

Meta Earnings Presentation Q4 2023

Supplemental Materials

The numbers for our key metrics are calculated using internal company data based on the activity of user accounts. We have historically reported our estimates of the numbers of our daily active people (DAP), monthly active people (MAP), and average revenue per person (ARPP) (collectively, our "Family metrics") based on the activity of users who visited at least one of Facebook, Instagram, Messenger, and WhatsApp (collectively, our "Family" of products) during the applicable period of measurement. We have historically reported the numbers of our daily active users (DAUs), monthly active users (MAUs), and average revenue per user (ARPU) (collectively, our "Facebook metrics") based on user activity only on Facebook and Messenger and not on our other products.

Beginning with our earnings release and Quarterly Report on Form 10-Q to be filed for the first quarter of 2024, we will no longer report DAUs, MAUs, ARPU, and MAP. We intend to begin reporting year-over-year percentage changes in ad impressions delivered and the average price per ad by geographic region, while continuing to report DAP and ARPP (calculated based on DAP), beginning with our Quarterly Report on Form 10-Q to be filed for the first quarter of 2024.

For additional information, see the section entitled "Limitations of Key Metrics and Other Data" in our most recent quarterly or annual report filed with the Securities and Exchange Commission.
