J.P. Morgan Auto Conference

Kevin Clark

President and Chief Executive Officer

DELPHI

Innovation for the Real World

Forward-looking statements

This presentation, as well as other statements made by Delphi Automotive PLC (the “Company”), contain forward-looking statements that reflect, when made, the Company’s current views with respect to current events, certain investments and acquisitions and financial performance. Such forward-looking statements are subject to many risks, uncertainties and factors relating to the Company’s operations and business environment, which may cause the actual results of the Company to be materially different from any future results. All statements that address future operating, financial or business performance or the Company’s strategies or expectations are forward-looking statements. Factors that could cause actual results to differ materially from these forward-looking statements are discussed under the captions “Risk Factors” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in the Company’s filings with the Securities and Exchange Commission. New risks and uncertainties arise from time to time, and it is impossible for us to predict these events or how they may affect the Company. It should be remembered that the price of the ordinary shares and any income from them can go down as well as up. The Company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events and/or otherwise, except as may be required by law.

Strategic imperatives remain unchanged

Disciplined revenue growth

- Enhance portfolio of market relevant products
- Continue rotation to high-growth products and regions
- Further diversify customer base and platform mix

Margin expansion

- Continue footprint rotation to best cost countries
- Further integrate EOS across the enterprise
- Increase leverage in operating model

Increased cash flow

- Maintain investment grade ratings
- Increase investment in organic and acquisition growth
- Continue to return cash to shareholders

Increase shareholder value

Safe, Green and Connected technologies driving growth

Demand for
active safety features

Creating a
cleaner planet

Demand for increased
connectivity

Automated
driving

Regulations for
increased fuel economy

Seamless smartphone
integration

Providing solutions to our customers' challenges

Actively managing our product portfolio

Investing in technologies that maximize profitable growth

Strengthening our technology portfolio

Acquisitions that increase shareholder value

Strong performance post acquisition

	Acquisition date	2015 revenue growth	2015 EBITDA margins	Explanation
	Q4 2012	~6%	+20%	EBITDA margins significantly over plan Synergies in excess of plan
	Q4 2014	~40%	+20%	Bookings ahead of plan Revenue growth well over plan Synergies in excess of plan
	Q4 2014	~6%	+20%	Bookings ahead of plan Synergies in excess of plan

Delivering incremental value through seamless integration

Strengthening our technology portfolio

Increasing focus on high-growth, high-margin products

Realigning product portfolio

Portfolio actions

- Divested Thermal business
 - 2010 – 2014 revenue growth¹ of 1%
 - Transaction value of \$727M (9.5x EBITDA)
- Divested Reception Systems product line
 - 2010 – 2014 revenue growth¹ of (6%)
 - Transaction value of \$70M (6.5x EBITDA)

Areas of acquisition focus

Strategic

- Strengthen product portfolio
- Diversify customer and regional mix

Operating

- Solid operating systems
- Strong management team and cultural fit
- High confidence integration plan

Financial

- Enhance growth and return profile
- Accretive to earnings and return profile

Proceeds reinvested into high-growth, high-margin acquisitions

Strengthening our technology portfolio

Investments and acquisitions that increase shareholder value

Government regulations becoming more stringent

Miles per gallon

Grams of CO₂ per kilometer

Technology solutions will solve these challenges

Tula minority investment

Dynamic skip fire improves fuel economy

Strategic benefits

Next generation cylinder deactivation software

Technology improves fuel efficiency and reduces emissions

Helps achieve government regulations

High value, low cost technology

Broad applicability across engine sizes and types

Enhances performance of Valvetrain portfolio

DELPHI

Vehicles are becoming more complex

Increasing vehicle software creates content opportunity

Quanergy minority investment

Strategic benefits

Leader in 3D sensing

Provides high precision data in real world conditions

Developing affordable LiDAR sensors

State-of-the art solid state chipset

Enables advanced autonomous driving functionality

Developing smart sensing solutions

Enhancing active safety capabilities

Ottomatika acquisition

Strategic benefits

Industry-leading vehicle decision making software

First mover in technology development

Spin-out of Carnegie Mellon University

Modular and scalable solutions

Sensor fusion for current and next-gen hardware

Partnership on coast-to-coast automated drive

Strengthening competitive position in autonomous driving

Increasing electrical architecture content

Cable Management Systems

Cable/Wiring

2.5 miles

1.5 miles

**+67%
increase**

Connectors

350

280

**+25%
connectors**

**Enables
content growth**

Digital Data

Up to 1.5
gigabit/sec

65 megabit/sec

**+2,200%
increase**

Electrification

Up to 600 V

12 V

**+50x
voltage**

**Requires architecture
content**

Electrical architecture is the foundation for vehicle content growth

HellermannTyton business overview

Financial profile

(€ millions)	2015 consensus sales	€679
	% growth	~14%
	Historical EBITDA margins	~20%
	Run-rate synergies	\$50+ million
	Employees	~4,000
	Manufacturing facilities	12

2014 segment revenue mix

Track record of growth

2014 regional revenue mix

Sustainable growth and margin profile

Strengthens our existing cable management portfolio

Protection & fixings

- Application tools to assist with cable management systems

Network connectivity

- Structured communication cabling systems

Identification

- Printing systems and software

Installer solutions

- Test instruments and tools

Highly engineered product with a high cost of failure

HellermannTyton's products in action

Case study 1: Off-highway vehicles in North America

- Worked with North American OEM to reduce vehicle weight and increase fuel economy
- 86% weight reduction per piece by using HellermannTyton products

Case study 2: Aerospace OEM weight reduction

- Worked with airplane OEM to redesign harness brackets resulting in a 60% weight reduction per piece and better performance
- Advanced material technology to contribute to light-weight design

Case study 3: Vehicle platforms increasing content

- Worked with European OEM to design improved harness routing for new global platform
- Parts content increased ~200% on new platform with European production followed by global roll out

Products are engineered-in to OEM designs

Why Delphi will outperform

Well positioned in a transformed and growing industry

Global scale

Industry-leading cost structure

Strong margin expansion and cash flow generation

Balanced and disciplined capital allocation

Industry-leading shareholder returns

An aerial photograph of a city skyline, likely New York City, viewed from a high angle. The image is overlaid with a semi-transparent blue filter. A network of thin, white lines is superimposed over the city, connecting various points across the skyline, suggesting a global or interconnected network. The sky is a gradient of blue, with some wispy clouds visible.

The future. Now.
