We provide non-GAAP gross margin, research & development and selling, general & administrative expense amounts in order to provide meaningful supplemental information regarding our operational performance and our prospects for the future. These supplemental measures exclude, among other things, charges related to amortization of intangibles, transformational initiatives, acquisition and integration costs, change in fair value of contingent consideration and business exit and divestiture costs.

Our management recognizes that items such as amortization of intangibles can have a material impact on our cash flows and/or our net income. Our GAAP financial statements including our statement of cash flows portray those effects. Although we believe it is useful for investors to see core performance free of special items, investors should understand that the excluded items are actual expenses that may impact the cash available to us for other uses. To gain a complete picture of all effects on the company's profit and loss from any and all events, management does (and investors should) rely upon the GAAP income statement. The non-GAAP numbers focus instead upon the core business of the company, which is only a subset, albeit a critical one, of the company's performance.

Readers are reminded that non-GAAP numbers are merely a supplement to, and not a replacement for, GAAP financial measures. They should be read in conjunction with the GAAP financial measures. It should be noted as well that our non-GAAP information may be different from the non-GAAP information provided by other companies.

The preliminary reconciliation of gross margin, research & development expenses and selling, general & administrative expenses is estimated based on our current information.

^(a) The adjustment for taxes excludes tax expense (benefits) that management believes are not directly related to on-going operations and which are either isolated, temporary or cannot be expected to occur again with any regularity or predictability such as windfall benefits on stock compensation and the impact of R&D capitalization under section 174 of the Tax Cuts and Jobs Act of 2017. For the three months ended April 30, 2022, management used a non-GAAP effective tax rate of 13.92%. For the three months ended July 31, 2022, management used a non-GAAP effective tax rate of 13.76%. For the three months ended October 31, 2022, management used a non-GAAP effective tax rate of 14.12%. For the three months ended January 31, 2023, management used a non-GAAP effective tax rate of 13.75%. For the three months ended April 30, 2023, management used a non-GAAP effective tax rate of 13.75%.

We provide non-GAAP net income and non-GAAP net income per share amounts in order to provide meaningful supplemental information regarding our operational performance and our prospects for the future. These supplemental measures exclude, among other things, charges related to amortization of intangibles, transformational initiatives, acquisition and integration costs, change in fair value of contingent consideration, business exit and divestiture costs, pension settlement loss, loss on extinguishment of debt and net loss (gain) on equity securities.

Transformational initiatives include expenses associated with targeted cost reduction activities such as manufacturing transfers including costs to move manufacturing, site consolidations, legal entity and other business reorganizations, insourcing or outsourcing of activities. Such costs may include move and relocation costs, one-time termination benefits and other one-time reorganization costs. Included in this category are also expenses associated with company programs to transform our product lifecycle management (PLM) system and human resources and financial systems.

Acquisition and integration costs include all incremental expenses incurred to effect a business combination. Such acquisition costs may include advisory, legal, tax, accounting, valuation, and other professional or consulting fees. Such integration costs may include expenses directly related to integration of business and facility operations, the transfer of assets and intellectual property, information technology systems and infrastructure and other employee-related costs.

Change in fair value of contingent consideration represents changes in the fair value estimate of acquisition-related contingent consideration.

Business exit and divestiture costs include costs associated with business divestitures.

Pension settlement loss relates to the relief of the US Retirement Plan pension obligation due to increased lump sum payouts over a specified accounting threshold.

Loss on extinguishment of debt relates to the net loss recorded on the redemption of the \$600 million outstanding 3.875% 2023 senior notes due on July 15, 2023, called on April 4, 2022 and settled on May 4, 2022.

Net loss (gain) on equity securities relates to the realized and unrealized mark-to-market adjustments for our marketable and non-marketable equity securities.

Other includes certain legal costs and settlements, environment compliance costs related to a prior acquisition and acceleration of share-based compensation expense in addition to other miscellaneous adjustments.

Our management uses non-GAAP measures to evaluate the performance of our core businesses, to estimate future core performance and to compensate employees. Since management finds this measure to be useful, we believe that our investors benefit from seeing our results "through the eyes" of management in addition to seeing our GAAP results. This information facilitates our management's internal comparisons to our historical operating results as well as to the operating results of our competitors.

Our management recognizes that items such as amortization of intangibles can have a material impact on our cash flows and/or our net income. Our GAAP financial statements including our statement of cash flows portray those effects. Although we believe it is useful for investors to see core performance free of special items, investors should understand that the excluded items are actual expenses that may impact the cash available to us for other uses. To gain a complete picture of all effects on the company's profit and loss from any and all events, management does (and investors should) rely upon the GAAP income statement. The non-GAAP numbers focus instead upon the core business of the company, which is only a subset, albeit a critical one, of the company's performance.

Readers are reminded that non-GAAP numbers are merely a supplement to, and not a replacement for, GAAP financial measures. They should be read in conjunction with the GAAP financial measures. It should be noted as well that our non-GAAP information may be different from the non-GAAP information provided by other companies.

The preliminary non-GAAP net income and diluted EPS reconciliation is estimated based on our current information.

Agilent (Core)	<u>\$ 1,714</u>	<u>\$ 1,607</u>	6.6%	9.5%	-3 pts	<u>\$ (45)</u>

We compare the year-over-year change in revenue excluding the effect of recent acquisitions and divestitures and foreign currency rate fluctuations to assess the performance of our underlying business.

^(a) The constant currency year-over-year growth percentage is calculated by recalculating all periods in the comparison period at the foreign currency exchange rates used for accounting during the last month of the current quarter and then using those revised values to calculate the year-over-year percentage change.

^(b) The dollar impact from the current quarter currency impact is equal to the total year-over-year dollar change less the constant currency year-over-year change.

The preliminary reconciliation of GAAP revenue adjusted for recent acquisitions and divestitures and impact of currency is estimated based on our current information.

Total Revenue (Core)	<u>\$ 1,714</u>	<u>\$ 1,607</u>	7%	9%	-2 pts	<u>\$ (45)</u>
China and Hong Kong	\$ 365	\$ 283	29%	32%	-3 pts	\$ (9)

We compare the year-over-year change in revenue excluding the effect of recent acquisitions and divestitures and foreign currency rate fluctuations to assess the performance of our underlying business.

^(a) The constant currency year-over-year growth percentage is calculated by recalculating all periods in the comparison period at the foreign currency exchange rates used for accounting during the last month of the current quarter and then using those revised values to calculate the year-over-year percentage change.

^(b) The dollar impact from the current quarter currency impact is equal to the total year-over-year dollar change less the constant currency year-over-year change.

The preliminary reconciliation of GAAP revenue adjusted for recent acquisitions and divestitures and impact of currency is estimated based on our current information.
