

Investor Presentation

Fourth Quarter Fiscal 2022

Safe Harbor and Statement Regarding Use of Non-GAAP Financial Measures

Other than statements of historical fact, all information contained in this presentation, including statements regarding our future operating results and financial position, our business strategy and plans, product, service, and technology offerings, market growth and trends, and objectives for future operations, are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. In some cases, you can identify forward-looking statements by terminology such as “may,” “will,” “should,” “plan,” “predict,” “expect,” “estimate,” “anticipate,” “intend,” “goal,” “strategy,” “believe,” and similar expressions and variations thereof. We have based these forward-looking statements largely on our current expectations and projections about future events and trends that we believe may affect our financial condition, results of operations, business strategy, short-term and long-term business operations and objectives, and financial needs. These forward-looking statements are subject to a number of risks, uncertainties, and assumptions, including those described under the heading “Risk Factors” and elsewhere in our most recently filed Form 10-Q for the fiscal quarter ended October 31, 2021, the Form 10-K for the fiscal year ended January 31, 2022 that will be filed, and other filings and reports we make with the Securities and Exchange Commission (SEC) from time to time. It is not possible for us to predict all risks, nor can we assess the effect of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements we may make. In light of these risks, uncertainties, and assumptions, the future events and trends discussed in this presentation may not occur and actual results could differ materially and adversely from those anticipated or implied in the forward-looking statements.

You should not rely on forward-looking statements as predictions of future events. The events and circumstances reflected in the forward-looking statements may not be achieved or occur. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee that the future results, performance, or events and circumstances reflected in the forward-looking statements will be achieved or occur. These forward-looking statements speak only as of the date of this presentation, and we undertake no obligation to revise or update any forward-looking statements to reflect events or circumstances after the date hereof.

This presentation contains statistical data, estimates, and forecasts that are based on independent industry publications or other publicly available information, as well as other information based on our internal sources. While we believe the industry and market data included in this presentation are reliable and are based on reasonable assumptions, these data involve many assumptions and limitations, and you are cautioned not to give undue weight to these estimates. We have not independently verified the accuracy or completeness of the data contained in these industry publications and other publicly available information.

The trademarks included herein are the property of the owners thereof and are used for reference purposes only. Such use should not be construed as an endorsement of such products or services.

This presentation also includes certain non-GAAP financial measures, which have not been prepared in accordance with generally accepted accounting principles in the United States (GAAP). These non-GAAP financial measures are in addition to, and not as a substitute for, or superior to, financial measures calculated in accordance with GAAP. There are a number of limitations related to the use of these non-GAAP financial measures versus their nearest GAAP equivalents. For example, other companies may calculate non-GAAP financial measures differently or may use other measures to evaluate their performance, all of which could reduce the usefulness of our non-GAAP financial measures as tools for comparison. Please see the appendix for reconciliations of these non-GAAP financial measures to their nearest GAAP equivalents and for the calculation of certain other financial metrics.

Our non-GAAP product gross profit, operating income (loss), and net income (loss) measures exclude the effect of stock-based compensation-related charges, including employer payroll tax-related items on employee stock transactions, amortization of acquired intangibles, expenses associated with acquisitions and strategic investments, and the related income tax effect of these adjustments. We believe the presentation of operating results that exclude these non-cash or non-recurring items provides useful supplemental information to investors and facilitates the analysis of our operating results and comparison of operating results across reporting periods.

Free cash flow is defined as net cash provided by (used in) operating activities reduced by purchases of property and equipment and capitalized internal-use software development costs. Adjusted free cash flow is defined as free cash flow plus (minus) net cash paid (received) on payroll tax-related items on employee stock transactions. Prior to the fiscal quarter ended April 30, 2021, adjusted free cash flow was defined as free cash flow plus cash paid on only employer payroll tax-related items on employee stock transactions. Starting with the fiscal quarter ended April 30, 2021, adjusted free cash flow is defined to also exclude the effects of employee payroll tax-related items on employee stock transactions, which are generally pass-through transactions that are expected to have a net zero impact on free cash flow over time, but that may impact free cash flow in any given fiscal quarter due to differences between the time that we receive funds from our employees and the time we remit those funds to applicable tax authorities. We believe that excluding the effects of these employee payroll tax-related items will enhance stockholders' ability to evaluate our free cash flow performance, including on a quarter-over-quarter basis. The impact of excluding employee payroll tax-related items on employee stock transactions from our definition of adjusted free cash flow was not significant for any prior periods. As a result, we have not restated adjusted free cash flow measures for any periods prior to the quarter ended April 30, 2021. Free cash flow margin and adjusted free cash flow margin are calculated as free cash flow or adjusted free cash flow as a percentage of revenue. We believe these measures provide useful supplemental information to investors because they are indicators of the strength and performance of our core business operations.

NON-GAAP PRODUCT GROSS MARGIN

Note: Fiscal year ends January 31. All figures are as of Q4 FY22 and, other than product revenue, are presented on a non-GAAP basis. Please see the appendix for reconciliations of non-GAAP financial measures to their nearest GAAP equivalents and for the calculation of certain other financial metrics. \$1M+ product revenue customers is a measure of customers with greater than \$1 million in trailing 12-month product revenue contribution as of January 31, 2022. See slide 16 for a definition of net revenue retention rate.

© 2022 Snowflake Inc. All Rights Reserved.

WE ARE NOT A SAAS MODEL

- 93% of revenue is consumption-based¹
- Revenue recognized only as consumption occurs
- In many cases, rollover of unused capacity permitted, generally on the purchase of additional capacity
- Contract durations increasing along with larger customer commitments
- Primarily billed annually in advance with some on-demand in arrears

¹ For the three months ended January 31, 2022.

WE FOCUS ON PRODUCT REVENUE AND RPO

Product Revenue

Why it matters:

Substantial majority of our revenue

Customers have flexibility in timing of consumption

What is and isn't reflected:

- + Contracted capacity consumed including excess in period and rollover from prior periods
- + On-demand capacity consumed
- Contracted customers who have yet to consume

Remaining Performance Obligations (RPO)

Why it matters:

Represents contracted future revenue not yet recognized

What is and isn't reflected:

- + Deferred revenue
- + Committed unbilled backlog
- On-demand arrangements and certain time and material contracts billed in arrears

Billings

Why it's less relevant:

Billings reflect the timing of the cash flows negotiated with our customers

We have customers who may negotiate to pay upfront and others in installments, but the key metrics are how customers utilize the product (Revenue) and the commitments they make to lock into Snowflake (RPO)

Evolving billing terms (annual, quarterly, monthly in arrears)

STRONG COMBINATION OF SCALE & GROWTH

ANNUAL REVENUE (MILLIONS)

QUARTERLY REVENUE (MILLIONS)

Note: Fiscal year ends January 31. Numbers are rounded for presentation purposes.

© 2022 Snowflake Inc. All Rights Reserved.

SIGNIFICANT CUSTOMER COMMITMENTS

REMAINING PERFORMANCE OBLIGATIONS¹ (MILLIONS)

Note: Fiscal year ends January 31. Numbers are rounded for presentation purposes.

¹ Represents the amount of contracted future revenue that has not yet been recognized, including (i) deferred revenue, and (ii) non-cancelable contracted amounts that will be invoiced and recognized as revenue in future periods. RPO excludes performance obligations from on-demand arrangements and certain time and materials contracts that are billed in arrears. Portions of RPO that are not yet invoiced and are denominated in foreign currencies are revalued into USD each period based on the applicable period-end exchange rates.

© 2022 Snowflake Inc. All Rights Reserved.

LARGE CUSTOMER MOMENTUM

TOTAL CUSTOMERS¹

CUSTOMERS OVER \$1M PRODUCT REVENUE²

Note: Fiscal year ends January 31.

¹ We count the total number of customers at the end of each period. For purposes of determining our customer count, we treat each customer account, including accounts for end-customers under a reseller arrangement, that has at least one corresponding capacity contract as a unique customer, and a single organization with multiple divisions, segments, or subsidiaries may be counted as multiple customers. For purposes of determining our customer count, we do not include customers that consume our platform only under on-demand arrangements. Our customer count is subject to adjustments for acquisitions, consolidations, spin-offs, and other market activity. ² Customers with greater than \$1 million in trailing 12-month product revenue contribution as of the corresponding period end date.

LANDING STRATEGIC CUSTOMERS

FORTUNE 500 CUSTOMERS

FORBES GLOBAL 2000 CUSTOMERS

Note: Our Fortune 500 customer count is based on the 2021 Fortune 500 list, and our Forbes Global 2000 customer count is based on the 2021 Forbes Global 2000 list. Each of our Fortune 500 customer count and our Forbes Global 2000 customer count is subject to adjustments for annual updates to the list by Fortune or Forbes, as applicable, as well as acquisitions, consolidations, spin-offs, and other market activity with respect to such customers. The Fortune 500 customer count and the Forbes Global 2000 customer count for historical periods have each been restated to reflect these adjustments.

WORLD-CLASS RETENTION RATE

DOLLAR-BASED NET REVENUE RETENTION RATE¹

Note: Fiscal year ends January 31.

¹ To calculate this metric for any given period, we first specify a measurement period consisting of the trailing two years from the corresponding period end. Next, we define as our measurement cohort the population of customers under capacity contracts that used our platform at any point in the first month of the first year of the measurement period. Starting with the fiscal quarter ended October 31, 2021, the cohorts used to calculate net revenue retention rate include end-customers under a reseller arrangement. Although the impact is not material, we have adjusted all prior periods presented to reflect this inclusion. We then calculate the net revenue retention rate for that period as the quotient obtained by dividing the product revenue from this cohort in the second year of the measurement period by the product revenue from this cohort in the first year of the measurement period. Any customer in the cohort that did not use our platform in the second year remains in the calculation and contributes zero product revenue in the second year. Our net revenue retention rate is subject to adjustments for acquisitions, consolidations, spin-offs, and other market activity.
