Citi Car of the Future

Glen De Vos

Vice President, Global Advanced and Product Engineering

DELPHI

Innovation for the Real World

Forward-looking statements

This presentation, as well as other statements made by Delphi Automotive PLC (the “Company”), contain forward-looking statements that reflect, when made, the Company’s current views with respect to current events and financial performance. Such forward-looking statements are subject to many risks, uncertainties and factors relating to the Company’s operations and business environment, which may cause the actual results of the Company to be materially different from any future results. All statements that address future operating, financial or business performance or the Company’s strategies or expectations are forward-looking statements. Factors that could cause actual results to differ materially from these forward-looking statements are discussed under the captions “Risk Factors” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in the Company’s filings with the Securities and Exchange Commission. New risks and uncertainties arise from time to time, and it is impossible for us to predict these events or how they may affect the Company. It should be remembered that the price of the ordinary shares and any income from them can go down as well as up. The Company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events and/or otherwise, except as may be required by law.

Why we're the leader

Strategic partnerships

- Strategic partnerships with over 30 leading technology companies
- Relationships provide accessibility to various software and applications
- Delphi Technology Advisory Council to promote intuitive innovation

Global resource

- Mature global footprint with significant presence in best cost countries
- 5,000+ engineers dedicated to software, system and calibration development
- Engineering development centers strategically located: Silicon Valley

Innovative solutions

- Fast to market with advanced technology and flawless execution
- Regulatory compliant technologies meet customer requirements
- Software and vehicle integration expertise

Global capability drives competitive advantage

Reinventing the road trip

Automated drive highlights

~3,400 miles traveled

~99% of trip fully automated

9 days, 15 states

20 sensors

~3 terabytes of data collected

Arriving in New York City

Setting records and breaking boundaries

Automated driving video

What we learned...

Next steps

- Further develop cameras to detect diverse lane markings
- Improve camera performance in bright sunlight and harsh weather conditions
- Driving behavior optimization for a more natural feel
- Democratization of Automated Driving features for production programs

Radar worked well in all conditions

Further improving the technology of the future

Automated driving offering cross mega-trend benefits

Safe

Potential to significantly reduce accidents due to driver distraction

Green

Improves fuel economy by up to 8% and reduces CO₂ emissions

Connected

V2V & V2I connectivity decreases traffic congestion

Enabling intelligent driving

Delphi technologies enable a range of protection

Increased safety awareness driving market growth

■ Passive ■ Active ■ Active – regulated and incentivized

Product portfolio

Integrated technology advances Active Safety value proposition

Regulations drive fuel economy solutions

Regulatory trends driving growth

Maximizing Delphi content

Fleet CAFE must improve 75% in the next 10 years: 30.8* to 54.5 mpg

Creating the next generation of Infotainment

2010

Connected
navigation

2013

Reconfigurable
cluster & displays

Today

Connected
Infotainment

Tomorrow

Eye gaze tracking &
gesture control

World-class user experience converges with Active Safety

DELPHI

Convergence requires system integration

Delphi expertise enables a world-class user experience

Multi-Domain Controller maximizes computing power

Multi-Domain Controller

- + Scalable software platform
- + Reduced architecture complexity
 - + Faster communication
 - + Capacity to future proof

First launch in 2016

Centralized vehicle intelligence

Enables vehicle architecture of the future

Increasing content per vehicle

+\$2,000 - \$2,500 CPV when moving to a fully autonomous vehicle

Award-winning innovation

Delphi tops the list of all companies with 56 PACE finalists and awards*

Proud recipient of an industry-leading 17 PACE awards

DELPHI

Why we're the leader

Strategic partnerships with over 30 leading technology companies

5,000+ engineers dedicated to software, system and calibration development

Engineering development centers strategically located: Silicon Valley

Fast to market with advanced technology and flawless execution

Software and vehicle integration expertise
