Forward Looking Statements

This presentation, as well as other statements made by Aptiv PLC (the “Company”), contain forward-looking statements that reflect, when made, the Company’s current views with respect to current events, certain investments and acquisitions and financial performance. Such forward-looking statements are subject to many risks, uncertainties and factors relating to the Company’s operations and business environment, which may cause the actual results of the Company to be materially different from any future results. All statements that address future operating, financial or business performance or the Company’s strategies or expectations are forward-looking statements. Factors that could cause actual results to differ materially from these forward-looking statements are discussed under the captions “Risk Factors” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in the Company’s filings with the Securities and Exchange Commission. New risks and uncertainties arise from time to time, and it is impossible for us to predict these events or how they may affect the Company. It should be remembered that the price of the ordinary shares and any income from them can go down as well as up. The Company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events and/or otherwise, except as may be required by law.

We are a global technology company that develops **safer, greener and more connected** solutions, which enable the future of mobility.

Active Safety Leading To Automated Driving

INVESTMENTS IN SOFTWARE, SENSING AND COMPUTE DRIVE BENEFITS TODAY AND IN THE FUTURE

TODAY

DEMOCRATIZATION OF ACTIVE SAFETY

Base Active Safety functionality moving from premium vehicles to mass market platforms. Adoption driven by increased consumer awareness, scale-up improving affordability, and evidence of effectiveness driving rating agency and regulatory standards.

COMMERCIALIZATION OF AUTOMATED DRIVING

Mobility on Demand (AMOD) applications in geo-fenced areas represent initial deployments, helping provide more equitable access to mobility. Longer-term, convergence with OEM product and technology roadmap helps drive consumer introductions.
