanced Safety and User Experience	\$ 40	\$ —
LeddarTech, Inc.	Advanced Safety and User Experience	19	19
Quanergy Systems, Inc. (1)	Advanced Safety and User Experience	—	6
Other investments	Various	6	5
Total equity investments without readily determinable fair values		65	30
Publicly traded equity securities:			
Smart Eye AB	Advanced Safety and User Experience	3	11
Otonomo Technologies Ltd.	Advanced Safety and User Experience	3	39
Valens Semiconductor Ltd.	Signal and Power Solutions	9	16
Total publicly traded equity securities		15	66
Total investments		\$ 80	\$ 96

- (1) Quanergy Systems, Inc. experienced a change in measurement basis due to an underlying transaction during the nine months ended September 30, 2022 and we liquidated our entire investment in the company after the transaction and during the nine months ended September 30, 2022. See below for further details on the transaction.

During the second quarter of 2022, the Company's Advanced Safety and User Experience segment made an investment totaling 50 billion South Korean Won (approximately \$40 million, using foreign currency rates on the investment date) in StradVision, Inc., a provider of deep learning-based camera perception software for automotive applications.

In February 2022, Quanergy Systems, Inc. ("Quanergy") merged with a publicly traded special purpose acquisition company ("SPAC") and shares of Quanergy began trading on the NYSE under the symbol QNGY. As part of the SPAC merger, our preferred shares in Quanergy were converted into Quanergy ordinary shares. During the nine months ended September 30, 2022, the Company sold all of its Quanergy ordinary shares for net proceeds of approximately \$3 million. The Company's Advanced Safety and User Experience segment had previously made a \$3 million investment in Quanergy during 2016, which was in addition to the Company's \$3 million investment made during 2015.

In September 2021, Valens Semiconductor Ltd. ("Valens") merged with a publicly traded SPAC and shares of Valens began trading on the NYSE under the symbol VLN. As part of the SPAC merger, our preferred shares in Valens were converted into Valens ordinary shares.

In August 2021, Otonomo Technologies Ltd. ("Otonomo") merged with a publicly traded SPAC and shares of Otonomo began trading on the Nasdaq Capital Market under the symbol OTMO. As part of the SPAC merger, our preferred shares in Otonomo were converted into Otonomo ordinary shares. During the second half of 2021, the Company sold a portion of its Otonomo ordinary shares for net proceeds of approximately \$3 million. The Company's Advanced Safety and User Experience segment had previously made a \$3 million investment in Otonomo during 2019, which was in addition to the Company's \$15 million investment made during 2017.

In June 2021, Affectiva, Inc. ("Affectiva") was acquired by Smart Eye AB ("Smart Eye"), which is publicly traded on the Nasdaq Stockholm AB stock exchange. As part of the acquisition, Aptiv received shares of Smart Eye in exchange for Aptiv's Affectiva preferred shares.

In April 2021, Innoviz Technologies ("Innoviz") merged with a publicly traded SPAC and shares of Innoviz began trading on the Nasdaq Capital Market under the symbol INVZ. As part of the SPAC merger, our preferred shares in Innoviz were converted into Innoviz ordinary shares. During the second half of 2021, the Company sold all of its Innoviz ordinary shares for net proceeds of approximately \$18 million. The Company's Advanced Safety and User Experience segment had previously made a \$15 million investment in Innoviz during 2017.

Following each of the transactions described above for Quanergy, Valens, Otonomo, Smart Eye and Innoviz, the fair value of each respective investment is measured on a recurring basis, with changes in fair value recorded to other income (expense), net.

Certain of the equity securities measured at fair value disclosed above are subject to contractual sale restrictions which prohibit the sale of the security over contractually defined periods of time. The fair value of equity securities with contractual sale restrictions was approximately \$2 million as of September 30, 2022. These contractual sale restrictions will fully expire during the next twelve months as of September 30, 2022.

There were no material transactions, events or changes in circumstances requiring an impairment or an observable price change adjustment to our investments without readily determinable fair value. The Company continues to monitor these investments to identify potential transactions which may indicate an impairment or an observable price change requiring an adjustment to its carrying value.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

This Quarterly Report on Form 10-Q, including the exhibits being filed as part of this report, as well as other statements made by Aptiv PLC (“Aptiv,” the “Company,” “we,” “us” and “our”), contain forward-looking statements that reflect, when made, the Company’s current views with respect to current events, certain investments and acquisitions and financial performance including the potential impact of the proposed acquisition of Wind River Systems, Inc. Such forward-looking statements are subject to many risks, uncertainties and factors relating to the Company’s operations and business environment, which may cause the actual results of the Company to be materially different from any future results, express or implied, by such forward-looking statements. All statements that address future operating, financial or business performance or the Company’s strategies or expectations are forward-looking statements. In some cases, you can identify these statements by forward-looking words such as “may,” “might,” “will,” “should,” “expects,” “plans,” “intends,” “anticipates,” “believes,” “estimates,” “predicts,” “projects,” “potential,” “outlook” or “continue,” and other comparable terminology. Factors that could cause actual results to differ materially from these forward-looking statements include, but are not limited to, the following: global and regional economic conditions, including conditions affecting the credit market; uncertainties posed by the COVID-19 pandemic and the difficulty in predicting its future course and its impact on the global economy and the Company’s future operations; uncertainties created by the conflict between Ukraine and Russia, and its impacts to the European and global economies and our operations in each country; fluctuations in interest rates and foreign currency exchange rates; the cyclical nature of global automotive sales and production; the potential disruptions in the supply of and changes in the competitive environment for raw material and other components integral to the Company’s products, including the current semiconductor supply shortage; the Company’s ability to maintain contracts that are critical to its operations; potential changes to beneficial free trade laws and regulations such as the United States-Mexico-Canada Agreement; the ability of the Company to integrate and realize the expected benefits of recent transactions; the ability of the Company to attract, motivate and/or retain key executives; the ability of the Company to avoid or continue to operate during a strike, or partial work stoppage or slow down by any of its unionized employees or those of its principal customers; and the ability of the Company to attract and retain customers. Additional factors are discussed under the captions “Risk Factors” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in the Company’s filings with the Securities and Exchange Commission, including those set forth in the Company’s Annual Report on Form 10-K for fiscal year ended December 31, 2021 and within the Quarterly Report on Form 10-Q for the quarter ended March 31, 2022. New risks and uncertainties arise from time to time, and it is impossible for us to predict these events or how they may affect the Company. It should be remembered that the price of the ordinary shares and any income from them can go down as well as up. Aptiv disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events and/or otherwise, except as may be required by law.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following management's discussion and analysis of financial condition and results of operations ("MD&A") is intended to help you understand the business operations and financial condition of the Company for the three and nine months ended September 30, 2022. This discussion should be read in conjunction with Item 1. Financial Statements. Our MD&A is presented in eight sections:

- Executive Overview
- Consolidated Results of Operations
- Results of Operations by Segment
- Liquidity and Capital Resources
- Off-Balance Sheet Arrangements
- Contingencies and Environmental Matters
- Recently Issued Accounting Pronouncements
- Critical Accounting Estimates

Within the MD&A, "Aptiv," the "Company," "we," "us" and "our" refer to Aptiv PLC (formerly known as Delphi Automotive PLC), a public limited company formed under the laws of Jersey on May 19, 2011, which completed an initial public offering on November 22, 2011, and its consolidated subsidiaries. On December 4, 2017, following the spin-off of Delphi Technologies PLC, the Company changed its name to Aptiv PLC and New York Stock Exchange ("NYSE") symbol to "APTIV."

Executive Overview

Our Business

We are a leading global technology and mobility architecture company primarily serving the automotive sector. We deliver end-to-end mobility solutions enabling our customers' transition to more electrified, software-defined vehicles. We design and manufacture vehicle components and provide electrical, electronic and active safety technology solutions to the global automotive and commercial vehicle markets, creating the software and hardware foundation for vehicle features and functionality. Our Advanced Safety and User Experience segment is focused on providing the necessary software and advanced computing platforms, and our Signal and Power Solutions segment is focused on providing the requisite networking architecture required to support the integrated systems in today's complex vehicles. Together, our businesses develop the 'brain' and the 'nervous system' of increasingly complex vehicles, providing integration of the vehicle into its operating environment.

We are one of the largest vehicle technology suppliers and our customers include the 25 largest automotive original equipment manufacturers ("OEMs") in the world.

Our total net sales during the three and nine months ended September 30, 2022 were \$4.6 billion and \$12.8 billion, an increase of 26% and 12% compared to the same periods of 2021, respectively. Our overall volumes increased 29% for the three months ended September 30, 2022, compared to increased global automotive production of 27% (24% on an Aptiv weighted market basis, which represents global vehicle production weighted to the geographic regions in which the Company generates its revenue, "AWM"). The increase in volumes for the three months ended September 30, 2022 is attributable to increased volumes in all regions. Our overall volumes increased 13% for the nine months ended September 30, 2022, compared to increased global automotive production of 6% (5% on an AWM basis). The increase in volumes for the nine months ended September 30, 2022 is primarily attributable to increased volumes in North America and China.

We are focused on maintaining a low fixed cost structure that provides us flexibility to remain profitable at all points of the traditional vehicle industry production cycle, including during periods of reduced industry volumes. Accordingly, we will continue to adjust our cost structure and optimize our manufacturing footprint in response to changes in the global and regional automotive markets and in order to increase investment in advanced technologies and engineering as conditions permit. As we operate in a cyclical industry that is impacted by movements in the global and regional economies, we continually evaluate opportunities to further refine our cost structure, as evidenced by our ongoing restructuring programs focused on the continued rotation of our manufacturing footprint to best cost locations and on reducing our global overhead costs, as described in Note 7. Restructuring to the consolidated financial statements contained herein. We believe our strong balance sheet coupled with our flexible cost structure will position us to capitalize on improvements in OEM production volumes as economic and pandemic conditions improve.

Proposed Acquisition of Wind River Systems, Inc.

In January 2022, the Company entered into a definitive agreement to acquire Wind River Systems, Inc. (“Wind River”), a global leader in delivering software for the intelligent edge, for \$4.3 billion, subject to customary post-closing adjustments. The transaction is subject to regulatory approvals and customary closing conditions, and we are targeting a closing this year as we work through the regulatory approval process. Refer to Note 17. Acquisitions and Divestitures to the consolidated financial statements contained herein for more information. With Aptiv and Wind River’s synergistic technologies and decades of experience delivering safety critical systems, the Company believes this acquisition will accelerate the journey to a software-defined future of the automotive industry.

Trends, Uncertainties and Opportunities

Ukraine/Russia conflict. The conflict between Ukraine and Russia, which began in February 2022, has had, and is expected to continue to have, negative economic impacts to both countries and to the European and global economies. In response to the conflict, the European Union (the “E.U.”), United States (the “U.S.”) and other nations implemented broad economic sanctions against Russia. These countries may impose further sanctions and take other actions as the situation continues.

Given the sanctions put in place by the E.U., U.S. and other governments, which restrict our ability to conduct business in Russia, we initiated a plan to exit our majority owned subsidiary in Russia in the second quarter of 2022. As a result, the Company determined that this subsidiary, which is reported within the Signal and Power Solutions segment, met the held for sale criteria as of September 30, 2022. Consequently, during the nine months ended September 30, 2022, the Company recorded a pre-tax charge of \$51 million to impair the carrying value of the Russian subsidiary’s net assets to fair value, which was recorded primarily within cost of sales in the consolidated statement of operations. Approximately \$25 million of these charges were attributable to the noncontrolling interest based on the noncontrolling shareholder’s economic interest. The remaining assets and liabilities, which are de minimis, were reclassified to other current assets and other current liabilities, respectively, in the consolidated balance sheet as of September 30, 2022.

Ukraine and Russia are also significant global producers of raw materials used in our supply chain, including copper, aluminum, palladium and neon gases. Disruptions in the supply and volatility in the price of these materials and other inputs produced by Ukraine or Russia, including increased logistics costs and longer transit times, could adversely impact our business and results of operations. In addition, in July 2022, the E.U. introduced an emergency natural gas rationing plan to reduce the use of natural gas by businesses and in public buildings in E.U. member states from August 2022 through March 2023 in order to replenish gas reserves. Among other impacts, this may cause widespread economic disruptions during this time period, including potential shutdowns at our suppliers’ or customers’ facilities in the region. The conflict has also increased the possibility of cyberattacks occurring, which could either directly or indirectly impact our operations. Furthermore, the conflict has caused our customers to analyze their continued presence in the region and future customer production plans in the region remain uncertain.

We do not have a material physical presence in either Ukraine or Russia, with approximately 1% of our workforce located in those countries as of December 31, 2021, while approximately 2% of our annual net sales were generated from manufacturing facilities in those countries for the year ended December 31, 2021. However, the impacts of the conflict have adversely impacted, and may continue to adversely impact, global economies, and in particular, the European economy, a region which accounted for approximately 33% of our total net sales for the year ended December 31, 2021. We have incurred costs (including capital expenditures), to relocate production for certain customers out of Ukraine and to duplicate such production in other countries, which we substantially completed in the second quarter of 2022. We have recovered substantially all of the costs related to this relocation from impacted customers as of September 30, 2022. Aggregate costs and recoveries related to this process were not significant for the three and nine months ended September 30, 2022. However, the Company recorded asset impairments and other related charges of approximately \$2 million and \$8 million during the three and nine months ended September 30, 2022, respectively, primarily for long-lived assets and inventory for certain sites in Ukraine. These charges were primarily recorded within cost of sales in the statement of operations. Furthermore, as a result of the conflict, we estimate that the adverse impacts to revenue from Russia operations were approximately \$15 million and \$45 million during the three and nine months ended September 30, 2022, respectively.

We continue to monitor the situation and will seek to minimize its impact to our business, while prioritizing the safety and well-being of our employees located in both countries and our compliance with applicable laws and regulations in the locations where we operate. Any of the impacts mentioned above, among others, could adversely affect our business, business opportunities, results of operations, financial condition and cash flows.

COVID-19 pandemic. The global spread of COVID-19, which originated in late 2019 and was later declared a pandemic by the World Health Organization in March 2020, negatively impacted the global economy, disrupted supply chains and created significant volatility in global financial markets in 2020 with various adverse impacts continuing throughout 2021 and 2022.

Beginning late in the first quarter of 2022 and continuing into the second quarter, various regions in China, including regions where Aptiv has operations, were subjected to lockdowns imposed by governmental authorities to mitigate the spread of COVID-19 in those areas. In response, our manufacturing facilities located in these areas implemented measures designed to minimize the impacts of any shutdowns. Despite these measures, industry-wide production interruptions adversely impacted our sales and profitability beginning at the end of the first quarter and continuing throughout much of the second quarter. Estimated total indirect and direct adverse impacts to revenue as a result of these lockdowns during the first half of 2022 was approximately \$210 million. Despite the easing of most lockdowns in China late in the second quarter, the overall duration and impact, as well as possible reoccurrence, of these lockdowns remain uncertain and may adversely impact our results of operations and cash flows in future periods.

In 2021, the pandemic impacted economies and communities throughout the world, including in all of the markets and regions served by Aptiv. Although vaccines were introduced that reduced the effect of COVID-19, governmental authorities throughout the world may continue to implement numerous measures aimed at containing and mitigating the effects of the pandemic, including renewed travel bans and restrictions, quarantines, social distancing orders, “lockdown” orders and shutdowns of non-essential activities. In 2021, our manufacturing facilities were not impacted by prolonged shutdowns directly resulting from the COVID-19 pandemic.

Certain direct and indirect adverse impacts of the COVID-19 pandemic persisted throughout 2021 and 2022 and are expected to continue into 2023, including the worldwide semiconductor supply shortage and global supply chain disruptions. As a result, due to the continuing uncertainties surrounding the ultimate impacts of the COVID-19 pandemic and resulting potential future governmental actions and economic impacts, it is possible that these adverse impacts could reoccur, resulting in further adverse impacts on our future operating earnings and cash flows. We will continue to actively monitor all direct and indirect potential impacts of the COVID-19 pandemic, and will seek to aggressively mitigate and minimize their impact on our business.

Global supply chain disruptions. Due to various factors that are beyond our control, there are currently global supply chain disruptions, including a worldwide semiconductor supply shortage. The semiconductor supply shortage, due in part to increased demand across multiple industries, is impacting production in automotive and other industries. We anticipate these supply chain disruptions will continue into 2023. We, along with most automotive component manufacturers that use semiconductors, have been unable to fully meet the vehicle production demands of OEMs because of events which are outside our control, including but not limited to, the COVID-19 pandemic, the global semiconductor shortage, fires in our suppliers’ facilities, unprecedented weather events in the southwestern United States, and other extraordinary events. Although we are working closely with suppliers and customers to minimize any potential adverse impacts of these events, some of our customers have indicated that they expect us to bear at least some responsibility for their lost production and other costs. While no assurances can be made as to the ultimate outcome of these customer expectations or any other future claims, we do not currently believe a loss is probable. We will continue to actively monitor all direct and indirect potential impacts of these supply chain disruptions, and will seek to aggressively mitigate and minimize their impact on our business.

In addition, we are carrying critical inventory items and key components, and we continue to procure productive, raw material and non-critical inventory components in order to satisfy our customers’ vehicle production schedules. However, as a result of our customers’ recent production volatility and cancellations, our balance of productive, raw and component material inventories has increased substantially from customary levels as of September 30, 2022 and December 31, 2021. We will continue to actively monitor and manage inventory levels across all inventory types in order to maximize both supply continuity and the efficient use of working capital.

Commercializing the high-tech evolution of the automotive industry. The automotive industry is increasingly evolving towards the implementation of software-dependent components and solutions. In particular, the industry is focused on the development of advanced driver assistance technologies, with the goal of developing and introducing a commercially-viable, fully automated driving experience. We expect automated driving technologies will provide strong societal benefit as well as the opportunity for long-term growth for our product offerings in this space. We are focused on enabling and delivering end-to-end smart mobility solutions, enabling our customers’ transition to more electrified, software-defined vehicles, accelerating the commercialization of active safety and autonomous driving technologies and providing enhanced user experience and connected services.

In an effort to harness the full potential of connected intelligent systems across industries, strengthen our capabilities in software-defined mobility and to enable advanced smart vehicle architecture changes, we entered into a definitive agreement to acquire Wind River in January 2022. The transaction is subject to regulatory approvals and customary closing conditions, and we are targeting a closing this year as we work through the regulatory approval process. Wind River is a global leader in delivering software for the intelligent edge. Previously, in 2021, we executed a strategic collaboration agreement with Wind River to develop a software toolchain for various automotive applications.

We are also continuing to invest in the automated driving space, and have continued to develop market-leading automated driving platform solutions such as automated driving software, key active safety sensing technologies and our multi-domain controller, which fuses information from sensing systems as well as mapping and navigation data to make driving decisions. We believe we are well-aligned with industry technology trends that will result in sustainable future growth in this space, and have partnered with leaders in their respective fields to advance the pace of development and commercialization of these emerging technologies.

In March 2020, to further our leadership position in the automated driving space we completed a transaction with Hyundai Motor Group to form Motional, Inc. (“Motional”), a joint venture focused on the design, development and commercialization of autonomous driving technologies.

Motional began testing fully driverless systems in 2020 and began testing a production-ready autonomous driving platform available for robotaxi providers, meal delivery providers, fleet operators and automotive manufacturers at prototype scale in 2022, with higher volumes anticipated to be available for deployment in 2023. In addition, Motional is involved in collaborative arrangements with mobility providers and with smart cities such as Boston, Las Vegas, Los Angeles and Singapore as solutions are developed for the evolving nature of the mobility industry. As a result of our substantial investments and strategic partnerships, we believe we are well-aligned with industry technology trends that will result in sustainable future growth in these evolving areas.

However, there are many risks associated with these evolving areas, including the high development costs of active safety and autonomous driving technologies, the uncertain timing of customer and consumer adoption of these technologies, increased competition from entrants outside the traditional automotive industry and evolving regulations, such as the guidance for automated driving systems published by the U.S. Department of Transportation. While we believe we are well-positioned in these markets, the high development cost of active safety and autonomous driving technologies may result in a higher risk of exposure to the success of new or disruptive technologies different than those being developed by us or our partners.

Economic conditions. Our business is directly related to automotive sales and automotive vehicle production by our customers. Automotive sales depend on a number of factors, including global and regional economic conditions. Global automotive vehicle production increased 2% (flat on an AWM basis) from 2020 to 2021, primarily due to the impacts of the global supply chain disruptions, including the worldwide semiconductor supply shortage, which followed the significant decrease in vehicle production in 2020 due to the adverse impacts of the COVID-19 pandemic. Although 2021 global vehicle sales and production rates increased slightly, they were still significantly below historic levels. Compared to the unusually low 2020 production rates, vehicle production in 2021 increased by 2% in China, 1% in North America and 18% in South America, our smallest region, and decreased by 4% in Europe. Compared to 2021, vehicle production for the nine months ended September 30, 2022 increased by 6% (5% on an AWM basis).

Economic volatility or weakness in North America, Europe, China or South America could result in a significant reduction in automotive sales and production by our customers, which would have an adverse effect on our business, results of operations and financial condition. In 2022, global inflationary pressures have both reduced consumer demand for automotive vehicles and increased the price of inputs to our products, which has adversely impacted our profitability and it is possible this trend could continue into 2023. There is also potential that geopolitical factors could adversely impact the U.S. and other economies, and specifically the automotive sector. In particular, changes to international trade agreements such as the United States-Mexico-Canada Agreement, or other political pressures could affect the operations of our OEM customers, resulting in reduced automotive production in certain regions or shifts in the mix of production to higher cost regions. Increases in interest rates could also negatively impact automotive production as a result of increased consumer borrowing costs or reduced credit availability. Additionally, economic weakness may result in shifts in the mix of future automotive sales (from vehicles with more content such as luxury vehicles, trucks and sport utility vehicles toward smaller passenger cars). While our diversified customer and geographic revenue base, along with our flexible cost structure, have well positioned us to withstand the impact of industry downturns and benefit from industry upturns, shifts in the mix of global automotive production to higher cost regions or to vehicles with less content could adversely impact our profitability.

Key growth markets. There have been periods of increased market volatility and moderation in the level of economic growth in China, which resulted in periods of lower automotive production growth rates in China than those previously experienced. For example, automotive production in China experienced minimal growth of 2% in 2021, primarily due to the adverse impacts of the global supply chain disruptions impacting the industry and trade uncertainties, which follows a decrease of 3% in the region in 2020. Despite this lack of significant growth and the moderation in the level of economic growth in China, rising income levels in China and other key growth markets are expected to result in stronger growth rates in these markets over the long-term. Our strong global presence, and presence in these markets, has positioned us to experience above-market growth rates over the long-term. We continue to expand our established presence in key growth markets, positioning us to benefit from the expected long-term growth opportunities in these regions. We are capitalizing on our long-standing relationships with the global OEMs and further enhancing our positions with the key growth market OEMs to continue expanding our worldwide leadership. We continue to build upon our extensive geographic reach to capitalize on fast-growing

automotive markets. We believe that our presence in best cost countries positions us to realize incremental margin improvements as the global balance of automotive production shifts towards the key growth markets.

We have a strong local presence in China, including a major manufacturing base and well-established customer relationships. Each of our business segments have operations and sales in China. Our business in China remains sensitive to economic and market conditions that impact automotive sales volumes in China, and may be affected if the pace of growth slows as the Chinese market matures or if there are reductions in vehicle demand in China, as have recently been experienced as a result of the COVID-19 pandemic and related governmental lockdowns. However, we continue to believe this market will benefit from long-term demand for new vehicles and stringent governmental regulation driving increased vehicle content, including accelerated demand for electrified vehicles.

Market driven products. Our product offerings satisfy the OEMs' needs to meet increasingly stringent government regulations and meet consumer preferences for products that address the mega-trends of Safe, Green and Connected, leading to increased content per vehicle, greater profitability and higher margins. With these offerings, we believe we are well-positioned to benefit from the growing demand for vehicle content and technology related to safety, electrification, high speed data, connectivity to the global information network and automated driving technologies. We are benefiting from the substantial increase in vehicle content, software and electrification that requires a complex and reliable electrical architecture and systems to operate, such as automated advanced driver assistance technologies, electrical vehicle monitoring, active safety systems, lane departure warning systems, integrated vehicle cockpit displays, navigation systems and technologies that enable connected infotainment in vehicles. Our ability to design a reliable electrical architecture that optimizes power distribution and/or consumption is key to satisfying the OEMs' needs to reduce emissions while continuing to meet consumer demand for increased vehicle content and technology.

Global capabilities. Many OEMs are continuing to adopt global vehicle platforms to increase standardization, reduce per unit cost and increase capital efficiency and profitability. As a result, OEMs are selecting suppliers that have the capability to manufacture products on a worldwide basis, as well as the flexibility to adapt to regional variations. Suppliers with global scale and strong design, engineering and manufacturing capabilities are best positioned to benefit from this trend. Our global footprint enables us to serve the global OEMs on a worldwide basis as we gain market share with key growth market OEMs. This regional model is structured primarily to service the North American market from Mexico, the South American market from Brazil, the European market from Eastern Europe and North Africa and the Asia Pacific market from China, and we have continued to rotate our manufacturing footprint to best cost locations within these regions.

Our operations are subject to certain risks inherent in doing business globally, including military conflicts in regions in which we operate, unexpected changes in laws or regulations governing trade, or other monetary or tax fiscal policy changes, including tariffs, quotas, customs and other import or export restrictions or trade barriers. We are also subject to risks associated with actions taken by governmental authorities to impose changes in laws or regulations that restrict certain business operations, trade or travel in response to a pandemic or widespread outbreak of an illness. For instance, as described above, the conflict between Ukraine and Russia has created numerous economic uncertainties, including the impact of sanctions announced to date against Russia and potential further sanctions, the impact on the global supply chain for raw materials produced in each country, as well as increased logistics costs and transit times, the impact of the E.U. natural gas rationing plan and the actions of automotive OEMs and suppliers as they relate to production plans in each country. The impacts of any of these factors mentioned above, among others, could adversely affect our business, business opportunities, results of operations, financial condition and cash flows.

In addition, the global spread of the COVID-19 pandemic and variants thereof in 2020 and throughout 2021 and 2022, has had various direct and indirect adverse impacts on our global operations, the automotive industry and economies around the world. Although certain of the adverse impacts of the pandemic abated during the second half of 2020, other direct and indirect adverse impacts continued throughout 2021 and 2022, such as the overall supply chain disruptions, including the global semiconductor supply shortage and the regional lockdowns imposed by governmental authorities in China during the first half of 2022. These impacts continue to negatively affect the global economy and automotive industry, and we anticipate that certain impacts will persist into 2023. As a result, we are unable to predict the ultimate impact to our business due to a number of evolving factors, including the duration and spread of the pandemic, the impact of the pandemic on economic activity, our supply chain, consumer demand and vehicle production schedules, and the actions of governmental authorities across the globe.

Furthermore, existing free trade laws and regulations, such as the United States-Mexico-Canada Agreement, provide certain beneficial duties and tariffs for qualifying imports and exports, subject to compliance with the applicable classification and other requirements. Changes in laws or policies governing the terms of trade, and in particular increased trade restrictions, tariffs or taxes on imports from countries where we manufacture products, such as China and Mexico, could have a material adverse effect on our business and financial results. Furthermore, management continues to monitor the volatile geopolitical environment to identify, quantify and assess threatened duties, taxes or other business restrictions which could adversely affect our business and financial results.

Product development. The automotive technology and components industry is highly competitive and is characterized by rapidly changing technology, evolving industry standards and changes in customer needs. Our ability to anticipate changes in technology and regulatory standards and to successfully develop and introduce new and enhanced products on a timely and cost competitive basis will be a significant factor in our ability to remain competitive. To compete effectively in the automotive technology and components industry, we must be able to develop and launch new products to meet our customers' demands in a timely manner. Our innovative technologies and robust global engineering and development capabilities have us well positioned to meet the increasingly stringent vehicle manufacturer demands and consumer preferences for high-technology content in automobiles.

OEMs are increasingly looking to their suppliers to simplify vehicle design and assembly processes to reduce costs and weight. As a result, suppliers that sell vehicle components directly to manufacturers (Tier I suppliers) have assumed many of the design, engineering, research and development and assembly functions traditionally performed by vehicle manufacturers. Suppliers that can provide fully-engineered solutions, systems and pre-assembled combinations of component parts are positioned to leverage the trend toward system sourcing.

Engineering, design and development. Our history and culture of innovation have enabled us to develop significant intellectual property and design and development expertise to provide advanced technology solutions that meet the demands of our customers. We have a team of approximately 18,900 scientists, engineers and technicians focused on developing leading product solutions for our key markets, located at 12 major technical centers in China, Germany, India, Mexico, Poland, Singapore and the United States. During the year ended December 31, 2021, we invested approximately \$1.4 billion (which includes approximately \$320 million co-investment by customers and government agencies) in research and development, including engineering, to maintain our portfolio of innovative products, and own/hold approximately 8,500 patents and protective rights. We also encourage "open innovation" and collaborate extensively with peers in the industry, government agencies and academic institutions. Our technology competencies are recognized by both customers and government agencies, who co-invest approximately \$320 million annually in new product development, accelerating the pace of innovation and reducing the risk associated with successful commercialization of technological breakthroughs.

In the past, suppliers often incurred the initial cost of engineering, designing and developing automotive component parts, and recovered their investments over time by including a cost recovery component in the price of each part based on expected volumes. Recently, we and many other suppliers have negotiated for cost recovery payments independent of volumes. This trend reduces our economic risk.

Pricing. Cost-cutting initiatives adopted by our customers result in increased downward pressure on pricing. Our customer supply agreements generally require step-downs in component pricing over the periods of production and OEMs have historically possessed significant leverage over their outside suppliers because the automotive component supply industry is fragmented and serves a limited number of automotive OEMs. Our profitability depends in part on our ability to generate sufficient production cost savings in the future to offset price reductions. In addition, during 2021, global economies and our industry were subjected to significant inflationary cost pressures, and these pressures have worsened in 2022. We continue to work with our customers, both through price recoveries and adjustments as well as future pricing adjustments as contracts renew, to mitigate the impact of these inflationary pressures on our results of operations.

We are focused on maintaining a low fixed cost structure that provides us flexibility to remain profitable at all points of the traditional vehicle industry production cycle. As a result, approximately 97% of our hourly workforce is located in best cost countries. Furthermore, we have substantial operational flexibility by leveraging a large workforce of contingent workers, which represented approximately 25% of the hourly workforce as of September 30, 2022. However, we will continue to adjust our cost structure and optimize our manufacturing footprint in response to changes in the global and regional automotive markets and in order to increase investment in advanced technologies and engineering, as evidenced by our ongoing restructuring programs focused on reducing our global overhead costs and on the continued rotation of our manufacturing footprint to best cost locations in Europe. As we continue to operate in a cyclical industry that is impacted by movements in the global and regional economies, we continually evaluate opportunities to further refine our cost structure.

We have a strong balance sheet with gross debt of approximately \$6.4 billion and substantial available liquidity of approximately \$7.3 billion as of September 30, 2022, consisting of cash equivalents, available financing under our Revolving Credit Facility and committed European accounts receivable factoring facility, and no significant U.S. defined benefit or workforce postretirement health care benefits and employer-paid postretirement basic life insurance benefits ("OPEB") liabilities. We intend to maintain strong financial discipline by targeting industry-leading earnings growth, cash flow generation and return on invested capital and to maintain sufficient liquidity to sustain our financial flexibility throughout the industry cycle.

OEM product recalls. The number of vehicles recalled globally by OEMs has increased above historical levels. These recalls can either be initiated by the OEMs or influenced by regulatory agencies. Although there are differing rules and regulations across countries governing recalls for safety issues, the overall transition towards global vehicle platforms may also

contribute to increased recalls outside of the U.S., as automotive components are increasingly standardized across regions. Given the sensitivity to safety issues in the automotive industry, including increased focus from regulators and consumers, we anticipate the number of automotive recalls may remain above historical levels in the near future. Although we engage in extensive product quality programs and processes, it is possible that we may be adversely affected in the future if the pace of these recalls continues.

Efficient use of capital. The global vehicle components industry is generally capital intensive and a portion of a supplier's capital equipment is frequently utilized for specific customer programs. Lead times for procurement of capital equipment are long and typically exceed start of production by one to two years. Substantial advantages exist for suppliers that can leverage their prior investments in capital equipment or amortize the investment over higher volume global customer programs.

Industry consolidation and disruptive new entrants. Consolidation among worldwide OEMs and suppliers is expected to continue as these companies seek to achieve operating synergies and value stream efficiencies, acquire complementary technologies and build stronger customer relationships. Additionally, the rise of advanced software and technologies in vehicles has attracted new and disruptive entrants from outside the traditional automotive supply industry. These entrants may seek to gain access to certain vehicle technology and component markets. Any of these new competitors may develop and introduce technologies that gain greater customer or consumer acceptance, which could adversely affect the future growth of the Company. We believe companies with strong balance sheets and financial discipline are in the best position to take advantage of these trends.

Consolidated Results of Operations

Aptiv typically experiences fluctuations in revenue due to changes in OEM production schedules, vehicle sales mix and the net of new and lost business (which we refer to collectively as volume), increased prices attributable to escalation clauses in our supply contracts for recovery of increased commodity costs (which we refer to as commodity pass-through), fluctuations in foreign currency exchange rates (which we refer to as "FX"), contractual reductions of the sales price to the OEM (which we refer to as contractual price reductions) and engineering changes. Changes in sales mix can have either favorable or unfavorable impacts on revenue. Such changes can be the result of shifts in regional growth, shifts in OEM sales demand, as well as shifts in consumer demand related to vehicle segment purchases and content penetration. For instance, a shift in sales demand favoring a particular OEM's vehicle model for which we do not have a supply contract may negatively impact our revenue. A shift in regional sales demand toward certain markets could favorably impact the sales of those of our customers that have a large market share in those regions, which in turn would be expected to have a favorable impact on our revenue.

We typically experience (as described below) fluctuations in operating income due to:

- Volume, net of contractual price reductions—changes in volume offset by contractual price reductions (which typically range from 1% to 3% of net sales) and changes in mix;
- Operational performance—changes to costs for materials and commodities or manufacturing and engineering variances; and
- Other—including restructuring costs and any remaining variances not included in Volume, net of contractual price reductions or Operational performance.

The automotive technology and component supply industry is traditionally subject to inflationary pressures with respect to raw materials and labor which may place operational and profitability burdens on the entire supply chain. For instance, in 2021 and throughout 2022, the industry has been subjected to increased pricing pressures, specifically in relation to copper and petroleum-based resin products, which have experienced significant volatility in price. Also in 2022, we have been impacted globally by increased overall inflation as a result of a variety of global trends. Due to various factors, the industry is also facing increased operating and logistics challenges from certain global supply chain disruptions, including a worldwide semiconductor supply shortage. This shortage has resulted in increased pricing pressures on semiconductors as well. In addition, we expect semiconductor supply cost and commodity cost volatility to have a continual impact on future earnings and/or operating cash flows. As such, we continually seek to mitigate both inflationary pressures and our material-related cost exposures using a number of approaches, including combining purchase requirements with customers and/or other suppliers, using alternate suppliers or product designs, negotiating cost reductions and/or commodity cost contract escalation clauses into our vehicle manufacturer supply contracts and hedging. In 2022, we have also negotiated, and will continue to negotiate, price increases with our customers in response to the aforementioned global supply chain disruptions.

Three and Nine Months Ended September 30, 2022 versus Three and Nine Months Ended September 30, 2021

The results of operations for the three and nine months ended September 30, 2022 and 2021 were as follows:

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2022	2021	Favorable/(unfavorable)	2022	2021	Favorable/(unfavorable)
	(dollars in millions)

Total Net Sales

Below is a summary of our total net sales for the three months ended September 30, 2022 versus September 30, 2021.

	Three Months Ended September 30,			Variance Due To:				
	2022	2021	Favorable/(unfavorable)	Volume, net of contractual price reductions	FX	Commodity pass-through	Other	Total
	(in millions)			(in millions)				
Total net sales	\$ 4,614	\$ 3,654	\$ 960	\$ 1,186	\$ (217)	\$ (9)	\$ —	\$ 960

Total net sales for the three months ended September 30, 2022 increased 26% compared to the three months ended September 30, 2021. Our volumes increased 29% for the period, which reflects increased global automotive production of 27% (up 24% on an AWM basis). The increase in volumes is primarily attributable to an increase in all regions. Our total net sales also reflect the favorable impact of price recoveries, net of contractual price reductions of \$135 million and unfavorable foreign currency impacts, primarily related to the Euro and Chinese Yuan Renminbi.

Below is a summary of our total net sales for the nine months ended September 30, 2022 versus 2021.

	Nine Months Ended September 30,			Variance Due To:				
	2022	2021	Favorable/(unfavorable)	Volume, net of contractual price reductions	FX	Commodity pass-through	Other	Total
	(in millions)			(in millions)				
Total net sales	\$ 12,849	\$ 11,484	\$ 1,365	\$ 1,688	\$ (420)	\$ 97	\$ —	\$ 1,365

Total net sales for the nine months ended September 30, 2022 increased 12% compared to the nine months ended September 30, 2021. Our overall volumes increased 13% for the period, which primarily reflects increased global automotive

production of 6% (5% on an AWM basis). The increase in volumes is primarily attributable to increases in North America and China. Our total net sales also reflect the favorable impact of price recoveries, net of contractual price reductions of \$155 million and unfavorable foreign currency impacts, primarily related to the Euro.

Cost of Sales

Cost of sales is primarily comprised of material, labor, manufacturing overhead, freight, fluctuations in foreign currency exchange rates, product engineering, design and development expenses, depreciation and amortization, warranty costs and other operating expenses. Gross margin is revenue less cost of sales and gross margin percentage is gross margin as a percentage of net sales.

Cost of sales increased \$683 million for the three months ended September 30, 2022 compared to the three months ended September 30, 2021, as summarized below. The Company's material cost of sales was approximately 55% and 50% of net sales for the three months ended September 30, 2022 and 2021, respectively.

	Three Months Ended September 30,			Variance Due To:				
	2022	2021	Favorable/(unfavorable)	Volume (a)	FX	Operational performance	Other	Total
	(dollars in millions)			(in millions)				
Cost of sales	\$ 3,821	\$ 3,138	\$ (683)	\$ (715)	\$ 197	\$ (153)	\$ (12)	\$ (683)
Gross margin	\$ 793	\$ 516	\$ 277	\$ 471	\$ (20)	\$ (153)	\$ (21)	\$ 277
Percentage of net sales	17.2 %	14.1 %						

(a) Presented net of contractual price reductions for gross margin variance.

The increase in cost of sales reflects increased volumes and operational performance, partially offset by favorable impacts from currency exchange. Our operational performance for the three months ended September 30, 2022 includes approximately \$160 million of increased costs for semiconductors and commodities, as well as approximately \$15 million of decreased costs, primarily related to material logistics costs associated with the global supply chain disruptions due to the worldwide semiconductor shortage and other extraordinary events. The total impacts within cost of sales resulting from the global supply chain disruptions were decreased costs of approximately \$20 million during the three months ended September 30, 2022.

Cost of sales increased \$1,388 million for the nine months ended September 30, 2022 compared to the nine months ended September 30, 2021, as summarized below. The Company's material cost of sales was approximately 55% and 50% of net sales for the nine months ended September 30, 2022 and 2021, respectively.

	Nine Months Ended September 30,			Variance Due To:				
	2022	2021	Favorable/(unfavorable)	Volume (a)	FX	Operational performance	Other	Total
	(dollars in millions)			(in millions)				
Cost of sales	\$ 11,027	\$ 9,639	\$ (1,388)	\$ (1,077)	\$ 392	\$ (570)	\$ (133)	\$ (1,388)
Gross margin	\$ 1,822	\$ 1,845	\$ (23)	\$ 611	\$ (28)	\$ (570)	\$ (36)	\$ (23)
Percentage of net sales	14.2 %	16.1 %						

(a) Presented net of contractual price reductions for gross margin variance.

The increase in cost of sales reflects increased volumes and operational performance, partially offset by favorable impacts from currency exchange. Our operational performance for the nine months ended September 30, 2022 includes approximately \$455 million of increased costs for semiconductors and commodities, as well as approximately \$40 million of increased costs, primarily related to material logistics costs associated with the global supply chain disruptions due to the worldwide semiconductor shortage and other extraordinary events. The total impacts within cost of sales resulting from the global supply chain disruptions were incremental costs of approximately \$20 million during the nine months ended September 30, 2022. Cost of sales was also impacted by the following items in Other above:

- \$97 million of increased commodity pass-through costs; and
- \$59 million of charges, primarily to impair the carrying value of our majority owned Russian subsidiary's net assets to fair value.

Selling, General and Administrative Expense

	Three Months Ended September 30,		
	2022	2021	Favorable/ (unfavorable)
	(dollars in millions)		
Selling, general and administrative expense	\$ 275	\$ 263	\$ (12)
Percentage of net sales	6.0 %	7.2 %	

	Nine Months Ended September 30,		
	2022	2021	Favorable/ (unfavorable)
	(dollars in millions)		
Selling, general and administrative expense	\$ 835	\$ 784	\$ (51)
Percentage of net sales	6.5 %	6.8 %	

Selling, general and administrative expense (“SG&A”) includes administrative expenses, information technology costs and incentive compensation related costs. SG&A decreased as a percentage of net sales for the three and nine months ended September 30, 2022 compared to 2021, primarily due to increased sales.

Amortization

	Three Months Ended September 30,		
	2022	2021	Favorable/ (unfavorable)
	(in millions)		
Amortization	\$ 37	\$ 37	\$ —

	Nine Months Ended September 30,		
	2022	2021	Favorable/ (unfavorable)
	(in millions)		
Amortization	\$ 112	\$ 111	\$ (1)

Amortization expense reflects the non-cash charge related to definite-lived intangible assets. The consistency in amortization during the three and nine months ended September 30, 2022 compared to 2021 reflects the continued amortization of our definite-lived intangible assets, which resulted primarily from our acquisitions, over their estimated useful lives. Refer to Note 17. Acquisitions and Divestitures to the consolidated financial statements contained herein for further detail of our business acquisitions, including details of the intangible assets recorded in each transaction.

Restructuring

	Three Months Ended September 30,		
	2022	2021	Favorable/ (unfavorable)
	(dollars in millions)		
Restructuring	\$ 11	\$ 1	\$ (10)
Percentage of net sales	0.2 %	— %	

	Nine Months Ended September 30,		
	2022	2021	Favorable/ (unfavorable)
	(dollars in millions)		
Restructuring	\$ 52	\$ 21	\$ (31)
Percentage of net sales	0.4 %	0.2 %	

The Company recorded employee-related and other restructuring charges totaling approximately \$11 million and \$52 million during the three and nine months ended September 30, 2022, respectively. We expect to make cash payments of approximately \$45 million over the next twelve months pursuant to currently implemented restructuring programs.

The Company recorded employee-related and other restructuring charges totaling approximately \$1 million and \$21 million during the three and nine months ended September 30, 2021, respectively.

We expect to continue to incur additional restructuring expense in 2022 and beyond, primarily related to programs focused on reducing global overhead costs and on the continued rotation of our manufacturing footprint to best cost locations in Europe, which includes approximately \$50 million (of which approximately \$40 million relates to the Advanced Safety and User Experience segment and approximately \$10 million relates to the Signal and Power Solutions segment) for programs approved as of September 30, 2022. Additionally, as we continue to operate in a cyclical industry that is impacted by movements in the global and regional economies, we continually evaluate opportunities to further adjust our cost structure and optimize our manufacturing footprint. The Company plans to implement additional restructuring activities in the future, if necessary, in order to align manufacturing capacity and other costs with prevailing regional automotive production levels and locations, to improve the efficiency and utilization of other locations and in order to increase investment in advanced technologies and engineering. Such future restructuring actions are dependent on market conditions, customer actions and other factors.

Refer to Note 7. Restructuring to the consolidated financial statements contained herein for additional information.

Interest Expense

	Three Months Ended September 30,		
	2022	2021	Favorable/ (unfavorable)
	(in millions)		
Interest expense	\$ 58	\$ 36	\$ (22)

	Nine Months Ended September 30,		
	2022	2021	Favorable/ (unfavorable)
	(in millions)		
Interest expense	\$ 157	\$ 114	\$ (43)

The increase in interest expense during the three and nine months ended September 30, 2022 compared to 2021 reflects the issuance of \$2.5 billion in aggregate principal amount of senior unsecured notes in February 2022 (the “2022 Senior Notes”), partially offset by the issuance of \$1.5 billion in aggregate principal amount of 3.10% senior unsecured notes due 2051, which were utilized to redeem \$700 million in aggregate principal amount of 4.15% senior unsecured notes due 2024 and \$650 million in aggregate principal amount of 4.25% senior unsecured notes due 2026. Refer to Note 8. Debt to the consolidated financial statements contained herein for additional information.

Other Income, Net

	Three Months Ended September 30,		
	2022	2021	Favorable/ (unfavorable)
	(in millions)		
Other income, net	\$ 20	\$ 1	\$ 19

	Nine Months Ended September 30,		
	2022	2021	Favorable/ (unfavorable)
	(in millions)		
Other (expense) income, net	\$ (44)	\$ 2	\$ (46)

Other income (expense), net for the three and nine months ended September 30, 2022 includes interest income of \$26 million and \$35 million, respectively, offset by losses of \$6 million and \$55 million, respectively, recognized for the change in fair value of publicly traded equity securities.

Other income, net for the three and nine months ended September 30, 2021 includes a loss of \$1 million and a gain of \$8 million, respectively, recognized for the change in fair value of publicly traded equity securities. Also, as further discussed in Note 8. Debt to the consolidated financial statements contained herein, during the nine months ended September 30, 2021, Aptiv recorded a loss on debt modification of \$1 million in conjunction with the June 2021 amendment to the Credit Agreement.

Refer to Note 16. Other Income, net to the consolidated financial statements contained herein for additional information.

Income Taxes

	Three Months Ended September 30,		
	2022	2021	Favorable/ (unfavorable)
	(in millions)		
Income tax expense	\$ 59	\$ 25	\$ (34)

	Nine Months Ended September 30,		
	2022	2021	Favorable/ (unfavorable)
	(in millions)		
Income tax expense	\$ 96	\$ 101	\$ 5

The Company's tax rate is affected by the fact that its parent entity is an Irish resident taxpayer, the tax rates in Ireland and other jurisdictions in which the Company operates, the relative amount of income earned by jurisdiction and the relative amount of losses or income for which no tax benefit or expense was recognized due to a valuation allowance. The Company's effective tax rate is also impacted by the receipt of certain tax incentives and holidays that reduce the effective tax rate for certain subsidiaries below the statutory rate. For the nine months ended September 30, 2022, the Company's effective tax rate was impacted by impairments and other charges related to the Ukraine/Russia conflict for which no tax benefit was recognized.

The Company's effective tax rate for the three and nine months ended September 30, 2022 includes net discrete tax benefits of approximately \$1 million and \$5 million, respectively, primarily related to provision to return adjustments, net changes in accruals for unremitted earnings and changes in reserves. The effective tax rate for the three and nine months ended September 30, 2021 includes net discrete tax expense of approximately \$4 million and \$0 million, respectively, primarily related to changes in reserves and provision to return adjustments. Refer to Note 11. Income Taxes to the consolidated financial statements contained herein for additional information.

Equity Loss

	Three Months Ended September 30,		
	2022	2021	Favorable/ (unfavorable)
	(in millions)		
Equity loss, net of tax	\$ 67	\$ 51	\$ (16)

	Nine Months Ended September 30,		
	2022	2021	Favorable/ (unfavorable)
	(in millions)		
Equity loss, net of tax	\$ 202	\$ 146	\$ (56)

Equity loss, net of tax reflects the Company's interest in the results of ongoing operations of entities accounted for as equity method investments. The equity losses recognized by Aptiv for each period presented are primarily attributable to the Motional autonomous driving joint venture.

Results of Operations by Segment

We operate our core business along the following operating segments, which are grouped on the basis of similar product, market and operating factors:

- Signal and Power Solutions, which includes complete electrical architecture and component products.
- Advanced Safety and User Experience, which includes vehicle technology and systems integration expertise in advanced safety, user experience and connectivity and security solutions, as well as advanced software development and autonomous driving technologies.
- Eliminations and Other, which includes i) the elimination of inter-segment transactions, and ii) certain other expenses and income of a non-operating or strategic nature.

Our management utilizes segment Adjusted Operating Income as the key performance measure of segment income or loss to evaluate segment performance, and for planning and forecasting purposes to allocate resources to the segments, as management believes this measure is most reflective of the operational profitability or loss of our operating segments. Segment Adjusted Operating Income should not be considered a substitute for results prepared in accordance with U.S. GAAP and should not be considered an alternative to net income attributable to Aptiv, which is the most directly comparable financial measure to Adjusted Operating Income that is prepared in accordance with U.S. GAAP. Segment Adjusted Operating Income, as determined and measured by Aptiv, should also not be compared to similarly titled measures reported by other companies.

Effective on January 1, 2022, the Company now excludes amortization expense of intangible assets from the calculation of Adjusted Operating Income, as reflected in the definition below. The Company's management believes that the updated calculation of this non-GAAP financial measure will be more useful to both management and investors in their analysis of the Company's results of operations due to recent and pending acquisitions. Amortization of intangible assets generally results from a write-up in the value of assets in connection with an acquisition. The Company believes that exclusion of amortization expense will facilitate more comparable operating results of the Company over time, between periods when the Company is more or less acquisitive and allows for improved comparison with both acquisitive and non-acquisitive peer companies. The historical presentation of Adjusted Operating Income in the tables below has been revised to be consistent with this updated calculation.

The reconciliation of Adjusted Operating Income to operating income includes, as applicable, amortization, restructuring, other acquisition and portfolio project costs (which includes costs incurred to integrate acquired businesses and to plan and execute product portfolio transformation actions, including business and product acquisitions and divestitures), asset impairments and other related charges and gains (losses) on business divestitures and other transactions. The reconciliations of Adjusted Operating Income to net income attributable to Aptiv for the three and nine months ended September 30, 2022 and 2021 are as follows:

Total	\$ 525	\$ 256	\$ 269	\$ 471	\$ (153)	\$ (49)	\$ 269

As noted in the table above, Adjusted Operating Income for the three months ended September 30, 2022 as compared to the three months ended September 30, 2021 was impacted by volume, including product mix, and the favorable impact of price recoveries, net of contractual price reductions, and operational performance. Our operational performance for the three months ended September 30, 2022 includes approximately \$160 million of increased costs for semiconductors and commodities, as well as approximately \$15 million of decreased costs, primarily related to material logistics costs associated with the global supply chain disruptions due to the worldwide semiconductor shortage and other extraordinary events. The total impacts within Adjusted Operating Income resulting from the global supply chain disruptions were decreased costs of approximately \$20 million during the three months ended September 30, 2022. Adjusted Operating Income was also impacted by the following items included within Other in the table above:

- Approximately \$20 million of increased incentive compensation costs; and
- \$7 million of unfavorable foreign currency impacts.

	Nine Months Ended September 30,			Variance Due To:			
	2022	2021	Favorable/(unfavorable)	Volume, net of contractual price reductions	Operational performance	Other	Total

Total	\$ 1,062	\$ 1,068	\$ (6)	\$ 611	\$ (570)	\$ (47)	\$ (6)

As noted in the table above, Adjusted Operating Income for the nine months ended September 30, 2022 as compared to the nine months ended September 30, 2021 was impacted by volume, including product mix, and the favorable impact of price recoveries, net of contractual price reductions, and operational performance. Our operational performance for the nine months ended September 30, 2022 includes approximately \$455 million of increased costs for semiconductors and commodities, as well as approximately \$40 million of increased costs, primarily related to material logistics costs associated with the global supply chain disruptions due to the worldwide semiconductor shortage and other extraordinary events. The total impacts within Adjusted Operating Income resulting from the global supply chain disruptions were incremental costs of approximately \$20 million during the nine months ended September 30, 2022. Adjusted Operating Income was also impacted by the following item included within Other in the table above:

- \$39 million of increased SG&A expense, not including the impact of other acquisition and portfolio project costs.

Liquidity and Capital Resources

Overview of Capital Structure

Our liquidity requirements are primarily to fund our business operations, including capital expenditures and working capital requirements, as well as to fund debt service requirements, operational restructuring activities and dividends on our outstanding preferred shares. Our primary sources of liquidity are cash flows from operations, our existing cash balance, and as necessary and available, borrowings under credit facilities and issuance of long-term debt and equity. To the extent we generate discretionary cash flow we may consider using this additional cash flow for optional prepayments of existing indebtedness, strategic acquisitions or investments, and/or general corporate purposes. We also continually explore ways to enhance our capital structure.

As of September 30, 2022, we had cash and cash equivalents of \$4.9 billion and net debt (defined as outstanding debt less cash and cash equivalents) of \$1.5 billion. The following table summarizes our available liquidity, which includes cash, cash equivalents and funds available under our significant committed credit facilities, as of September 30, 2022:

	September 30, 2022
	(in millions)
Cash and cash equivalents	\$ 4,850
Revolving Credit Facility, unutilized portion (1)	2,000
Committed European accounts receivable factoring facility, unutilized portion (2)	438
Total available liquidity	\$ 7,288

(1) Availability reduced by less than \$1 million in letters of credit issued under the Credit Agreement as of September 30, 2022.

(2) Based on September 30, 2022 foreign currency rates, subject to the availability of eligible accounts receivable.

Despite the current global economic impacts and uncertainties resulting from the conflict between Ukraine and Russia, the ongoing global supply chain disruptions, the COVID-19 pandemic and the resulting direct and indirect impacts on global vehicle production, we currently expect existing cash, available liquidity and cash flows from operations to continue to be sufficient to fund our global operating activities, including restructuring payments, any mandatory payments required under the Credit Agreement as described below, dividends on preferred shares and capital expenditures. Furthermore, we expect to acquire Intercable Automotive Solutions S.r.l and pay other required fees and expenses in connection with the proposed acquisition utilizing cash on hand. We also expect to acquire Wind River and pay other required fees and expenses in connection with the proposed acquisition primarily utilizing cash on hand, including proceeds from the issuance of the 2022 Senior Notes.

We also continue to expect to be able to move funds between different countries to manage our global liquidity needs without material adverse tax implications, subject to current monetary policies and the terms of the Credit Agreement. We utilize a combination of strategies, including dividends, cash pooling arrangements, intercompany loan repayments and other distributions and advances to provide the funds necessary to meet our global liquidity needs. There are no significant restrictions on the ability of our subsidiaries to pay dividends or make other distributions to Aptiv. As of September 30, 2022, the Company's cash and cash equivalents held by our non-U.S. subsidiaries totaled approximately \$4.8 billion. If additional non-U.S. cash was needed for our U.S. operations, we may be required to accrue and pay withholding if we were to distribute such funds from non-U.S. subsidiaries to the U.S.; however, based on our current liquidity needs and strategies, we do not anticipate a need to accrue and pay such additional amounts.

2020 Public Equity Offering

In June 2020, the Company completed the underwritten public offering of approximately 15.1 million ordinary shares at a price of \$75.91 per share, resulting in net proceeds of approximately \$1,115 million, after deducting expenses and the underwriters' discount of \$35 million. Simultaneously, the Company completed the underwritten public offering of 11.5 million 5.50% Mandatory Convertible Preferred Shares, Series A, \$0.01 par value per share (the "MCPS") with a liquidation preference of \$100 per share (the "MCPS Offering"), resulting in net proceeds of approximately \$1,115 million, after deducting expenses and the underwriters' discount of \$35 million. Each share of MCPS will convert on the mandatory conversion date of June 15, 2023, into between 1.0754 and 1.3173 shares of the Company's ordinary shares, subject to customary anti-dilution adjustments.

Holders of the MCPS will be entitled to receive, when and if declared by the Company's Board of Directors, cumulative dividends at the annual rate of 5.50% of the liquidation preference of \$100 per share (equivalent to \$5.50 annually per share), payable in cash or, subject to certain limitations, by delivery of the Company's ordinary shares or any combination of cash and the Company's ordinary shares, at the Company's election. If declared, dividends on the MCPS will be payable quarterly on March 15, June 15, September 15 and December 15 of each year (commencing on September 15, 2020 to, and including June 15, 2023), to the holders of record of the MCPS as they appear on the Company's share register at the close of business on the immediately preceding March 1, June 1, September 1 or December 1, respectively. Refer to Note 12. Shareholders' Equity and Net Income Per Share to the consolidated financial statements contained herein for further detail on the June 2020 public equity offering.

Share Repurchases

In April 2016, the Board of Directors authorized a share repurchase program of up to \$1.5 billion of ordinary shares, which commenced in September 2016. This share repurchase program provides for share purchases in the open market or in privately negotiated transactions, depending on share price, market conditions and other factors, as determined by the Company.

There were no shares repurchased during the three and nine months ended September 30, 2022 and 2021.

As of September 30, 2022, approximately \$13 million of share repurchases remained available under the April 2016 share repurchase program, which is in addition to the share repurchase program of up to \$2.0 billion that was previously announced in January 2019. This program, which will commence following the completion of the April 2016 share repurchase program, provides for share purchases in the open market or in privately negotiated transactions, depending on share price, market conditions and other factors, as determined by the Company. All previously repurchased shares were retired, and are reflected as a reduction of ordinary share capital for the par value of the shares, with the excess applied as reductions to additional paid-in-capital and retained earnings.

Preferred Dividends

In the third quarter of 2022, the Board of Directors declared and paid a quarterly cash dividend of approximately \$1.375 per mandatory convertible preferred share outstanding.

Acquisitions and Other Transactions

El-Com—On December 30, 2021, Aptiv acquired 100% of the equity interests of El-Com, Inc. (“El-Com”), a manufacturer of custom wire harnesses and cable assemblies for high-reliability products and industries, for total consideration of up to \$88 million. The total consideration includes a cash payment of up to \$10 million, contingent upon the achievement of certain performance metrics over a one-year period following the acquisition. The acquisition was accounted for as a business combination, with the operating results of El-Com included within the Company’s Signal and Power Solutions segment from the date of acquisition. The Company acquired El-Com utilizing cash on hand.

Krono-Safe Automotive—On November 9, 2021, Aptiv acquired 100% of the equity interests of Krono-Safe Automotive, SAS (“Krono-Safe Automotive”), a leading software developer of safety-critical real-time embedded systems, for total consideration of \$13 million, which was comprised of Aptiv’s previous investment of \$6 million in Krono-Safe, SAS and \$7 million of cash. The acquisition was accounted for as a business combination, with the operating results of Krono-Safe Automotive included within the Company’s Advanced Safety and User Experience segment from the date of acquisition.

Ulti-Mate—On April 30, 2021, Aptiv acquired certain assets of Ulti-Mate Connector, Inc. (“Ulti-Mate”), a manufacturer of miniature and micro-miniature connectors and cable assemblies, for total consideration of \$45 million. The acquisition was accounted for as a business combination, with the operating results of Ulti-Mate included within the Company’s Signal and Power Solutions segment from the date of acquisition. The Company acquired Ulti-Mate utilizing cash on hand.

Intercable Automotive—In September 2022, Aptiv entered into a definitive agreement to acquire 85% of the equity interests of Intercable Automotive Solutions S.r.l. (“Intercable Automotive”), a manufacturer of high-voltage busbars and interconnect solutions, for €595 million, subject to customary post-closing adjustments. The acquisition is expected to close in the fourth quarter of 2022, subject to regulatory approvals and customary closing conditions. Upon completion, Intercable Automotive will become part of Aptiv’s Signal and Power Solutions segment. The Company intends to acquire its interest in Intercable Automotive utilizing cash on hand.

Concurrent with the acquisition, the Company entered into an agreement with the noncontrolling interest holders that provides the Company with the right to purchase, and the noncontrolling interest holders with the right to sell to the Company, the remaining 15% of Intercable Automotive for cash at a contractually defined value beginning in 2026.

Wind River—In January 2022, Aptiv entered into a definitive agreement to acquire 100% of the equity interests of Wind River, a global leader in delivering software for the intelligent edge, for \$4.3 billion, subject to customary post-closing adjustments. The transaction is subject to regulatory approvals and customary closing conditions, and we are targeting a closing this year as we work through the regulatory approval process. Upon completion, we anticipate that Wind River will become part of Aptiv’s Advanced Safety and User Experience segment. The Company intends to acquire Wind River primarily utilizing cash on hand, including proceeds from the issuance of the 2022 Senior Notes.

Planned Exit from Majority Owned Russian Subsidiary—Given the sanctions put in place by the E.U., U.S. and other governments, which restrict our ability to conduct business in Russia, we initiated a plan to exit our majority owned subsidiary in Russia in the second quarter of 2022. As a result, the Company determined that this subsidiary, which is reported within the Signal and Power Solutions segment, met the held for sale criteria as of September 30, 2022. Consequently, during the nine months ended September 30, 2022, the Company recorded a pre-tax charge of \$51 million to impair the carrying value of the Russian subsidiary’s net assets to fair value, which was recorded primarily within cost of sales in the consolidated statement of operations. Approximately \$25 million of these charges were attributable to the noncontrolling interest based on the noncontrolling shareholder’s economic interest. The remaining assets and liabilities, which are de minimis, were reclassified to other current assets and other current liabilities, respectively, in the consolidated balance sheet as of September 30, 2022.

Refer to Note 17. Acquisitions and Divestitures to the consolidated financial statements contained herein for further detail of the Company’s business acquisitions and divestitures.

Technology Investments—During the second quarter of 2022, the Company’s Advanced Safety and User Experience segment made an investment totaling 50 billion South Korean Won (approximately \$40 million, using foreign currency rates on the investment date) in StradVision, Inc, a provider of deep learning-based camera perception software for automotive applications.

In February 2022, Quanergy Systems, Inc. (“Quanergy”) merged with a publicly traded special purpose acquisition company (“SPAC”) and shares of Quanergy began trading on the NYSE under the symbol QNGY. As part of the SPAC merger, our preferred shares in Quanergy were converted into Quanergy ordinary shares. During the nine months ended September 30, 2022, the Company sold all of its Quanergy ordinary shares for net proceeds of approximately \$3 million. The Company’s Advanced Safety and User Experience segment had previously made a \$3 million investment in Quanergy during 2016, which was in addition to the Company’s \$3 million investment made during 2015.

In September 2021, Valens Semiconductor Ltd. (“Valens”) merged with a publicly traded SPAC and shares of Valens began trading on the NYSE under the symbol VLN. As part of the SPAC merger, our preferred shares in Valens were converted into Valens ordinary shares.

In August 2021, Otonomo Technologies Ltd. (“Otonomo”) merged with a publicly traded SPAC and shares of Otonomo began trading on the Nasdaq Capital Market under the symbol OTMO. As part of the SPAC merger, our preferred shares in Otonomo were converted into Otonomo ordinary shares. During the second half of 2021, the Company sold a portion of its Otonomo ordinary shares for net proceeds of approximately \$3 million. The Company’s Advanced Safety and User Experience segment had previously made a \$3 million investment in Otonomo during 2019, which was in addition to the Company’s \$15 million investment made during 2017.

In June 2021, Affectiva, Inc. (“Affectiva”) was acquired by Smart Eye AB (“Smart Eye”), which is publicly traded on the Nasdaq Stockholm AB stock exchange. As part of the acquisition, Aptiv received shares of Smart Eye in exchange for Aptiv’s Affectiva preferred shares.

In April 2021, Innoviz Technologies (“Innoviz”) merged with a publicly traded SPAC and shares of Innoviz began trading on the Nasdaq Capital Market under the symbol INVZ. As part of the SPAC merger, our preferred shares in Innoviz were converted into Innoviz ordinary shares. During the second half of 2021, the Company sold all of its Innoviz ordinary shares for net proceeds of approximately \$18 million. The Company’s Advanced Safety and User Experience segment had previously made a \$15 million investment in Innoviz during 2017.

Following each of the transactions described above for Quanergy, Valens, Otonomo, Smart Eye and Innoviz, the fair value of each respective investment is measured on a recurring basis, with changes in fair value recorded to other income (expense), net.

Investment in TTTech Auto AG—On March 15, 2022, Aptiv acquired approximately 20% of the equity interests of TTTech Auto AG (“TTTech Auto”), a leading provider of safety-critical middleware solutions for advanced driver-assistance systems and autonomous driving applications, in exchange for €200 million (approximately \$220 million, using foreign currency rates on the investment date). The Company made the investment in TTTech Auto utilizing cash on hand. The Company’s investment in TTTech Auto is accounted for using the equity method of accounting following the date of the investment.

Refer to Note 21. Investments in Affiliates to the consolidated financial statements contained herein for further detail of the Company’s investments.

Credit Agreement

Aptiv PLC and its wholly-owned subsidiary Aptiv Corporation entered into a credit agreement (the “Credit Agreement”) with JPMorgan Chase Bank, N.A., as administrative agent (the “Administrative Agent”), under which it maintains senior unsecured credit facilities currently consisting of a term loan (the “Tranche A Term Loan”) and a revolving credit facility of \$2 billion (the “Revolving Credit Facility”). Subsequently, Aptiv Global Financing Limited (“AGFL”), a wholly-owned subsidiary of Aptiv PLC, executed a joinder agreement to the Credit Agreement, which allows it to act as a borrower under the Credit Agreement, and a guaranty supplement, under which AGFL guarantees the obligations under the Credit Agreement, subject to certain exceptions.

The Credit Agreement was entered into in March 2011 and has been subsequently amended and restated on several occasions, most recently on June 24, 2021. The June 2021 amendment, among other things, (1) refinanced and replaced the existing term loan A and revolver with a new term loan A that matures in 2026, and a new five-year revolving credit facility with aggregate commitments of \$2 billion, (2) utilized the Company’s existing sustainability-linked metrics and commitments, that, if achieved, would change the facility fee and interest rate margins as described below, and (3) established the leverage ratio maintenance covenant that requires the Company to maintain total net leverage (as calculated in accordance with the Credit Agreement) of less than 3.5 to 1.0 (or 4.0 to 1.0 for four full fiscal quarters following completion of material

acquisitions, as defined in the Credit Agreement) and allowed for dividends and other payments on equity. Losses on modification of debt totaled \$1 million during the nine months ended September 30, 2021 related to the June 2021 amendment. Aptiv paid amendment fees of \$6 million during the nine months ended September 30, 2021 which are reflected as a financing activity in the consolidated statements of cash flows.

The Tranche A Term Loan and the Revolving Credit Facility mature on June 24, 2026. Beginning in the third quarter of 2022, Aptiv was obligated to begin making quarterly principal payments on the Tranche A Term Loan according to the amortization schedule in the Credit Agreement. The Credit Agreement also contains an accordion feature that permits Aptiv to increase, from time to time, the aggregate borrowing capacity under the Credit Agreement by up to an additional \$1 billion upon Aptiv's request, the agreement of the lenders participating in the increase, and the approval of the Administrative Agent.

As of September 30, 2022, there were no amounts drawn on the Revolving Credit Facility and less than \$1 million in letters of credit were issued under the Credit Agreement. Letters of credit issued under the Credit Agreement reduce availability under the Revolving Credit Facility. No amounts were drawn on the Revolving Credit Facility during the nine months ended September 30, 2022.

Loans under the Credit Agreement bear interest, at Aptiv's option, at either (a) the Administrative Agent's Alternate Base Rate ("ABR" as defined in the Credit Agreement) or (b) the London Interbank Offered Rate (the "Adjusted LIBO Rate" as defined in the Credit Agreement) ("LIBOR") plus in either case a percentage per annum as set forth in the table below (the "Applicable Rate"). The June 2021 amendment also contains provisions to facilitate the replacement of the LIBOR-based rate with a Secured Overnight Financing Rate ("SOFR") based rate upon the discontinuation or unavailability of LIBOR. The Applicable Rates under the Credit Agreement on the specified dates are set forth below:

	September 30, 2022		December 31, 2021	
	LIBOR plus	ABR plus	LIBOR plus	ABR plus
Revolving Credit Facility	1.06 %	0.06 %	1.10 %	0.10 %
Tranche A Term Loan	1.105 %	0.105 %	1.125 %	0.125 %

Under the June 2021 amendment, the Applicable Rate under the Credit Agreement, as well as the facility fee, may increase or decrease from time to time based on changes in the Company's credit ratings and whether the Company achieves or fails to achieve certain sustainability-linked targets with respect to greenhouse gas emissions and workplace safety. Such adjustments may be up to 0.04% per annum on interest rate margins on the Revolving Credit Facility, 0.02% per annum on interest rate margins on the Tranche A Term Loan and 0.01% per annum on the facility fee. Accordingly, the interest rate is subject to fluctuation during the term of the Credit Agreement based on changes in the ABR, LIBOR, changes in the Company's corporate credit ratings or whether the Company achieves or fails to achieve its sustainability-linked targets. The Credit Agreement also requires that Aptiv pay certain facility fees on the Revolving Credit Facility, which are also subject to adjustment based on the sustainability-linked targets as described above, and certain letter of credit issuance and fronting fees. As a result of meeting the sustainability-linked targets for the 2021 calendar year, the interest rate margins and facility fees were reduced by the amounts specified above, effective in the third quarter of 2022.

The interest rate period with respect to LIBOR interest rate options can be set at one-, three-, or six-months as selected by Aptiv in accordance with the terms of the Credit Agreement (or other period as may be agreed by the applicable lenders). Aptiv may elect to change the selected interest rate option in accordance with the provisions of the Credit Agreement. As of September 30, 2022, Aptiv selected the one-month LIBOR interest rate option on the Tranche A Term Loan, and the rates effective as of September 30, 2022, as detailed in the table below, were based on the Company's current credit rating and the Applicable Rate for the Credit Agreement:

	Applicable Rate	Borrowings as of September 30, 2022 (in millions)	Rates effective as of September 30, 2022
	LIBOR plus 1.105%	\$	
Tranche A Term Loan		311	4.23 %

Borrowings under the Credit Agreement are prepayable at Aptiv's option without premium or penalty.

The Credit Agreement contains certain covenants that limit, among other things, the Company's (and the Company's subsidiaries') ability to incur certain additional indebtedness or liens or to dispose of substantially all of its assets. In addition, under the June 2021 amendment, the Credit Agreement requires that the Company maintain a consolidated leverage ratio (the ratio of Consolidated Total Indebtedness to Consolidated EBITDA, each as defined in the Credit Agreement) of not more than 3.5 to 1.0 (or 4.0 to 1.0 for four full fiscal quarters following completion of material acquisitions, as defined in the Credit Agreement). The Credit Agreement also contains events of default customary for financings of this type. The Company was in compliance with the Credit Agreement covenants as of September 30, 2022.

As of September 30, 2022, all obligations under the Credit Agreement were borrowed by Aptiv Corporation and jointly and severally guaranteed by AGFL and Aptiv PLC, subject to certain exceptions set forth in the Credit Agreement.

Senior Unsecured Notes

As of September 30, 2022, the Company had the following senior unsecured notes issued and outstanding:

Aggregate Principal Amount (in millions)	Stated Coupon Rate	Issuance Date	Maturity Date	Interest Payment Date
\$ 700	2.396%	February 2022	February 2025	February 18 and August 18
681	1.50%	March 2015	March 2025	March 10
486	1.60%	September 2016	September 2028	September 15
300	4.35%	March 2019	March 2029	March 15 and September 15
800	3.25%	February 2022	March 2032	March 1 and September 1
300	4.40%	September 2016	October 2046	April 1 and October 1
350	5.40%	March 2019	March 2049	March 15 and September 15
1,500	3.10%	November 2021	December 2051	June 1 and December 1
1,000	4.15%	February 2022	May 2052	May 1 and November 1

Although the specific terms of each indenture governing each series of senior notes vary, the indentures contain certain restrictive covenants, including with respect to Aptiv's (and Aptiv's subsidiaries') ability to incur liens, enter into sale and leaseback transactions and merge with or into other entities. As of September 30, 2022, the Company was in compliance with the provisions of all series of the outstanding senior notes. Refer to Note 8. Debt to the consolidated financial statements contained herein for additional information.

Guarantor Summarized Financial Information

As further described in Note 8. Debt to the consolidated financial statements contained herein, Aptiv PLC, Aptiv Corporation and AGFL are each potential borrowers under the Credit Agreement, under which such borrowings would be guaranteed by each of the other two entities. Aptiv PLC issued the 2015 Euro-denominated Senior Notes, 2016 Euro-denominated Senior Notes, 2016 Senior Notes, 2019 Senior Notes and 2021 Senior Notes. In February 2022, Aptiv Corporation and AGFL were added as guarantors on each series of outstanding senior notes previously issued by Aptiv PLC. AGFL was added as a joint and several co-issuer of the 2021 Senior Notes in December 2021, effective as of the date of issuance. Aptiv PLC and Aptiv Corporation jointly issued the 2022 Senior Notes, which are guaranteed by AGFL. Together, Aptiv PLC, Aptiv Corporation and AGFL comprise the "Obligor Group." All other consolidated direct and indirect subsidiaries of Aptiv PLC are not subject to any guarantee under any series of notes outstanding (the "Non-Guarantors"). The guarantees rank equally in right of payment with all of the guarantors' existing and future senior indebtedness, are effectively subordinated to any of their existing and future secured indebtedness to the extent of the value of the collateral securing such indebtedness and are structurally subordinated to the indebtedness of each of their existing and future subsidiaries that is not a guarantor.

The below summarized financial information is presented on a combined basis after the elimination of intercompany balances and transactions among the Obligor Group and equity in earnings from and investments in the Non-Guarantors. The below summarized financial information should be read in conjunction with the Company's consolidated financial statements contained herein, as the financial information may not necessarily be indicative of results of operations or financial position had the subsidiaries operated as independent entities.

The historical presentation of the summarized financial information has been revised to be consistent with the presentation of the entities that comprise the structure of the Obligor Group as of September 30, 2022.

Nine Months Ended September 30, 2022	Obligor Group	
	(in millions)	
Net sales	\$	—
Gross margin	\$	—
Operating loss	\$	(50)

- (1) Includes current assets of \$3,983 million and \$4,136 million due from Non-Guarantors as of September 30, 2022 and December 31, 2021, respectively, which includes amounts due from affiliates of \$1 million and \$5 million, respectively.
- (2) Includes long-term assets of \$53 million due from Non-Guarantors as of September 30, 2022.
- (3) Includes current liabilities of \$6,029 million and \$6,530 million, and long-term liabilities of \$226 million and \$226 million, due to Non-Guarantors as of September 30, 2022 and December 31, 2021, respectively.

Other Financing

Receivable factoring—Aptiv maintains a €450 million European accounts receivable factoring facility that is available on a committed basis and allows for factoring of receivables denominated in both Euros and U.S. dollars (“USD”). This facility is accounted for as short-term debt and borrowings are subject to the availability of eligible accounts receivable. Collateral is not required related to these trade accounts receivable. This facility became effective on January 1, 2021 and has a term of three years, subject to Aptiv’s right to terminate at any time with three months’ notice. After expiration of the three-year term, either party can terminate with three months’ notice. Borrowings denominated in Euros under the facility bear interest at the three-month Euro Interbank Offered Rate (“EURIBOR”) plus 0.50% and USD borrowings bear interest at two-month LIBOR plus 0.50%, with borrowings under either denomination carrying a minimum interest rate of 0.20%. As of September 30, 2022 and December 31, 2021, Aptiv had no amounts drawn on the European accounts receivable factoring facility. No amounts were drawn under the European accounts receivable factoring facility during the nine months ended September 30, 2022.

Finance leases and other—As of September 30, 2022 and December 31, 2021, approximately \$15 million and \$14 million, respectively, of other debt primarily issued by certain non-U.S. subsidiaries and finance lease obligations were outstanding.

Letter of credit facilities—In addition to the letters of credit issued under the Credit Agreement, Aptiv had approximately \$3 million and \$3 million outstanding through other letter of credit facilities as of September 30, 2022 and December 31, 2021, respectively, primarily to support arrangements and other obligations at certain of its subsidiaries.

Cash Flows

Intra-month cash flow cycles vary by region, but in general we are users of cash through the first half of the month and we generate cash during the latter half of the month. Due to this cycle of cash flows, we may utilize short-term financing, including our Revolving Credit Facility and European accounts receivable factoring facility, to manage our intra-month working capital needs. Our cash balance typically peaks at month end.

We utilize a combination of strategies, including dividends, cash pooling arrangements, intercompany loan structures and other distributions and advances, to provide the funds necessary to meet our global liquidity needs. We utilize a global cash

pooling arrangement to consolidate and manage our global cash balances, which enables us to efficiently move cash into and out of a number of the countries in which we operate.

Operating activities—Net cash provided by operating activities totaled \$330 million for the nine months ended September 30, 2022, as compared to \$553 million for the nine months ended September 30, 2021. Cash flows provided by operating activities for the nine months ended September 30, 2022 consisted primarily of net earnings of \$324 million, increased by \$599 million for non-cash charges for depreciation, amortization and pension costs, offset by \$918 million related to changes in operating assets and liabilities, net of restructuring and pension contributions. Cash flows provided by operating activities for the nine months ended September 30, 2021 consisted primarily of net earnings of \$570 million, increased by \$617 million for non-cash charges for depreciation, amortization and pension costs, partially offset by \$866 million related to changes in operating assets and liabilities, net of restructuring and pension contributions.

Investing activities—Net cash used in investing activities totaled \$913 million for the nine months ended September 30, 2022, as compared to \$470 million for the nine months ended September 30, 2021. The increase in usage is primarily attributable to increased capital expenditures of \$236 million and \$220 million paid for business acquisitions and other transactions during the nine months ended September 30, 2022 as compared to the nine months ended September 30, 2021.

Financing activities—Net cash provided by financing activities totaled \$2,376 million for the nine months ended September 30, 2022 and net cash used in financing activities totaled \$128 million for the nine months ended September 30, 2021. Cash flows provided by financing activities for the nine months ended September 30, 2022 primarily included net proceeds of \$2,472 million received from the issuance of the 2022 Senior Notes, partially offset by \$47 million of MCPS dividend payments. Cash flows used in financing activities for the nine months ended September 30, 2021 primarily included \$47 million of MCPS dividend payments and \$30 million in repayments under debt agreements.

Off-Balance Sheet Arrangements

We do not engage in any off-balance sheet financial arrangements that have or are reasonably likely to have a material current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

Contingencies and Environmental Matters

The information concerning contingencies, including environmental contingencies and the amount currently held in reserve for environmental matters, contained in Note 10. Commitments and Contingencies to the unaudited consolidated financial statements included in Part I, Item 1 of this report is incorporated herein by reference.

Recently Issued Accounting Pronouncements

The information concerning recently issued accounting pronouncements contained in Note 2. Significant Accounting Policies to the unaudited consolidated financial statements included in Part I, Item 1 of this report is incorporated herein by reference.

Critical Accounting Estimates

There have been no significant changes in our critical accounting estimates during the three and nine months ended September 30, 2022.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no material changes to the information concerning our exposures to market risk as stated in the Company's Annual Report on Form 10-K for the year ended December 31, 2021. As described in the Form 10-K, we have currency exposures related to buying, selling and financing in currencies other than the local functional currencies in which we operate ("transactional exposure"). We also have currency exposures related to the translation of the financial statements of our non-U.S. subsidiaries that use the local currency as their functional currency into U.S. dollars, the Company's reporting currency ("translational exposure"). As described in Note 14. Derivatives and Hedging Activities to the unaudited consolidated financial statements included in Part I, Item 1 of this report, to manage this risk the Company designates certain qualifying instruments as net investment hedges of certain non-U.S. subsidiaries. The effective portion of the gains or losses on instruments designated as net investment hedges are recognized within the cumulative translation adjustment component of OCI to offset changes in the value of the net investment in these foreign currency-denominated operations.

ITEM 4. CONTROLS AND PROCEDURES

A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected.

Disclosure Controls and Procedures

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) under the U.S. Securities Exchange Act of 1934, as amended (the “Exchange Act”). The Company maintains disclosure controls and procedures that are designed to provide reasonable assurance of achieving their objectives.

As of September 30, 2022, the Company’s management, with the participation of the Chief Executive Officer and the Chief Financial Officer, has evaluated, for disclosure purposes, the effectiveness of the Company’s disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that the Company’s disclosure controls and procedures were effective to provide reasonable assurance that the desired control objectives were achieved as of September 30, 2022.

Changes in Internal Control over Financial Reporting

There were no material changes in the Company’s internal controls over financial reporting during the three and nine months ended September 30, 2022 that have materially affected, or are reasonably likely to materially affect, the Company’s internal controls over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are from time to time subject to various actions, claims, suits, government investigations, and other proceedings incidental to our business, including those arising out of alleged defects, breach of contracts, competition and antitrust matters, product warranties, intellectual property matters, personal injury claims and employment-related matters. For a description of risks related to various legal proceedings and claims, see Item 1A, “Risk Factors,” in our Annual Report on Form 10-K for the year ended December 31, 2021. For a description of our outstanding material legal proceedings, see Note 10. Commitments and Contingencies to the unaudited consolidated financial statements included in this report.

ITEM 1A. RISK FACTORS

Other than as described in the Company's Form 10-Q for the quarter ended March 31, 2022, there have been no material changes to the risk factors described in Part I, “Item 1A. Risk Factors” in the Company’s Annual Report on Form 10-K for the year ended December 31, 2021.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

There were no repurchases of equity securities during the three months ended September 30, 2022. In January 2019, the Board of Directors authorized a share repurchase program of up to \$2.0 billion. This program will commence following the completion of the previously announced share repurchase program of \$1.5 billion, which was approved by the Board of Directors in April 2016. As of September 30, 2022, approximately \$2,013 million remained available for repurchases pursuant to these programs.

ITEM 6. EXHIBITS

<u>Exhibit Number</u>	<u>Description</u>

CERTIFICATIONS**Certification of Principal Executive Officer**

I, Kevin P. Clark, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Aptiv PLC;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
