Sustainability Impact 2030

Q1 2026 Results
IMPACT SCORE*
2025 Baseline: 3.00/10

Q1	Q2	Q3	Q4	2026 Target
3.40	-	-	-	4.20/10

We **electrify** the world
towards decarbonization

Efficiency forward

80%	Schneider Impact Revenues[1]	75.4%
1500M	MWh energy saved or electrified with our solutions, 2026-2030*	47.5M
100%	of applicable SE software deliver advanced energy and carbon insights for customers	In progress

Towards Net-Zero

-90%	reduction of Scopes 1&2 CO_2 emissions, absolute vs 2017	-82.5%
-25%	reduction of Scope 3 CO_2 emissions, absolute vs 2021	-13.1%
1500Mt	CO_2 saved and avoided by customers with SE solutions, 2018-2030	880Mt

School of Energy Tech

TBC	electrical experts trained to bridge the energy tech skill gap	In progress

We **reinvent** our industry
towards innovation

Future-designed

100%	of major offers in design demonstrate circular and environmental excellence*	14%

Industry catalyzer

1500	suppliers on a Zero Carbon Pathway to decarbonize the supply chain*	0
100%	of strategic suppliers engaged to implement advanced Decent Work practices*	0%
50%	of materials selected to provide superior environmental and social value	19%

Longer, Better

x2	growth of circular services for longer and better usage	X1

We **unlock** human potential
towards equal opportunities

Inclusion for all

100%	of senior talents engaged in their own development or the development of others	In progress
40%	of women in leadership[2]	31.5%

Power progress

100M	people with access to sustainable electricity[3] *	64.6M
3M	people upskilled through educational programs, including those from vulnerable communities[3] *	1.2M

We **empower** local communities
towards action and care

Impact starts with us

>30%	of employees volunteering to be change agents, in their communities and homes	3.3%
100	sites designed to care for people, nature and communities	0

2030 ambition

Q1 2026

** Programs included in the calculation of the Impact score are the programs that contribute to the collective share of Schneider Electric's Short-Term Incentive Plan (STIP)*

[1] Per Schneider Electric definition and methodology

[2] The gender balance metric is a global strategic ambition. It does not apply to territories that prohibit such ambition. The Schneider Electric policy is to always select the best candidate for any position based on skills, experience and potential (irrespective of their gender, age, origin, disability, appearance, etc...).

Schneider Electric

We have positioned our company to Advance Energy Tech in this new era of Intelligence

Schneider Electric

Unique portfolio to go to the next level of Energy & Industrial Intelligence leveraging Data & AI

One unified customer experience
Across the full lifecycle
In all key targeted markets

Schneider Electric

Energy Intelligence has the capability to pre-empt and optimize energy operations

Traditional	Energy Intelligence	Customer Outcomes
Siloed Systems	Fragmented → Unified Single ontology, digital twin validated, AI + Human	Unlocked hidden capacity
Monitor & Prevent	Design → Operate (Cross Domain) Continuous lifecycle, not handoff silos	Lowered energy costs
Manual Decisions	Observe → Act Autonomous execution, not just dashboards	Reduced unplanned downtime
Minutes to Respond	Reactive → Pre-emptive Act before failure, in milliseconds	Extended asset lifespan
		Faster incident response

Energy Intelligence means your facility doesn't just tell you something went wrong.
It prevents the problem before it happens, in real time.

Schneider Electric

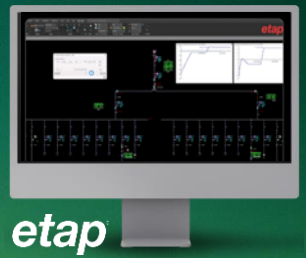

Best-in-class solutions for AI factory across the lifecycle

Modernize and digitize infrastructure, enabling AI-driven, condition-based maintenance with remote monitoring for real-time visibility across critical assets

1. **Consulting services for design & build optimization**
   Design system architecture and optimal asset strategy
2. **Digitized asset tracking & monitoring**
   Collect asset data to perform health monitoring via connected sensors
3. **Maintenance & support execution**
   Optimize asset maintenance strategy with analytic-based predictions
4. **Sustainability & modernization services**
   Optimize asset life and minimize impact with circularity & modernization services

Schneider Electric

Intelligence enabling industrial electrification at scale

Industry end-market
Netherlands

Unified Energy & Process Intelligence:

A single intelligence layer integrating power and process control, enabling industrial electrification under tight grid constraints.

Intelligence in Action:

- Real-time orchestration **across 1,000+ data points**
- **From 542 smart Medium Voltage relays** into a single operational view
- Dynamic load management within grid limits
- Single operational view supporting continuous, data-driven decision-making

Open & Interoperable Architecture Built on **EcoStruxure**:

- EcoStruxure Foxboro DCS, EcoStruxure Electrodynamic Controller, EcoStruxure Control HMI, EcoStruxure Power & Process
- Integrated with **AVEVA PI System**

Measurable Intelligence-driven outcomes :

- Supports **~30% CO_2 reduction by 2030**
- Enables **~1.5% annual energy-efficiency improvement**

Schneider Electric

CEO priorities for 2026 unchanged - focused execution of our medium-term strategic roadmap to drive shareholder value

TECHNOLOGY
Leadership

- Leadership in the New Energy Landscape
- AI to power Energy & Industrial intelligence and Software-defined architectures
- Leadership to design the Data Centers of the Future
- Strategic Partnerships for Innovation & Supply Chain

CUSTOMER
Differentiation

- Next level of regionalization
- Capture strong market demand across end-markets
- Accelerating the contribution of our Enterprise business
- Seamless execution of the record-high backlog

OPERATIONAL
Excellence

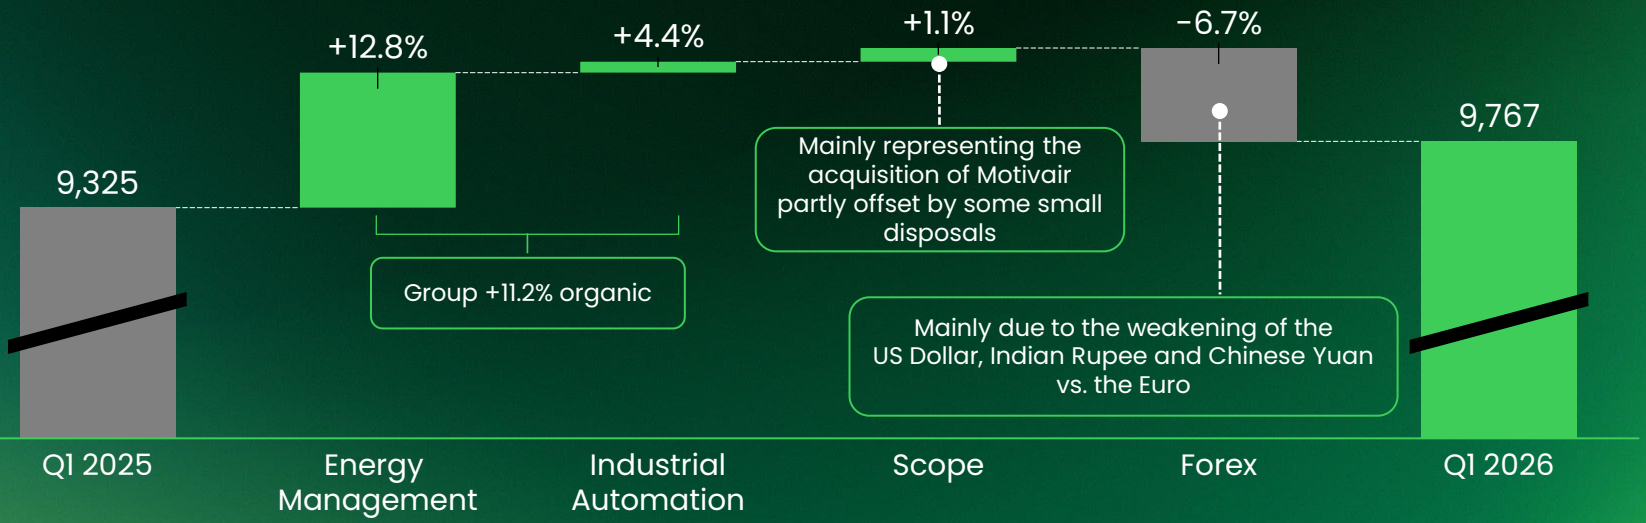

- Pricing excellence
- Margin obsession
- Delivering on our Productivity and Efficiency ambitions
- AI@scale for Efficiency & Scalability

Q1 2026 Financial Performance Highlights

Nathan Fast, Chief Financial Officer

Strong growth in Q1 2026 up +11% organic

Analysis of Change in Group Revenues (in €m)

Based on current rates, the FX impact on FY 2026 revenues is estimated to be between -€750 million to -€850 million

The FX impact at current rates on adjusted EBITA margin for FY 2026 could be around -10bps.

Strong growth in Q1 led by Systems, with recovery in Products

PRODUCTS
48% of Q1 revenues

+9%

Q1 organic growth

- Majority of growth volume related
- Price also contributed in Q1; expected to ramp through the year
- Energy Management up double-digit, with strong growth in electrical distribution across end-markets
- Industrial Automation up mid-single digit with growth in many product categories as steady recovery continues in Discrete

SYSTEMS
33% of Q1 revenues

+16%

Q1 organic growth

- Energy Management up double-digit with contributions across end-markets, led by Data Center
- Industrial Automation grew low-single digit with good growth in Discrete markets, while Process & Hybrid was down

SOFTWARE & SERVICES
19% of Q1 revenues

+9%

Q1 organic growth

- Agnostic software
  - AVEVA: ARR up +12% with strong upsell to existing customers. High-single digit organic growth led by strong performance in SaaS
  - EM Software: up low-single digit, led by performance at ETAP
- Field Services: Up double-digit in Energy Management linked to Data Center, while Industrial Automation grew low-single digit
- Digital Services: Up high-single digit with strong performance in Grid offers and EcoStruxure advisors

Schneider Electric

End markets: Q1 performance highlights

Data Center & Networks

- Double-digit demand growth despite high base of comparison, while sales grew strong double-digit
- Pure Data Center demand grew double-digit, reflective of both sustained strong momentum and a very large order in the baseline
- Distributed IT saw low-single digit growth in both demand and sales

Buildings

- Strong demand overall, while sales grew modestly
- Strong demand in Non-residential which saw momentum in many technical building categories
- Positive demand overall in Residential, primarily in Europe and India, while the U.S. and China remained weak

Industry

- Strong demand overall with positive momentum in both Discrete and Process & Hybrid
- Strong demand in Discrete reflecting continued recovery on a broad geographic base, driving good sales growth
- Process & Hybrid markets saw strong demand in Semicon, E&C and MMM, though sales were down slightly

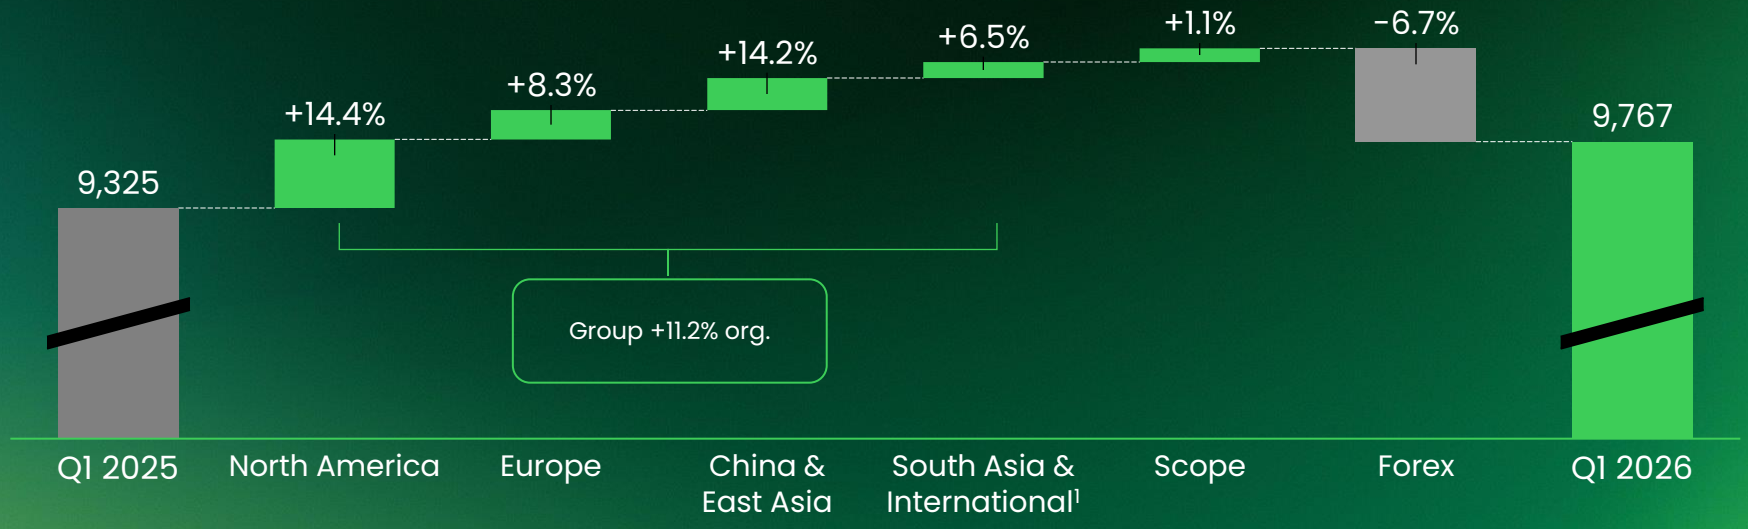

Infrastructure

- Strong demand across the end-market and strong sales growth led by Power & Grid
- Power & Grid saw strong demand from digitalization and flexibility projects across geographies, with good traction for SF_6-free offers
- Water & Wastewater saw good demand
- Demand in Transportation was down slightly

Schneider Electric

Q1 2026 up +11% organic

Analysis of Change in Group Revenues (in €m)

[1] *The Middle East (which represented less than 5% of 2025 Group revenues) was down low-single digit in the quarter.*

Energy Management +13% Q1 org. growth

Split of Q1 2026 revenue by geography:

North America +16%

- Double-digit growth against a multi-year double-digit base of comparison
- U.S. up double-digit, primarily volume-led, while price contributed in the quarter
- U.S. growth led by Data Center, while Buildings was down
- Canada up double-digit led by Data Center and Infrastructure
- Mexico down sharply

Europe +9%

- Growth led by Data Center, with Industry and Infra making strong contribution; Buildings solid, with Resi stable
- Spain up strong double-digit, led by Data Center and Power & Grid
- U.K. and Italy up double-digit, led by Industry and Infrastructure
- France and Germany up mid-single digit, with good execution on Data Center projects
- High-single digit growth in rest of the region led by Nordics and Portugal

South Asia & International +7%

- India up double-digit with strong contribution across end-markets, leveraging multi-brand strategy
- Australia up double-digit led by Data Center project execution
- Middle East & Africa down low-single digit in an environment of increased uncertainty; Saudi Arabia down, growth in U.A.E and Türkiye
- South America up mid-single digit driven by project execution in the E&C segment, while product sales declined in a muted market

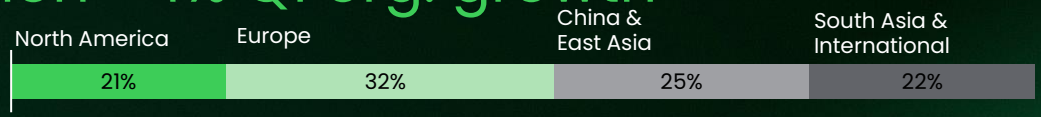

China & East Asia +18%

- China up strong double-digit, led by Data Center and Infra; strong growth in Industry led by Semicon, while Resi Buildings remained weaker
- East Asia up double-digit, led by Data Center
- Within East Asia, growth was strongest in Thailand and Indonesia, while Japan and Taiwan grew strongly, linked to Semicon

Schneider Electric

Industrial Automation +4% Q1 org. growth

Split of Q1 2026 revenue by geography:

North America +3%

- U.S. up low-single digit, led by high-single digit growth at AVEVA. Discrete up mid-single digit with strong growth in Industrial manufacturing, while Process & Hybrid was down
- Canada grew high-single digit, with strong growth at AVEVA and in Discrete automation
- Mexico was down on continued macroeconomic uncertainty

Europe +5%

- Growth in the region led by AVEVA, up double-digit, while there was low-single digit growth in both Discrete and Process & Hybrid.
- U.K. grew double-digit with strong performance at AVEVA
- Spain was up double-digit with strong growth in Discrete while Process & Hybrid also contributed
- France and Germany up high-single digit, with France benefitting from a large renewal at AVEVA
- Italy grew low-single digit, with good growth in Discrete, while Process & Hybrid was impacted by timing of project execution

South Asia & International +4%

- India up double-digit, driven by performance in Discrete and AVEVA
- Australia was around flat, with Discrete automation slightly positive
- Middle East & Africa was up low-single digit, in an environment of increased uncertainty, sales into Process & Hybrid markets were up while Discrete was down
- South America up low-single digit led by AVEVA

China & East Asia +5%

- Growth led by Discrete automation, up high-single digit, supported by positive contribution from AVEVA, while Process & Hybrid was down
- China grew low-single digit overall, with strong growth in Discrete automation partly offset by weakness in Process automation
- East Asia grew double-digit, with strength in Discrete notably in Korea; supported by growth at AVEVA in Korea and Japan

Schneider Electric

Expected Trends & Financial Target

Olivier Blum, Chief Executive Officer

Expected trends in 2026

Amid an environment of increased uncertainty, the Group currently expects:

End-market

- Strong market demand to drive growth, with positive contribution from all four end-markets
- Data Center & Networks to lead growth based on strong demand in 2025; Industry and Infrastructure to accelerate; Buildings to improve contribution, aligned with macroeconomic trends

Business model

- Systems to lead growth; Products to show improved contribution with continued recovery in Discrete
- Strong growth in Software and Services, with key focus on driving more recurring revenues

Geography

- All four regions to contribute to growth (North America, Europe, China & East Asia, South Asia & International), led by U.S. and India
- South Asia and International region potentially impacted in Q2, specific to the disruption and uncertainty created by the ongoing situation in the Middle East

Operational Excellence

- The Group expects to be Net Price positive in value (price to offset raw material impact and tariffs), ramping up throughout the year
- The Group expects the other drivers of adj. EBITA margin expansion to be aligned with those set out in its recent Capital Markets Day

Schneider Electric

2026 Target reaffirmed

The Group reaffirms its 2026 financial target as follows:

2026 Adjusted EBITA growth of between +10% and +15% organic

The target would be achieved through a combination of organic revenue growth and margin improvement, currently expected to be:

- Revenue growth of **+7% to +10% organic**
- Adjusted EBITA margin up **+50bps to +80bps organic**

This implies Adjusted EBITA margin of **around 19.1%** to **19.4%** (including scope based on transactions completed to-date and FX based on current estimation).

Further notes on 2026 FX & Scope available in slide 26

Appendix

2026 additional notes

- **Foreign Exchange impact:** Based on current rates[1], the FX impact on FY 2026 revenues is estimated to be between -€750 million to -€850 million. The FX impact at current rates on adjusted EBITA margin for FY 2026 could be around -10bps
- **Scope impact:** Around flat on 2026 revenues and around flat on 2026 adjusted EBITA margin, based on transactions completed to-date
- **Tax rate:** The ETR is expected to be in a 23-25% range in 2026
- **Restructuring:** The Group expects cumulative incremental restructuring costs of €500 million in the years 2025-2027, above a normalized rate of c. €100 - €150 million per year
- **Finance costs:** The Group expects incremental costs of c. -€150 million in 2026 associated with the financing of the transaction to acquire the remaining 35% of SEIPL.

1. *Forward exchange rates are volatile and difficult to predict. Consequently, the impact of such movement and possible impacts from hyperinflation technical accounting (IAS29) are not factored at this stage.*
