ADAS ROUNDTABLE DISCUSSION

• APTIV •

Forward Looking Statements

This presentation, as well as other statements made by Aptiv PLC (the “Company”), contain forward-looking statements that reflect, when made, the Company’s current views with respect to current events, certain investments and acquisitions and financial performance. Such forward-looking statements are subject to many risks, uncertainties and factors relating to the Company’s operations and business environment, which may cause the actual results of the Company to be materially different from any future results. All statements that address future operating, financial or business performance or the Company’s strategies or expectations are forward-looking statements. Factors that could cause actual results to differ materially from these forward-looking statements include, but are not limited to, the following: global and regional economic conditions, including conditions affecting the credit market; global inflationary pressures; uncertainties posed by the COVID-19 pandemic and the difficulty in predicting its future course and its impact on the global economy and the Company’s future operations; uncertainties created by the conflict between Ukraine and Russia, and its impacts to the European and global economies and our operations in each country; fluctuations in interest rates and foreign currency exchange rates; the cyclical nature of global automotive sales and production; the potential disruptions in the supply of and changes in the competitive environment for raw material and other components integral to the Company’s products, including the ongoing semiconductor supply shortage; the Company’s ability to maintain contracts that are critical to its operations; potential changes to beneficial free trade laws and regulations, such as the United States-Mexico-Canada Agreement; changes to tax laws; the ability of the Company to integrate and realize the expected benefits of recent transactions; the ability of the Company to attract, motivate and/or retain key executives; the ability of the Company to avoid or continue to operate during a strike, or partial work stoppage or slow down by any of its unionized employees or those of its principal customers; and the ability of the Company to attract and retain customers. Additional factors are discussed under the captions “Risk Factors” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in the Company’s filings with the Securities and Exchange Commission. New risks and uncertainties arise from time to time, and it is impossible for us to predict these events or how they may affect the Company. It should be remembered that the price of the ordinary shares and any income from them can go down as well as up. The Company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events and/or otherwise, except as may be required by law.

Aptiv ADAS Overview

OVER 30 YEARS OF EXPERIENCE PROVIDING INCREASINGLY COMPLEX END-TO-END ADAS SOLUTIONS

LONG HISTORY OF PIONEERING
ADAS TECHNOLOGY...

...POSITIONS APTIV AS A
CLEAR MARKET LEADER

**Financials reflect guidance, as of Q2 2024 Earnings*

ADAS Market Trends

MARKET EXPECTED TO REACH \$45B BY 2030 – DRIVEN BY INCREASED L2 AND ABOVE PENETRATION

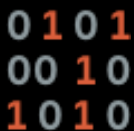

PENETRATION ACCELERATING

~50% of global auto market to be equipped with level 2 and above by 2030; up 17pts / \$10B+ TAM versus prior view¹

MASS DEMOCRATIZATION

Market upside driven by consumer demand, and government regulations

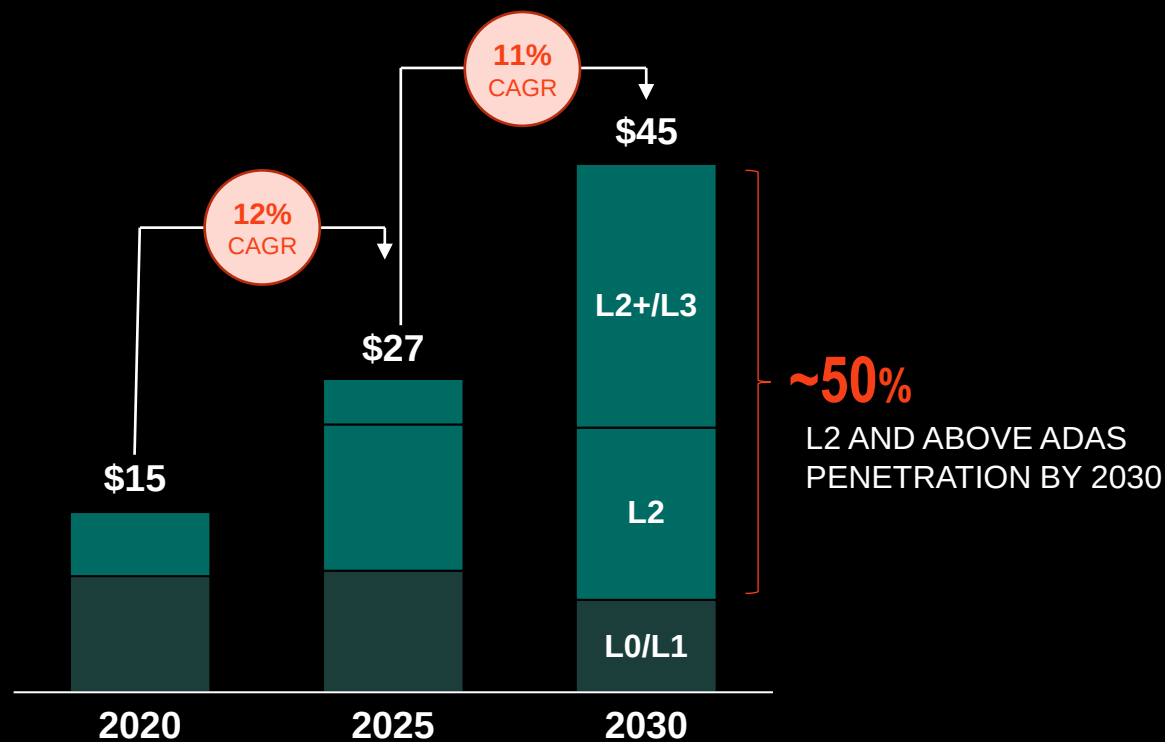

INCREASING SOFTWARE REQUIREMENTS

ADAS software market expected to grow at a 15% CAGR to ~\$9B by 2030

1. ADAS penetration as of 2023 Aptiv Investor Day (February 14, 2023)
2. Aptiv internal estimates

TOTAL ADDRESSABLE MARKET² (Billions)

Industry Challenges To Support Next Gen ADAS

BETTER PERFORMANCE AT A LOWER COST, WHILE SUPPORTING VARIOUS STRATEGIES AND CAPABILITIES

BETTER PERFORMANCE

- Highest possible system availability: geographies, road types, environmental conditions
- Robust “human-like” performance: safe, predictable, accurate, limited disengagements
- Continuous enhancement: leveraging data and OTA to support new / refined features

LOWER COST

- Scalability: easy-to-deploy ADAS system across the widest possible vehicle lineup
- Components: optimized hardware and software with sourcing flexibility
- Minimized development cost: testing / validation, deployment, updates and enhancements

STRATEGIC FLEXIBILITY

- Make / buy: flexibility to develop portions of the SW stack aligned to strategy / capabilities
- Avoid vendor lock-in: sourcing flexibility for localization, cost and ecosystem considerations
- Brand identity: tune features consumers use every day to match driving characteristics

Aptiv's Approach Uniquely Addresses OEM Needs

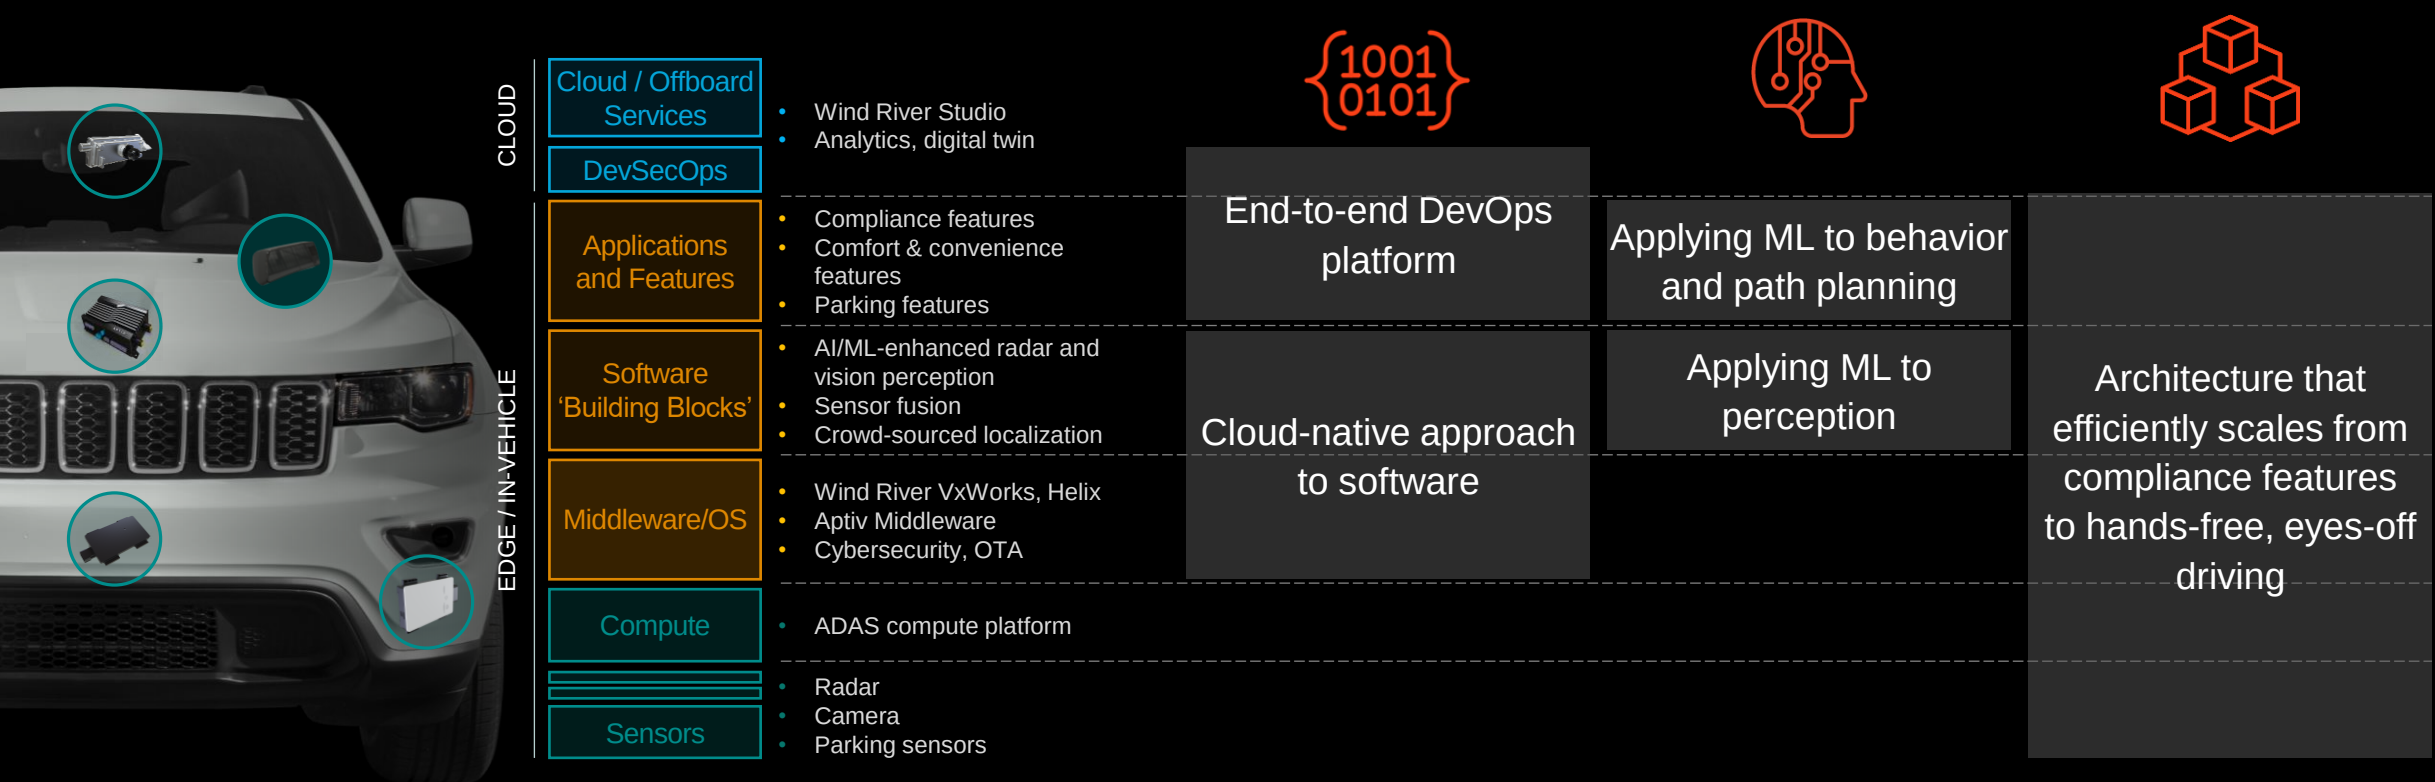

MODERN, SCALABLE APPROACH TO TECH STACK ADDRESSING OEM NEEDS TODAY AND IN THE FUTURE

OPTIMIZED, FULL--SYSTEM SOFTWARE
AND HARDWARE SOLUTIONS

MODERN SOFTWARE
ARCHITECTURE

OPTIMIZED AI/ML
DEPLOYMENT

SCALABLE, MODULAR
APPROACH

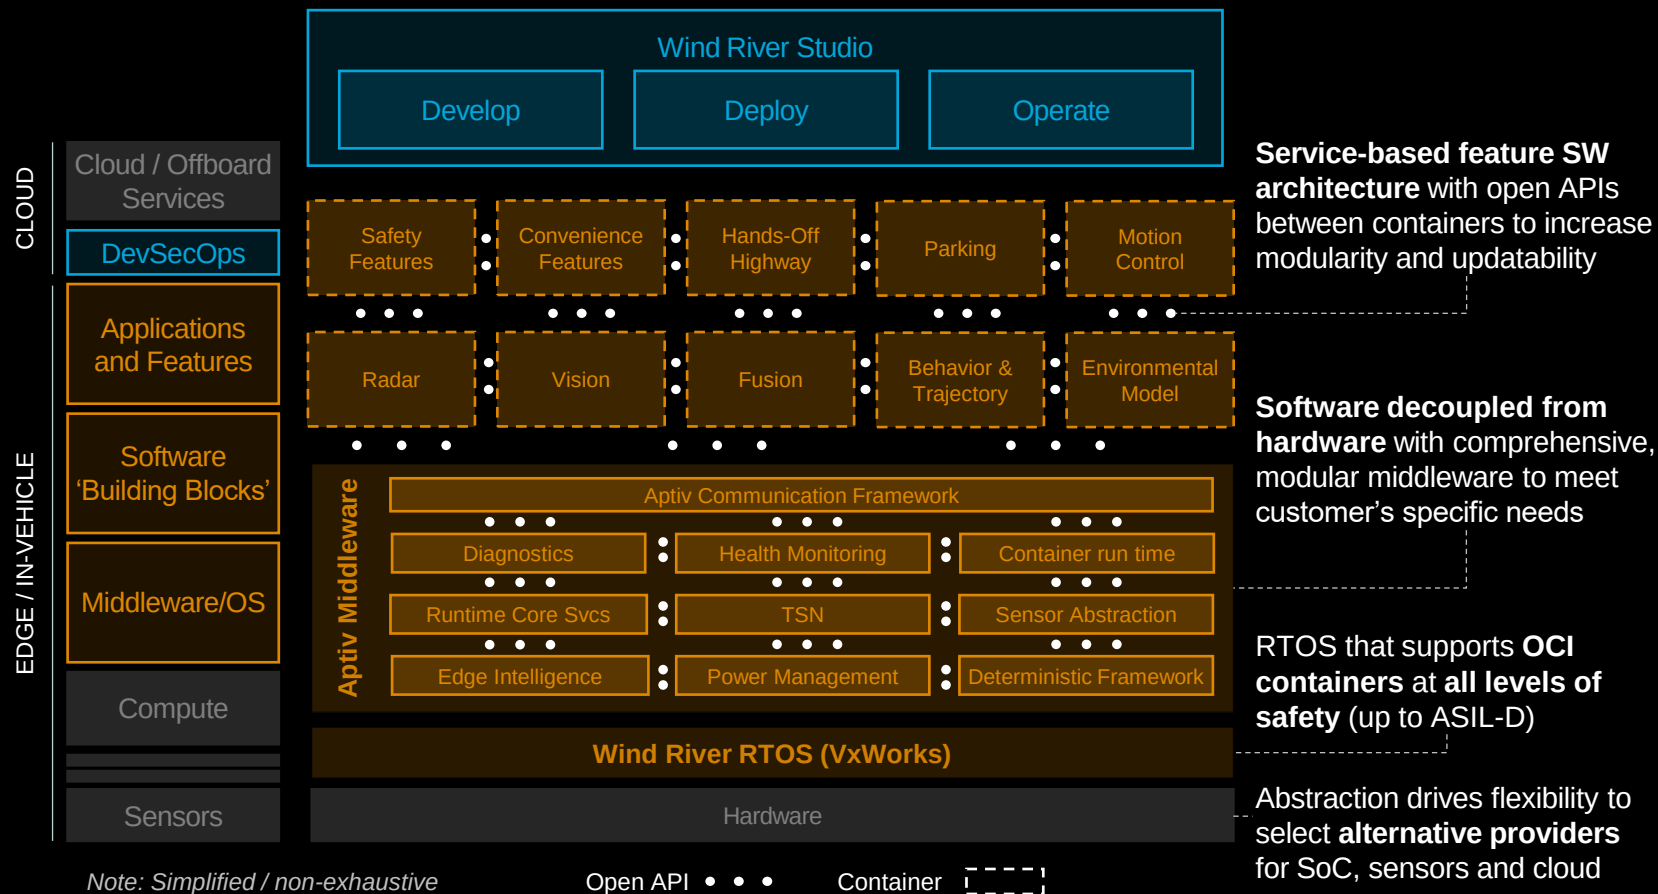

Note: Simplified / non-exhaustive

Modern Software Architecture

ENHANCING FEATURE UPDATABILITY WITH A SERVICE-BASED ARCHITECTURE

Benefits

BETTER PERFORMANCE

- More frequent feature updatability and refinement over lifecycle

LOWER COST

- Faster development
- Lower cost and warranty for porting, OTA updates and enhancements

STRATEGIC FLEXIBILITY

- Ability to select alternative SoC, sensor and cloud providers
- Option for internal tech development

Optimized AI/ML Deployment

INDUSTRY-LEADING CAPABILITIES AND EXPERIENCE IN PERCEPTION, SENSOR FUSION, AND AI/ML

CLOUD

Cloud / Offboard
Services

DevSecOps

Applications
and Features

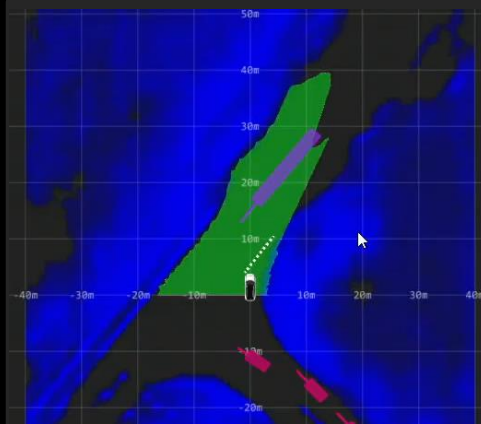

Software
'Building Blocks'

Middleware/OS

Compute

Sensors

EDGE / IN-VEHICLE

Enhancing radar & sensor fusion performance

- Better detection: >10x lower object miss rate in urban scenarios / corner cases
- > 50% improvement in object size determination and position estimation
- Enabling vulnerable road user classification with 90%+ identification rate vs. 60% (classical)
- More accurate and earlier detection of stationary vehicles / objects

AI/ML enhancing behavior and path planning

- Enables context-aware, humanistic driving
- Enhances driving with situations such as tight curves, ramps, and roads without lane markers
- Capable of leveraging multiple sensor inputs

Benefits

BETTER PERFORMANCE

- More robust perception performance resulting in higher system availability
- More “human-like” and context-aware driving behavior

LOWER COST

- Optimized sensor hardware
- Optimized, serverized compute with lower data processing requirements

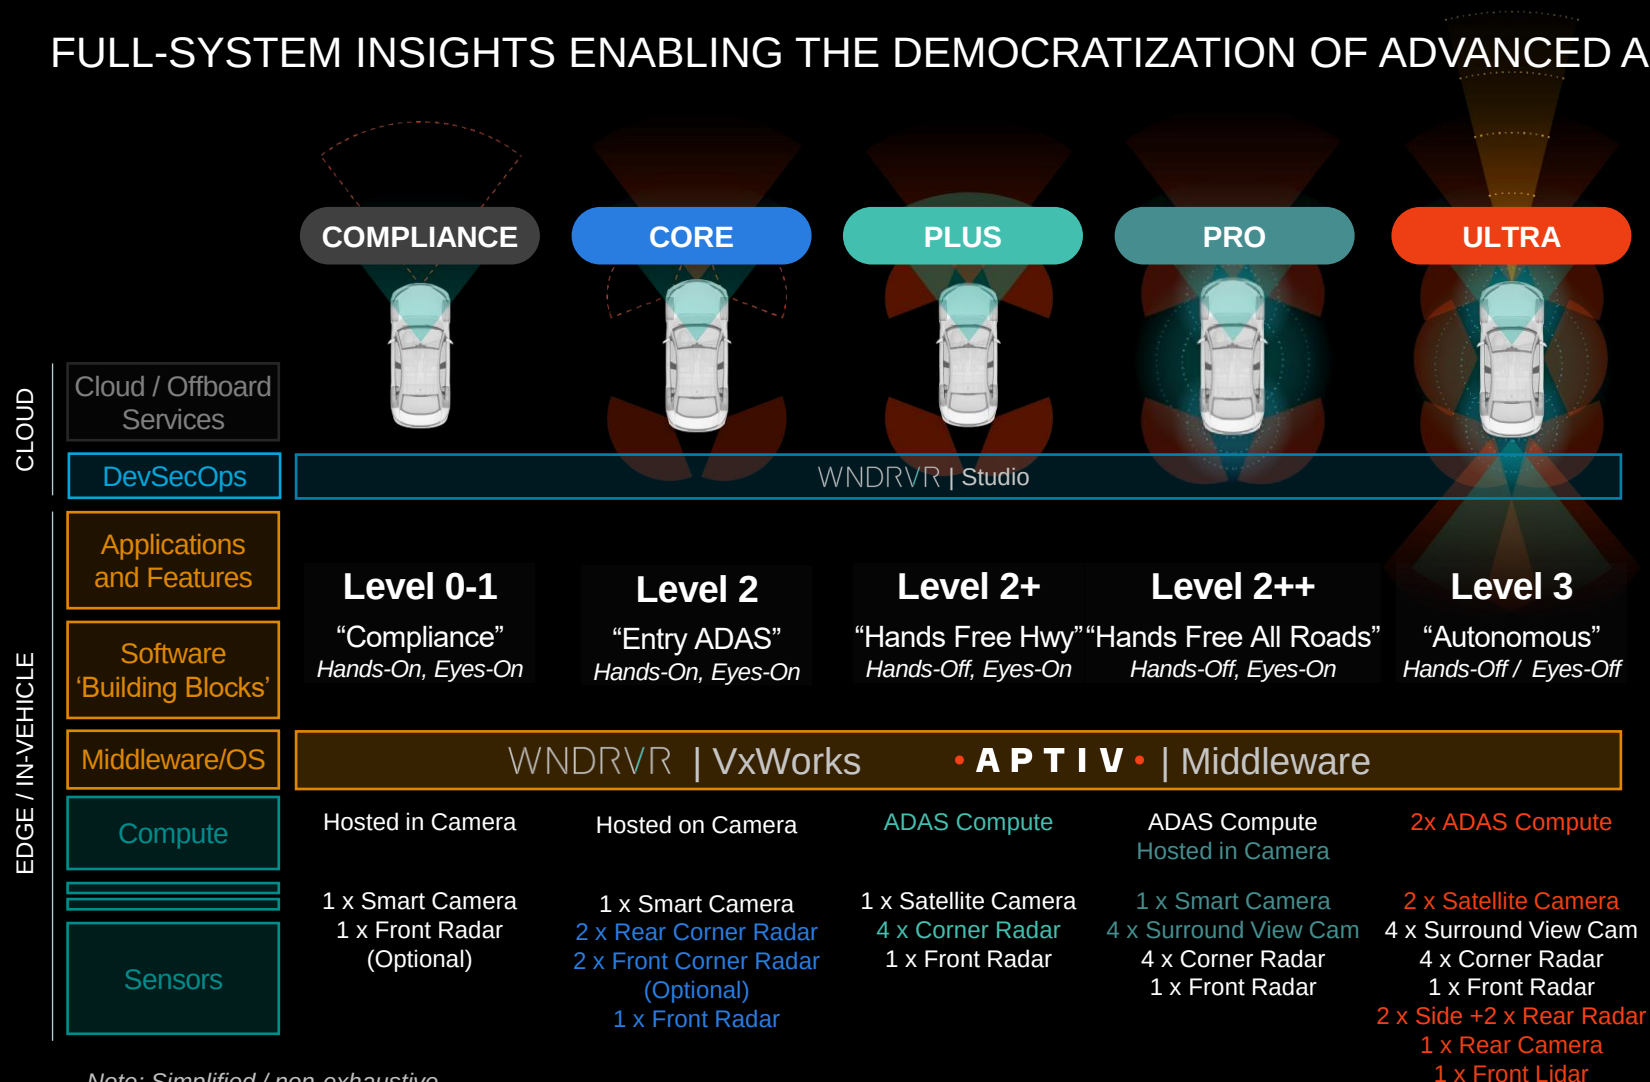

STRATEGIC FLEXIBILITY

- Vision provider flexibility
- Decoupling sensors from SoC

Scalable, Modular Approach

FULL-SYSTEM INSIGHTS ENABLING THE DEMOCRATIZATION OF ADVANCED ADAS SOLUTIONS

Benefits

BETTER PERFORMANCE

- More mature products due to increased testing and validation across levels

LOWER COST

- Maximized re-use across platforms / nameplates reduces development, testing and validation costs
- Improved quality / lower update cost

STRATEGIC FLEXIBILITY

- Ability to optimally match ADAS config specific brand / model / trim

Note: Simplified / non-exhaustive

ADAS Market in China

CHINA LEADING IN ADOPTION OF ADVANCED ACTIVE SAFETY SOLUTIONS

CONSUMERS DEMANDING INNOVATION

- Growing consumer awareness of road safety issues
- Tech-savvy younger consumer focus on hands-free features

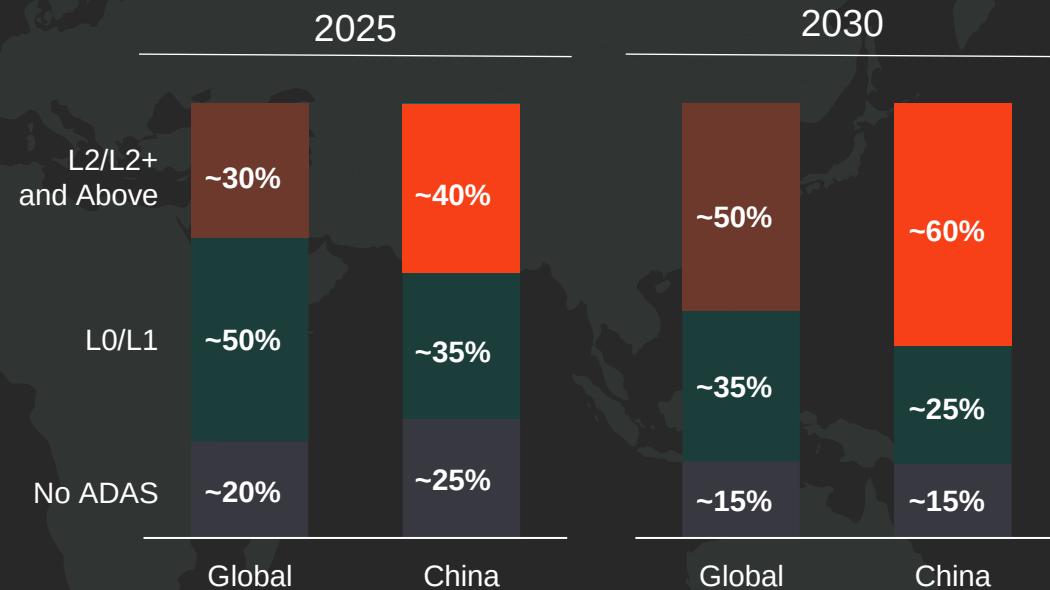

OEMS DIFFERENTIATING WITH ADAS

- OEMs leveraging ADAS to win market share
- Adoption of ADAS technologies increasing OEM brand awareness

STRONG GOVERNMENT SUPPORT

- Government actively promoting ADAS technologies (8 robotaxi pilot cities; ~7,700 testing licenses issued)
- Smart City ambition driving development of V2X communication systems and vehicle-road-cloud integration

CHINA LEADING ADOPTION OF PREMIUM ADAS

Delivering Advanced ADAS For Chinese OEMs

LOCALIZED, TAILORED SOLUTIONS AND GO-TO-MARKET TO SUPPORT RAPIDLY EVOLVING CHINA ADAS MARKET

IN REGION, FOR REGION CAPABILITIES

- ~600 local Aptiv/Wind River engineers, supporting multiple different local OEMs
- Localized manufacturing enhances cost competitiveness and responsiveness

MODULARIZED, FLEXIBLE SOLUTIONS

- Proven execution capabilities with a consistent end-to-end customer experience
- Leveraging productized solutions that are modular, scalable and proven
- Full-system solutions leverage flexible, SoC agnostic approach

STRENGTHENING THE LOCAL VENDOR ECOSYSTEM

- Localized supply chain increases resiliency and cost competitiveness
- Established strategic partnerships with local SOC, vision and mapping providers
- Partnering with local AI partners to enhance capabilities for advanced ADAS

APTIV CHINA ADAS AWARDS

ADAS awards across multiple leading Chinese OEMs

Geely leveraging software and hardware solutions from Aptiv to deliver hands-free highway driving and premium parking

Summary

PERFECTLY POSITIONED TO CAPTURE VALUE FROM INNOVATIVE SOLUTIONS
WHICH ENHANCE PERFORMANCE, COST AND FLEXIBILITY

ACCELERATING ADAS MARKET ADOPTION GLOBALLY

Nearly 50% of global auto market to be equipped with Level 2 and above by 2030

APTIV'S MODERN, SCALABLE APPROACH UNIQUELY ADDRESSING OEM NEEDS

Modern software architecture delivers better performance at a lower cost over the complete vehicle lifecycle

CHINA DEVELOPMENT & LAUNCHES VALIDATE APPROACH

Enables localized content and rapid development to support necessary speed-to market
